Oops, I had intended the bulletin copy to go just to N8XX :-(. My apologies for broadcasting the secret message to the whole yahoo group. I hope my reprimand from the ARRL won't be too severe.

1817. Re: [GRARA] Anyone else copying W1AW FD bulletin this evening?

Yahoo group: GRARA
Date: 2012-06-23 02:53:59 UTC
From: Steven Kaney
Topic: 1811 Message: 1817

Other people had a better plan for my life (in their humble opinion).

de N7MUT/8

From: n8xxham <n8xx@...>
To: GRARA@yahoogroups.com
Sent: Friday, June 22, 2012 5:20 PM
Subject: [GRARA] Anyone else copying W1AW FD bulletin this evening?

Day Mode Pacific Mountain Central Eastern
FRIDAY CW 5 PM 6 PM 7 PM 8 PM
Digital 6 PM 7 PM 8 PM 9 PM
Phone 6:45 PM 7:45 PM 8:45 PM 9:45 PM
CW 8 PM 9 PM 10 PM 11 PM
Or, if we can't get another volunteer, could someone set up a receiver @ calvin so we can receive the Saturday morning transmissions?
SATURDAY CW 7 AM 8 AM 9 AM 10 AM
Phone 8 AM 9 AM 10 AM 11 AM
CW 5 PM 6 PM 7 PM 8 PM
Digital 6 PM 7 PM 8 PM 9 PM
Phone 6:45 PM 7:45 PM 8:45 PM 9:45 PM
W1AW will operate on its regularly published frequencies:
· CW frequencies: 1.8025, 3.5815, 7.0475, 14.0475, 18.0975, 21.0675, 28.0675 and 147.555 MHz.
· Digital frequencies (includes PSK31 and MFSK16) using 45.45-baud Baudot: 3597.5, 7.095, 14.095, 18.1025, 21.095, 28.095 and 147.555 MHz.
Phone frequencies: 1.855, 3.990, 7.290, 14.290, 18.160, 21.390, 28.590 and 147.555 MHz.

I'd very much prefer to have a 2nd, 3rd, and 4th opinion on what W1AW sent, even though I at one time could copy CW with "reasonable" proficiency.

The response to my previous message seemed very underwhelming.

1819. Let me be amongst the first!

Yahoo group: GRARA
Date: 2012-06-25 02:00:23 UTC
From: Hank Greeb
Topic: 1819 Message: 1819

To congratulate the folks who organized, detailed, etc., the FB Field Day effort @ W8M, Calvin College, this weekend.

Great learning experience, we got started on time - numerous visitors came by, food for breakfast (in particular) was great @ the Prince Conference Center.

The CW station even got a "surprise" shower from the lawn sprinklers - I heard that it woke up the operators quite suddenly. :)

Too bad the sunspots (and related technical stuff as written the the weekly propagation forecast) didn't cooperate. "Everyone" throughout the country was commenting about poor propagation. But, it seems we had more Q's than in recent past - and most folks went away tired but happy!

Gerry:

FB nice pictures. - you must have a real sturdy camera. It took a
picture of me, and you were still abel to use it later!

Glad we had photographers - did anyone take a video of the 100' tower as
it was being raised to the top?

Mark:

The next "outing" for the QRP minded is the "Flight of the Bumblebees" on the last Sunday of July. No definite plans yet, but a couple years ago KA5S and I went up to Fisk Knob in Northern Kent county and had a ball with my AT-Sprint and Cortland's K1. We tried to get others to join, but for whatever reason things didn't work out.

The "rules" for FOBB 2012 haven't even been finalized yet (to my knowledge), but do put this on your list.

1825. Anyone need a LDG 4/1 UN-UN

Yahoo group: GRARA
Date: 2012-06-28 21:50:15 UTC
From: Hank Greeb
Topic: 1825 Message: 1825

I order a 4/1 LDG BALUN the other day. Today a 4/1 LDG UN-UN arrived. Neither the Un-Un nor the BALUN was in the Universal Catalog, so I didn't even know that LDG made a 4/1 UN-UN.

Anyway, I'm requesting a way to return it and get the unit I ordered, but I'd save them money and trouble if there's anyone within the greater Grand Rapids area who needs a 4/1 UnUn rated at 100 watts.

Please advise via private e-mail

From: Hank Greeb
Topic: 1828 Message: 1828

Help, Help, Help

A group from Ottawa county has scheduled "free coffee, etc" at the Rest Stop along I-96

It's officially called

Fruitport Rest Area 502
Region: Grand Highway: I-96 WB
County: Ottawa Mile Marker: 8
Location: Westbound on I-96, 1 mile beyond Exit 9 also called Spring Lake Exit.

I've been "sucked into" (quite willingly) covering the Midnight (12:01 AM) Thursday, to 6 am Thursday, 7/05/2012 slot.

We need one more "sucker" errrr..... volunteer because MDOT requires we have two people at all times.

Any "suckers" errrr..... volunteers out there who would care to help this public service event?

Please advise me via direct e-mail and also Tom, K8EOD, k8eod@... <mailto:k8eod@...>

The pay is double (and the multiplier is negotiable if double isn't large enough) the usual pay for this kind of volunteer duty.

<http://campaign.r20.constantcontact.com/render?llr=6e997tjab&v=001gitP1NKQiAIZg9AXIcEv928ShZjbjQZBOUBPEICa3qrouRsnz4v7oHlNt8uL1r7RYda94maOt0Vitvp2YV0-NR74R3MlZylY4IXPmr3D1-g%3D>

*MRHS Report No. 5 for the Weekend of 30 June/1July 2012****

*We received a report that for some readers Report No. 4 was hard to
read because the text displayed as black letters on a black background.
If that happened to you we apologize. We hope the problem has been
corrected.

FEAR THE /BOX OF DEATH /

/Transmitter Supervisor Steve Hawes (L) stands bravely at the *Box of
Death*, so called because we were warned by the last transmitter site
engineer to NEVER turn it on. But in fact it is a very valuable tube
tester allowing us to test the mercury vapor rectifiers and thyratrons
used in the vintage transmitters. The tube is shown under test at right. /

SUPPORT THE MRHS

Make a Donation
<https://www.paypal.com/cgibin/webscr?first_name=&last_name=&undefined_quantity=1&business=info@...&image_url=&return=http://www.radiomarine.org&cancel_return=&item_name=Support%20the%20MRHS&amount=0&shipping=0¤cy_code=USD&item_number=&cmd=_xclick>

Steve is ready to put himself on the line by using the BOD and the rest
of us are happy to pay for tubes for him to test. Our transmitters from
the 1940s and 1950s need tubes and other parts that have become scarce
or almost unobtainable so every bit of financial help we get means a
lot. If you're a True Believer and can make a contribution to The Cause
it will be most appreciated. And remember, we're all volunteers so 100%
of your contribution goes directly to purchase the items needed to keep
the transmitters and receivers working and the antennas in the air.

Thanks!

NIGHT OF NIGHTS XIII 12 JULY

/*Updated Information*/

/This is the 1929 RCA receive site where Night of Nights XIII will be held. Why not join us? See below for location and time information./

Night of Nights XIII will be held on 12 July 2012 - the date of the supposed last commercial Morse transmission. Every year on that date we pick up the thread and carry forward with the traditions of maritime Morse. More details will follow in these reports and on our Web site.

/Flash!/

We have just received confirmation that frequencies for both KPH and KFS will be available again this year, this through the kind support of Globe Wireless <http://r20.rs6.net/tn.jsp?e=001H8jq0-LDdXhVbTh0a0pELPmNKmCtTNNok6B1ltZuIzj-jQJrLjUhFfRTeS6DnVGjSWSoc5yJ3oOH0KfvArrDCt6y58oh8dBoH0VTqn46DIlWvrgXQZxw6g==>.

The MRHS Transmitter Department will have to confirm the availability of transmitters and antennas for these frequencies but for now we hope to activate KPH and KFS on the frequencies below. KSM will also be on the air but on a reduced number of frequencies due to a lack of enough transmitters and antennas for all KSM frequencies.

KPH - KFS - KSM -

426 500 426
500 17026.0 500
4247.0 12695.5 6474.0
6477.5 8438.3
8642.0 12993.0
12808.5
17016.8
22477.5

All frequencies for these three stations will be keyed in parallel.

But wait, there's more!

Rene Stiegler of Shipcom LLC <http://r20.rs6.net/tn.jsp?e=001H8jq0-LDdXgl8bDvgiEn_Mq5UKzga3BWBWmHtY-fesV4V3jM1gjG0XER-x71LFORdEZVLr_aQ0L0yZkA3pqtWe1NNs930PO9wIwePZv61t8OhbBQdCMT4A==> has said that every effort will be made to have WLO and KLB on the air once again this year. This too will have to be confirmed closer to Night of Nights but probable frequencies are listed below.

WLO - KLB -

2055.5 488
4343.0 500
12992.0 8582.5
16968.5

All stations will listen for calls from ships on 500 and ITU channel 3 HF:

ITU Ch 3 -

4184.0
6276.0
8368.0
12552.0
16736.0
22280.5

Amateur Station K6KPH -

K6KPH, the amateur station of the MRHS, will be on the air listening for calls on its usual operating frequencies:

3550.0
7050.0
14050.0
21050.0

That's right! A total of 16 transmitters will be on the air from the Bolinas transmitter site for Night of Nights.

WHAT THE HECK IS NIGHT OF NIGHTS?

Right, good question. We get so caught up in this event each year that we forget that a lot of folks may be finding out about it for the first time. In a nutshell, this is a True Believer event to the max. Check out this description - complete with time and location information.

12 July 1999 was a sad day for many of us. We knew it was coming but when the end finally arrived is was a shock. I was there.

It was the supposed last day of Morse code. The final sign off took place at a remote station on the Pacific coast. Women attending the event were dressed asif at a funeral. Grizzled, hard bitten old men, the kind you wouldn't mess with in a bar room, had tears in their eyes as the last messages was keyed out to the world at 0000 gmt. And then there was silence.

It was just beeps in the air. But that's how much Morse code means to the men and women who made the profession of radiotelegrapher one of honor and skill.

But the prediction of the death of Morse code was not to be fulfilled. On that day the Maritime Radio Historical Society was born. On that day we began plans to restore a Morse code radio station - the famous KPH. One year later we held the first "Night of Nights" when not only KPH but

other coast stations appeared once again on the air. Every year since we have commemorated that date by returning these stations to the air and thereby, we hope, honoring the men and women who came before us.

Join us this year for Night of Nights XIII. See and hear a real Morse code coast station in full song. Mingle with the pioneers who werethe men and women of the airwaves.

Or, if you can't join us in person, join us on the air. KSM and, we hope, KPH and KFS will be in action.

K6KPH will be open to calls from amateur stations.

When: 12 July 2012 - Doors open at 3:00pm, first transmission at 5:01pm (0001gmt)

Where: KPH receive station, 17400 Sir Francis Drake Blvd, Point Reyes National Seashore, past the oyster company and G Ranch

Information: info@... or +1 415-663-8982

Light snacks will be served.

VY 73,

RD
Chief Operator
KSM and K6KPH

---

*POINT REYES NATIONAL SEASHORE

*Once there were dozens of coast station in the US alone. They ranged from the power houses of the big communications companies like RCA, Globe Wireless and Tropical Radio to the smaller, privately held stations. They stood shoulder to shoulder across the commercial marine bands working ships, sending weather and press and putting all else aside when those most electrifying three letters - SOS - crackled in their headphones.

Every one of these historic stations was closed and bulldozed before the tubes in the transmitters even grew cold. Every one that is except KPH. That's because both the transmit and receive sites **are within the Point Reyes National Seashore (PRNS), part of the National Park Service. KPH continued in service until 30 June 1997. On that day the transmitters were shut down, the lights turned off and the doors locked.

The PRNS now owned this major communications facility with only a general idea of what it was and probably very little idea of what should be done with it.

Fast forward to 1999. Two guys show up saying they have founded the Maritime Radio Historical Society. They say the thing to do with KPH is to preserve and restore it. And not only that, they say they're the guys to do it.

Put yourself in the place of the administrators of the PRNS. They're used to dealing with wildlife and native plants and beaches. Now they're looking at these two radio squirrels who they don't know. The squirrels say they want to work on transmitters generating thousands of volts and antennas 100ft in the air. The potential for things going very badly was clear. And yet... they said "Okay, go ahead!"

Think of the vision of those folks. And think of the trust they placed in the MRHS. Today it seems almost impossible to imagine. We still find it hard to believe. But from that day to this they have been unstinting in their support and enthusiasm for The Cause.

We appreciate the thanks we get from fellow True Believers who think our project meaningful and worthwhile. But the real thanks are due to to Point Reyes National Seashore. Without those folks none of the things we have been able to accomplish would have happened.

Why not plan a special trip to visit the PRNS, one of the most spectacularly beautiful parks in the country. Plus you'll be able to stop by and pay us a visit!

PRNS Web Site

DENICE CONTINUES TO MAKE PROGRESS

As many will recall our beloved Denice Stoops suffered a stroke aboard her newly assigned ship. After beginning her rehabilitation in a Singapore hospital she's now home and continuing her recovery. Lots have folks have sent cards and letters to Denice via the MRHS. She's received and enjoyed them as we hear in this report just received from Kathy Lauer, Denice's sister:

Greetings to Denice's Fans all over the world!

Good news comes to you this week. Denice was released from the rehab hospital and is now resting comfortably at her father's home in Saginaw, MI. Denice will start out patient rehab on Mon. July 2nd. What a happy fourth we will have this year. Rehab will be three our hour days a week about half a day each.

Denice is "moving" around the house quite well. Her speech continues to progress daily as she hears "new" words. Today it was California and Florida. She said she was moving there.....what she meant was here

in Mi. Each day I seem to get a good laugh out of her. This is always a funny moment for both of us.

She is keeping up with in-coming emails on her blackberry. Not sure if she is returning any of them yet. Her sea gear finally arrived just this morning. She now has her lap top, though we haven't gotten it out yet. Hopefully soon. Not to rush it. We only take things as fast as she wants. Her brain may not be quite ready for that task yet.

I wish to thank you all for all of your well wishes, cards, emails, etc. It is very good for Denice to hear from you all. I know she is thinking of you as well.

Current address is:

1524 Marquette St.
Saginaw, Mi. 48602

Blessings,
Kathy Lauer

Denice began her radio career as a radioman in the US Coast Guard at NMC, then transitioned to KPH in 1979 to become the first female radiotelegrapher at the station. When KPH closed she had a number of jobs but none really satisfied. Then she decided to go to sea on Military Sealift Command ships. She got all the licenses and certifications needed and began her new life aboard ship. She was about to set sail on her new ship when she suffered her stroke.

Denice is a central part of the MRHS and is known the world over for her keying style on the air. We at the MRHS join her family and all of you in wishing her a full and quick recovery.

/Denice in the radio room aboard SS JEREMIAH O'BRIEN/KXCH where she is R/O/

*/Flash!

/*Just before press time we received this wonderful email, the first from Denice!

richard,
i am on the road to recovery. all warmth received. sending love you way!
xo
denice

As you can see she knows her fans all around the world are sending her all their love.

*WWII VET VISITS THE MRHS

*We receive lots of requests for information about visiting the transmit and receive sites we've restored. But this one was special. Normally we ask folks to join us during one of our regular Saturday work days. But this particular request was for a visit on a weekday. And it was from the son of Sam Bayer, WWII veteran, a radioman aboard USS IOWA (BB-61). So of course we made a special arrangement for the visit.

/Sam Bayer tells MRHS Chief Operator Richard Dillman of some of his experiences/

Sam was aboard USS IOWA in Tokyo Bay for the surrender ceremonies. At the last moment he was advised that the radio ship assigned to send news of the ceremonies had not arrived and that he was in charge of sending all communications through his ship's radio facilities. The problem was... he hadn't had the required high power transmitters on the air before! But in the grand traditions of the service he had the transmitters tuned and on line in time to transmit the press information about the historic event.

That was only one story he told us. Like every WWII vet I've had the honor to meet he was modest about his own contribution to the war. But of course he is a genuine hero.

After the war Sam had a great time with his home brew kilowatt and HQ-129X at his amateur station W2PAR. He had a rotary beam driven by the post-war classic prop pitch motor. It was a 40m/20m/10m beam (that's right kids, 15m did not exist at the time!). The beam was bigger than the house! Sam reports a neighbor running in to say the house was turning as turning as he aimed his beam at some choice DX.

/Sam is a happy man after sending a CQ via the K6KPH transmitters/

In an email, Sam wrote:

"It was great to visit with you and get a little nostalgic. When I sat down at the key it was the first time in a little over fifty years that I handled one. Brought back a lot of old memories."

Visits like Sam's remind us what we're really about at the MRHS. While we're busy with repairs and restorations our real program is to assure that the traditions and skills of men like Sam are not forgotten.

---

*
PRESS WIRELESS PW-15 TRANSMITTER IN INDIA*

Those True Believers who have followed our project may know that some years ago we recovered two Press Wireless PW-15 transmitters from the KFS transmitter site in Palo Alto, CA, south of San Francisco. One of the transmitters, which was on the air on the supposed last day of Morse code, has been restored and is on the air as an alternate transmitter for the KSM 12Mc channel (see below...). On Night of Nights this

transmitter will be back on its KFS 12Mc channel.

With that as background check this out...

One of the great things about this project is the correspondence one receives. Take for example this note from Harvey Masters who noted our restoration and use of a PW-15. Harvey writes:

Hi Richard ---

I was in the Army Signal Corps during WWII and trained at the Signal Corps base at Camp Crowder, Missouri. I was working at a radio station in Greensboro, NC as a broadcast engineer (technician) at the time I was drafted, so the Signal Corps was a natural. I went to radio school there for several months. One of the transmitters we studied was the Press Wireless 15 kw, the largest transmitter the Signal Corps had. They did all kinds of things to simulate failures which we had to locate. One of the things, I thought, was kind of dirty. They would put finger-nail polish on some of the relay contacts. You would locate the fault, but there appeared to be nothing wrong. Finally, as a last resort, you would use an ohmmeter. Eventually, I came to know the transmitter pretty well.

Overseas I was in the CBI Theater (China-Burma-India). I was part of an eleven-man team. Our mission was to operate and maintain fixed-station transmitters. The team consisted of 3 transmitter technicians, 3 diesel/generator technicians, and 5 key operators (Morse Code). I, of course, was one of the three transmitter technicians.

Our first assignment was in Kharagpur, India --- about 80 miles outside Calcutta. This was a B-29 Bomber base (20th Air Corps). There we had only the one transmitter, the Press Wireless 15 kw. We provided communications for the 20th Air Corps Headquarters at Kharagpur to the Pentagon. The transmitter fed a Rhombic Antenna (a highly directional, four-tower, diamond-shaped antenna). We transmitted directly to Hawaii. From there it was relayed to Washington.

I have only one picture of the transmitter which I took with my Kodak Brownie 6-20 Box Camera.

From left to right are Joe Richmond and Joe Machost, both key operators. They took away my two transmitter operators and assigned them to the receiver station. As we were operating strictly Radio Teletype, 24/7, they didn't need key operators. So these two were pronounced transmitter operators. They both did a great job. As you can see, formality was rather relaxed in the hot, India environment.

Later, the B-29's moved to Tinian in the Mariana Islands where they bombed Japan constantly.

We moved to Kunming, China where I was responsible for a number of smaller transmitters, the largest being 1 kw. They were all keyed. Strangely, my older brother was a bombardier on one of the 29's

and had been in India for some time before I arrived.

Harvey Masters

As it happens our own PW-15 was on the air on KSM frequency 12992.0kc on Saturday 30 July. Here it is in full operation:

Note the flashing mercury vapor rectifiers. When we received the transmitter these had been replaced by solid state units. The MRHS Transmitter Department replaced these with the original tubes, filament transformers and wiring.

---

*MIKE PAYNE'S REPORT

* **
/Mike carefully collects the "holy water" condensed by the dehumidifiers in the control room at the transmitter station. We bottle this in small flasks for sale to visitors. /

Hey Mike! Been working a lot of those Mongolian ships? Right, that's what I thought. Keep trying, OM!

Mr. and Mrs. America and all the ships at sea... let's go to press with MikePayne's report No. 4 for the weekend of 23/24 June 2012...

Sat Jun 30

Posn 6:

2104 AB3AP (21)

Posn 1:

2145 W5ZR (14)
2147 W6UDO (14)
2152 WD0BC (14)
2208 K6ACJ (14)
2218 W4DLZ (14)
2233 W8IM (14) QTC NR52 KSM VIA K6KPH SWL RPT FLA 2210Z 4/6/8 NO CPY 12 QSA 5 16 QSA 5 22 QSA 1 12/16 QRK 5 22 QRK 1 AR
2237 K4VIZ (14)

Watkins-Johnson WJ-8718-23: No dwell time, receiver stuck on 8438.3mhz. Reprogramed for 4 second dwell - receiver back to normal ops now scanning 4/6/8/12/16/22mhz.

A-Tronix CW electronic keyer on holiday. This equipment malfunction delayed putting on the KSM wheel for about 35 minutes. I programmed the keyer incorrectly and had to put on the Boehme Keying Head Driver Type 4-D-B with the ole perforiated tape and send out as the wheel while I attempted to correct my programming error on the A-Tronix. Only

partially corrected. Will correct errors Sunday.

KSM: No sigs

Number of guests were I think six.

RD did the honors while I kept futzing around on Posn 1.

I managed to bcst KSM Tfc List and High Seas Wx without incident.

Sunday July 1st

Posn 1:

2027 W4LNI (14)
2140 VO1RAC (14)
2213 N4KGL (14)
2240 W6AWO (14)
2245 KD7KAR (14)
2250 W7ASA (14)
2255 KB1VEN (14)
2323 PY2EL (21)

So I arrive 15 minutes early to try and reprogram the A-Tronix. 30 minutes later I am still trying. So why not just reference the instruction book you might ask...cause there isn't one. Bummer. So, back on the wheel goes the Boehme, but finally, I program the A-Tronics correctly and put her back on the air. Whew!

And in case you missed the new call on the TFC List it is NBVO.

And my last call for the day was PY2EL, out of Sao Paulo. He had his keyer cranked up to between 30 es 35 so I cranked up my bug to same. The ole bug was smoking but had most excellent time.

Also, spent good amount of time CQing 7 and 21mhz but no luck except for PY2EL. It seemed that today and yesterday there must have been solar flares because intermittent very heavy QRN that would come and go, knocking out all signals at times.

KSM: No sigs

Visitors were none. As it was heavy mist and fog out at the station today, I figure that kept folks away.

KSM Tfc List and High Seas Wx bcst without incident.

As always, if I missed your call or failed to note you in this weeks report please accept my apologies and let me know at puffin@...

Until next time, 73s from ZUT central KSM/K6KPH MP

---

*NIGHT OF NIGHTS INTERVIEWS ON KWMR

*
Richard Dillman, member of the Operations Department and Chief Operator
at KSM and K6KPH, will be interviewed on community radio station KWMR in
Point Reyes Station about the MRHS and Night of Nights.

The first program will begin at 1:00pm Pacific time on Friday, 6 July.
On 12 July, the morning of Night of Nights, Richard will be a guest on
"Swimming Upstream" with Amanda Eichstaedt. The interview will begin at
about 10:00am Pacific time. We hope that ex-KPH operators and other
important folks will join in by phone.

KWMR is the media sponsor for Night of Nights. Listen to KWMR over the
air or on line for the best of what a real community radio station can
offer.

MRHS Report No. 5 for the Weekend of 30 June/1July 2012

We received a report that for some readers Report No. 4 was hard to read because the text displayed as black letters on a black background. If that happened to you we apologize. We hope the problem has been corrected.

FEAR THE BOX OF DEATH

Transmitter Supervisor Steve Hawes (L) stands bravely at the Box of Death, so called because we were warned by the last transmitter site engineer to NEVER turn it on. But in fact it is a very valuable tube tester allowing us to test the mercury vapor rectifiers and thyratrons used in the vintage transmitters. The tube is shown under test at right.

SUPPORT THE MRHS

Steve is ready to put himself on the line by using the BOD and the rest of us are happy to pay for tubes for him to test. Our transmitters from the 1940s and 1950s need tubes and

other parts that have become scarce or almost unobtainable so every bit of financial help we get means a lot. If you're a True Believer and can make a contribution to The Cause it will be most appreciated. And remember, we're all volunteers so 100% of your contribution goes directly to purchase the items needed to keep the transmitters and receivers working and the antennas in the air.

Thanks!

NIGHT OF NIGHTS XIII 12 JULY

Updated Information

This is the 1929 RCA receive site where Night of Nights XIII will be held. Why not join us? See below for location and time information.

Night of Nights XIII will be held on 12 July 2012 - the date of the supposed last commercial Morse transmission. Every year on that date we pick up the thread and carry forward with the traditions of maritime Morse. More details will follow in these reports and on our Web site.

Flash!

We have just received confirmation that frequencies for both KPH and KFS will be available again this year, this through the kind support of Globe Wireless.

The MRHS Transmitter Department will have to confirm the availability of transmitters and antennas for these frequencies but for now we hope to activate KPH and KFS on the frequencies below. KSM will also be on the air but on a reduced number of frequencies due to a lack of enough transmitters and antennas for all KSM frequencies.

KPH - KFS - KSM -

426 500 426
500 17026.0 500
4247.0 12695.5 6474.0
6477.5 8438.3
8642.0 12993.0
12808.5
17016.8
22477.5

All frequencies for these three stations will be keyed in parallel.

But wait, there's more!

Rene Stiegler of Shipcom LLC has said that every effort will be made to have WLO and KLB on the air once again this year. This too will have to be confirmed closer to Night of Nights but probable frequencies are listed below.

WLO - KLB -

2055.5 488
4343.0 500
12992.0 8582.5
16968.5

All stations will listen for calls from ships on 500 and ITU channel 3 HF:

ITU Ch 3 -

4184.0
6276.0
8368.0
12552.0
16736.0
22280.5

Amateur Station K6KPH -

K6KPH, the amateur station of the MRHS, will be on the air listening for calls on its usual operating frequencies:

3550.0
7050.0
14050.0
21050.0

That's right! A total of 16 transmitters will be on the air from the Bolinas transmitter site for Night of Nights.

WHAT THE HECK IS NIGHT OF NIGHTS?

Right, good question. We get so caught up in this event each year that we forget that a lot of folks may be finding out about it for the first time. In a nutshell, this is a True Believer event to the max. Check out this description - complete with time and location information.

12 July 1999 was a sad day for many of us. We knew it was coming but when the end finally arrived is was a shock. I was there.

It was the supposed last day of Morse code. The final sign off took place at a remote station on the Pacific coast. Women attending the event were dressed asif at a funeral. Grizzled, hard bitten old men, the kind you wouldn't mess with in a bar room, had tears in their eyes as the last messages was keyed out to the world at 0000 gmt. And then there was silence.

It was just beeps in the air. But that's how much Morse code means to the men and women who made the profession of radiotelegrapher one of honor and skill.

But the prediction of the death of Morse code was not to be fulfilled. On that day the Maritime Radio Historical Society was born. On that day we began plans to restore a Morse code radio station - the famous KPH. One year later we held the first "Night of Nights" when not only KPH but other coast stations appeared once again on the air. Every year since we have commemorated that date by returning these stations to the air and thereby, we hope, honoring the men and women who came before us.

Join us this year for Night of Nights XIII. See and hear a real Morse code coast station in full song. Mingle with the pioneers who werethe men and women of the airwaves.

Or, if you can't join us in person, join us on the air. KSM and, we hope, KPH and KFS will be in action.

K6KPH will be open to calls from amateur stations.

When: 12 July 2012 - Doors open at 3:00pm, first transmission at 5:01pm (0001gmt)

Where: KPH receive station, 17400 Sir Francis Drake Blvd, Point Reyes National Seashore, past the oyster company and G Ranch

Information: info@radiomarine.com or +1 415-663-8982

Light snacks will be served.

VY 73,

RD
Chief Operator
KSM and K6KPH

POINT REYES NATIONAL SEASHORE

Once there were dozens of coast station in the US alone. They ranged from the power houses of the big communications companies like RCA, Globe Wireless and Tropical Radio to the smaller, privately held stations. They stood shoulder to shoulder across the commercial marine bands working ships, sending weather and press and putting all else aside when those most electrifying three letters - SOS - crackled in their headphones.

Every one of these historic stations was closed and bulldozed before the tubes in the transmitters even grew cold. Every one that is except KPH. That's because both the transmit and receive sites are within the Point Reyes National Seashore (PRNS), part of the National Park Service. KPH continued in service until 30 June 1997. On that day the transmitters were shut down, the lights turned off and the doors locked.

The PRNS now owned this major communications facility with only a general idea of what it was and probably very little idea of what should be done with it.

Fast forward to 1999. Two guys show up saying they have founded the Maritime Radio Historical Society. They say the thing to do with KPH is to preserve and restore it. And not only that, they say they're the guys to do it.

Put yourself in the place of the administrators of the PRNS. They're used to dealing with wildlife and native plants and beaches. Now they're looking at these two radio squirrels who they don't know. The squirrels say they want to work on transmitters generating thousands of volts and antennas 100ft in the air. The potential for things going very badly was clear. And yet... they said "Okay, go ahead!"

Think of the vision of those folks. And think of the trust they placed in the MRHS. Today it seems almost impossible to imagine. We still find it hard to believe. But from that day to this they have been unstinting in their support and enthusiasm for The Cause.

WWII VET VISITS THE MRHS

We receive lots of requests for information about visiting the transmit and receive sites we've restored. But this one was special. Normally we ask folks to join us during one of our regular Saturday work days. But this particular request was for a visit on a weekday. And it was from the son of Sam Bayer, WWII veteran, a radioman aboard USS IOWA (BB-61). So of course we made a special arrangement for the visit.

Sam Bayer tells MRHS Chief Operator Richard Dillman of some of his experiences

Sam was aboard USS IOWA in Tokyo Bay for the surrender ceremonies. At the last moment he was advised that the radio ship assigned to send news of the ceremonies had not arrived and that he was in charge of sending all communications through his ship's radio facilities. The problem was... he hadn't had the required high power transmitters on the air before! But in the grand traditions of the service he had the transmitters tuned and on line in time to transmit the press information about the historic event.

That was only one story he told us. Like every WWII vet I've had the honor to meet he was modest about his own contribution to the war. But of course he is a genuine hero.

After the war Sam had a great time with his home brew kilowatt and HQ-129X at his amateur station W2PAR. He had a rotary beam driven by the post-war classic prop pitch motor. It was a 40m/20m/10m beam (that's right kids, 15m did not exist at the time!). The beam was bigger than the house! Sam reports a neighbor running in to say the house was turning as turning as he aimed his beam at some choice DX.

Sam is a happy man after sending a CQ via the K6KPH transmitters

In an email, Sam wrote:

"It was great to visit with you and get a little nostalgic. When I sat down at the key it was the first time in a little over fifty years that I handled one. Brought back a lot of old memories."

Visits like Sam's remind us what we're really about at the MRHS. While we're busy with repairs and restorations our real program is to assure that the traditions and skills of men like Sam are not forgotten.

PRESS WIRELESS PW-15 TRANSMITTER IN INDIA

Those True Believers who have followed our project may know that some years ago we recovered two Press Wireless PW-15 transmitters from the KFS transmitter site in Palo Alto, CA, south of San Francisco. One of the transmitters, which was on the air on the supposed last day of Morse code, has been restored and is on the air as an alternate transmitter for the KSM 12Mc channel (see below...). On Night of Nights this transmitter will be back on its KFS 12Mc channel.

With that as background check this out...

One of the great things about this project is the correspondence one receives. Take for example this note from Harvey Masters who noted our restoration and use of a PW-15. Harvey writes:

Hi Richard ---

I was in the Army Signal Corps during WWII and trained at the Signal Corps base at Camp Crowder, Missouri. I was working at a radio station in Greensboro, NC as a broadcast engineer (technician) at the time I was drafted, so the Signal Corps was a natural. I went to radio school there for several months. One of the transmitters we studied was the Press Wireless 15 kw, the largest transmitter the Signal Corps had. They did all kinds of things to simulate failures which we had to locate. One of the things, I thought, was kind of dirty. They would put finger-nail polish on some of the relay contacts. You would locate the fault, but there appeared to be nothing wrong. Finally, as a last resort, you would use an ohmmeter. Eventually, I came to know the transmitter pretty well.

Overseas I was in the CBI Theater (China-Burma-India). I was part of an eleven-man team. Our mission was to operate and maintain fixed-station transmitters. The team consisted of 3 transmitter technicians, 3 diesel/generator technicians, and 5 key operators (Morse Code). I, of course, was one of the three transmitter technicians.

Our first assignment was in Kharagpur, India --- about 80 miles outside Calcutta. This was a B-29 Bomber base (20th Air Corps). There we had only the one transmitter, the Press Wireless 15 kw. We provided communications for the 20th Air Corps Headquarters at Kharagpur to the Pentagon. The transmitter fed a Rhombic Antenna (a highly directional, four-tower, diamond-shaped antenna). We transmitted directly to Hawaii. From there it was relayed to Washington.

I have only one picture of the transmitter which I took with my Kodak Brownie 6-20 Box Camera.

From left to right are Joe Richmond and Joe Machost, both key operators. They took away my two transmitter operators and assigned them to the receiver station. As we were operating strictly Radio Teletype, 24/7, they didn't need key operators. So these two were pronounced transmitter operators. They both did a great job. As you can see, formality was rather relaxed in the hot, India environment.

Later, the B-29's moved to Tinian in the Mariana Islands where they bombed Japan constantly.

We moved to Kunming, China where I was responsible for a number of smaller transmitters, the largest being 1 kw. They were all keyed. Strangely, my older brother was a bombardier on one of the 29's and had been in India for some time before I arrived.

Harvey Masters

As it happens our own PW-15 was on the air on KSM frequency 12992.0kc on Saturday 30 July. Here it is in full operation:

Note the flashing mercury vapor rectifiers. When we received the transmitter these had been replaced by solid state units. The MRHS Transmitter Department replaced these with the original tubes, filament transformers and wiring.

MIKE PAYNE'S REPORT

Mike carefully collects the "holy water" condensed by the dehumidifiers in the control room at the transmitter station. We bottle this in small flasks for sale to visitors.

Hey Mike! Been working a lot of those Mongolian ships? Right, that's what I thought. Keep trying, OM!

Mr. and Mrs. America and all the ships at sea... let's go to press with Mike Payne's report No. 4 for the weekend of 23/24 June 2012...

Sat Jun 30

Posn 6:

2104 AB3AP (21)

Posn 1:

2145 W5ZR (14)
2147 W6UDO (14)
2152 WD0BC (14)
2208 K6ACJ (14)
2218 W4DLZ (14)
2233 W8IM (14) QTC NR52 KSM VIA K6KPH SWL RPT FLA 2210Z 4/6/8 NO CPY 12 QSA 5 16 QSA 5 22 QSA 1 12/16 QRK 5 22 QRK 1 AR
2237 K4VIZ (14)

Watkins-Johnson WJ-8718-23: No dwell time, receiver stuck on 8438.3mhz. Reprogramed for 4 second dwell - receiver back to normal ops now scanning 4/6/8/12/16/22mhz.

A-Tronix CW electronic keyer on holiday. This equipment malfunction delayed putting on the KSM wheel for about 35 minutes. I programmed the keyer incorrectly and had to put on the Boehme Keying Head Driver Type 4-D-B with the ole perforiated tape and send out as the wheel while I attempted to correct my programming error on the A-Tronix. Only partially corrected. Will correct errors Sunday.

KSM: No sigs

Number of guests were I think six.

RD did the honors while I kept futzing around on Posn 1.

I managed to bcst KSM Tfc List and High Seas Wx without incident.

Sunday July 1st

Posn 1:

2027 W4LNI (14)
2140 VO1RAC (14)
2213 N4KGL (14)
2240 W6AWO (14)
2245 KD7KAR (14)
2250 W7ASA (14)
2255 KB1VEN (14)
2323 PY2EL (21)

So I arrive 15 minutes early to try and reprogram the A-Tronix. 30 minutes later I am still trying. So why not just reference the instruction book you might ask...cause there isn't one. Bummer. So, back on the wheel goes the Boehme, but finally, I program the A-Tronics correctly and put her back on the air. Whew!

And in case you missed the new call on the TFC List it is NBVO.

And my last call for the day was PY2EL, out of Sao Paulo. He had his keyer cranked up to between 30 es 35 so I cranked up my bug to same. The ole bug was smoking but had most excellent time.

Also, spent good amount of time CQing 7 and 21mhz but no luck except for PY2EL. It seemed that today and yesterday there must have been solar flares because intermittent very heavy QRN that would come and go, knocking out all signals at times.

KSM: No sigs

Visitors were none. As it was heavy mist and fog out at the station today, I figure that kept folks away.

KSM Tfc List and High Seas Wx bcst without incident.

As always, if I missed your call or failed to note you in this weeks report please accept my apologies and let me know at puffin@...

Until next time, 73s from ZUT central KSM/K6KPH MP

NIGHT OF NIGHTS INTERVIEWS ON KWMR

Richard Dillman, member of the Operations Department and Chief Operator at KSM and K6KPH, will be interviewed on community radio station KWMR in Point Reyes Station about the MRHS and Night of Nights.

The first program will begin at 1:00pm Pacific time on Friday, 6 July. On 12 July, the morning of Night of Nights, Richard will be a guest on "Swimming Upstream" with Amanda Eichstaedt. The interview will begin at about 10:00am Pacific time. We hope that ex-KPH operators and other important folks will join in by phone.

KWMR is the media sponsor for Night of Nights. Listen to KWMR over the air or on line for the best of what a real community radio station can offer.

Listen Live

Until next week we wish you fair winds and following seas.

VY 73,

MRHS

Help, Help, Help

A group from Ottawa county has scheduled "free coffee, etc" at the Rest Stop along I-96

It's officially called

Fruitport Rest Area 502
Region: Grand Highway: I-96 WB
County: Ottawa Mile Marker: 8
Location: Westbound on I-96, 1 mile beyond Exit 9 also called Spring Lake Exit.

I've been "sucked into" (quite willingly) covering the Midnight (12:01 AM) Thursday, to 6 am Thursday, 7/05/2012 slot.

We need one more "sucker" errrr..... volunteer because MDOT requires we have two people at all times.

Any "suckers" errrr..... volunteers out there who would care to help this public service event?

Please advise me via direct e-mail and also Tom, K8EOD, k8eod@...

The pay is double (and the multiplier is negotiable if double isn't large enough) the usual pay for this kind of volunteer duty.

1836. Special Event from the Acropolis, Greece

Yahoo group: GRARA
Date: 2012-07-06 13:39:01 UTC
From: Hank Greeb
Topic: 1836 Message: 1836

Be on the lookout for more information about SX1GR, a special event station which will be operating from the Acropolis in Greece between 18-22 July 2012. The web site for this activity is

http://www.raag.org/news.asp?ITMID=495&LANG=EN

or, for those of us who are fluent in the Greek Language

http://www.raag.org/news.asp?ITMID=495&LANG=GR

I didn't dig into particulars, but I did notice that the operation would be during operation of the museum.

Updates will be appreciated.

Mitch:

Sorry I missed you and the meeting tonight. Family is visiting this weekend, and I lost track of time. It was 7:30 p.m., just after we finished dinner, when I noticed the time. I figured the meeting would be at least half over. It would have been great to meet you and to reminisce with others about Field Day (did anyone mention the "free shower we had courtesy of the lawn sprinklers on Field Day Sunday morning?) and other happenings.

Welcome to the club. I hope to be down at the Open Radio Room this Wednesday. If you've nothing better on your agenda would like to meet you then. That's 7:15 p.m. (sometimes folks show up sooner) almost every week unless there's something very unusual like 4th of July, Thanksgiving, Christmas, New Year's Day, or Dayton Hamvention. Location is the Red Cross Building, same place as the meeting was held tonight.

73 de n8xx Hg

p.s Your use of "Gentlemen" is very gracious and a very stretch of the Queen's Englyshe. :)

From: Hank Greeb
Topic: 1840 Message: 1841

That's Noon EDT Saturday, July 14th, to Noon EDT Sunday, July 15.

Details and rules are at

http://www.arrl.org/iaru-hf-championship

This is one of the "premier" contests of the year, with over 3600 entries last year.

All sorts of categories, Single op, Multi op, QRP, Low, High Power, CW, Phone, Mixed.

Might be worth a try at one or more of the club stations in the area?

Note: The Operators from 'QRP in the Park" could QSY to home QTH and continue to work the world. Last time I entered (2010) I managed >150 contacts in quite a number of zones, with my "mighty five watts" and a cloud warmer antenna. Not anywhere near full time.

1843. Open Radio Room on Yahoo Groups Calendar

Yahoo group: GRARA
Date: 2012-07-10 13:45:48 UTC
From: Hank Greeb
Topic: 1843 Message: 1843

I put the open radio room on the GRARA Yahoo Groups calendar for 7:15 p.m. each Wednesday evening.

For this week it's tomorrow - Wednesday, July 11, 2012 at 7:15 p.m., Come one, come all!

The announcement will show up on this reflector one day before, Not sure what time, but probably around 7:15 P.M. Tuesday. We'll see what happens tonight.

I've also put an announcement of the GRARA meetings, but the default is by day of the month. I don't see a way to put an event on the first Friday of each month, so these have to be done manually, at least for now until "The New Yahoo groups events calendar" is rolled out. They've been advertising the new calendar for some time, so perhaps it will have such a feature.

From: Jack Amelar
Topic: 1849 Message: 1849

This Friday and Saturday, July 13 & 14
It's not ham radio, but it is radio. Vintage ham gear tends to show up at this event.

http://www.michiganantiqueradio.org/?q=content/extravaganza

Welcome to EXTRAVAGANZA □12

This year the Michigan Antique Radio Club is proud to announce our 27th annual EXTRAVAGANZA convention which will be held at the fabulous Causeway Bay Hotel in Lansing Michigan. The primary activities related to this year□s convention will take place on Thursday, July 12th, Friday, July 13th and Saturday, July 14th. As has been the case in the past, there will be activities on Thursday evening. Last year over 1000 attendees from nearly 30 states and a number of foreign countries, as close as Canada and as far as Australia, enjoyed the festivities. Our theme this year will be Bakelite and Beyond.
Registration Fees

There is no charge for attending the outdoor flea market as a buyer. Also, its free to attend the Good Buy Affair donation auction on Saturday night. Our live auction Saturday afternoon has a nominal paddle fee for buyers and is free for observers. All other functions require registration. .....

This year the Telephone Collectors International, Inc is holding their meet in conjunction with EXTRAVAGANZA '12. Please visit their website for details of their meet......

Visit the website for more details

The Grand Rapids Amateur Radio Association will host General License Exam training classes this fall on Wednesday nights starting September 19, 2012 at 7:00 PM, for eight weeks. The last class on November 7th will be followed by an ARRL General Class License VE testing session on November 14th, run by the GRARA VE Team.

Cost will be $20 for the classes and $15 for the license exam fee.

The training classes will be held at the American Red Cross Building, 1050 Fuller NE, Grand Rapids, MI.

One of the following study guides is suggested: "ARRL General Class License Manual for the Radio Amateur" (April 25, 2011) [Available from Amazon.com for $19.95] OR "The 2011-15 FCC Element 3 General Class License" by Gordon West [Available from Amazon.com for $24.95]

For more information, contact the instructor, Tom Bosscher at 616-662-1080 or k8tb@... <mailto:k8tb@...>.

1858. ARRL Ohio State Convention - August 11th, 2012

Yahoo group: GRARA
Date: 2012-07-15 22:56:44 UTC
From: Hank Greeb
Topic: 1858 Message: 1858

If you happen to be in Ohio on August 11, this may be of interest to you:

==========

Greetings!

You are receiving this e-mail as a club contact of an ARRL Affiliated Club.

The ARRL Ohio State Convention is less than one month away Saturday, August 11. The Convention is being held in conjunction with the Columbus Hamfest.

We have many interesting forums being held at the Aladdin Shrine Center, 3850 Stelzer Road in Columbus. Doors open at 8:00am, the first forum kicks off at 8:30am, and goes non-stop until 2:00pm.

The Shrine Center is a beautiful facility, and the Columbus Hamfest will have both indoor and outdoor vendors, along with Emergency Vehicle displays, and much more.

Our Keynote Speaker for the day will be Kay Craigie, N3KN, ARRL President.

For full details of the day, please visit
http://arrl-ohio.org/convention/index.html

I look forward to seeing everyone in Columbus on August 11th!

73, Frank KI8GW

1860. New SDR rig (up to 15 watts output) State of the art

Yahoo group: GRARA
Date: 2012-07-18 12:18:47 UTC
From: Hank Greeb
Topic: 1860 Message: 1860

Fellow West Michigan Ops:

A new, somewhat novel, open source, state of the (current) art. I
figure it might interest some ops who like to be on "the cutting edge."

If he actual performance is as claimed, it should make a fair to
middlin' contest rig.

Date: Tue, 17 Jul 2012 09:00:44 -0400
From: John Ackermann N8UR <jra@...>
Subject: [tapr-announce] HPSDR: TAPR Now Accepting Orders for Hermes
To: tapr-announce@...
Message-ID: <500561FC.90801@...>
Content-Type: text/plain; charset=ISO-8859-1; format=flowed

TAPR is pleased to announce that Hermes, an HF transceiver incorporating
the capabilities of the existing "Atlas Bus" HPSDR receiver, exciter,
and computer interface onto a single board, is now available for order
at http://tapr.org/kits_hermes.html

The Hermes board is completely assembled and tested, and is offered at
the following prices.

TAPR member: $895
TAPR non-member: $940

The order page will close Wednesday July 25th, so don't delay!

Please note that TAPR will be building only one production run of Hermes
boards, and will only build the number necessary to fulfill the orders
received on or before before the July 25th cutoff date.

Estimated delivery is October 15, and earlier if possible. Be a part of
history and support HPSDR!

More information here: http://openhpsdr.org/wiki/index.php?title=HERMES

Order here: http://tapr.org/kits_hermes.html

1861. Errata: New SDR rig State of the art

Yahoo group: GRARA
Date: 2012-07-18 12:39:52 UTC
From: Hank Greeb
Topic: 1861 Message: 1861

Fellow GRARA Ops:

Errata - look carefully at the specs of the board - I think it produces only several hundred milliwatts - though some of the info talks about 15 watts. Probably a separate amplifier board, not a part of the "deal."

Apologies for this extra bandwidth>

1868. 10-M ant for 11-M ops

Yahoo group: GRARA
Date: 2012-07-27 07:27:54 UTC
From: pobox740
Topic: 1868 Message: 1868

Hello,
I am switching out some radios in my car, and am interested in useing the 10-m ant for my new 11-m (cb)radio.
The plan is to use the 10-m rig as a base, and use a dipole for it.
So I was thinking of useing the 10-m ant for the cb.
The ant is rated for 50-W, 28.000-30.000 Mhz.
The cb is 4-W, 27.500 (center freq)Mhz.
As I see it, there should not be much of any problim with the theary.
And may work better, than the 1-1/2 foot ant that I was useing for the old cb.
Any information, or advice is welcomed.
TNX

1869. Re: 10-M ant for 11-M ops

Yahoo group: GRARA
Date: 2012-07-27 18:30:01 UTC
From: Jack Amelar
Topic: 1868 Message: 1869

Since you want to go from a higher frequency range to a slightly lower frequency range, to properly tune the antenna you would have to lengthen the antenna. Not knowing what kind of antenna you have, is there enough tuning adjustment for this? Could adding a base spring accomplish this? Could replacing a top whip with a longer whip do this? And if nothing else, local truck stops have new CB antennas (springs and whips too) reasonably priced.

1874. Anyone For the North American QSO Party, Saturday August 5

Yahoo group: GRARA
Date: 2012-08-01 21:31:38 UTC
From: Hank Greeb
Topic: 1874 Message: 1874

Yup, it's that time again. The semi-annual North American QSO Party (CW version) is being held from 1800Z (2 p.m EDT), Saturday, August 4, until 0600Z (2 a.m. EDT) Sunday, August 5. This is a "fun" event, limited to 100 watts output, so you're not competing with the "full gallon" stations. The object is to contact as many stations within the U.S., Canada, Mexico, and other countries within North America.

Full details and rules are at http://www.ncjweb.com/naqprules.php

I'll be attempting to run an "itty bitty AT-Sprint" rig, built inside an Altoids tin, just a bit larger than a pack of cigarettes. Note, do we have a psychiatrist or psychologist amongst our membership? Some folks have suggested that my choice of rigs may be indicative of my mental health. :)

Hope to see you during NAQP this Saturday.

Subject: [GRARA] Looking for bench equipment

A fellow at my work (young EE, not a ham) is looking for the following:

· Oscilloscope (DSO preferred)

· Multimeters

· DC power supplies

· Soldering station

· Function generator / signal generator

· Wire strippers / breadboards / spare tools and parts… basically everything you would need to setup a home lab!

Thanks again,

Eric Otte

He's not on this yahoo group - but I'll pass anything along to him that comes up.

1886. New NWS weather station at Holland State Park...

Yahoo group: GRARA
Date: 2012-08-20 22:38:32 UTC
From: K8TB
Topic: 1886 Message: 1886

Recently NOAA completed upgrading the Lake Michigan level gauge station in Holland. There is a great article about it at:

http://oceanservice.noaa.gov/news/weeklynews/oct11/holland.html

A few weeks ago when I was at the Holland State park, I had noticed the weather station. Hey who doesn't look at Rohn 25! I thought the small building next to it held electronic equipment. But it holds two lake level gauges. And the even neater part? You can read all the data at the station anytime:

http://www.ndbc.noaa.gov/station_page.php?station=hlnm4

Take your time and look at all the data that is there for near real time and archived.

But wait, there's more.

In July, many local groups, with the help of Limnotech, deployed a weather buoy about 2 miles out into the big lake.
Press release at:
http://www.limno.com/pdfs/HollandBuoyPressRelease_071012.pdf

A U of M link:
http://uglos.engin.umich.edu/station_page.php?station=45029

And its NWS data? Look at:
http://www.ndbc.noaa.gov/station_page.php?station=45029

These are some impressive weather stations for us to look at anytime.

Anyone want to run a boat out to the buoy for a picture session?
HLD-Hank ? :)

Think the feds would notice a 3 element 2 meter beam on that Rohn 25? :)

Great info, thanks Tom!

You can see the effect the wind has when the lake level rises and falls ever so slightly due to the wind "pulling" the water toward or away from the shore.

One question that I had as I was looking at the data plot was, "What does inches above LWD mean?" The answer to that can be found here:
http://glakesonline.nos.noaa.gov/faqglin.shtml

73 everybody!

1888. K6JSS/UNIO during Ohio QSO Party Saturday, August 25, 1600Z

Yahoo group: GRARA
Date: 2012-08-23 00:59:36 UTC
From: Hank Greeb
Topic: 1888 Message: 1888

Please be advised that I'll be operating as K6JSS/UNIO from UNIOn county, Ohio near Columbus. This event starts at 1600Z August 25, and ends at 0359:59Z on August 26. (That's Saturday evening in the United States and Canada). Rules for the party can be found at http://www.ohqp.org

If you're in the contest, or hear my signal, please spot me on your favorite DX cluster, and/or QRPSPOTS.com. Note that the rules allow for use of DX Clusters, Reverse Beacon Network, QRPSpots, etc. for all categories of operation.

Unless things change, I'll be the only fixed station on from UNIOn county, so folks will like to know when/where I'm operating.

This event is part of the K6JSS State QSO Party Challenge. Details of the challenge are at the QRZ.com page for K6JSS and at http://www.qrparci.org/content/view/8407/139/

Hope to see many GRARA members during the contest. If you contact me, please try to contact at least two or three others, so you won't be unique to my log.

1891. Grara Hamfest Project status

Yahoo group: GRARA
Date: 2012-08-27 00:09:31 UTC
From: sprovost
Topic: 1891 Message: 1891

Hello, on saturday a crew of 15 or so people assisted with the removal of about 35 years of amateur radio equipment from a local silent key's basememt.

We cataloged over 135 pieces of equipment with many items that were not inventoried.

We expect to have this equipment available at the swap meet for people to look at and purchase!

What I wanted to know is there is still alot of work to do and have the idea to have the radio room group go to Bob Moe's house for the next two wednesdays before the swap meet to go over the equipment and do any minor work as needed to make the equipment shine a little brighter!

What is your thoughts on this idea?

Thanks

Sounds like a good idea. Here is a cleaning tip. since the equipment was in the basement make a mix of water and bleach. Wipe the equipment with a damp cloth. Open it up and put in the sunshine to dry. Let it get nice and warm to dry up the mold or mildew. cul Jim KB8QAQ

Call: K6JSS
Operator(s): N8XX
Station: N8XX

Class: Single Op QRP
QTH: Glacier Ridge Metro Park, UNIOn County
Operating Time (hrs): 11

Summary:
Band CW Qs Ph Qs

80: 67 51
40: 31 56
20: 18 2
15: 0 0
10: 0 0

Total: 115 109 CW Mults = 69 Ph Mults = 53 Total Score = 41261

SOAPBOX: Before I begin My soapbox, let me thank the QRP Amateur Radio Club International for the honor and privilege of operating K6JSS/UNIO in the Ohio QSO Party (OHQP) this past Saturday. I had a blast ? set a new personal (recent) record for number of Q?s during the OHQP. I?m 99.44+++% sure I set a new record for QRP operation in UNIOn county. (There was no QRP fixed station operation in previous recorded history from UNIOn county).

With that obligatory preface, let me start:

?Is it REALLY fun to spend 18 to 20 hours straight, out in the field, for a ham radio event?? That was the question my wife, daughter, son-in-law, and grand kids had for me as I prepared to go to Glacier Ridge Metro Park in UNIOn county for the 2012 Ohio QSO Party.

I won?t answer that question directly, because it all started about 1000Z (6 a.m. EDT) with my alarm clock?s ?beep, beep, beep.? Bang the snooze button, 5 minutes later, same routine. Manage to get out @ 1006Z. Out the door by 1030Z, 7 minute drive to Glacier Ridge. Stop by Mickey D?s for breakfast on the go. Arrive by 1100Z. No one at the (non-reserevable) picnic shelter, so met the park ranger, who insisted on helping unload the ham radio stuff.

By 1130 finished breakfast, contemplated best place for the antenna. By 1300Z had antenna ?sorta placed?, but still needed adjustment to get the mast vertical. (One never ceases to be amazed at the how flexibility of

fiberglass reinforce plastic mast.) One last adjustment. CRASH! Like Humpty Dumpty, ?All fell down!?

Luckily, I brought a couple extra mast sections, since one was severely cracked at the joint. 2nd try? Got the mast up 36 feet, somewhat precariously. Adjusting one guy. Result: CRASH! #2. Third try turned out to be ?the charm.? 36? high (figured that the last 4 feet wasn?t worth another crash!), looks good.

Drag out all the parts of the rig. Oh #$%&@ (exact words unprintable in polite company)! Where?s the cord and connector between the 12 Volt power pack and the LDG Antenna Tuning Unit? I KNOW I looked at it prior to leaving home. Contemplate ?Plan B.? Should I call wife, ask her to find a Rat Shack and purchase a power plug? Nawww, ham radio ingenuity to the rescue. The ATU worked fine if I just tied the negative lead to the chassis ground, and touched the center pole of the power jack on the back of the tuner as I let it tune?..

Finally got on about 1630Z. 40 meters was ?OK? but figured that 20 would be reasonable to get a few states. WRONG! Rate was abysmal - only 14 Q?s in 70 minutes. Switched to 40 phone ? couldn?t seem to get off SSB because of folks calling, calling, calling. What a run!

The rest is history ? highlights:

A group of Chinese Graduate students from Ohio State University invaded the shelter a bit after 1600Z. Lots of questions about ham radio. Reduced the rate, but part of the reason for going to a public place is public relations for ham radio (other than to set a new record for an otherwise unrepresented county in the QRP category.) About 2000Z the family arrived with extra refreshements. Another 45 minutes to an hour of chatting, including nice chat with a passing cyclist who had lots of questions about ham radio, cycling with ham radio, etc., plus chit chat with the grand kids. (Grand kids generally take precedence over hamming.)

By 0200Z there were 175 Q?s in the bag, but the rate was ?OK, but nothing spectacular.? Quick check of last year?s log resulted in same number of Q?s, but slightly lower score. So, decision to plug on ? netted K8MR and W8O in new multipliers. Forays into SSB netted a few more. Final tally, 225 Q?s, 69 CW mults, 53 Phone mults, total claimed score 41261 ? a new personal best for OHQP!

By 0600Z the antenna was down (it came down WITHOUT crashing!), everything packed into the car. Locked the gate to the park, and made it back to daughter?s place.

I MUST thank the personnel and management of Metro Parks. The ranger on duty in the morning insisted on helping unload the gear, even though I told him I figured he had better things to do. He also checked several times during the day. The park manager was on duty, stopped by, and apologized before leaving at about 0000Z ? saying that getting ready for a big marathon invasion on Sunday was occupying most of his time. His

major concern was that I?d be all alone after the park was closed. I assured him I had a cell phone and could dial 911 in case of any emergency!

Finally, thanks to the organizers of the Ohio QSO party ? FB job, FB!

1909. Pictures of clean equipment

Yahoo group: GRARA
Date: 2012-09-04 12:29:09 UTC
From: sprovost
Topic: 1909 Message: 1909

Does somebody have the pictures of the cleaned equipment that I can post on this group's photos?
I also want to send some picture to people who are interested.
thanks
stephen

1918. Classes and Classes, Tech and General

Yahoo group: GRARA
Date: 2012-09-06 00:44:46 UTC
From: K8TB
Topic: 1899 Message: 1918

If you know of anyone who is interested in getting their technician class license, the Holland ARC will be holding a "Ham License in a Day" class, on Saturday, September 22, 2012. Start time is 1 PM, and the cost is $ 35.00 More information and online registration is at:

http://www.hollandarc.org/?p=2524

And if you have your technician license, and have always thought about upgrading to the general, the Grand Rapids ARA will be holding a general class starting on Wednesday, September 19, 2012 at 7 PM. These classes are two hours long, and will last 8 weeks, with a special VE testing session on November 14th.

More information on this class is at:

http://tinyurl.com/cfmrvmx

1919. September VHF Contest

Yahoo group: GRARA
Date: 2012-09-06 01:48:26 UTC
From: David DeVos
Topic: 1919 Message: 1919

To my Ham Radio Friends:

I'll be on the air from Saturday at 2:00 PM EST until Sunday night 11 PM (with some sleeping breaks) for the ARRL September VHF contest. This one is every radio band from 6 meters and up. My home station has 6 meters up to 1.2 GHz, so I'd love to work you on any radio bands you have.

My grid is EN72fu - looking forward to working you. If you'd like more information, or would like to make a schedule, email me, or call me on my cell - 616-706-8736.

The problem at this point is we do not have a accurate accounting of the equipment that was left over. We would have to do another inventory.

1924. A Question About the Hamfest Estate Sale

Yahoo group: GRARA
Date: 2012-09-10 22:11:24 UTC
From: John C. Bradley
Topic: 1898 Message: 1924

Bob,

Sunday it dawned on me that the Heathkit AT-1 transmitter
was ITEM 75
and NOT _price_ $75.
I know it sold right away, but my curiosity is killing me -
I started out with an AT-1.
What was the price of item 75 on that list you had?

Thanks in advance for a reply,

John Bradley - AB8WT (former KN8RQY & W0CZJ)

"Did any one check to see if we had a email database?"
Other than various e-mail reflectors such as this one, no.
In future hamfest ticket printings, I would recommend a line for e-mail address, all on a larger ticket.

"I missed the test in late June by 1 question."

If you are that close, review the study material and re-take the exam.
Sounds like you about have it. Good luck.

Info on the exams in Grand Rapids:
http://www.w8dc.org/grr_license_testing/license_testing.htm

Grand Rapids ARA is proud to bring you "Sites, Sounds and Smells of Mt Athos"

An audio-visual presentation by Dr Rick Dorsch, MD, NE8Z

7:00 PM, FRIDAY, OCTOBER 5, 2012 , RED CROSS BUILDING, 1050 FULLER AVE NE, GRAND RAPIDS, MI

Mount Athos is one of the most sought after DX contacts. Until last year the only contacts were on SSB. Rick,NE8Z, brought additional ham equipment, including a key and keyer.

He lived for two weeks with Monk Appollo, SV2ASP/a, the only resident ham at the Monastary.

If you've ever been on a DXpedition, or if you've never been on one, this is one unlike any other. When you step into the monastery, it's like going backwards in time at least 1000 years. Rick promises to relate to you the sights and sounds and smells of this very unique place.

Maps to Red Cross HQ at
http://goo.gl/maps/9gQZo
Just enter your starting point, click the "Get Directions" button, and "voila, a map with specific directions."
We will have talk in on the W8DC repeater 147.26 MHz, 94.8 Hz PL

Note: Please pass this along to any other ham reflector to which you belong!

1933. Kalamazoo Area Technician and General Classes...

Yahoo group: GRARA
Date: 2012-09-25 16:48:00 UTC
From: Chip Locke
Topic: 1933 Message: 1933

This begins week #2 of licensing classes for Technician and General Class in Kalamazoo. It's not to late to join in!

General Class, session #2 is tonight at 7 PM at the Greater Kalamazoo Area Chapter of the American Red Cross, 5640 Venture Ct. in Kalamazoo.

Technician Class session #2 is this Saturday from 2-4 PM at the same location.

For further details and registration, go to http://W8UH.Net. Registration, while desirable, is NOT necessary. If you realize at the last minute that you haven't registered for the course(s) of your choosing, come anyway!!

You may also contact John Tucker, via email at wb8zvv [at] gmail [dot] com or via phone at (269) 324-9085.

and, if in the Grand Rapids area, don't forget GRARA's General Class, also ongoing! Check out http://www.w8dc.org/ for details!

Hi Al!

Not that I'm aware of. We don't have any plans at the moment for an Extra class, and haven't held one in awhile.

Thanks for asking, though!

Anyone else aware of an Extra Class (or any other classes) coming up??

1938. Estate stuff at Muskegon Hamfest

Yahoo group: GRARA
Date: 2012-10-05 00:24:44 UTC
From: streyle.j@comcast.net
Topic: 1931 Message: 1938

All:

I've reserved (3) tables for the Muskegon Hamfest, on October 13th, along with purchasing (2) advance admission tickets.
I have my neighbor's trailer I will bring to haul stuff. I assume some of us will need to meet at K8EX's barn Friday evening (the 12th), to load up the 'stuff'. We'll need to decide on a time to meet there (now that more of us know how to find it!)
KD8QNX has offered his pickup to pull the trailer, which will allow a bit more carrying capacity (using the pickup bed).
Are there any other things we need to prepare for the Muskegon swap?

Tim K3LR
WWROF Vice Chairman

1943. Availability of 20' lengths of DWV pipe?

Yahoo group: GRARA
Date: 2012-10-11 01:22:24 UTC
From: Hank Greeb
Topic: 1942 Message: 1943

I thought at one time places like Lowe, Home Depot, Menards, etc., carried 20' lengths of 4" and 6" (sometimes larger) drain waste and vent pipes. I'd like to experiment with building a free standing tower with such pipe. The local versions of these only have 10' lengths, which don't do me much good.

Is there a large building or plumbing supplier in the greater grand which carries the longer lengths? Maximum height would be ~ 40 feet, with very low wind load. That would mean two sections built with 20' lengths, nested a few feet, and a smaller vertical section to which the antenna would be attached. If it stays up for a winter, it's probably doesn't have a large enough antenna array - if i follow the rule my pappy taught me. He claimed he learned it from several of his cronies.

Tnx es 73 de n8xx Hg

1944. Estate equipment @ the Muskegon swap

Yahoo group: GRARA
Date: 2012-10-11 01:34:32 UTC
From: streyle.j@comcast.net
Topic: 1942 Message: 1944

D.V., I will rendezvous with Frank on Friday afternoon, and plan to be at the K8EX storage barn by 5 PM, with trailer & tarp, etc. A goodly number of hams having strong backs (and weak minds?) are needed to help load estate equipment.

I have reserved (3) tables at the Muskegon swap (and 2 admission tickets), and plan to be there (4200 Apple Ave, Muskegon 49442) by 7 AM on Saturday. Again, help will be needed to haul in, and set up the estate equipment. Hopefully, there will be much less stuff to load up and haul back!

1946. Hamvention 2013 - Upcoming Department of Homeland Security Emergency Communications Course

Yahoo group: GRARA
Date: 2012-10-11 12:53:34 UTC
From: Hank Greeb
Topic: 1946 Message: 1946

In case anyone is considering Hamvention 2013, she/he might wish to consider the following. Note that more details will be available as Hamvention 2013 gets closer Check the hamvention website from time to time

==========

The following comes from the Hamvention Website. Go to http://hamvention.org/#DHSOEC for future updates

Department of Homeland Security's Office of Emergency Communications To Provide Training In Conjunction With Hamvention® 2013

Details for registering for this special free course being held in conjunction with Hamvention® will be provided on this page at a later date. Stay tuned to the Hamvention® website for registration details as they become available. It should be noted that the instructors conducting the course will also be giving a forum at Hamvention® 2013 regarding the use of trained amateur radio operators as backup communicators in an NIMS/ICS emergency operations environment.

The Department of Homeland Security's Office of Emergency Communications (OEC) will be on hand at Hamvention® 2013 to conduct their nationally recognized NIMS/ICS compliant Auxiliary Emergency Communications course. The course will be held prior to Hamvention®, 14-16 May 2013 in the Dayton area as part of Hamvention® 2013.

The OEC workshop is designed for auxiliary emergency communicators who volunteer to provide backup emergency radio communications support to public safety and emergency response professionals and their agencies. Typically includes amateur radio communicators from groups such as MARS, ARES, RACES, SATERN, etc. Volunteer emergency communications operators/groups have been providing back-up emergency communications to the public safety community for nearly a century. They are routinely used by event planners and emergency managers at all levels of government. On numerous occasions amateur radio services have been used reliably when other forms of communications have completely failed or have been severely disrupted. Today nearly all the States/territories have incorporated some level of participation by amateur radio auxiliary communication operators into their communications interoperability plans.

The course focuses on auxiliary communications interoperability, emergency operation center etiquette, on-the-air etiquette, FCC rules and regulations, auxiliary communications training and planning, certification and accreditation and emergency communications deployment. It is intended to supplement and standardize an operator's basic knowledge of emergency amateur radio communications in a public safety context.

Prerequisites for attendance include:

• Successful completion of IS-100.b, IS-200.b, IS-700.a, and IS-800.b prior to the workshop (copies of certificates will need to be scanned and emailed to the lead instructor no later

than 14 days after registering. Details on this will be forthcoming.)
• At least have a General class FCC license, active for the past three years or more (a copy of your license will be requested at the start of the class)
• Documented past experience in auxiliary emergency communications in an EOC type environment
• A desire to learn how to work with COMLs in a NIMS/ICS environment

This will be an intensive three day course with including facilitated lectures and student exercises. This course provides scheduled time for interactive discussions and exercises. Normally this class is limited to 30 students, but for Hamvention this is being expanded to 60 attendees.

Course content:
• Introduction
• The Communications Unit and the Emergency Operations Center (EOC)
• AEC Roles and Responsibilities
• Interoperable Communications
• Incident Communication
• Incident Radio Communications Plan
• Incident Communications Center
• Team Management and Accountability
• Resources
• Intrastate and interstate radio networks
• Final exercise exam

Hank - with all the surplus tower sections available, and the ease of putting up an unguyed tower, why mess around building one? Rohn 25 is rated unguyed to 20-40 feet depending on wind load if you simply dig an 18" hole in the ground 3-4 feet deep, and put cement in around the bottom of the tower section per Rohn drawings. Pretty simple.

I have personally purchased Rohn 25 sections for $25-40 a piece, and have gotten a lot of them for nothing also. So, that would be my recommendation.

If you got the sections for free, which is very possible, you could put up a tower for the cost of the cement. 4-6 bags at $5 a piece = $20-30 bucks. Then you would have a climb-able tower. Get some young wipper-snapper like Tom Hansen to climb it for you!

> I thought at one time places like Lowe, Home Depot, Menards, etc., carried 20' lengths of 4" and 6" (sometimes larger) drain waste and vent pipes. I'd like to experiment with building a free standing tower with such pipe. The local versions of these only have 10' lengths, which don't do me much good.
>
> Is there a large building or plumbing supplier in the greater grand which carries the longer lengths? Maximum height would be ~ 40 feet, with very low wind load. That would mean two sections built with 20' lengths, nested a few feet, and a smaller vertical section to which the antenna would be attached. If it stays up for a winter, it's probably doesn't have a large enough antenna array - if i follow the rule my pappy taught me. He claimed he

learned it from several of his cronies.

I am in agreement. I was a physics major in college but did take a few basic engineering courses like strength of materials, statics, and dynamics. There are three kinds of stress the parts (members) of the tower must be able to deal with and I doubt pipe has very rigorous requirements for any of them. The Rohn was engineered to take the stresses. This project has the possiblity of earning a darwin award when it collapses due to materials failure - hope no-one is climbing it at the time. It just doesnt pay to try and cheat the engineers.

P.S. I did see someone who tried to build a windmill using pipe, and it did collapse.

Hank - with all the surplus tower sections available, and the ease of putting up an unguyed tower, why mess around building one? Rohn 25 is rated unguyed to 20-40 feet depending on wind load if you simply dig an 18" hole in the ground 3-4 feet deep, and put cement in around the bottom of the tower section per Rohn drawings. Pretty simple.

I have personally purchased Rohn 25 sections for $25-40 a piece, and have gotten a lot of them for nothing also. So, that would be my recommendation.

If you got the sections for free, which is very possible, you could put up a tower for the cost of the cement. 4-6 bags at $5 a piece = $20-30 bucks. Then you would have a climb-able tower. Get some young wipper-snapper like Tom Hansen to climb it for you!

Steven:

I suspect you haven't heard the Olde Tymers's Maxim, "If it stays up for a full winter, it's ain't big enough."

I'm a comical engineer by training, by credentials in Ohio (Ch.E), so I'm not qualified to give a professional opinion on a structural engineer's question which you raise. But, I can guarantee you as a lay person and as one with 61 years in ham radio, including building a 50+ foot tower (guyed) from irrigation tubing which lasted for over 5 years of Field Day operation, and would probably still be usable had I not driven over on of the sections with my farm tractor back in Ohio, that I could build a tower from fibreglass reinforced polyester Drain, Waste and Vent (DWV) pipe, which would which stay up for at least a day or two in any wind less that 2 MPH.

However, Mr. Devos has given me a much better idea. Thanks, Dave. I'll have my eye out for some "freebie" Rohn 25 or equivalent,and put it up to support my wire beam rotatable antenna.

Topic: 1942 Message: 1954

So, anyone know where this "Barn" of which John speaketh is located? I'd head out to K8EX's place, but a storage barn might be located somewhere else. I've asked for someone to tell me where to go on 147.26, 147.16 and 145.27 MHz (output frequency, + or - 600 KHz for input frequency as the case may be) and have heard abstitively no response. Is two metre funny modulation dead these daze? I'd figure that 5 p.m. or so would be "prime drive time" for folks leaving work. Maybe we're a bunch of olde f**ts who don't have gainful employment any more so repeaters aren't necessary? C'est le guerre!

I gave up after about 15 minutes of hunting around for info on the air. I'm heading for the 5th street hall for a burger and brown 807.

I'll be @ Muskegon at whatever time is the "appointed time" to help with unloading, IF someone reads this message as responds with directions/instructions. Since folks have been know to LOVE to tell me where to go, I'll probably get inundated with responses.

Note, I qualify on only one of the needed qualities which are listed - I have a weak mind. But also a rather weak back. I'll carry at least one small item at a time from the unloading place to the tables, and give moral (or immoral?) support for the real "worker bees."

1959. BIG contest weekend coming up!

Yahoo group: GRARA
Date: 2012-10-23 03:39:19 UTC
From: Hank Greeb
Topic: 1959 Message: 1959

For the die hard contester, the upcoming weekend provides:

The 2012 CQ World-Wide DX Contest, SSB: Saturday 00:00Z, October 27, to Sunday 23:59Z October 28. That's 48 hours of SSB! (Better have a voice keyer set up!)

Do you think SSB in a major contest is an oxymoron unless you have a giant antenna farm and a full gallon? Well, Lettuce consider:

In 2011 the top QRP operator in the USA was ND0C. with 820 QSO's, 89 Zones, 243 Countries, for a total score of 757,292 Top LP operator was N1UR, had 2428 Q's, 135 Zones, and 449 Countries, for a total score of 3,948,424.

But, you don't need to be a "die hard." You might just go for some "new" DX, there were 6 QRP operators who reported less than 10 Q's, and less than 100 points.

So, if you want to "run for the gold," or just search for some rare ones, why not join in?

Rules are at http://cqww.com/rules.htm

SB QST ARL ARLB024
ARLB024 FCC Seeks Comments on Proposed Changes to Amateur Licensing Rules, Emission Types

Earlier this month, the FCC released a Notice of Proposed Rulemaking (NPRM) -- WT Docket No. 12-283 -- proposing to amend the Part 97 rules governing the Amateur Radio Service. On October 24, a summary of the NPRM was published in the Federal Register and the FCC is seeking comments on it.

Specifically, the Commission is proposing to modify the Amateur Radio Service rules to grant examination credit for expired and beyond-the-grace-period-for-renewal Amateur Radio operator licenses; to shorten the grace period during which an expired amateur license may be renewed; to revise the time a call sign is not available to the vanity call sign system correspondingly, and to reduce the number of volunteer examiners needed to administer an amateur license examination. The NPRM also asks for comment on amending the rules to permit remote test administration, and proposes to amend the Amateur Radio Service rules to allow amateur stations to transmit certain additional emission types.

Comments must be filed on or before December 24, 2012 (60 days after publication in the Federal Register); reply comments must be filed on or before January 22, 2013 (90 days after publication in the Federal Register). Instructions on how to file comments are listed

beginning on page 12 of the NPRM.

The NPRM can be found on the web in PDF format at,
http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db1002/FCC-12-121A1.pdf.

1963. November Sweepsteaks - CW THIS WEEKEND - SSB in two weaks

Yahoo group: GRARA
Date: 2012-11-01 12:50:55 UTC
From: Hank Greeb
Topic: 1963 Message: 1963

Yup, it's that time of the year again. ARRL November Sweepsteaks is looming

For people who like to exercise their left feet (or other appendages, as the case may be: this weekend CW: First full weekend in November (November 3-5, 2012)

For those who like to flap their vocal cords: SSB: Third full weekend in November (November 17-19, 2012)

Sweepsteaks is one of the "premier" contests within these Untied States. This year there are a couple of wrinkles, so it pays to read the rules:

http://www.arrl.org/files/file/Contest%20Rules%20PDFs/2012/2012-SS-Rules.pdf

or, if the above gets truncated: http://goo.gl/coCu9

The one more notable change is that we now have 83 ARRL sections - with Ontario being divided into four sections:

Ontario North (ONN), Ontario East (ONE), Greater Toronto Area (GTA), Ontario South (ONS)

(editor note - maybe some other section should split and call one of its sections "Tremendously Wonderfully Ordinary" or "TWO", then we could look for ONE plus TWO. :)

Sweepsteaks (or SS for short) can be an excellent excuse to fire up a club station, like W8DC - and test again if "Direct Current" can actually make ethereal waves to allow contacts with other stations.

Sorry for the above puns, but I must sadly report that I must be away from the shack on November 3-5, and won't be able to partook of one of my favorites, namely the Corn Whiskey part of SS.

Perhaps one or more of the GRARA folks can converge on W8DC and fire it up?

If a bunche of people show up @ 4:30 p.m. today, there WILL be a
sn*wbird dinner. It's a bit of a "fur piece" for me to attend,
particularly due to driving 800+ miles over last weekend on a mission of
mercy for my wife's sister in law.

Who owns the e-mail address "Myw8lrc@...?" Did you try to contact
the "caretaker" of that e-mail address? Does it still work?

Even if only a few people show up, it might result in some good eyeball
QSOs.

1967. Re: Reminder: Snow Bird dinner

Yahoo group: GRARA
Date: 2012-11-08 02:02:15 UTC
From: Jack Amelar
Topic: 1967 Message: 1967

Word from the original organizer of the Snow Bird Dinner:

----- Message from w0wch@... ---------

> Subject: Re: Reminder: Snow Bird dinner

> Dorothy and I have not held this event for the last two years since
> we relocated to the Fremont/Holton area as our primary residence. It
> is more informal and celebrated at Lunch Bunch @ Schnitz Deli on
> Friday in Kentwood.
> We could still do this event but most that attended are deceased or
> have moved away.
> 73
> Marc W0WCH

Just to re-iterate, the "Lunch Bunch" are hams who meet informally every Friday at the Schnitz South Deli, 1529 Langley St, Grand Rapids/Kentwood near Kalamazoo Ave. and 44th St. From Kalamazoo Ave, a block north of 44th St, turn west onto Langley at the Admiral Gas Station. Schnitz is in the first strip mall on the right. All are welcome.

Next time I'm there, I'll take a survey if this weekly event should be added to the calendar or left well enough alone.

Somewhere I have the log-in information for this, I'll get it removed. Funny thing is I don't recall seeing this message the past two years!

1975. ARRL 160 Meter Contest Next Weekend

Yahoo group: GRARA
Date: 2012-11-26 05:20:43 UTC
From: Hank Greeb
Topic: 1975 Message: 1975

The annual ARRL 160 Meter contest will be held next weekend

Starts 2200 UTC Friday, ends 1600 UTC Sunday (November 30-December 2, 2012). This is a forty-two hour period with no time limitation.

==========

For another 160 meter contest, the QRP ARCI is sponsoring their Top Band Sprint on November 29, 0000Z to 0600Z. That's 7 p.m Nov 28 EST to 1 a.m. Nov 29 EST.

Rules and other details at http://www.qrparci.org/content/view/8400/118/

As I write this, the QRP ARCI web site is down for maintenance. If it doesn't show up by Tuesday, I'll scrounge rules and post them in an e-mail.

Enjoy!

Hank N8XX
- I think you asked some time back about getting small quantities of PC boards made. I noticed an ad in one of my engineering trade magazines recently -

expresspcb.com

The ad says "free layout software, free schematic software, 3 PCBs for $51". I have no experience with them, whether good or bad.

An internet search yields the following websites that *sound* likely:

pcbexpress.com
www.custompcb.com
www.instantpcbquote.com/online-pcb/pcb-prototypes.html
www.pcbnet.com/default.asp
www.4pcb.com/
www.sunstone.com

If you build and get your project to work, let us know about it!

Thanks John:

I'm "sorta" thinking about making an itty bitty PCB which would fit inside a 9 PIN RS232 plug to convert the RS232 DTR to a keying circuit. I've cobbled the things together without a board, but they generally don't last all that long. Folks who sell these things already made generally charge $30 or so, and the parts, one off construction, cost all of about $2.00.

But, I've noticed that I was thinking about applying to "Procrastinators of America" a few years back, but have neglected to download an application form from their web site. I also heard talk about a national convention of that organization, but the convention has never materialized.

I did one using a relay out of an old dial-up modem (a great source of cheap parts, if you can find them).
Seems like it'd be a lot more useful to have that keying circuit hook to a USB port, since new computers don't have serial ports anymore.
How do you do a hardware interface to USB?

Topic: 1978 Message: 1981

John:

There are things like "rig blasters" which work directly from a USB port for CW keying. I think I saw a circuit for one in QST some time ago. And, if memory serves correct, Cortland, KA5S, has such a commercial interface which plugs into a USB port for keying CW.

These probably have circuits similar to what is in a USB to COM Port adapter plus the COM Port to CW keying adapter. If one can convert a USB port to a COM port, there's no reason you can't incorporate that circuitry and programming into a USB to Keying circuit.

When I think of it, isn't it strange that we use all sorts of complicated circuitry and computer hardware to merely turn a switch (key) which started out as a mechanical gadget back in the 1800's? :)

Yep, I know about the 'Rig Blaster' - but to me that's too much of an 'appliance operator' concession - and I have a couple of those USB-to-serial converters, too; but it'd be useful to really understand the USB interface directly, down at the hardware level. Of course, there's also a software aspect to that, so the port/radio interfaces with other sw, etc.

There are a variety of chips that perform the interface in a variety of ways at the 'B' end. There are also some micro controllers that talk USB as part of their on board IO. If you are trying to 'roll your own' device, may I suggest the Arduino ATMEL based mini-boards available at radio shack or arduino.cc, maker shed.com, or seedstudio.com. There are a variety of prototyping boards from the big 'mega' down to the tiny 'ardweeny'. Most common is the UNO. There are a number of 'shield' boards that stack onto the arduino board that give a variety of capabilities or you can wire what you want on a prototype shield. To my mind, this is the path of least resistance for something like this. I have a couple of Arduino Leonardo's and Seeduino Stalker.

I AM SADDENED TO REPORT THAT A LONG TIME FRIEND AND FELLOW HAM, LARRY ENGLAND, K8GMO HAS PASSED ON.

HE DIED AT HOLLAND HOSPITAL AT 8:30 AM SUNDAY DECEMBER 2, 2012.
LARRY HAD NOT BEEN WELL FOR SEVERAL YEARS.
I WILL SEND MORE, LATER WITH FUNERAL ARRANGEMENTS, ETC.

*****I DON'T HAVE EMAIL FOR MUSKEGON CLUB - PLEASE PASS THIS ON TO THEM. LARRY LIVED THERE IN HIS EARLY HAM DAYS*****

1992. OBITUARY: LARRY ENGLAND, K8GMO

Yahoo group: GRARA
Date: 2012-12-03 21:48:01 UTC
From: Charles Rich
Topic: 1992 Message: 1992

Reverend Dr. Lawrence England, age 78 of Holland went to be with his Lord and Savior Sunday, December 2, 2012.
He was preceded in death by his wife of 54 years, Betty England and an infant son, Jeffrey England.
He served as a minister at the First Baptist Church in Holland and New Richmond Baptist Church. He was the founder of the Fundamental Bible Institute and the founder and Chancellor of West Michigan Bible College. Larry also served as Quiz Master for West Michigan GARBC for 20 years.
He served his country in the Air Force during the Korean Conflict.
Larry is survived by his children: Marty and Shirley England of Holland, Barbara and Tim McKessy of Saugatuck and Shari and John Trautmann of Holland.
7 grandchildren and 8 great grandchildren.
Sister, Judith Herbert of Ontario, CA.
In-laws: Wilburn Rhoades of Chicago, Joan Dexter of Muskegon, William Vander Slute of Muskegon, Janet and William Schugars of South Bend, IN, Doris Arbo of South Bend, IN, Jim and Sue Vander Slute of Muskegon and Marlene Vander Slute of Muskegon.
Funeral services will be held 11 a.m. Thursday, December 6, 2012 at Rose Park Baptist Church, 600 Butternut Drive, Holland. Pastor Frank Senters will officiate. Visitation will be 5-8 p.m. Wednesday at Langeland-Sterenberg Funeral Home, 315 East 16th Street, Holland. Burial will be in Pilgrim Home Cemetery. Memorial contributions may be given to the American Heart Association or the Alzheimer’s Association. www.langelandsterenberg.com

I understand that there will be vistiation / viewing one hour prior to the funeral at the Church.(wear your call sign badges, I will)

1993. Triangular Recesssed Panhead screwdriver

Yahoo group: GRARA
Date: 2012-12-04 22:39:47 UTC
From: Hank Greeb
Topic: 1993 Message: 1993

Not exactly ham radio related, but I have an electronics gadget which is put together with what my local Ace Hardware describes as "Triangular Recessed Panhead" screws.

I've never seen one of them before this. Neither Ace nor its outside supplier has a tool to remove such screws. The people at Ace said screws like this are used for security.

But, I'd like to see what's inside a defective control box.

Anyone know where I might find a screwdriver or something which fits in my drill which could extract something like this. The screws have a triagular depression in the had, not quite equilateral (at least as measured by eye.)

Private responses seem appropriate.

Gather your children & grandchildren into your Ham Shack on DECEMBER 24th starting 8 PM for the Lowell Amateur Radio Club’s annual:

“SANTA CLAUS NET”

On the W8LRC Lowell repeater, Freq 145.270 with a PL of 94.8. Also on the IRLP Node: 4635 and EchoLink Node: 87878

For all ages young and old. Santa will be checking-in with his Radio Control Elf, Dave KC8PCL, from time to time looking to talk with children and any Adult Children, about what they would like for Christmas. All the while Radar Elf, Frank N8UVI, will keep track of where Santa is, on his radar screen, delivering his presents.

It is a TP3 security screw, googling it I only came up with one tool source
http://www.fastenersavings.com/tp3®screwdrivers-ct-2042.html
You might call Snap-On also

Yup, Rich is on it, Nintendo and Xbox are big users of these fasteners

1998. ARRL 10 Meter Contest This Weekend!

Yahoo group: GRARA
Date: 2012-12-07 21:25:51 UTC
From: Hank Greeb
Topic: 1998 Message: 1998

2012 ARRL 10 Meter Contest is this weekend, beginning at 0000 UTC Saturday; ends 2359 UTC Sunday (December 8-9, 2012)

Rule are at

http://www.arrl.org/files/file/Contest%20Rules%20PDFs/2012/2012-10M-Rules.pdf

If that gets truncated, use this itty bitty url
http://goo.gl/K749z

Note that this timing is coincidental with the beginning of our meeting, 7 p.m. EST. So, if anyone wants to tune to the 10 metre band in the W8DC shack and see if it's active, go for it! The contest will "probably" be much more informative than the usual drivel which passes for business during our meetings.

OOPPSS, I forgot, we have an exalted member of the Disaster team as as speaker this evening, so perhaps we can learn something!

Anyway, see you this evening. If anyone wishes to fire up W8DC during the day on Saturday or Sunday (the most probable times for propagation on 28 MHz), lettuce talk about who can lettuce into the place during those time.

72/73 de n8xx Hg
QRP >99.44% of the time

And, by some fluke, the "On Air Director" for GRARA (if I don't get fired for a couple of statements in the above message.)

1999. ARRL Michigan Clubs PRB-1 Alert

Yahoo group: GRARA
Date: 2012-12-08 17:33:07 UTC
From: Hank Greeb
Topic: 1999 Message: 1999

From: *ARRL Members Only Web site* <memberlist@...
<mailto:memberlist@...>>
Date: Sat, Dec 8, 2012 at 10:54 AM
Subject: PRB-1 Alert
To: hsbicknell@... <mailto:hsbicknell@...>

Greetings to all Michigan Hams December 8, 2012

This is a special email alert for all Michigan hams concerning our ongoing PRB-1 effort in Michigan.

I have good news to report in that after a Senate Hearing on December 5, based on a 3 ? 0 vote, SB1244 was passed and is moving onto the Senate Floor. This means that on December 11, our bill may be voted on by the Senate. If we are successful there, the bill will move to the House, and if successful there as well, it could end up on the Governors? desk for his signature.

I am asking each Michigan ham to act now and visit http://www.miarrlprb1.org/ which is our PRB-1 website and click on the ?Update Alert? tab to read the notes from Wednesday?s Senate Committee Hearing. Please download the ?sample? letter available by clicking on the ?What Can I Do?? tab. Simply fill in your senator?s name, add your name and address at the bottom and email to your senator. There is no need to add anything to the letter.

You can find your senator?s email address by clicking on the ?Find Your Senator? tab. Some senators have a direct email listed, others may have a form email where you may have to cut and paste your letter into their form. Please send a copy to wb8r@... <mailto:wb8r@...> so we can see how
much of the ?market? we are covering and we can send a copy to any senators who do not get a letter from a constituent. For those that use an email form, please send a note directly to me at wb8r@... <mailto:wb8r@...>telling me which senator you sent the letter to and that you used an
email form.

There is a possibility that our bill may time out if it is not possible to get the process completed by the end of the legislative session. Not to worry. We will start all over again in January and already have our primary sponsor lined up. We have some good support in the Senate and we feel that we are in good shape.

Thank you in advance for your fine assistance. This is an important issue and we need to blanket the Senate with our letters.

73,

Larry, WB8R
Michigan Section Manager

I have been looking for an older TenTec Transceiver myself for quite some time... I guess some people must use them to prop up their houses or something.... I haven't seen one for sale except on fleabay... then it's always " got it at an estate sale... doesn't smoke when I turn it on... but something smoked when I keyed the mike..." Or "I don't know anything about these, but twice what it was new seems like a fair price to start the auction,,,"
 Good luck and happy hunting!!

2005. Two "End of the World" events next week.

Yahoo group: GRARA
Date: 2012-12-15 19:45:09 UTC
From: Hank Greeb
Topic: 2005 Message: 2005

How many folks know that the end of the world will be December 21, 2012 (At least some folks who studied a rock containing the Mayan Calendar have come to that conclusion.)

You may have heard of NØD, a special event station to commemorate this event. For details see http://www.nowzerodays.com/

==========

But, if you're interested in a light hearted event, in celebration of this same event, why not join a bunch of (at least semi) mad QRP ops for the annual Zombie Shuffle? Why a 'Shuffle' you may ask? Because, silly, QRP Zombies don't sprint! As Paul NA5N says, "There is no point to the Zombie Shuffle whatsoever except to get on the air and have fun with fellow Zombies and QRPers".

Details are at http://www.zianet.com/qrp/ZOMBIE/zombie.htm

Time is from 5 p.m. local time to Midnight local time (or anything similar to that - shucks, this is a zombie event, and zombies are immortal, have little or no sense of time). Call CQ BOO on or around QRP "watering hole" frequencies of 14.060, 7.040, 7.030, 7.106, 3.560, 3.710, or anything that works.

Plus, this year and this year only, you can celebrate the end of the Mayan Calendar and possibly the End of the World as We Know It!! You surely don't want to miss out on that, HA!

Remember, this isn't a high-speed sweepstakes but a friendly little contest. Please QRS for newcomers and us old skeletons alike :-).

And, above all, have fun!

HPE CU FRI, December 21.

72/73 de n8xx Hg
QRP >99.44% of the time

P.S. I'll be one of several Mayan King's

2016. For Sale: Ameritron ALS-600 Solid State HF Amp w/ supply

Yahoo group: GRARA
Date: 2012-12-26 20:25:05 UTC
From: qschultze
Topic: 2016 Message: 2016

Hey, Gang.

I don't need this 600-watt HF amp (with the ten-meter option and the factory 25 amp, 50v, 120 supply -- heavy, and heavy duty) and would love to sell it locally. Works like new and looks about the same. I'm impressed with it. Those FETs do the job. No tuning. I ran it on a standard 15-amp 110 AC outlet. This thing is efficient, too. Magic.

I am the second owner and have not put many hours on it. I don't think I want to ship it. I've got original manuals, power cord, etc. Here's a link to the the info without the 10-meter adaptor.

http://www.ameritron.com/Product.php?productid=ALS-600

For $800 the whole package, with 10 meters and supply, is yours. Such a deal. If you decide to go back to QRP you could resell it for the same price. These are popular units and not easy to find used with supply and 10 meters. In decent shape (this is excellent shape) they go for $850-$980 (not including shipping) on eBay. Maybe the CBers buy them up.

Let me know soon because I intend to post on eham or eBay next.

Pax,

Quin, K8QS

2018. Stew Perry Top Band Challenge Dec 29/30

Yahoo group: GRARA
Date: 2012-12-27 22:41:21 UTC
From: Hank Greeb
Topic: 2018 Message: 2018

The Stew Perry Top Band Challenge is this coming Weekend. It starts at 1500Z December 29 and ends at 1500Z December 30. One may operate a maximum of 14 hours during the 24 hour period.

The call 160 meters "Top Band" but I figure this will need adjusting, since we will soon have an allocation around 500 KHz, or 600 meters. But, for now, let's let sleeping lies dog (or some converse thereof).

Details of this event may be found at
http://www.kkn.net/stew/stew.rules.txt

The scoring is a bit convoluted, and the scoring team does all the scoring, so I'm not worrying about how this is done.

Categories are, High power up to 1.5 KW, Low Power 5 watts to 100 watts, or QRP <5 watts

So, why not crank up the wavelength to about 166.666⅔ and give it "ye olde college try."

72/73 de n8xx Hg
QRP >99.44% of the time

Well, using a whopping 4 Watts, I managed to make 19 contacts with my fan-dipole-turned-into-a-top-loaded-vertical, and that in only about an hour's operating time - and none of that during gray-line conditions. Didn't work any DX, though.

Hi, John:

Good Show!

In the eyes of a contest organizer, there ain't no "trivial scores." I've even seen a score of "zero" reported - no comment in the "soapbox" are of the report. I was on a team of ops where one op said he would be part time. He managed 4 Q's, 16 points, but one of the Q's was disqualified for some reason, and his score was 9 points.

Every entry shows interests in the contest, which helps the organizers.

Scoring for this Top band Distance challenge is different from most other contests, in that there are no "section" or "state" or "zone" or Grid Square multipliers. I had a hard time at first copying EN71, DN13, etc., without a 5NN coming first. Hard habit to break!

Art:

You don't need 94.8 Hz CTSS on receive. That may be your problem. The repeater may not be transmitting a CTSS tone.

Try opening up your receiver so it doesn't require a CTSS tone for receiving. Your transmitter should SEND the 94.8 Hz tone TO the repeater.

I may be wrong, but I didn't find any info about a CTSS tone on the output of the 147.18 MHz repeater @ the W8HVG.org website.

Happy New Year. Happy transmitting/receiving with the new rig!

Oh, and be sure you have +600 KHz offset for the transmitter. It should be transmitting at 147.78 MHz. That's one thing which is easy to forget, unless the rig "automagically" set the offset.

From: streyle.j@comcast.net
Topic: 2034 Message: 2034

Hank:

I received a flyer in the mail recently at work from 'Advanced Circuits' The flyer says that a 'barebones" PCB is free, with some limitations: 2 layers, .062 thick, holes not plated through, up to 12" X 16". The link is

http://www.4pcb.com/bare-bones-pcbs

They also offer free PCB layout software. I don't know what the 'catch' may be, if any - but it sounds like it's worth investigating.

Another good option could be FAR circuits - this place appears to cater to the ham radio community. The web site has quite a list of project PWBs already designed, and available for a reasonable price, for various projects from ham magazines. Custom boards are available - but either prepared artwork, or 'Express PCB' files are required.

I met a fellow at the IRA pre-hamfest last year, N8CUF, who bought one of those "IC-V89" radios at Dayton. It was supposed to be a dual band HT, but as far as I could tell, it only covered 2M, along with a wide receive range. It was not immediately obvious that it was a fake, and was not easy to understand how to program it. Buyer beware!

A co- worker is inheriting an old wooden cabinet AM radio. He says it worked 25 years ago, but has not been turned on since. He's asked me to help find a good home for it.
Does anyone know of an antique radio collector type in the area that might be interested?
The radio will be available in the GR area in the first part of February- reasonable price to be negotiated. I don't have any more details at this time.

2013 Field Day is June 22-23!

Field Day is always the fourth full weekend in June. June 2013 has five
weekends in it, so make sure you have the correct date!Field Day 2013
will be the weekend of June 22-23.

73 Dave

2042. Club Dues

Yahoo group: GRARA
Date: 2013-01-25 21:01:20 UTC
From: Jack Kunnen
Topic: 2042 Message: 2042

GRARA members don't forget that clubs dues are due at the end of February. I'm sure the treasure will be glad to take them from you at the February meeting. By the way the next meeting is Friday 1 Feb at 7 PM at the Red Cross on Fuller NW

The Treasurer is always eager to remove funds from generous GRARA members. Thanks all for considering. Also, coming up will be discussion (hopefully) of the September Swap as in date, time, and location.

I also am interested in the wood cabinet AM radio, John. Would like to know make, model, cabinet condition, and ballpark price. I already have a Zenith Transoceanic wooden console cabinet multi-band, a Motorola model 10-Y wooden console cabinet multi-band, an RME 45 table top receiver, with matching speaker, and a bunch of bakelite table radios. I also have two Variacs to fire them up with. 6one6 8zero5 12 sixty-4. W8GL/Gary/Kentwood.

2049. F)reeze Y)our B)...t O)ff (FYBO) Sat 02-02 1400Z - 2400Z.

Yahoo group: GRARA
Date: 2013-01-30 01:33:04 UTC
From: Hank Greeb
Topic: 2049 Message: 2049

The annual F)reeze Y)our B)...t O)ff (FYBO) will be held this coming Saturday 2013-02-02 between 1400Z - 2400Z.

A couple of us nuts will be going out to a local park to F)reeze our B)...ts O)ff. and possibly making a few contact whilst so doing. Plans are preliminary, but if interested, please contact me.

This annual event is sponsored by the Arizona ScQRPions. The rules for 2012, same as 2013 except for date, are at
http://www.azscqrpions.com/fybo2009rules.html

Note, a few years ago, three of us went to Hell (Michigan), and Hell WAS frozen over at that time. This time we're looking for a park which has some shelter from the wind in the Greater Grand Rapids area.

High temperature is predicted to be 24 deg F. in the Grand Rapids area on Saturday, so dress warm, or else you may find the posterior of your body frozen. :)

Topic: 2050 Message: 2050

CQ, CQ, CQ All Hams,

Helping the wife of SK, Larry Case WD8BDK, sell his radio equipment. What is available is listed below.
This equipment is from a smoke free enviroment. Pictures upon request.

All Prices reduced

Contact me off the reflector at kd8deg@...

Icom IC-T90A Triband HT 6m, 2m & 70cm w/BC-110AR charger, external spkr/mic, like new in the original box, and tested OK.......asking $190.00 - New $319.00

Bencher BY-1 Iambic Paddle, Black base, Chrome components..........asking $85.00 - New $130.oo

Mirage B2516-G 2m amp; 5 to 35 watts in, 160 watts out + preamp, fully tested OK...........asking $110.00 - New $329.00

Heathkit HD-1410 Electronic keyer, tested OK.....asking $15.00 - New in kit form $50.00

2051. Drone Aircraft Demo at February Membership Meeting

Yahoo group: GRARA
Date: 2013-02-03 17:47:40 UTC
From: W8DER
Topic: 2051 Message: 2051

Many thanks to Al, KC8OPU, for the demonstration of his fantastic drone aircraft at the February general membership meeting.

Pictures are on the club website along with a link to a PDF copy of Al's handout on Arduino Micro-Controllers.

http://www.w8dc.org

Thanks also go out to John Streyle, GRARA "Off Air" Director for setting up this demonstration. (He is going to have a tough time topping this program at future meetings.)

2053. OK, who's going to volunteer to be Field Day Chairperson?

Yahoo group: GRARA
Date: 2013-02-07 21:17:05 UTC
From: Hank Greeb
Topic: 2053 Message: 2053

I've been railroaded into being "on Air Dictator.... errrr, I mean Director, but that doesn't mean I need to do everything about Our Day in the Field.

I'd like to get a gang of idiots who are crazy enough, errrr I mean Operators who desire to operate from Calvin College who will set up a station or two or three. The likely candidates who are crazy enough, errrr I mean have done this before are:

SSB - 1 - Tom, N8DGD
SSB - 2 - Bob, KD8HNF
CW - Cortland - KA5S
VHF/Gota - Ron, K8DMR

These folks have been doing this for quite some time, so if you're interested in seeing the inner workings of how such a station goes together, please let me know and I'll set you up with one of these fellers. Or, if for whatever reason, one of the above is not available, since I'm just drafting them at this time, I may be out hat in hand, begging for help.

One thing of which I know is that we're looking for a tower and a beam of some sorts for the CW setup. We've done fair to middlin' with just a wire antenna, but several dB of extra ERP would certainly help. Does anyone have, or know the whereabouts of a 40 to 50' tower and a tri band beam with rotor? If so, let me know.

We'd also like to know if we have someone with cooking skills who'd like to throw together some sustenance for an evening meal on Saturday. The club could "probably" spring for the fixin's. It's a shame we need to go to the local beanery and miss an hour or so of prime time operating on Saturday evening.

Why am I talking about Field day in the midst of February, and a sn*w storm you may ask. Well, the ARRL has just announced that Field Day info packets are available. So, if you want to get the real skinny on Field day, look at
http://www.arrl.org/arrlletter?issue=2013-02-07#toc01
If the above link gets truncated in your e-mail folder see
http://goo.gl/bhIxM

Above all, please mark the 4th full weekend in June, or June 22 & 23 for Field Day. We hope to see you there!

From: Jason E. Gillikin, CPHQ
Topic: 2053 Message: 2055

Hi, Hank (and everyone else!)

I'm a fairly newly licensed fellow - Technician last summer - and y'all haven't met me yet, because until just this month, I've had an obligatory meeting on the first Friday of the month that conflicts. Starting in March, and thereafter, the conflict vanishes.

I'm eager to meet everyone and contribute to GRARA. I'm also studying for General. I'd love the chance to soak up the wisdom from a few elmers out there.

Is there anything I can do to assist with Hamfest? I do, for example, make a mean vat of lean turkey chili ..

Hank,
I have a 60' portable tower that was used at last years field day, with a 2 & 6 meter and 70 cm antennas. I will be glad to bring it again. Ron K8DMR provided the antennas. I all so have a small beam if it is needed for 10,15,20 meter bands.

2059. New Ham's Dinner, Saturday, February 16

Yahoo group: GRARA
Date: 2013-02-10 20:45:08 UTC
From: Hank Greeb
Topic: 2059 Message: 2059

The "New Hams' Dinner," for the Grand Rapids and surrounding area will be held Saturday, February 16th, at 2:00 p.m., at the Old Country Buffet, 1038 28th Street, Wyoming, MI. Any "new" hams, licensed within the past year, or hams who have moved into the area will receive a free meal. Others are asked to contribute $9, which includes the meal, drink, and gratuity fee.

Door Prizes, lots of eyeball QSO's, etc., are on the agenda.

Come one, come all! See you Saturday afternoon.

Hello Hank, thanks for posting info for the New Hams Dinner. I was just sitting here trying to compose a notice for the web page.

I am still a little short on info. Can you help? It is sponsored by the _Grand Rapids Amateur Radio Club_, the _Michigan Amateur Radio Alliance_ and the _Lowell Amateur Radio Club_? The dinner is for the purpose of _____. All hams are welcome. New hams in the area are guests of the radio clubs. (new hams and hams who moved to the area in the last year.)

Having not gone to this in the past, I really don't know much about it. I might just come this year, since it is only 6 miles away.

Can you help me with a few words?

Mike

2061. Anyone for the ARRL DX (CW) contest this weekend?

Yahoo group: GRARA
Date: 2013-02-11 17:45:03 UTC
From: Hank Greeb
Topic: 2061 Message: 2061

Just curious. It's from 0000Z Saturday Feb 16, through 2359Z, Sunday, Feb 17. That's 7 p.m. Friday to 6:59 p.m. (EST) Sunday for the dolts among us (like me sometimes) who can't figure out Zulu time.

Probably would be good practice for the upcoming 160 SSB contest. :)

See
http://www.arrl.org/files/file/Contest%20Rules%20PDFs/2013/2013DX-Rules.pdf

Since that will more than likely be truncated the following will also work

2062. Video Payload: iHAB-9 T-minus 3 Days

Yahoo group: GRARA
Date: 2013-02-13 16:27:49 UTC
From: Hank Greeb
Topic: 2062 Message: 2062

FYI for anyone who may be interested in this iHAB-9 launch and tracking.

Subject: Fw: Video Payload: iHAB-9 T-minus 3 Days
To:

1. iHAB-9 Launch Announcement

The iHAB Team is excited to announce the next launch of the iHAB Project! iHAB-9 is scheduled to launch February 16, 2013 at 16:00Z (9AM CDT). In conjunction with Engineers Week 2013, sponsored by Cedar Valley Amateur Radio Club (CVARC), Collins Amateur Radio Club (CARC), and Rockwell Collins Inc in Cedar Rapids, the Iowa High Altitude Balloon Project.

Engineers Week celebrates the positive contributions engineers make to society and is a catalyst for outreach across the country to kids and adults alike. Engineers Week is part of many corporate and government cultures and is celebrated on every U.S. engineering college campus.

This year?s Engineers Week theme celebrates you?engineers, engineering students, and technicians?and all of the amazing things you do everyday to make the world a better place.

Launch Date/Time
February 16th, 2013
Webcast: 14:??Z - 8AM CDT
Launch: 15:??Z - 9AM CDT

Launch Location
North of the Rec Center - Building 154 - on the Rockwell Collins Campus
Cedar Rapids, Iowa.
N 42. ?314??, W -91.6479??

Payload includes a new "micro" 20 Meter QRP CW beacon designed and built by Dave Cripe - NM0S, Hi-Def Video, and 1.2Ghz live video downlink. The CW beacon controller is a new version (not yet available for purchase) of the EZKeyer from 4SQRP. The EZKeyer v2 has expanded memories, AND beacon mode!

2063. Skywarn Training -- you must register again to get a TICKET.

Yahoo group: GRARA
Date: 2013-02-15 13:42:49 UTC
From: Mike W8DER
Topic: 2063 Message: 2063

Hey guys, I noted in my email this morning that everyone has to register again for Skywarn Training so that they can send you a TICKET. If you registered or not, you need to fill out the short form again.

Then they send you a confirmation email where you have to click the _here_ link to see your ticket. You need to print the ticket for preferred entry into the training.

2064. Errata: Correct link for the ARRL DX (CW) contest this weekend?

Yahoo group: GRARA
Date: 2013-02-15 14:49:00 UTC
From: Hank Greeb
Topic: 2064 Message: 2064

Shucky durn: A kind fellow ham told me the link I had about the ARRL DX contest didn't work. I tried it, and sure 'nuff, it didnt' work.

Don't know whyt the original link doesn't work, it's exactly what appears on the top of my browser, but here's a link for a not so convenient form of rules.

http://www.arrl.org/arrl-dx

Even if you're in the contest, take a break for the new hams dinner - Saturday afternoon, at 2:00 p.m., at the Old Country Buffet located at 1038 28th Street SW, Wyoming, Mi, near Rogers Plaza! Cost for new hams, "Free" - cost for older hams and us real olde fogeys,$9.00 including tax and tip.

2065. Antique radios

Yahoo group: GRARA
Date: 2013-02-15 23:13:24 UTC
From: w8qz
Topic: 2065 Message: 2065

I've received (4) pictures of the antique radios I mentioned a few weeks ago.

They're posted on this group, photos, under W8QZ antique radios

http://groups.yahoo.com/group/GRARA/photos/album/544986850/pic/2120158774/view?picmode=&mode=tn&order=ordinal&start=1&count=20&dir=asc

The radios are located in Kalamazoo. The owner (my co-worker) is looking to get a 'reasonable' price for them (to be negotiated). He can be contacted at: erin.moore@... Please contact him directly.

The larger radio (Zenith 5678, AM & SW) is apparently from about 1940. It uses 6V tubes. The owner says that as far as he knows, the 'guts' are complete. At least one of the knobs is not original, and some of the buttons (for preset tuning, apparently) on the front are broken.

The smaller radio (Zenith 7K01 with 'tube saver', AM / FM) is approximately 1950. It uses a string of tubes set up for transformerless. The owner says it was last turned on about 25 years ago. (I explained to him the reason why he should *not* try turning it on now).

www.radiomuseum.org has a lot of info.

2066. Re: [GRARA] Antique radios

Yahoo group: GRARA
Date: 2013-02-16 00:40:06 UTC
From: R. Mark Barnett
Topic: 2065 Message: 2066

The Zenith 7K01 is an AWESOME radio. I'm not a collector, a radio has to pull its weight for me to keep it. I gave the last one I had to my dad, he loves it.

They both look like good project radios, if I didn't have so many projects going I would jump on the console. THANKS for posting these!!! I showed the console to my wife.... SHE thinks I should buy one pre-restored if I like it... I'm NOT going to argue with her... LOL So thanks!!!!

I WAS going to get a Tecsun PL-660 to replace my Sangean ATS-909.... maybe I'll just get an old Zenith with SW, as most of my listening is to Spanish broadcast SW anyway.

Mark B. N8PGV

160:	0	0
80:	13	12
40:	30	24
20:	42	30
15:	53	38
10:	22	19
Total:	160	123 Total Score = 59,040

Club: Mad River Radio Club

Comments:

Part time - Fish Fry on Friday evening until 0230Z. Saturday a "New Hams" luncheon (Yep, I attend those even though I've been licensed for more than 1 year). Family activities on Sunday. And these olde bones need rest. Goal was 150 Q's but figured I'd have a few N1L's or other errors of my ways, so I found 10 others, including several extra multipliers!

80 and 40 were surprises, with a cloud warmer antenna and a giant 5 watts output I figured close to zilch for those two bands. 10 was a pleasant surprise! 15 a workhorse, and 20 its usual crowded conditions, wall to wall and treetop tall between 14000.5 and 14099.5 much of the time.

Thanks to all who pulled out my pipsqueak signal amongst the QRM and ambient noise. As several of my colleagues are wont to say, "All the credit goes to the receiving station who has to copy the signal from the QRP Station." I'm very sure these folks use it as a "term of endearment" toward the person who chooses to run <5 watts.

And thanks to the organizers @ ARRL HQ!

From: Hank Greeb
Topic: 2072 Message: 2072

Please listen around 1845 ? QRM this evening and give N8CC a call if you hear us. We'll be camped out around that area of 160 meters for the CQ 160 SSB contest. And, while you're at it, I'll betcha a dollar to a donut you can work quite a few other station on 160 SSB this evening. Rules are at http://www.cq160.com

Yes, Jeff, N8CC runs a full gallon, but I'm sure we worked a host of Low Power stations and quite a few QRP ops.

So, you don't need to run anywhere near a full gallon to do some serious work on 160 Meter sideband!

Conditions were fair to middlin' on 160 last evening/early morning today.

2073. ARRL DX (SSB) Contest Apr 2 - Apr 3

Yahoo group: GRARA
Date: 2013-02-28 15:41:40 UTC
From: Hank Greeb
Topic: 2073 Message: 2073

Yup, it's that time of year again, The ARRL DX Contest is upon us:

From: http://www.arrl.org/arrl-dx

Time: First full weekend in March (March 2 - 3, 2013)
Contest Period: 0000 UTC Saturday through 2359 UTC Sunday.

This means that we can fire up W8DC for this contest immediately after the meeting Friday evening (actually our meeting starts at 0000Z Saturday).

I may or may not be there, (we've been "semi-invited" to a "fish fry" which I can't pass up) but (I think) we have a Logging program installed in the computer, (n1mm? n3fjp?) which can be used for logging.

Rules are at: http://www.arrl.org/arrl-dx

Note that 20 meters has been open quite often into the evening hours. But the best time for operation for 20, 15, and 10 meters would be daylight, Saturday or Sunday. Anyone want to open up the building for this event? Please lettuce no of this possibility and time(s).

2075. Hammarlund HQ 145X sell or trade

Yahoo group: GRARA
Date: 2013-03-02 17:40:56 UTC
From: qschultze
Topic: 2075 Message: 2075

Hey, gang.

I've had an HQ 145x for decades and just fired it up to check it out. Works like a charm. The original bezel on the clock is cracked, but I managed to find a replacement to pop in as soon as I have a little time.

Believe it or not, the rig has not had any modifications; yep, even original capacitors. I notice a little bit of low-level hum, so I would replace the PS caps at some point if I kept it. I think I have some replacement tubes, too, but that will take me a while to track down in the boxes upon boxes of stuff in the shack. I think I even have a couple replacement knobs somewhere in the effluvia.

Also, get this: I have the original, matching speaker, which is larger than a lot of HF rigs these days! It's a rare find.

Anyone interested in adding this to their collection? We would have to figure out what it's worth. Or maybe a trade idea -- with cash or whatever, either way?

Read the eham reviews here:

http://www.eham.net/reviews/detail/8592

Here are some specs and a good image of the rig:

http://www.shortwaveradio.ch/radio-e/hammarlund-hq145x-e.htm

I found an image of the speaker on an old eHam classified site:

http://www.eham.net/classifieds/detail/346874

Here's a YouTube demo of the rig in action:

http://www.youtube.com/watch?v=DyUN-lNT37w

Interested? Talk to me. I don't want to peddle this beauty on eBay. It deserves a home where it will be loved.

Quin, K8QS

qschultze@...

P.S. The audio dynamic range is amazing. So is the selectivity on the AM broadcast band. It's a real kick to tune around.

Misprint..??
Is this a HQ-129-X?? (Don't recall a 125-X)
May I get my 2 cents in?
If a 129-X......
I have had two of these receivers.   Sold the last one a couple years ago.
This is a great radio.
Hammarlund didn't make anything that wasn't.
The HQ-129X is an outstanding product that should give many more years of
great service.
On a scale of 1 - 10...this is a 12.

Info only!!

Quin,
Check out "Simple Headset Adapter for the IC-706 Series Radios" July 2007 QST. The adapter uses a different plug, but could be changed to an 8 pin.

The problem is more than the just the plug. Until recently ICOM was the only radio mfgr using a particular mic tech that that put out a higher voltage than others. Consequently their preamp didn't have enough gain to handle the lower voltage of the other mic technology. They changed the preamp to be able to handle both about 5 years ago. If you can't get an older mic from ICOM then the only other choice I know about is the Heil 'ICOM' mic element

2099. Only Four Weeks until the Michigan QSO Party (April 20)!

Yahoo group: GRARA
Date: 2013-03-23 01:00:35 UTC
From: Hank Greeb
Topic: 2099 Message: 2099

I received a message today from the Ontario Folks about their Ontario QSO Party on April 20/21. This jogged the (lack of) grey matter between my ears, and reminded me that we have the Michigan QSO Party coming up on April 20, from 1600Z, until April 21, at 0359Z. That's noon to midnight Saturday, EDT.

Why don't we plan to activate our club station, W8DC, for this event? There's an "EOC" classification, which, since we're located @ Red Cross, should qualify us for this class.

I can't make be @ W8DC, because I'm planning and annual QRP-Dxpedition to a "fairly rare" county which has a non-existent or no record for QRP fixed station operation. Looking around, I found that Ionia County is a nice choice, right next door to Kent County. To top it off, I was talking with Bob, KD8HNF, and he offered his remote site south of Saranac, complete with heated shack, beam antenna, and all the conveniences of a home shack! Thanks, Bob! So, I'll be there with my "mighty five watts" on both SSB and CW. Please look for me, I'll be running with the QRP Amateur Radio Club International Club Station Call K6JSS/IONI.

Please "talk up" MiQP at the club meetings, and with fellow hams with whom you have contact. Lettuce make MiQP 2013 the biggest and best ever!

Historically EOC requires that your location is an official EOC with state or county emergency people, I wouldn't just declare station to be an EOC. I worked at an EOC in washing once and it was a lot more than a radio room at RC

Steve:

Lettuce not quibble over details. I haven't seen a"full blown" emergency situation here in Michigan during mystint here (6 years). A "full blown"emergency in my experience, is where the Red Cross is fully engagedin disasterrelief for a week or more. In Ohio, where I was intimately associated with the Cincinnati Red Cross for some 40+ years, the majority of the building was changed into an emergency operating center when the Ohio River and/or tributaries flooded, or aSn*w emergency was declared and folksneeded shelters, or a tornado hit and damage assessmentand housing was needed for those hit.

In Michigan the State Police and County Police seem totake a more active part in managing emergency response. And there doesn't seem to be nearly as many emergencies as there were in the flood prone, tornado prone Ohio River Valley. But, I believe that here in Michigan, a major reason that a ham radio station is co-located within a Red Cross chapter is to provide communications in times of emergency.

You'd need to ask the local Red Cross HQ if the location at 1050 Fuller Avenue NW is considered an Emergency Operating Center ifand when theRed Crosswould be called outfor disaster relief. If I were a betting man, and had $10,000 extra tobet (like one recent non-winner in a Presidential Election), I'd bet that it would be considered an EOC.

But, ask WD8USA, KD8CAN, or the Disaster Committee Chair at thelocal Red Crossif you wish a definite answer.

And, if the response comes out "No, we in the Red Cross are NOT considered as capable of responding to emergency or disaster relief" I'll be a bitsurprised. But, even then, we could still open up the shack and operate as a multi-op ClubStationjust for practice in whatever non-emergency situationduring which Red Cross needed communications.

Steve:

Within Red Cross, here in Grand Rapids, there is a "commercial communications center" with 47.42 MHz and VHF communications facilities, which are used for routine "business" of the Red Cross on a day to day basis. And, I suspect that, in the various counties in Michigan, some have amateur radio facilities inside their facilities, others do not. I personally know that Kalamazoo and Grand Rapids chapters have amateur radio facilities which would be used in case of a large scale emergency.

We are fortunate, from a physical standpoint, of not having many natural disasters. We are unfortunate, from a training and recruiting standpoint, because of the same. In Cincinnati the best ham radio emergency response organization typically existed within six months to a year after the most recent flood or tornado. Hams would flock to the Queen City Emergency Net (Red Cross) and the Hamilton County Radio Amateur Service (RACES/ARES) after each such disaster, but 3 or 4 years later many would drop out because they did not see the "immediate" need. The Weather Amateur Radio Network (similar to Skywarn here in Western Michigan) had regular exercise due to weather bureau call ups for tornado watches and warnings but unless there was a F4 or F5 tornado involving a large swath of damage, this was hardly a blip on the recruiting map for the amateur radio response organizations.

The official name of the local chapter is "American Red Cross of Greater Grand Rapids" and has administrative responsibility for chapters in Ionia, Montcalm and Barry Counties,

For a more complete description of the history and current mission of this chapter, see
http://www.redcross.org/mi/grand-rapids/about
I don't claim to be and expert on this chapter.

I'm not familiar with the organization in the State of Washington. But, according to the web site run by the State of Washington, the EOC in Olympia is the State Emergency Operating Center. See
http://www.emd.wa.gov/about/emergency_operations_center.shtml,
There is a similar State EOC in Lansing, Michigan.
I'm sorry to say, but the Michigan State web page is organized to such an extent that a search for "State Emergency Operations Center Michigan" doesn't come up with a home page similar to that of the State of Washington. The best I can do is refer you to the page of the Michigan Department of Homeland Security:
http://michigan.gov/msp/1,1607,7-123-1593_3507---,00.html
It seems to me that each state government is responsible for its own emergency response plan. Here in Michigan we are blessed with the State being intimately involved with man-made disasters through local Sheriff's departments. I haven't seen the Emergency Operating Center at the Kent County Sheriff's office but I believe it exists.

I'm not sure of the extent of involvement of our local Red Cross during a civil emergency. I do know that our Red Cross is often alerted and responds when there is a multiple-alarm fire in Grand Rapids, and that we are subject to call if the need is large enough to require backup communication.

Thanks for questioning my statement about Red Cross and Emergency Operations Centers. It has caused me to look more into the organization of Red Cross locally and throughout the State of Michigan.

Jack:

Glad you asked:
==========
From the rules: http://www.miqp.org/Rules.htm

(d) Emergency Operations Center (EOC) Station - Michigan entries located at an established EOC site, activated by an individual or group. An EOC category entry may utilize permanently installed equipment and antennas, or equipment/antennas temporarily installed at the EOC for the event." EOC entries are not categorized by the number of transmitters, the power used, or the number of operators.
==========

The rules do NOT say who defines a place as an EOC. But, Joe, WD8USA confirms that Red Cross and W8DC would be used in a large scale emergency. We frequently practice in ARRL's annual Simulated Emergency Test @ W8DC. It seems to me that if a station is in a location which has been, and will be used to communicate and dispatch during natural and civil emergencies, that qualifies it as an EOC.

So, IF affiliation of GRARA with the Red Cross and the location of W8DC within the Red Cross building does not qualify it as an EOC station, then I punt. I shall say nothing more on the subject. I wonder sometimes, why we have such disgustions. (yes, that's not a typo.)

Note, more than once, a SATERN group (SALVATION ARMY TEAM EMERGENCY RADIO NETWORK) activated at or next to a Salvation Army center here locally and participated in the Simulated Emergency test as an EOC. I'm not sure if any SATERN group has operated at one of their EOC's during the MiQP, but I'm >>>99.44% sure that they would qualify. Methinks we picketh @ nits concerning the definition of "Emergency Operations Center."

2107. Webinar about CQ WPX Contest on the web

Yahoo group: GRARA
Date: 2013-03-26 20:26:02 UTC
From: Hank Greeb
Topic: 2107 Message: 2107

For the contesters, and wanna be contesters in GRARA, The CQ WPX contest is an easy one in which to get one's feet wet.

And, there's a good webinar concerning the CQ WPX by K5ZD, the outgoing CQ WPX manager, now on the web @

http://wwrof.org/category/webinar-archive/

Lots of info, somewhat pedantic, but worthwhile if you plan to be in either the Silly Side Band (this weekend) or the Corn Whiskey version (May 25/26) of this contest.

I'll be operating with my usual "mighty" 5 watts, using WQ8RP, the Michigan QRP Club call, in the CW version on May 25/26. The call WQ8RP is such a tongue twister that, after trying it on one Silly Side Band contest, I took a vow NEVER to try it again on SSB. (but WQ8 has been a "unique" prefix in the past few WPX contests).

2108. Ham Radio on Isle Royale National Park

Yahoo group: GRARA
Date: 2013-03-27 05:39:15 UTC
From: unclefesterman
Topic: 2108 Message: 2108

Topic came up at Scouts Tuesday evening; someone told me ham radio wasn't allowed on the island. Well, I looked it up and all I found was an emphasis on Marine band VHF, Weather stations, and thye NPS business repeater on 169.somewhere.

Another website says that two 5W handhelds can reach each other pretty much anywhere on the Island.

Honestly, all I can think it could possibly is a restriction on HF due to the park's proximity to Canada. Anyone know for sure?

Of course you know 440 is limited on this side as you approach the Canadian border - there was a question about that on the test. HF should be no problem unless there is a NPS restriction but I would be surprised by that especially since I have worked from many National Parks. Note that there is a Parks on the Air just as there is an Islands on the Air

Topic: 2108 Message: 2115

I suggested privately that, to be sure, before going to Isle Royal for a Scouting event which is intended to include Ham Radio, the scoutmaster should contact the Isle Royal National Park HQ in Houghton, Michigan. That was the recommendation of Dan Henderson, N1ND of ARRL's Regulatory and Advocacy department.

The local management of Isle Royale has the final say in what is permissible.

As for IOTA, islands on Inland Lakes and Rivers do not qualfy. From the IOTQ Q&A website at http://www.rsgbiota.org/info/directory/faqs-en.pdf < http://www.rsgbiota.org/info/directory/faqs-en.pdf>
WHICH ISLANDS COUNT?
To count for IOTA islands need to meet a few simple rules relating to location. They must not lie in rivers, inland lakes or seas, or largely enclosed bays.

2117. Re: Scouting's 2013 Jamboree on the Air

Yahoo group: GRARA
Date: 2013-03-29 15:28:29 UTC
From: unclefesterman
Topic: 2111 Message: 2117

Already on it.

I just completed a year-and-a-half "working my tickets" period for Woodbadge (business-level Scouting management training), and one of my 5 ticket items, International Scouting, had a huge ham component.

I first had to get a license! I've been "into" anything radio waves since I was 6. Ham license was, like so many, "next month", even though all I really had to learn was the ham-specific stuff (I had Commercial 1st-class in high school and later added microwave & radar). I got my Tech in time to help set up a HF station at the Michigan Int'l Camporee last July (my Troop hosted a unit from Budapest). General came later, only 47 years late. Gonna "test the waters" Saturday with the last test in Lowell.

I put a huge chunk of research into JOTA. I was supposed to interview Scouts from at least 25 separate JOTA activities, but had to scrape the barrel to get 10. This is a shame, since JOTA should be a bigger ham recruiting tool than all other public activities combined.

From surveys, I've found the biggest JOTA killers are PROPAGATION and POOR PLANNING-- and the two go hand in hand. The most common complaints were along the lines of, "All we did was watch some old guy fiddle with knobs & buttons" and "All that work studying to get a license, just to talk to Jenison?"

Jumping to "NOW": the link posted the post before is dead; Lowe Peninsula is now "Michigan Crossroads Council", and the 616 & 231 area codes are the "President Ford Field Service Council". Website is [url]www.michiganscouting.org[/url]. It hits all 4 FSC's. Merger's been a PITA, but they're really pushing International Scouting statewide now, and I'm jockeying for a position on their committee.

We can discuss this more at an upcoming meeting, but what I'm looking at and dialogueing with COuncikl is:

For Grand Rapids area, a common location (Council?). The more other Scouts a Scout sees, the more interested he'll be. More radios and operators in one place means less of the dreaded "dead time". Opportunities for demos & presentations-- that QSL from the aircraft carrier Hornet, for example, carries a lot of weight with the Scouts. The new ATCS radio-based railroad signaling system does too, even though it's not ham. VHF/UHF hams should be DELIBERATELY PLACED all over the area who just "happen" to be on, doing something interesting, and/or have a story to tell. In short, everything planned.

Scouting introduced a new International patch; it now involves some work beyond the old one. Cubs need ONE year's JOTA, Scouts and adults need TWO. So, demand for JOTA will go up.

I'm currently discussing options for something at Council; so far there's been SOME interest in considering semi-permanent/permanent power for the parking lot, both 120 & 220. (we wouldn't be the only people using it). taht's wher it stands right now.

Happy Easter!
Jerry

I guess I didn't make my points clear. 1) if there is a restriction other than 440 and above which is a Canadian bands restriction and not a parks restriction then it specific to that park because many people including me operate from other parks
2) that park is fairly unique in that it could be activated as both IOTA and POTA at the same time

If anyone is really planning to go to Isle Royale for the purpose of putting a US Island On the Air (see http://www.usislands.org/) or if boy scouts wished to combine a camping trip with Ham radio, it would be very easy to call the Isle Royale Headquarters in Houghton, Michigan, at (906) 482-0984, explain what you plan to do, and get a ruling on whether this would be permitted. It has been activated as a US Island and has a US Island number of MI001L, qualified by K8CJQ, so it appears that at one time, at very least, ham radio was permitted.

See http://www.rsgbiota.org for details on what constitutes an Island under their regulations. Isle Royale does not, I repeat, does not, qualify for RSGB IOTA.

As far as I can see, there is no mention one way or the other about Amateur Radio on the NPS web site for Isle Royale National Park.
See http://www.nps.gov/isro/index.htm

Telephone is cheep these days. If someone cannot afford a phone call to Houghton, please let me know and I'll make the call.

As far as operating from the parking lot next to the NPS HQ in Houghton, you'd need to contact whatever group keeps track of US Parks on the Air. It certainly wouldn't qualify for a US Island.

In case you haven't noticed the little counter on the front page of our W8DC.org web site, it passed 20,000 visitors this week. (20032 to be exact). Our last benchmark was when it passed 5,000 visitors on February 2, 2008. This is great news -- it makes all the time spent worthwhile.

Remember:
For daily chatter, questions and information, check-out our Yahoo group, http://groups.yahoo.com/group/GRARA/

For longer term information, check-out our website, http://www.w8dc.org

It's even getting better!

One thought ... it might be a Twitter handle based on someone's network ID. For example, students at Western Michigan University received logins based on first initial, last number of enrollment year, then first five characters of last name. Thus, a hypothetical student named Ned Mut who enrolled in 2007 would have an ID of n7mut. Not saying this other person with your call sign is a WMU student, but there are some odd ways to identify people out there.

Greetings

It doesn’t appear that a person is using your call, but it’s being used as a shortlink (example: http://twitition.com/n7mut) to a Petition site

to telecast what I am guessing is a soccer match. I think the fact it’s using your call is just a random chance.

2130. 3 State QSO Parties this weekend

Yahoo group: GRARA
Date: 2013-04-12 00:48:17 UTC
From: Hank Greeb
Topic: 2130 Message: 2130

If you want to "Warm up" for the Michigan QSO Party, there are State QSO Parties this weekend. Any any one (or all) of the following would be good practice for next weekend

Montana QSO Party: 0000Z, Apr 13 to 2400Z, Apr 14, rules @
http://www.fvarc.org/sites/default/files/library/2013%20MT%20QSO%20Party%20Rules.pdf
or, if that gets truncated in transmission, try
http://goo.gl/W7TLG

New Mexico QSO Party: 1400Z, Apr 13 to 0200Z, Apr 14,rules @
http://pages.swcp.com/~n5zgt/nmqsoparty/documents/NMQP_forms.pdf
Or, if that gets truncated in transmission, try
http://goo.gl/iColy

Georgia QSO Party: 1800Z, Apr 13 to 0359Z, Apr 14 and 1400Z-2359Z, Apr 14 rules @
http://www.georgiaqsoparty.org/
no multiplier for QRP operation

Have fun! Note - for the low power nuts - all these have a QRP category!

There's a Russian contest for the DXers:
Yuri Gagarin International DX Contest: 2100Z, Apr 13 to 2100Z, Apr 14
Rules @
http://gc.qst.ru/en/section/32

Seems like a full weekend of contesting.

There's a group that meeting most evenings near the bottom of the phone section of 75M that exchanges pictures using EasyPal. I had installed the sw and listened for awhile (but discontinued it as some of the pictures were a bit risqué, in my opinion). The pictures are relatively high resolution JPEGs (roughly 200k if I remember correctly), and have some sort of error correction. However, it appears to take a very strong signal - as it seemed like the only successfully received pictures were S9+. If you didn't get a complete picture, you got nothing. It also *completely* occupies the full bandwidth of a normal SSB transmitter. A significantly different mode from standard SSTV, etc. Let us know what you find out.
It could be used on VHF FM, perhaps?

2138. MiQP K6JSS(N8XX) Single Op QRP

Yahoo group: GRARA
Date: 2013-04-21 07:13:11 UTC
From: Hank Greeb
Topic: 2138 Message: 2138

Michigan QSO Party

Call: K6JSS
Operator(s): N8XX
Station: KD8HNF

Class: Single Op QRP
QTH: IONIa County
Operating Time (hrs): 12

Summary:
Band CW Qs Ph Qs

80: 62 28
40: 114 126
20: 29 17
15: 0 0
10: 0 0

Total: 205 171 CW Mults = 76 Ph Mults = 71 Total Score = 85,554

Club: Mad River Radio Club

Comments:

Wow! What a ride. 20 was so-so, 40 lasted until the bitter end,
though it went long and sparse, but still some of the Michigan stations
were workable, 80/75 was surprisingly good after dark, but with many
stations staying on 40 it got sparse toward the end.

Best personal results for a MiQP - beat my old record by almost a factor
of two. This was greatly enhanced by the use of KD8HNF's remote site
(Tnx, Bob), high on a hill in IONIa county. Also, a rare county (seems
like the other IONIa fellow must have been tied up with flood relief
work because the Grand River was flooding in Saranac - Wow! I barely
made it to the site because of the flood south of Lowell!

Thanks to QRPARCI for use of K6JSS call - no one asked for a QRPARCI
number, though I announced that I'd be happy to give one which would
help in the BIG 13 challenge for the year 2013.

Worked quite a few of the mobiles - tnx for digging down amidst the
pileups to pick out the QRP signal!

Worked W8DC at least once, nice going gang!

And, thanks to the organizers of the event!

2140. Any other GRARA Entries?

Yahoo group: GRARA
Date: 2013-04-22 00:08:23 UTC
From: Hank Greeb
Topic: 2140 Message: 2140

If we have 3 entries from a single club, we can enter for the club aggregate category. This would NOT disqualify individual entrants as W8DC, K6JSS, and ??? The scoring team would add up each individual score,and list it as "Grand Rapids ARA" in the final tabulation of the contest. But,we need at least one more entry.

I'm also >99.44% sure we wouldn't have a chance of winning the plaque for the highest club aggregate score, but we could get GRARA's "name in lights." Publicity never hurts.

Just a thought, before I submit my log from K6JSS.

2143. WWV Mystery

Yahoo group: GRARA
Date: 2013-04-22 15:42:36 UTC
From: sfkaney@...
Topic: 2143 Message: 2143

I woke up way late today because 3 of my 4 atomic clocks are reporting it was 8AM when it was 11AM. So I turned on WWV and by voice it is saying 13:00 when its 15:00 UTC or 9:00 MDT or 8:00 MST. I can't decode the digital part of the WWV so I don't know if that's where the clocks are getting the time but I would expect so. What's up with that?

PS 4th atomic clock is reporting correct time. Three of the clocks including the one that is correct are Oregon Scientific (2 weather stations and a SAME radio), 4th that is also off is a Sony shortwave which says its 13:00. On all cases the minutes agree but the hours are different

It usually gets a good signal but there was a while yesterday when the antenna icon was off. When it isn't getting a signal it keeps ticking away like a regular clock. For the hours to be off but the minutes to be correct implies they were getting bad info in the signal they were receiving. Allstate is fine today.

Ooo. The website indicates that some devices have just been obsoleted due to a change in the way they modulate. I don't know if that applies to my devices or not. But they're working today.

It surprises me that the signal is MF and not HF as I had thought. I wouldn't think that MF would have propagation to reach the whole country

Sometimes the simplest reason is the right one--

Replace the clock battery. Clean the battery contacts while you're at it. Actually, just opening it, saying "What should I do now? Awww, forget it!!" and closing it up is enough (accidental) cleaning to fix the problem. I've seen these clocks wander all over just from someone walking by and shaking the mass-produced floor.

As for 50KHz, just like WWL in Cincinnati (700K), it's a multiple of the Canadian Shield of limestone most of the contiguous USA sits on.

Are you retired? Or can you leave your work for a day or more to help out? Red Cross needs YOU! Call Red Cross at 616-456-8661 - ext 3521 and volunteer. This won't involve ham radio, and probably won't involve communications, but help is needed. The cleanup is expected to last well into next week - and Red Cross will be involved in various relief efforts.

As Jim said in an earlier message, there's no communications emergency. But, Red Cross can use several (probably many) more volunteers to help with various tasks. Nothing glamorous, but surely necessary.

For example, Steve Provost, KC8WQL, has been helping with various things, including his specialty, technical support of the computer system at 1050 Fuller.

Jim, KD8CAN, was spotted @ Red Cross HQ on Monday. Didn't have time for a chat, so ask him what he's been doing if you get a chance.

There are probably other GRARA members who have been helping - but I haven't run across them.

I've been helping fill "clean up kits" for distribution by ERV's and at shelters for the past two days, but can't be full time. Americorps volunteers are doing much of this work, but welcome help.

I'm only a "grunt" so don't know any details of needs, except the people at 1050 Fuller seem to need considerably more help. So if you can help, call Red Cross at 616-456-8661 - ext 3521 and volunteer. Don't be afraid to get your hands dirty. It won't be pushing a mike button and handling communications traffic, but you can be sure it will be needed.

And, don't be surprised at periods of "hurry up and wait" - scheduling of supplies, etc., from outside (and even within the area) can be difficult - so if you get assigned to go somewhere, and supplies, or other personnel, etc., aren't immediately available, it won't be the first time. I was asked to be @ Red Cross Monday for assignment to "clean up kit duty" but the warehouse and supplies weren't available when expected. Instead, I did a few "gopher" jobs and came back yesterday after things got set up.

As one staff person said, this is the largest flood in recent history - so things are a bit chaotic, and they're all learning.

2155. WWV, batteries and stuck bits

Yahoo group: GRARA
Date: 2013-04-24 12:53:50 UTC
From: Jerry L. Elya
Topic: 2144 Message: 2155

A fascinating problem. That's why I love troubleshooting.

Can't be a stuck bit in the signal; you're the only one with the problem.

Most clock batteries fade due to age and not due to current draw. See, household batteries aren't "charged", they have a set amount of energy AVAILABLE from chemicals; when used, they don't "discharge", but their internal resistance increases as by-products are created via use. There's actually a LOT of untapped power available that's blocked by these byproducts-- solving this issue is the Holy Grail of battery engineers. When the internal resistance drops most of the created voltage, you have a dead battery. That's also why a dead battery shows a substantial voltage even though it's dead.

Could it be a stuck bit at YOUR end? YES. Iffy solder joints, defective printed circuit board traces, undocumented/untested revisions, even bad programming-- all contribute to mass-produced equipment being far less identical to one another than what you'd expect. Michael Collins (Apollo 11) pointed out that x-raying every single wire, part and even bolt accomplished nothing other than a dozen highly-individual spaceships.

Supply voltages and available current vary wildly throughout the circuitry. Don't forget, batteries have impedence too, and it's connected to every component on the board (think about it: V+ and ground). Impedance affects radio. I used to DX LW, MW & SW, and always used the "Radio Shack Reds"-- shorter life but allowed far better sensitivity, which I proved many times by swapping them for Alkalines and the whole band drying up. A sad day for me when they stopped making them (mercury content).

SO, back to your problem:

Off by exact hours/minutes/seconds means it's screwed up in the BCD section. Slowly changing error means the free-running clock is fast/slow AND the BCD isn't getting used.

happening at the hours stage? Well, that's when the processor is checking your preferences and changing UCT to local time zone. This takes extra processor steps. Extra steps take extra current. EXtra current increases voltage drop across stray resistances. Extra drop leaves less voltage to run things. Bits drop out, or too low to be read correctly.

And here's the fun part: It happened over and over too fast for the display to dim.

NOW, WHY INTERMITTENT? Well, batteries do that. Quite a few op-amp circuits gave a battery bypass cap. I've had three radios over the years where I had to put the radio on battery power and tap every cap with a screwdriver handle until the shop fills with static. Ever swap batteries around in a TV remote and it works? In theory it shouldn't work, but don't tell that to an 8-year-old. If you can fix intermittents, you can fix anything.

SO, I'll stick with the replace-battery diagnosis. Although you won't have that grand "AHA!! IT WORKS!!" moment, the problem will go away--until the next time the battery gets low. Give it a try withya NEW battery and let me know. I'm accidentally right far more often than I'm stubbornly wrong.

I've been reading this thread... I have a Sharp and an Oregon Scientific... I didn't notice anything out of the ordinary... The Sharp is on my TV stand and I use it quite a bit... The Oregon Scientific is my alarm clock.... I only look at it twice a day, so it "could" have been off at some point, but it has been waking me at the right time.
I have never had a problem with them even when the battery is low... the displays just loose contrast... It took almost an hour for the Oregon Scientific to change to daylight savings time, the Sharp made the change immediately...

2159. Field Day T-Shirts, etc.

Yahoo group: GRARA
Date: 2013-04-25 13:44:49 UTC
From: Hank Greeb
Topic: 2159 Message: 2159

I'll be collecting orders for Field Day T-Shirts at the May meeting (May 3)

T-Shirts are available in sizes Small thru 4XL. Cost is $12.95 each, so I'll be collecting $13 each, payable by ca$h or Check (payable to GRARA). There's a special 15% off, and $10.50 shipping, so we should at least "break even" on the order. If any $$'s are left over, it will go toward the club's treasury.

There are also several other items associated with Field Day offered on the web site, which may be of interest. I can combine the order and get the favorable discount and shipping charges. If you're interested, in anything else, please look at the ARRL web site at

http://www.arrl.org/shop/Field-Day-Supplies-2013

I'll get the order in promptly. A few years ago we waited until a couple weeks before Field Day and many of the sizes were sold out. So, if you're interested in this offer, please don't dally, because the order will go in a few days after May 5. We should have the completed order for the June 7 meeting.

2160. Kalamazoo S.M.A.R.T. Club Dayton Bus Trip Update

Yahoo group: GRARA
Date: 2013-04-25 19:17:36 UTC
From: chip_wb8alw
Topic: 2160 Message: 2160

The Dayton Bus Trip is now a little less than a month away, and we only have 20 or fewer seats available. If you'd like to take the bus (The SMART way to get to Dayton! 8>)) and haven't made a reservation, now's the time.! Go to http://www.k8kzo.com/Dayton/ and click on the info link to download a reservation form with the information you need to secure a spot!! If you still owe a balance, it's due by the end of the month.

Additional questions?? Email me and I'll try my best to answer. Departure on May 18th from Portage Meijer on Westnedge just North of I-94 at around 3:45 AM, stop at Lakeview Square Mall in Battle Creek at approximately 4:05, and another quick stop at Coldwater at I-69 and US12.
Return at around 11:30 PM.

Thanks es 73

Chip

Cortland:

Well? R U proposing we go out to some trail and operate? I might be called by Red Cross, but if not, I might, just might, be encouraged to go out somewhere. I'm thinking of a place along the Fredrick Meijer White Pine Trail, which would qualify as a "hysterical (historical???) trail." I'm trying to find out the location of the rather new "picnic table" along the White Pine Trail between Rockford and Cedar Springs. If I can't find the location, I'll probably drift up the Sand Lake where there's a very nice staging area and picnic shelter.

Anyone else wishes to join the effort? Please lettuce no - Cortland is the likely sucker, errr, person to whom to volunteer - his e-mail address is ka5s at earthlink dot net. I leave it to the reader to figure out how to transcribe that to a "real" e-mail address.

I can't guarantee my presents (presence?) because I told the folks @ Red Cross that I'd be available to help if needed - but, then, I'm hoping and preying (praying?) that Saturday and Sunday will bring out some of the working stiffs who would otherwise be occupied during the weak (week?).

I won't devote a great amount of time to the effort, because I've devoted several hours this week to Red Cross, and neglected a few items @home which I "should" get done.

So Cortland, please tell me what you're planning - and if you wish some other place at which to set up, please tell me where to go and @ what time.

2167. Field Day T-Shirts

Yahoo group: GRARA
Date: 2013-05-04 07:05:40 UTC
From: Hank Greeb
Topic: 2167 Message: 2167

Thanks for all the support for Field Day which we received last night. As I said then, ARRL has given us a "deal" for Field Day T-Shirts, where we'll receive a 15% discount on any order greater than $50. We already received orders for five T-Shirts, which will be more than enough for this discount, but we might as well order as many as want them.

So, if you received an "order blank" at the meeting last night, please fill it out and send it along with a check made out to GRARA for $13.00 each. The discount will cover the shipping charges, and, if there's any excess, we'll donate the money to the GRARA treasury.

If you weren't at the meeting, the particulars are

Field Day T-Shirts, sizes S, M, L, XL, 2XL, 3XL, 4XL for $13 each. Please send your name, call, number of shirts and size(s) desired, plus a check for $13 made out to Grand Rapids ARA by US Mail to me:

Hank Greeb, N8XX
5727 11 Mile Rd NE
Rockford, MI 49341-9502

Please don't dally. Deadline for receipt here is this coming Friday, May 10, so mail by May 8 to be sure. I'd like to get the order in promptly.

Why such a rush? Well, several years ago we waited till near Field Day, and many sizes were out of stock.

2168. GAP Eagle 6-band Vertical Antenna -- first $100 takes it

Yahoo group: GRARA
Date: 2013-05-04 19:39:13 UTC
From: qschultze
Topic: 2168 Message: 2168

Gang:

Two GRARA friends just helped me take down this antenna from a friend's roof. It's in good condition. I have an optional roof tripod mount, too, if interested. I've taken it apart just enough for transportation and easy reassembly. No radials required for this puppy.

Price new is $399. First $100 takes it. Have original manual, too.

Here are the specs from the GAP website:

EAGLE DX

6 Band Multiband DX Antenna

SPECIFICATIONS
Bands
40m 20m 17m 15m 12m 10m
With supplied extender, this can be customized to your favorite part of the band
Bandwidth -- Under 2:1
Entire band on 40m 20m 17m 15m 12m
10m over 500 KHz
Height -- 21 ft.
Weight -- 19 lbs.
Mount : Virtually anywhere. Supplied pole mount fits your 1.25 in antenna mast
Counterpoise : 3 rigid counterpoises 80" long
Ground Area Required : None
Power-- Full Legal Limit on 20 Meters - 10 Meters, 300 Watts on 40 Meters
THE EAGLE DX

The Eagle is the smallest antenna in the GAP product line. Its development was the result of your requests for a low profile, high efficiency GAP antenna. The Eagle DX-VI weighs just 11 pounds and can be installed almost anywhere -- at ground level, on a pole, on your roof or atop a tower. It is essentially a set of vertical dipoles -- the optimum singular DX antenna. No traps, coils or transformers are used to achieve multiband operation in this antenna either. Why is that significant? Traps are the "weak link in the chain" of a multiband antenna.

Critical to the design of the GAP Eagle was the requirement to permit operation anywhere on all of its designed frequencies. The Eagle provides full coverage with a VSWR less than 2:1 on 40m, 20m, 17m, 15m, and 12m and approximately 500 KHz on 10m without readjusting. 10m operation is further optimized with a supplied extender. Compare that performance to any other low profile vertical. With the Eagle, as with all GAP antennas, you will not need to buy a tuner. If a rare DX station appears on 7.050, but, you normally work the SSB nets around 7.250, just slide the VFO and key the rig!

If the band is wide open, you might work a LU6 with a coat hanger, but when conditions are less than perfect you want the highest S meter reading an antenna can provide. Efficiency

is critical. The efficiency of the GAP Eagle is without equal. It has no traps, transformers or matching coils to rob transmitted or received power. For the highest S meter, choose a GAP Eagle.

Quin, K8QS

Subject: iHAB-10 Launch Announcement

iHAB-10 Launch Announcement

The iHAB Team is excited to announce the next launch of the iHAB Project! iHAB-10 is scheduled to launch Friday May 10, 2013 at 14:00Z (9AM Local). iHAB-10 is titled, "Lemme" for Lemme Elementary School, where the kindergarden class has designed and decorated 19 CanisterLabs. This launch will be a demonstration for the student, teachers, and parents.

Launch Date/Time
May 10th, 2013
Webcast: 13:ØØZ - 8AM Local Time
Launch: 14:ØØZ - 9AM Local Time

Launch Location
Lemme Elementary School
3100 E. Washington St.
Iowa City, IA 52236
N 41.6626, W -91.4875

Payload includes 19 CanisterLabs from the kindergarden students at Lemme Elementary School, a UHF/VHF CrossBand Repeater. Uplink: 446.000 PL:100 & Downlink 147.500. Everyone is invited to work contacts via the balloon while it is aloft. Expected range will be about 250 miles, so monitoring the downlink frequency will be easy with a modest antenna.

Visit http://www.ihabproject.com/iHAB-10/ for updated Flight News, and Launch Information.

=== The launch of iHAB-10 will be webcast LIVE starting at/around 8:00AM, so please plan to visit Mission Control. ===

QST QST calling all GRARA members and other interested hams.

The June 7 meeting of the GRARA will be held at the Field Day site, which is the Calvin College Ball fields and outdoor recreation facility. Access to this site is from East Paris Avenue SE, at East Campus Drive (Turn east off of East Paris), about 1 block north of Burton Avenue.

A map of the site may be found at http://goo.gl/maps/8YrBx

If you need directions, click on the line "directions" on the above map and enter your starting address.

Please bring a lawn chair or other seating. We will have a limited number of extra chairs, but not enough for the entire group.

Note that there is a large covered area near the concession and restroom facility, so we'll hold the meeting at the site, rain or shine. We plan to start at the usual time 6:30 for gathering, 7 p.m. for the business meeting. The "program" will be a discussion of the location of the rigs and antennas, and other details of field day.

Hello to all my friends back up north.
I have been down here in Tampa, fl for about 3 weeks, and no job yet.
I was promised one down here, but the powers that be decited not to higher me. Oh well....
I have made some contacts on the local 2-m repeters, and a few simplex nets, also.
I have herd from some down here, that if you go to Key west you can get in to a 2-m repeter in Cuba.
And all it takes, is a 25W rig, with a 5/8 wave ant.
May drivedown there after I get a job, and get some time off.
To all that will be in the 5/3 RBR, have fun.

Greetings to the hams of Michigan,

Amateur Radio Week June 17 – 23, 2013

At the beginning of the month, I received word from our Public Information Officer Pat Mullet, KC8RTW that the Michigan Senate had adopted SR0039 which declares that the week of June 17 – 23 will be Amateur Radio Week in Michigan.

You can find the text of the resolution here:
http://www.legislature.mi.gov/(S(jw5rqkaldtxe2p45x1wuuk45))/mileg.aspx?page=getObject&objectName=2013-SR-0039doing

Thanks to Pat for doing a great job!

From: k9hxo
Topic: 2174 Message: 2174

For sale:

ROHN H50 Telescopic Antenna Mast - this is a 43 ft. max pole which can be used for much greater strength at shorter height. I paid $140.00 plus shipping. Never been used.

Mast Section Dimensions are:
(1) 10'0" length x 1.25" O.D. (16 AWG)
(2) 9'10" length x 1.50" O.D. (18 AWG)
(3) 9'04" length x 1.75" O.D. (18 AWG)
(4) 8'10" length x 2.00" O.D. (18 AWG)
(5) 8'04" length x 2.25" O.D. (18 AWG)

The nested length is less than 12 ft. Pictures at 3starinc.com

Also,
6 50 ft. coils of 18ga. 6 strand guy wire - never used.

I'll consider reasonable offers.

73,
Bill K9HXO

2175. Museum Ships 2013

Yahoo group: GRARA
Date: 2013-05-19 17:58:35 UTC
From: Hank Greeb
Topic: 2175 Message: 2175

Please post this notice on your club reflector or web site.

The Brazos Valley Amateur Radio Club, KK5W is participating in this year's Museum Ships Weekend. June 1-2, 2013. Our call sign, KK5W will be credited as a contact with both WW II Submarine USS Cavalla and Destroyer Escort USS Stewart. Visit our web page for more information, www.bvarcmswe.org (http://www.bvarcmswe.org). We
will be operating from Seawolf Park in Galveston, Texas, NA-143.

Frequencies as follows:
SSB
7.260 MKHz
14.260 MHz
21.360 MHz
28.360 MHz

CW
7.039 Mhz
14,039 MHz
21.039 KHz
28,039 KHz

Amateur radio operators in the Galveston - Houston area are cordially invited to participate. You can sign up on the web page if you would like to operate KK5W during the event at Seawolf Park.

KK5W will also host two VHF Nets for Houston-Galveston amateurs to contact the local museum ships using the WA5CYI repeater 146.94 (-) PL 167.9 on Saturday and Sunday from 11AM - 1 PM Local time. We are anticipating the USS Texas (NA5DV), Elissa (N5E), and the Grandcamp/High Flyer Memorial (AC0TX) will be on the net.

Operation on OSCAR satellites is planned for daytime passes on Saturday, June 1.
A balloon launch is scheduled for Saturday morning,

For the second year, KK5W is sponsoring the Texas Navy Award.
This year's Texas Navy Fleet is expanded to include:
USS Cavalla and USS Stewart – KK5W
USS Texas – NA5DV
Tall Ship Elissa – N5E
USS Lexington – W5LEX
SS High Flyer and SS Grandcamp Memorial – AC0TX
National Museum of the Pacific War – N5P
For KK5W and AC0TX, one contact counts for both ships.

Provide evidence of two way communication (log extract) with at least four of the call signs during MSWE 2013 to earn the 2013 Texas Navy Certificate. Work all six to earn the coveted “Clean Sweep” endorsement. Visit our web page, www.bvarcmswe.org (http://www.bvarcmswe.org) for information on how to claim the certificate.

2176. N24HC call for amateur radio, Saturday, June 15

Yahoo group: GRARA
Date: 2013-05-23 01:04:54 UTC
From: Jack Amelar
Topic: 2176 Message: 2176

To all Amateur Radio Operators

The National 24 Hour Challenge (N24HC) http://www.n24hc.org is a 126 1/2 mile bicycle route through Barry County that takes place on the day / Saturday before Fathers Day that attracts about 400 riders plus their support crews. Amateur Radio communications is an important part of the logistics of this annual event taking place this year on June 15. Communications positions are in need of volunteers for 4 check points and 3 vehicles (supplied with driver).

CHECK POINT 1, Lakewood Middle School, 8699 Brown Rd, west of Velte Rd., 9:15AM to 10:40AM - Reports to net control passing traffic from the check point to ground zero.
CHECK POINT 2, Baseline UM Church, south end of Barry County, 10:45 AM to 1:45PM - Reports to net control passing traffic from the check point to ground zero.
CHECK POINT 3, Delton Library, Delton, 11:00 AM to 3:35 PM - Reports to net control passing traffic from the check point to ground zero.
CHECK POINT 5, near Yankee Springs State Park (NOT in the park, no permit required), 1:30 PM to 4:45 PM first shift, 4:45 PM to 8 PM second shift - Reports to net control passing traffic from the check point to ground zero.
LEAD CAR, 7:30 AM to 12:45 PM. Vehicle and driver supplied.
SAG 1, 9AM to 2PM, vehicle and driver supplied.
SAG 2, 11AM to 6PM, vehicle and driver supplied.

The event coordinators provide shirts, limited refreshments, and Friday evening spaghetti dinner. Please contact the Ham Radio Communications Director if you are willing to help.

Class: SOAB QRP
QTH: MI
Operating Time (hrs): 22.5

Summary:
Band QSOs

160: 0
80: 0
40: 97
20: 214
15: 88
10: 16

Total: 415 Prefixes = 266 Total Score = 203,756

Club: Mad River Radio Club

Comments:

A learning experience, combined with lousy conditions, especially on 20, 15, 10 meters. Bob, KD8HNF had set up a remote operation on one of the higher hills in Ionia County (if you count anything in that county as "high") He has a spider beam and a G5RV antenna, and the place is generally quite quiet for RFI.

To improve the station, Bob bought a couple of "dedicated computer controlled boxes" one which plugs into the control head, and the other into the rig at the remote site. This effort didn't come to fruition until a day before the contest, so we both decided that physical QSY to the remote site was the best, since learning how the station under remote control works plus trying to compete in a could be disastrous.

In retrospect, it wouldn't have mattered much, because bands were very noisy, even on 20, 15, and 10 meters and propagation was "interesting" to say the very least. At first I thought something noisy was at the site, but in a few contacts with locals, they were having the same problem. And, the gods which control the ionosphere, (maybe the Egyptian Sun God Aten?) weren't smiling on us, and these bands were "rotten, miserable, to almost tolerable" in phases. All of them were

noisy on Saturday! The maximum length of a "run" after calling CQ for as long as 10 minutes might be 3 or 4 Q's. After the fact, it appears that very few of my signals made it above the noise level at the skimmers on the Reverse Beacon Network, because 2 dB above the noise level was typical, and 10 dB or higher was very seldom when looking at the history after the fact.

One other complication was that I saw a nice Compaq computer at the site, It has 2.6 GHz Pentium and 1 gig memory, more computing power than my Dell Laptop, and was right at the operating position. So, we loaded N1MM on it, hooked the TS-480-SAT to it and tested it. Initial testing was satisfactory, so it was "all go." Yup, "all go" until about 2 hours into the contest when it slooowwwweeeddd down to a crawl. Sending CW was very marginal, commands between the rig and the computer and vice versa took seconds. Rebooting the computer was the only thing which resolved the slowness. After a couple of these events, I looked a the Windows Task Manager and noted that much of the time 100% of the CPU capacity was being used. At that point I decided to take a break, brought out my trusty laptop, connected it to the TS-480 and never looked back.

So, even with a hex beam, which should have provided something like 6 dBd on 20/15/10, and a G5RV, similar to my inverted V at home, this year was less productive than last year. After the first evening, I decided that there was no way I was going to beat any records, So, plan "B"; went into effect. I used the motto my pappy told me, when I wasn't even knee high to a grasshopper, who always said, "Do the best you can with whatever you got."

High points was working Europe on 40 meters with a cloud warmer G5RV antenna, working several fellow club members who were various places in the Caribbean and having quite a few ops who know me asked "QRP? Hank" The final high point was when I worked a fellow QRP op Dale, WC7S out in Wyoming on 20 meters who was in a midst of what appeared to be a great run on the low end of the band. The camaraderie of these events makes up for the sometimes monotony of an hour of 10 contacts during lull in propagation.

Thanks to the organizers of CQ WPX. Thanks to all the folks who took time to pull my signal out of the noisy bands. (Of course, for most, if not all these contacts it gave a new multiplier, at least during the first contact on the first band!) Thanks to KD8HNF for the use of his remote site. And thanks to the Michigan QRP Club for the use of WQ8RP, the club call! Folks tell me that a "unique prefix" adds 10 dB to a signal, and, during this event, I needed every dB possible!

2178. Best place to buy a button silver oxide cell.

I found an old calculator which had been given to me while I was consulting as Hg Consulting, Inc. The AG10 1.55 volt cell had been depleted, since it was last used well over 8 years ago.

I looked around places like Walmart,com, Meijer.com, etc. ratshack.com, etc., and find that they want what I consider an arm and a leg for a replacement. Any idea of an inexpensive local source for such an item? I generally could get an Eveready 357 (similar diameter but about twice as fat) for <$2.00 @ Wally world locally.

Yes, I know I "probably" could buy a 4 function calculator for <$5.00 but this one has sedimental value, so I'd like to revive it.

Thanks for the bandwidth.

The Dollar Stretcher near 54th and Clyde Park (NE) has lots of button cells for $1.25... Most are Interstate brand and seem to work well for me... AG10 crosses to LR55 and LR1130... I can't say if they have them or not, but if you are near there it's a good place to get cheap button cells...

To: hgreeb@...

SB QST @ ARL $ARLB013
ARLB013 FCC Seeks Small Vanity Call Sign Fee Increase

ZCZC AG13
QST de W1AW
ARRL Bulletin 13 ARLB013
>From ARRL Headquarters
Newington CT May 30, 2013
To all radio amateurs

SB QST ARL ARLB013
ARLB013 FCC Seeks Small Vanity Call Sign Fee Increase

The FCC released a Notice of Proposed Rulemaking (NPRM) on May 23,
seeking to raise the fee for Amateur Radio vanity call signs by 20
cents. Currently, a vanity call sign costs $15 and is good for 10
years. The new fee, if approved, will go up to $15.20 for 10 years.
The FCC is authorized by the Communications Act of 1934, as amended
to collect vanity call sign fees to recover the costs associated
with that program. The NPRM can be found in PDF format at,
http://transition.fcc.gov/Daily_Releases/Daily_Business/2013/db0523/FCC-13-74A1.pdf

The vanity call sign fee has fluctuated over the 15 years of the
current program -- from a low of $11.70 in 2007 to a high of $70 (as
first proposed in the FCC's 1994 Report and Order). The FCC said it
anticipates some 14,300 Amateur Radio vanity call sign "payment
units," or applications, during the next fiscal year, collecting
$217,360 in fees from the program.

The vanity call sign regulatory fee is payable not only when
applying for a new vanity call sign, but also upon renewing a vanity
call sign. Those holding vanity call signs issued prior to 1993 are
exempt from having to pay the vanity call sign regulatory fee at
renewal, as Congress did not authorize the FCC to collect regulatory
fees until 1996. Such "heritage" vanity call sign holders do not
appear as vanity licensees in the FCC Amateur Radio database.

Amateur Radio licensees may file for renewal only within 90 days of their license expiration date. All radio amateurs must have an FCC Registration Number (FRN) before filing any application with the Commission. Applicants can obtain an FRN by going to the Universal Licensing System (ULS) and clicking on the "New Users: Register" link. You must supply your Social Security Number to obtain an FRN.

The ARRL VEC will process license renewals for vanity call sign holders for a modest fee. The service is available to ARRL members and nonmembers, although League members pay less. Routine, non-vanity renewals continue to be free of charge for ARRL members. Trustees of club stations with vanity call signs may renew either via the ULS or through a Club Station Call Sign Administrator, such as the ARRL VEC.

Visit the "Call Sign Renewals or Changes" web page at http://www.arrl.org/call-sign-renewals-or-changes for complete instructions on how to have the ARRL renew your license for you or for how to do it yourself.

License application and renewal information and links to the required forms are available on the FCC License Renewals web page at http://www.arrl.org/renewals. The FCC's forms page at http://www.fcc.gov/forms also offers the required forms.

2182. NOAA Flood Advisory

Yahoo group: GRARA
Date: 2013-05-30 18:06:59 UTC
From: Hank Greeb
Topic: 2182 Message: 2182

We should all hope that this is much less water than we had earlier in the month.

==========

Flood advisory

National weather service grand rapids mi

1129 am EDT THU MAY 30 2013

...the flood advisory is cancelled for the following river in Southwest lower Michigan...

Looking glass River near Eagle affecting Clinton county

...the flood advisory continues for the following rivers in southwest Lower Michigan...

Grand River at Ionia affecting Ionia county

Grand River at Lowell affecting Kent county

Maple River at Maple Rapids affecting Clinton county

Chippewa River below Mt Pleasant affecting Isabella county

...the National Weather Service in Grand Rapids has issued a flood advisory for the following rivers in southwest lower Michigan...

THORNAPPLE River above Hastings affecting Barry county

.The current weather is dominated by an approaching deep trough to the west. A round of showers and thunderstorms will come through this afternoon through tonight. This weather system will produce rainfall amounts ranging from a quarter to half an inch. The extended outlook is for more showers and storms on Friday and Saturday, some of which could be severe. The following forecast is based on observed and forecast 24 hour precipitation.

Precautionary/preparedness actions... Safety message... caution is urged when walking near riverbanks.

A flood advisory means minor flooding is possible and rivers are forecast to exceed bankfull.If you are in the advisory area remain alert to possible flooding or the possibility of the advisory being upgraded to a warning. Report observed flooding to local emergency services or law enforcement and request they pass this information on to the National Weather Service.

Stay tuned to further developments by listening to your local Radio,
Television or NOAA weather radio for further information.

2183. Callsign Equivalent(s) of "555" Telephone Numbers

Yahoo group: GRARA
Date: 2013-06-01 01:30:41 UTC
From: unclefesterman
Topic: 2183 Message: 2183

Need this for my writing. Hollywood uses "555" numbers, and "Klondike" prefixes (for pre-1962-set films) to keep movie & TV watchers from calling the numbers. Is there an equivalent for amateur radio call signs? I can see someone looking up a call sign after watching a movie and calling them. . .

I need the info for my writing; I'd use mine, but it's a 2x3 call and I'd like to upgrade it someday.

On what has to be the remotest shred of staying ion topic, I looked up teh callsigns of Danny Dunn & Irene Miller, two main characters of the Sanny Dunn Sci-Fi books published 1957-1974, and found out their calls were available. Now taht's a great question for a quiz bowl.

Anyone with contacts at WGVU radio or Michigan Radio (WVGR, and others)? Perhaps we could get a public service announcement about our Field Day on one or both of these radio stations similar to what the Colorado QRP Club recently had on their KGNU public radio station?

Just an idea - maybe we don't need much of an "inside contact," but I've not had any contact with either of these public broadcast stations except for occasional donations of $$'s.

Advice, Please

From: Hank Greeb
Topic: 2187 Message: 2189

Hi Stephen:

We are working to have 2 SSB stations, 1 VHF station, 1 CW station and a GOTA station. The GOTA station will have its own call, so it won't be networked. We will be using N1MM software.

If you'd like, I could join you earlier Friday at the site or some day earlier during the day and give you an idea of the general layout. We won't know exact details until we finish the meeting, but the general layout should be enough for you to work on. We should plan to get together at least one evening before field day to get all the computers working on the network.

Since you're the computer expert, please advise you schedule so we can work with you on an evening to get the network set up and going.

Thanks Cortand,

We don't take these things lightly. When we got the concern last night,
we took the site off-line, rebuilt it from the appropriate backup and
put it back on-line. Retest shows no problems at all.

There is too much going on in June to have any concerns about the website.

See you at field day.... Life is good!

2193. 1st Annual LARC Fox Hunt - Saturday, June 8th, 2013 - 12:00pm-2:00pm

Yahoo group: GRARA
Date: 2013-06-03 14:59:56 UTC
From: Jack Amelar
Topic: 2193 Message: 2193

From: Michael Wolthuis KB8ZGL
Subject: 1st Annual LARC Fox Hunt - June 8th, 2013 - 12:00pm-2:00pm

The 1st Annual Lowell Amateur Radio Club Fox hunt will be held this Saturday from 12:00pm-2:00pm. All are welcome.

The initial hunt will be a short drive and then on foot in Lowell, MI (within 1 mile of the starting location). Then a second frequency will be given to those as they arrive for the intermediate hunt which is within 3 miles of the location.

We will be using Automated tracker boxes for the hunt, but also providing voice and clues along the way as time goes on.

The starting point is the FROM (Flat River Outreach Ministry) building located at:
11535 Fulton St. E.
Lowell, MI 49331

The hunt will start following the LARC monthly meeting, which should be 12pm. Anyone who wishes may show up at 10AM to join in the LARC monthly meeting, but this is not required.

We are very excited about the hunt. Frequency information will be provided to all who arrive at FROM when their mileage is given. Hunt will be based on mileage, not time to complete.

Questions?

Sincerely,
Mike Wolthuis - KB8ZGL - The Intermediate Fox - LARC Treasurer

2194. VHF on a Hill Saturday

Yahoo group: GRARA
Date: 2013-06-05 20:17:37 UTC
From: Bryan Leenheer
Topic: 2194 Message: 2194

It's the June VHF Contest this weekend. The rules are here:
http://www.arrl.org/june-vhf

This year the ARRL has made it even better to play radio in the Very High Frequencies and up; they added a new category for 3-band operation on 6, 2, and 70cm, just like the popular FT817, 857, 897, TS-2000, and IC-7000 radios have built in! This is on top of the FM only category, for our Technicians and other operators who don't have all-mode capability. Just remember to keep it on Simplex!

I will be (if the weather stays nice) climbing to the top of Mt. Baldhead in Saugatuck (Grid Square EN62vp) with my HT and a 6 meter antenna, operating in the Single Operator Portable category, for as long as my batteries last. I welcome anybody who feels like braving the 308 steps to the top to stop by and visit; and really welcome contacts from all amateur operators in the area.

My HT is only capable of 2 watts out, but it does handle 144, 222, and 440 bands I'll be scanning the simplex frequencies, listening for anyone calling. The TS-2000 will be limited to 10 watts out, and most likely just being used for 6 meters SSB, but if I finish my antenna project will also have 2 meters SSB.

Thanks, and I hope to hear from you this weekend!

Bryan Leenheer, KD8LDX

This is on top of the FM only category, for our Technicians and other operators who don't have all-mode capability. Just remember to keep it on Simplex!

Bryan will be operating portable from the 300+ step climb at Mt. Baldhead in saugatuck.

Meanwhile up north, Jim, K8JH, Bob, WB8CCV and Tom, K8TB will be in the far eastern edge of the UP by this time tomorrow night, in the rare grid of EN86. We will be on the air as soon as possible, and certainly for the VHF contest. SSB should be 50.186.

Yep, the regular meeting of the Grand Rapids Amateur Radio Association will be held @ a different location. The meeting location is at the ball fields owned by Calvin College, just north of Burton Street off Paris Avenue, SE.

The meeting will start at 7 p.m. After the business part, the "program" will be a discussion of Field Day, 2013.

Please bring a lawn chair or similar if possible. We will have a few extras, but cannot provide chairs for all. Note, there is cover in case of rain, so don't be afraid of a little precipitation!

From: pobox740
Topic: 2199 Message: 2199

Greetings from Tampa, FL.
It is 21:50 UTC/17:50 EST in Tampa, FL, and the worst of ANDREA is over.
I checked into the local ARES/RACES net on the 147.105+ system. (146.2 PLL)
Did have a Tornado in my area, but nothing much to report.
In my area, there is some minor damage and street flooding, but not much beyond that.
Hope to have a place to set up radios soon.

Jerry:

Welcome to Field day! You are a prime candidate to be helper to set up and operate the GOTA station, which means G)et O)n T)he A)ir Station. We will have an "Elmer" in charge, to show you the ropes, how the station is set up, how it works, how a typical contact or two goes, and then you can operate. If you get the hang of operating the GOTA station, you can advance to one of the two SSB stations and make even more contacts. (There's a limit of 50 or 100 Q's, I do believe, for one operator on the GOTA station - I'll have a copy of the rules at tomorrow's meeting.)

You can be useful in helping to set up the GOTA station, so, if you can be at the site sometime between 9 and 10 a.m. on Saturday the 22 June, there will be plenty to do. You aren't obliged to be present when we start setting up, but the more the merrier. As someone said, "Many hands makes for light work!" Bring yourself, any soft drinks or juice you care to have. We'll have water, and probably some snacks. There are quite a few restaurants close to Calvin college on East Beltline near 28th Street for lunch, or you might bring a sandwich or something. Evening meal is some sort of Box lunch or maybe pizza, or other food courtesy of the local chapter of the Institute of Electrical and Electronics Engineering (IEEE).

Please, do NOT be shy. Come as early as you can, stay as long as you wish, operate by all means. I remember the very first Field Day I attended. My buddy and I, budding novices at the time, had a ball. You only learn by doing, so jump in with all four feet flailing, and make a splash!

CU tomorrow evening and on Field Day Weekend.

Jerry,

As long as there is a General or higher grade licensed ham on site as the main control operator of the station, you can operate on the HF bands.

From: Doug Luurs
Topic: 2207 Message: 2207

I'm thinking about getting a new radio, but haven't been keeping up with the new

radio->repeater->internet->repeater->radio protocols.

I see WIRES, Echo Link, IRLP and D-star (just to name the ones I know).

I understand D-star is ICOM digital format vs. the others analogs, but

what is the differences/advantages each of them?

Is there a popular one in the West Michigan area?

Thanks all ..

Doug:

I can't speak from experience, never having used any of those. I have a radio that could operate D-Star (if I added a $200 module) - but have been too cheap to do so. (anybody know of a 'real deal' on an Icom UT-118 module?) There is a D-STAR repeater around GR - maybe 2 or 3, but I don't think it's getting a lot of use. Never heard of 'WIRES'. GRARA will have a presentation on MotoTrbo at our November meeting - so there's yet *another* mode.

As far as I know, both D-STAR and MotoTrbo both use proprietary 'codecs' - to encode transmitted audio (and different ones between the two!), and decode it on the receiving end. The rest of the protocol for D-STAR is open, but not much use without the codec. There's a fair amount of internet linked activity on D-STAR (I'm told - with people using the 'DV Dongle' on their computers / internet. (Where's the Chinese copycat hackers when you need 'em?)

Maybe my little bit of knowledge will stir someone that's really "in the know" to comment.

One additional thought:
Note that MotoTrbo radios are single band only (UHF, VHF or 900mhz). A D-star radio you can get in dual band. So, if you are after analog dual band and digital dual band I would checkout the D-STAR Icom products.

http://www.icomamerica.com/en/products/amateur/dstar/dstar/default.aspx

The 80-AD and 92-AD are great radios!

Have you used any of the reflectors??? Lots of people on the reflectors for D-Star. West Michigan is maybe a bit quiet locally, but lots of people on the REF and XRF reflectors!

There is a great book out there I will have to find the title of on D-Star.

Maybe we should do a presentation on D-Star reflectors and call sign routing and stuff.

As far as I know, both D-STAR and MotoTrbo both use proprietary 'codecs' - to encode transmitted audio (and different ones between the two!), and decode it on the receiving end. The rest of the protocol for D-STAR is open, but not much use without the codec. There's a fair amount of internet linked activity on D-STAR (I'm told - with people using the 'DV Dongle' on their computers / internet. (Where's the Chinese copycat hackers when you need

'em?)

Maybe my little bit of knowledge will stir someone that's really "in the know" to comment.

Subject: [GRARA] Internet Radio Protocols

I¹m thinking about getting a new radio, but haven¹t been keeping up with the new radio->repeater->internet->repeater->radio protocols. I see WIRES, Echo Link, IRLP and D-star (just to name the ones I know).I understand D-star is ICOM digital format vs. the others analogs, butwhat is the differences/advantages each of them? Is there a popular one in the West Michigan area? Thanks all ..¹73 N8ZUU Doug

2213. field day points for having emcom people visit

Yahoo group: GRARA
Date: 2013-06-16 02:04:47 UTC
From: sprovost
Topic: 2213 Message: 2213

Came across this information that some may already know about:

Stephen

Field Day for ARES Readiness:
The purpose of Field day is to prove that Amateur Radio can work in less than optimal conditions - and using emergency power.
These conditions might very well be present in a real emergency.

Red Cross can remind Ham Clubs and ARES teams that we can and do need their skills to meet the challenges of emergency communication in a disaster coupled with a communication outage or overload.

From the Field Day rules:
7.3.12. Site Visitation by a representative of an agency
: One (1) 100-point bonus may be claimed if your Field Day site is visited by a representative of an agency served by ARES in your local community (American Red Cross, Salvation Army, local Emergency Management, law enforcement, etc.) as the result of an invitation issued by your group. ARRL officials (SM, SEC,DEC, EC, etc) do not qualify for this bonus.

We have a check list for Volunteers that do agency visits and a form: "Red Cross Served Agency" visit. Drop me an email if you want a copy. You will have to tailor to your chapter or region

Would a "visit" by Joe, WD8USA, or Jim, KD8CAN qualify as a "representative" of Red Cross?

From: Hank Greeb
Topic: 2223 Message: 2223

Page 4 of 11 available at http://www.arrl.org/files/media/News/ARRL-ARC_MoU.pdf

ARRL Field Day: The Red Cross will encourage all chapters to participate in ARRL Field Day, the Simulated Emergency Test (SET) and other emergency exercises. Participation may take many forms, including Red Cross officials visiting and touring sites to better understand the capabilities of local ARRL volunteers and ARES® units, or the joint use of Red Cross equipment such as vehicles or trailers.

Perhaps one or more of the paid staff and the volunteer leaders of the Disaster Relief @ 1050 Fuller might be appraised of the fact the Red Cross National encourages the chapters to Participate in Field day, and at very least, have one of them show up @ our Field Day site?

Would this be too much to ask?

Typically the "latest" version of N1MM comes out a day or two prior to
the next big contest. I'd expect to see a new version sometime between
Wednesday and Friday of this week. Keep your eyes and ears open.

Stephen should have the latest info - and if there's a newer version
after Wednesday evening, he'll probably have the latest update on a
flash drive so ensure that the same version is used by everyone.

Ron Fredericks KD8DMR posted the following on the IEEE mailing list:

Grand Rapids Area Radio “Hams” to Hold Annual Field Day June 23 and 24th and the West Michigan Section is Invited for a Saturday Evening Picnic and Demo

The West Michigan Section IEEE will be joining the Grand Rapids Amateur Radio Association for a Saturday Evening Picnic during the latter’s annual Field Day which takes place Saturday and Sunday June 22 and 23. See the attached public announcement. The location is the Gainey Athletic Field on the east side of Calvin College campus in Grand Rapids. The general public is invited to drop by anytime from 2 P.M. Saturday the 22nd to noon Sunday the 23rd for a very educational demo of how hams conduct emergency communications using generators or alternate energy and makeshift (and not-so makeshift) antennas. However all WMS-IEEE members and their guests are specially invited to a 5:30 P.M. Saturday picnic with the GRARA operators at the athletic complex east of the Prince Conference Center. At that time the Section will serve a picnic dinner consisting of pizza (both regular and deep-dish), appetizers, salad, and pop and fruit dessert.

The Section will supply everything for this combination technical and social event. All you have to do is let WMS IEEE Secretary Ron Fredricks (and radio amateur operator extra class operator K8DMR) know you are coming. If you are bringing a non-IEEE guest there will be a charge of $5 otherwise there is no cost for this last event before the Section goes dormant for the summer. Please call or E-mail Ron with you RSVP by Tuesday June 18th at 616-608-5992 (home office) or ron_fredricks@... (underscore between the first and last name).

Visitors should access the complex via the Calvin east gate off of East Paris and north of Burton Street between Burton and Lake Drive (the west gate adjacent to the Prince

Conference Center will probably be closed). Look for us by the Field House building. A map of the campus is available at www.calvin.edu/map . The exact address for the Gainey Athletic complex is 1661 East Paris Ave SE, Grand Rapids, MI 49546.

Looking forward to seeing many of you at 5:30 (or before) on the 22nd. Come early and stay late as we will have 5 HF and VHF/UHF stations running for the contest. One of them will be a special "Get on the Air" station for non-licensed or new hams which will allow you to make some actual contest contacts under the supervision of a licensed amateur.

2227. Field Day, Saturdy, June 24

Yahoo group: GRARA
Date: 2013-06-20 03:59:35 UTC
From: n8xxham
Topic: 2227 Message: 2227

Please don't forget field day is this weekend. Come out and operate or just to visit. We will have 2 voice stations on HF, 1 CW station on HF, one VHF stations on multiple bands, 6 meters to Daylight, (If I remember the list of bands upon which KF8QL can operate) and a 'Get on the Air' voice/CW station under the tutelage of K8DMR..

Location: Calvin College Ball Fields - official address is 1631 (?) Paris Avenue SE, Grand Rapids, which is on the west side of Paris avenue about 1 city block north of Burton St SE. The gate @ Paris avenue will be open during our event, BUT the gate near the Prince Conference Center will more than likely be closed.

We will begin setup as soon as possible after 9 a.m. Saturday, June 24. Bring a lunche (or there are plenty of restaurants at which to eat within a mile or so of the site).

Saturday 2 pm: Start operating all stations.

Saturday around 6 p.m. - The IEEE will be providing a dinner (pizza and trimmings, if memory serves correctly). We will be joined by some 20, 30, or more IEEE members, so be on your best behaviour! :) Thanks to Ron, K8DMR,and the local IEEE chapter for this kind gesture!

Sunday morning - anyone who has stayed overnight is welcome to breakfast @ the Prince Conference Center. If like last year, it will be a great breakfast!

Sunday around Noonish - Start tearing down any stations which are not being used.

Sunday 2pm: On the air OPERATION ENDS. Tear down everything. We will need plenty of help!!!!

NOTE: As many have said, this is NOT a contest, but should be, could be a great Training Operation. If you haven't operated Field Day for several years, The GOTA (Get on the Air) station is just for you. If you're familiar with operating - but not in a contest - and prefer SSB, check with the chief op of either of the SSB Stations. If you like CW, we'll have a setup just for you! Remember, you do NOT have to be a contest Wizard to participate in Field Day - just come out AND actually make a few contacts!

Let's plan to have a great time - work some stations, and hope we don't have to dodge too many raindrops and/or lightning bolts! As with most Field Day's in the past, we have ~50% probability of thunderstorms, high in the mid to high 80's, and high humidity for Saturday and Sunday. But, there's lots of fun and camaraderie to be had with this

event.

So, come one, come all!

2228. Field Day VHF Contacts Wanted! 146.55 FM /144.200 USB / 50.125 USB

Yahoo group: GRARA
Date: 2013-06-21 16:24:01 UTC
From: David
Topic: 2228 Message: 2228

Hello Fellow Amateurs!

At the 2013 GRARA Field Day event, I will be leading the efforts on VHF/UHF. I would love to have a contact from everyone from their home stations to test our readiness to communicate.

On VHF, we will be monitoring 146.55 and calling "CQ" on that frequency on the top and bottom of each hour. Please get on FM to give us a contact!

We will also be operating on VHF SSB, and calling CQ on the calling frequency 144.200 USB. Please give me a call there if you can as well.

On 6 meters, I will be operating on the call frequency of 50.125 USB.

We startup operations at 2:00 on Saturday so grab that handheld, or base station or mobile radio, and get on the air!!!

73 de Dave - KF8QL

I didn't do much operating at this FD, but I did charge a SLA battery and managed seven "natural power" CW contacts, so we have that bonus.

That battery came in handy once we learned that the high noise level at the CW position was coming via (but not necessarily FROM) the wireless router connection. Going to battery power for the router cut it from S9 to S3.

This is a general plea for critique, either positive or negative feedback, for the Field Day 2013 @ Calvin College last Saturday/Sunday.

Particularly, I solicit comments from the leaders of the SSB, VHF, and GOTA stations, from Stephen Provost, computer guru, and any of the operators of these stations. I've already beaten the drum for the known operators of the CW station.

It appears we had a good turnout of members and visitors - so, even though we didn't set any new records for contacts, the event can be considered a success.

Please send them privately to me, or, if you wish, share them on this reflector so we all can see.

I was only able to participate for a short time - but I was a bit frustrated by the 40M antenna. It felt like I was transmitting into a dummy load, as much work as it took to get a contact on 40M phone. I wonder if a significantly taller object to hang the 40M wires from would have helped?

Great location - we got a little bit of PR just from the people walking past for the ball games. We might want to work on that aspect a bit more next year, if we can use the same location. Also, no other RFI source(s) was a good thing.

Where was KD8HNF with his *monster* portable tower? Could have used him.

Thanks John, for the comments:

I left it to the leaders of each group to set up whatever antennae they thought best for the effort. I make no comments on the efficacy of what was chosen.

I personally believe that, within reason, the higher the better - up to somewhat over 1/4 wavelength at the operating frequency for 80 and 40 meters - with a good compromise somewhere around 40 to 50' for and 80/40 antenna. For 20 thru 10 meters skip is generally longer, so a halfwave or more is typical, and a 3 element yagi or phased array like the W8JK or curtain array provides gain. A curtain array is hard to steer......

You may have noticed that there were an abundance of "naturally occurring antenna supports surrounding the area where we were permitted to operate.

I agree that the location was great - we were at first perplexed by all the vehicles in the parking lot, but had little difficulty convincing a few people to move their vehicles so that the tower could be guyed properly. As you say, we got considerable publicity and interest from the passers by.

You should have made your presence known to the CW group. We'd have made room for you to operate for some time.

KD8HNF had family obligations which prohibited his participation. KD8OHS could not be available full time, and did not want to leave his 110 ft. tower unattended due to possibility of sudden wind storms. This was certainly understandable. We missed them both, and pray they'll be back in future years.

I was only able to participate for a short time - but I was a bit frustrated by the 40M antenna. It felt like I was transmitting into a dummy load, as much work as it took to get a contact on 40M phone. I wonder if a significantly taller object to hang the 40M wires from would have helped?

Great location - we got a little bit of PR just from the people walking past for the ball games. We might want to work on that aspect a bit more next year, if we can use the same location. Also, no other RFI source(s) was a good thing.

Where was KD8HNF with his *monster* portable tower? Could have used him.

Subject: [GRARA] Critique Please for FD 2013

This is a general plea for critique, either positive or negative feedback, for the Field Day 2013 @ Calvin College last Saturday/Sunday.

Particularly, I solicit comments from the leaders of the SSB, VHF, and GOTA stations, from Stephen Provost, computer guru, and any of the operators of these stations. I've already beaten the drum for the known operators of the CW station.

It appears we had a good turnout of members and visitors - so, even though we didn't set any new records for contacts, the event can be considered a success.

Please send them privately to me, or, if you wish, share them on this reflector so we all can see.

With the exception of last years effort, I have been repeatedly disappointed and discouraged by W8DC field day operations. I had hoped that last year represented a turning point but it seems that was a fluke. Things that were particularly disappointing to me are:

Lack of decent antennas. Single band wire antennas up only about 7' dont make it because of NVIR nature of antenna that low. Additionally they cant be steered into active areas (the ZL was oriented for E-W and couldnt get into the hot areas in the SE Saturday night. I brought a military mast and a ZL that I thought would be used on the GOTA and it was a bit inadequate for a main SSB station. It was only up 18' which was more than twice as high as the other wires but still not high enough. (I could have gotten it up higher if we could have staked guys but instead had to use those sections for the tripod). I'm surprised that the club has made no effort to invest in a couple or three effective portable antennas for field day/contest events/emergency ops. Other clubs I have been involved with have had as many as 3 or 5 beams on short towers on trailers, others had hex beams which were surprisingly effective, wire deltas, etc owned by the club. There are so many possibilites that are way better than a wire up 6' or 7'. None of the antennas except maybe the MA5B and/or VHF were strong enough to run a freq and you just cant score if you're constrained to hunt and peck. At the very least they need to be up a lot higher (fiberglass poles would make a big improvement over what we had).

No antenna tuner, DSP, or filters. One station had to use a wire 7' off the ground because it was tuned for 40 and the radio did not have a tuner - the owner bought one years ago but never got around to installing it. The Kenwood 440 was a nice radio back in the 80's but without a DSP or crystal filters was inadequate for fighting heavy noise on 40m and 80m.

After spending Wednesday night setting up computers and programs for use by field day, several station managers wouldn't use the ones that had been set up and instead used their own which weren't set up correctly. The version of N1MM on the Kenwood 440 would not recognize the new Canadian sections that have been in use for about a year. That implies the program wasn't up to date. Additionally, there were 100's of 2012 QSO's left in the log which resulted in the computer reporting dupes that were not dupes.

By the time I got a chance to really operate at midnight I was totally demoralized and I could sense that in others as well. I was surprised that when I came back at 9:30 on Sunday, the CW station was dismantled, and by about 10:15 the SSB station with the Orion was being taken down. Everyone was packed up by 2PM when we should have just stopped operating. I understand the CW had its own problems which were probably exasperated by a domineering and dismissive station manager who seemed have no use for most of the members who attended (after two quick run-ins with him during setup I had no desire to get anywhere near the CW station for the rest of the event). With RF in the shack, I suspect that by the time he would have been willing to listen to other input no one would volunteer any suggestions.

There also seems to be a lack of knowledgable operators. I couldn't believe all the CB jargon I was hearing from our side of the QSO not to mention useless time wasting responses (in most cases the guy on the other end already knows his call, unless there are multiple

stations in the passband and you're not sure which you're talking to, and when he calls your call sign does not need to hear your call again when he already got it right, etc).

I have worked with several high scoring field day groups and know that if you aren't making about 1000 Q's per HF station and at least 400 on VHF and GOTA you're just not competitive. I would very much like to at least make a respectable showing if not top our category.

Steven:

Your comments are welcome. Not completely unbiased, but...

Some of them are "spot on." As for antennas and supports: Did you notice some "naturally occurring antenna supports" only a couple hundred feet (if not that far) from the site which was chosen for the two SSB rigs? Bob Moe had a air-cannon "spud gun" which could have helped put up a rope to support a long wire or even a dipole @ 40 to 50' high - maybe more, I didn't triangulate to calculate the height of the trees. I had at least 200' or more of 3/8" nylon rope which could have been used if anyone had asked.

The initial choice was to use dugouts for operating sites, which were much closer to the trees and could have supported slopers or dipoles. The choice of positions was made by the leaders of the teams. We had three unused generators any one of which could have been put to service at a dugout location. I had 4 or 5 tarps which could have provided shade if a dugout with opening toward the south was chosen.

Personally, I made 14 or so SSB contacts on 40 meters with the Kenwood 440 between about 1630Z and when we decided to shut down shortly after 1700Z. It did fair to middlin' better rate than I mustered on 80/40/20 CW because of RFI inside the metal box shack caused by yet to be determined causes, but not because of lack of "state of the art transceiver" (an Elecraft K3).

Note, the last contact by the CW crew was logged at 14:48Z, or about 11 a.m. EDT. I was returning to the site after a catnap at home, so I wasn't involved with the decision to shut down. But, the RF in the shack, from yet to be determined sources, was undoubtedly a "downer" to all us CW ops, and probably contributed to the decision to shut down.

I'll take responsibility, but no blame, for the lack of attention to the "Station Zero" which was the master station, and which had an incorrect version of N1MM. This could have been corrected on site. Had I been sharp enough, I'd have shut down the station, exported the ADIF file, edited out all of the 2012 contacts, installed the latest version which I had on my (unused but standby) computer, imported the 2013 data from the edited ADIF dile, and we'd have been "in like flynn". When the fact that one of the computers was running last year's version with lack year's contacts, was mentioned to me, I must have been tired, and my meager mental capacity was at an even lower ebb. As it is now, after the fact, I had to manually take out last year's contacts from the ADIF file, which is a trivial exercise after the contest, but which probably caused some calls to come up as "dupes" when doing S&P.

To me, Field Day is always a learning experience. We make misteaks. We teach a few ops some of the fine points of operating. That we don't do more to encourage ops to try the GOTA station is perhaps something to work on for next year. Yet, I heard from two or three "brand new ops" that they were delighted to make contacts on 6 meters - and were amazed that signals would "Pop up for a few minutes and then be gone." So, the VHF station served in some cases as the GOTA station, allowing some ops to make their very first contacts in a contest!

As for being at the top of 3A, I've never been associated with a "general interest" club, such as GRARA which has placed higher than the top 20% of a class of choice. It takes a dedicated group of contest operators for such a ranking. I don't know any "truly dedicated contest ops" within the club. I haven't seen a Michigan club "win" a category - but I'll admit I haven't searched past results with anything approaching diligence. My pappy used to say, starting when I was a mere pup, hardly knee high to a grasshopper, that "One should do the best he can with what he got."

I dont know why the antennas were strung up so low, it happened before I got there a little after 10 but the last I knew the spud gun had something stuck in its craw and I never saw it again. I brought 100' of nylon cord and used it for the ends of the ZL.

I would think there was a grounding problem inside the trailer. I doubt it had anything to do with the antenna itself. It lends a whole new meaning to 'RF shack'. I don't know how they made a contact at 14:48Z when it was pretty well dismantled when I got there about 14:15Z.

I dont know that you need to take responsibility for the computers when we had several that had been set up on Wednesday that were available but not used, unless you were the one that introduced the 2 computers (that I know of) that had not been part of the wednesday setup.

I agree that field day is a learning experience but learning implies that mistakes are corrected and not repeated year after year. I dont know why we couldn't do at least as well as we did last year. Somebody needs to actually learn something from the learning experience. VHF is always subject to the fickle VHF gods but we should be able to do way better on HF. We're not doing the best with what we have. It seems to me that its more of an attitude thing. I saw NF4GA do a bang up job with a club no bigger than ours. You don't have to be a professional contester, just read the ^@&* ARRL Operators Book and don't go in with a half @$$'d attitude.

Hank - Thanks for all the work put in to set up a field day event. I ran the VHF station, and we had good results and good fun. Conditions were not great, but a small 6m opening on Sunday felt great!

Positives for me were:
1)a good location with nice bathrooms and surroudings. We had 8-10 bystanders stop by the VHF trailer to talk.
2) A good dinner from IEEE - thanks Ron and the IEEE.
3) Friendly people in our club that helped me in every way setting up, operating, and just hanging out talking.
4) Good reliable generator power.

Could be better:
1) N1MM does not really work at all for VHF where you need to switch bands a couple times for each station worked.
2) I'd always like to be in a location with more height.
3) It was too hot. Oh well...

Thanks everyone - looking forward to next year. KF8QL

Spending $8.95 for a USB to CIV/CAT/... cable makes a world of difference with N1MM.
KD8HNF turned me on to a place to buy both CIV and CAT cables for cheap but now rig runner cables have dropped in price to compete. Then the program knows what the radio is doing and visa versa. Change one and the other follows. You can even work 'assisted' through the net - click on a spot and its tuned on the radio, band, mode, freq and all and all the spots show on one of the aux windows. Even without 'assisted' it marks all the freqs where you found a station and colors it differently depending on whether you logged it or not so you can come back and work them later. Thats way better than MPW/MPR. Pretty #@^% cool.
If we got really sophisticated we could have a SWL station on our net making spots that a hunt and peck station can quickly grab. (I tried to work the VHF but couldn't figure out your paper logs and didn't know what had been worked and
what hadn't so I didn't contribute much).

There are cables for pretty much all the modern radios including your IC-706, your Yeasu 817 and even the Ten Tecs and Elecrafts. Dont know if the older Kenwood 440, etc, can be interfaced or not. I think there is even a work around for using transverters using the multi-radio feature but I haven't had a need to figure that out.

I agree the location was better than the other calvin site or the site by GVSU in that we werent blasting our signal into the side of a building, but we had better antennas last year.

Every FD is a learning experience, that is not a bad thing. If everything was perfect, what fun we would miss.
We had a great site and the weather was good. There was lots of visitors asking about what was going on.
Great friends and food, don't get no better. Life is good. I think our Club is more about having fun then wining contests. Hank did a fine job getting things set up, getting cars moved, etc. Many thanks to Bob Moe for having the do-dads that the rest of us always seem to forget.
Myself, I had a positive good time.

2244. Morley site grounds maintenance, Friday, July 5

Yahoo group: GRARA
Date: 2013-06-26 16:24:05 UTC
From: Jack Amelar
Topic: 2244 Message: 2244

The following is a LOWELL ARC event and responsibility, but GRARA members are certainly welcome.

Morley receive site grounds maintenance.

It's time once again for grounds maintenance at the 250ft commercial tower NE of Morley owned by T&W Electronics which, among other radio services, hosts the Lowell 145.27- (94.8Hz) Morley remote receiver 144.67 MHz. And now includes the K8SN 442.075 (103.5Hz) repeater! I am informed a new building is in placing hosting the commercial services. The pre-existing □shed□ is now ours where the amateur radio equipment remains.

Part of OUR arrangement with T&W is upkeep of the grounds.

Being the site is a mix of field and woods located in a rural area near Amish families, this can also double as camping trip.

The main cleanup day will be Friday, July 5, day after Independence Day. Rain day is Saturday, July 6. Figure start around 10AM. Rolls and coffee will be provided in the morning, Burgers and beverages for lunch. The "better half" and kids are certainly welcome.

There are no toilet facilities here, but I will have the rest room in my motorhome available. **It's not a problem, really!**

I plan to arrive Thursday and not leave "until I'm ready to".
Anyone else interested in a cheap non-crowded campsite is welcome.
Electricity is available. Questions? E-mail jamelar@... or phone home: (616)438-5412 or cell: (616)438-1464. It□s best to call the □home□ phone as it will be ported to Morley and connected to an outside roof antenna.

On the cleanup agenda.
LET□S REALLY GET TOGETHER THIS TIME AND FINISH THE CLEARING JOB!
It is my understanding the East guy wire area has been plowed clear, but brush and logs need to be gathered and burned, then the area mowed.
Then the future should be mowing and light trimming to keep it all clean.
Mowing. The north an south guy wire areas are pretty well cleaned up and should just need mowing, maybe some trimming. Driveway and frontage need mowing.
What to bring? If available, an extra mower (in case the one I bring breaks down, been there, done that) as well Extra chain saw a BIG plus.
BUT MOST IMPORTANT, YOURSELF!

HOW TO GET THERE?

Use your preferred mapping program and input: 3800 155th Ave, Morley, MI 49336 Or follow the Google Maps with the links below.

Directions from Grand Rapids via US-131 Expressway are simple. If you are arriving from Lowell, the "from Lowell" direction use paved county roads and is really the shortest, quickest way.

FROM GRAND RAPIDS to Morley receive site.
http://goo.gl/maps/acPpw
Head north on US-131 expressway to Morley exit 125, Jefferson Rd.

Turn right / east for 1 1/2 miles to Northland Dr. in the center of Morley.
Just before passing thru Morley, give a shout on the Lowell repeater to see if we need Ice or anything from a gas station / convenience store.

Jog left / north then right / east. Continue on Jefferson Rd for another 1 3/4 miles.

Turn left / north on 155th Ave for 2 1/2 miles.

Turn right in the drive and park. You will have spotted the tower well before you arrived.

FROM LOWELL to Morley receive site
http://goo.gl/maps/0BBL0

Head north on Lincoln Lake Ave, for 20 miles, crossing Hwy M-44 and M-57 along the way.

Turn left / west on 18 Mile Rd., toward Cedar Springs, for 1 mile.

Turn right / north on Meddler Ave for 4 miles. Meddler ends at 22 Mile Rd.

Turn left / west on 22 Mile Rd for 1/2 mile. 22 Mile Rd borders Kent and Montcalm Counties.

Turn right / north on Amble Rd, entering Montcalm County, for 2 miles.

Turn left / west on Briggs Rd for 1 mile.

Turn right / north on Bailey Rd for 4 1/2 miles, passing through the village of Coral.
Just before passing thru Coral, give a shout on the Lowell repeater to see if we need Ice or anything from the gas station / convenience store.

Turn right / east on Church Rd for 1 mile.

Turn left / north on Amble Rd for 7 1/2 miles. **If Amble Rd were a thru street, I would not have routed you thru Coral!** You will cross Hwy M-46 along the way. Past M-46, you will enter Mecosta County where Amble Rd becomes 150th Ave.

Turn left / west on Jefferson Rd for 1/2 mile.

Turn right / north on 155th Ave for 2 1/2 miles.

Turn right in the drive and park. You will have spotted the tower well before you arrived.

2245. Commentary on Field Day by N8XX

Yahoo group: GRARA
Date: 2013-06-26 17:00:50 UTC
From: Hank Greeb
Topic: 999 Message: 2245

A few general comments about Field Day, and the rationale therefore.

from the rules available @ http://www.arrl.org/fieldday :

2 Object: To work as many stations as possible on any and all amateur bands (excluding the 60, 30, 17, and 12-meter bands) and in doing so to learn to operate in abnormal situations in less than optimal conditions. *

A premium**is placed on developing skills to meet the challenges of emergency preparedness as well as to acquaint the general **public with the capabilities of Amateur Radio. (emphasis added by N8XX)
*

We pay scan attention to the part about developing skills, and could to better at acquainting the general public with Amateur Radio.

There were only 10 operators who signed in to the three HF stations. I don't have a list of operators of the VHF station, but it's encouraging that Dave, KF8QL, reports that several operators "took the dive" and made contacts for the very first time in a contest setting, and one may have made his very first ham radio contact. We will have a full report at our next meeting in August.

It would appear that Bob Moe, AC8ZX, is the "winner" with the most contacts made while one of the SSB stations was logged in with his call. Congrats, Bob! You did good!

Why are there twice to three times as many hams at Field day as operators? Are these people afraid of the key or the microphone? As we say repeatedly, we're not in the event for score, we're in to have fun. Do we need to twist people's arms? Offer prizes for newbies who make a certain number of contacts? Have a "recruiting officer" in charge of recruiting people who haven't operated Field Day in the past "N" years (where N could be any number from 1 to 3 or so)?

We are affiliated with Red Cross, they host our Club Station, they provide us with a meeting room. Two Red Cross officials came out to visit us and support us, even did some of the "light lifting" during the setup part of our field day. They allowed us to use one of their Emergency Response Vehicles and two additional generators.

Proficiency in making contact, operating under adverse conditions of climate, propagation, atmospherics (QR), interference from adjacent stations (QR), etc. is one of the skills highly valued by Red Cross and other organizations dedicated to ameliorating the ravages of natural or man made disasters. And, the first premise of Ham Radio, as defined in the preface to Part 97 Section 1A of the FCC regulations is

(quoting from
http://www.arrl.org/files/file/Regulatory/Part%2097%20-%2004-28-2011.pdf):

a) Recognition and enhancement of the value of the amateur service to
the public as a voluntary noncommercial communication service,
particularly with respect to providing emergency communications.
(*again, emphasis added by N8XX*)

I have no quarrel with folks who come out for the camaraderie, food, and
chit chat with fellow hams. But, may I suggest that we consciously
attempt to encourage more operators to actually make a few contacts?
Doing so isn't rocket science, we all have to learn somehow, some way,
some day.

From: Steven Kaney
Topic: 999 Message: 2246

First of all, criticism was requested and I gave an honest answer as did several others before
I even saw the request.

What is demonstrated here is:
1) We cant take honest criticism
2) by and large we cant demonstrate core ham radio competencies as evidenced by the inability to put up effective antennas, the inability to keep RF out of the shack, the inability to use proper ham jargon instead of CB jargon, the inability to properly setup our logging software, etc.
3) the inability to learn as evidenced by not being able to apply lessons to next years effort or even being able to reproduce one years successes the next year. (And what can we be teaching with antennas and stations that couldn't possibly perform?)

We did well with picking a nice location with clean restrooms and with consuming pizza (provided by others). So lets just go have a picnic and socialize and not waste time setting
up radio stations that can't perform and cant teach anyone anything, or are we such social misfits that we can't interact without being surrounded with toys to take the pressure off ?

Note that there is a wide spectrum between what we are doing and being a completely gung ho and intolerant full contest station. I am suggesting that a 'Radio' club should be able to
demonstrate some core competencies in radio. And by the way, the person that seemed to be running the CW ops WAS one of those intolerant people you are railing against (Hank wasn't running it from what I could see).

Yeah, Bob:

I know, but I trust the fact that the crew @ Mike's rig thought about all your effort before, during, and after our Field Day and chose your call by design, not by default. Without members like you, and all those who devoted time and effort in organizing, setting up, operating, and tearing down, field day would be a bust! Those who came out for "moral support" and "show of force" are to be commended!

I won't mention any other names or calls, because I'm sure I'd miss participants. I only wish we had a complete roster of attendees, helpers, and operators, for duly deserved recognition!

From: Steven Kaney
Topic: 2250 Message: 2250

I wasn't complaining about lack of Radio control, I was trying to counter Dave's argument that N1MM is inadequate for VHF which I think is a bit unfair to N1MM. Personally, I have no trouble typing a frequency into the call sign box and hitting return but I fear some of the operators might have been unaware of the need to tell the program what band you are on and that might have resulted in some logs being incorrectly attributed to the wrong band. For contest purposes, you don't have to enter the exact freq, just any freq in the band - the cabrillo file will only specify the band anyway.

With an interface cable, which his IC-706 supports, he can QSY to his hearts content and never have to do anything. I think he can even use a transverter with the N1MM multi-radio feature and just tell N1MM he is using the 'other' radio. I haven't had the need to figure that out since I don't have any transverters.

P.S. I did see that someone on the internet claimed to be able to interface the 440 to N1MM using a homebuilt interface but the article was 10 years old. It doesn't say whether he told N1MM it was a 450 or what. I don't have a 440 so I don't feel a burning need to figure that out.

PPS. You change ops with control-O. I couldn't remember that until about midnight and logged most of my meager contributions to someone else's call sign. I didn't know we were having (that kind of) contest.

Steven:

FYI. You may wish to check the innards of the club's TS440 to see if it has the IC-10 and IF-232 modules needed for computer control. If not, you might find a defunct TS-440 for sale on e-bay or e-ham, etc., for peanuts, which has thesemodules, But,if so, perhaps you might wish to determine which, if any, of the suggestions Mr. Chudek has made concerning computer control forit.

Since you're the complaintant about the lack of computer control, Ileave this exercise to you.

The Kenwood TS-440 is about the same vintage as the TS-940. I would try that first. I believe these older Kenwoods were hard coded to 4800,8,N,1 (or maybe 4800,8,N,2).

If that doesn't work, try "Kenwood Slow". And finally plain old "Kenwood" as the third choice.

I had my TS-940S/AT computer controlled, but that was back in the CT and RTTY by WF1B days.

Damn it Hank! I'm done with this. You asked for my critique and I gave it honestly but then you keep arguing points many of which I had no problem with. It is apparent at this point you are not READING or UNDERSTANDING anything I am writing and are just shooting out flame messages.

I have no problem with N1MM, in fact I like it.

I have no problem with the lack of an interface to the TS-440, I can use N1MM w/o an interface.

I dont have a problem with my ZS(6BKW). It was adequate for a GOTA station and it was up almost 3 times the height of the other SSB antennas. I could have gotten it higher if I could have driven stakes into the ground for guying.

I wasn't ranting about the 440 except for pointing out that it didnt have the chops for 40m and 80m. READ the damn messages.

etc, etc, etc.

I do have a problem with a Radio Club putting up worm burner antennas that cant get out. In case you have forgotten, a dipole needs to be close to 1/2 wave above the ground. When substantially lower, the lobes rise towards the vertical and the antenna becomes a dummy load as stated by other before I got involved in this discussion. It is also counterproductive to raise a dipole higher than that since the lobes droop below the horizon and then bounce back up to interfere with the desirable lobes. 7' off the ground is ridiculous.

I am done. Take me off the reflector. I can get my interaction with other groups that are more socially adept. I was looking for a group that can put up antennas and run a field day operation.

You've managed to p.o. quite a few people with your recent ranting and raving in the GRARA reflector. If you don't understand why, then I suggest you take a course on "How to Win Friends and Influence People."

I understood exactly what you said to Mr. Devos in the reflector,
and it appears that you felt superior to him and was trying to
give him a lecture. That is definitely NOT the way to accomplish
change in a volunteer organization.

If you have no burning need to interface the TS-440, why were you ranting and raving about the low quality of the equipment being used for the sideband stations? Why did you complain that there may be contacts in the log attributed to incorrect bands/modes? As Tonto said to the Lone Ranger "White man speaks with forked tongue."

Unless I hear or see something constructive from you, (which is not very likely, considering the interchanges so far) this will be the last communication from me on any subject relating to Field Day 2013.

>I wasn't complaining about lack of Radio control, I was trying to counter Dave's argument that N1MM is inadequate for VHF which I think is a bit unfair to N1MM. Personally, I have no trouble typing a frequency into the call sign box and hitting return but I fear some of the operators might have been unaware of the need to tell the program what band you are on and that might have resulted in some logs being incorrectly attributed to the wrong band. For contest purposes, you don't have to enter the exact freq, just any freq in the band - the cabrillo file will only specify the band anyway.
>>
>>With an interface cable, which his IC-706 supports, he can QSY to his hearts content and never have to do anything. I think he can even use a transverter with the N1MM multi-radio feature and just tell N1MM he is using the 'other' radio. I haven't had the need to figure that out since I don't have any transverters.
>>
>>
>>P.S. I did see that someone on the internet claimed to be able to interface the 440 to N1MM using a homebuilt interface but the article was 10 years old. It doesn't say whether he told N1MM it was a 450 or what. I don't have a 440 so I don't feel a burning need to figure that out.

2252. Re: [GRARA] Field Day

Yahoo group: GRARA
Date: 2013-06-27 16:01:28 UTC
From: Steven Kaney
Topic: 999 Message: 2252

Criticism was requested and I gave an honest answer as did several others before I even saw the request. As stated by others, the antennas on two of the radios were in fact dummy
loads. At 7' above ground, the lobes were nearly vertical and the ERP at the horizontal was
probably milliwatts).

What is demonstrated here is:
1) We cant take honest criticism
2) by and large we cant demonstrate core ham radio competencies as evidenced by the inability to put up effective antennas, the inability to keep RF out of the shack, using CB jargon on the air instead of proper ham jargon, the inability to properly setup our logging software, etc.
3) the inability to learn as evidenced by not being able to apply lessons to next years effort or even being able to reproduce one years successes the next year.

We did well with picking a nice location with clean restrooms and with consuming pizza (provided by others). So lets just go have a picnic and socialize and not waste time setting
up impotent radio stations, or are we such social misfits that we can't interact without being
surrounded with toys to take the pressure off?

Note that there is a wide spectrum between incompetence and being a completely gung ho and intollerant full contest station. A 'Radio Club' is supposed to know something about
radio and be able to demonstrate some core competencies.

I couldn't make it this year, but I wanted to comment on Jim's statement. "Great friends and food, don't get no better. Life is good. I think our Club is more about having fun then wining contests."

About 30 years I and another ham friend stopped at a GRARA FD operation being held behind the Red Cross building, a grass field back then. The operators involved were there to win and didn't tolerate well visitor distractions. Short story, we just plain left.
It would be some years before I ever attended another GRARA function or came to a meeting. By then the people involved in the FD apparently had decided GRARA wasn't serious enough for them as I never saw any of them

again.

I'm just reiterating Jim's point is to enjoy ourselves. If the GRARA membership ever decides to become a hard core serious club, it will gain some folks, and loose others. Myself, I prefer Jim's way.

Mike, I have some 3 GB of pictures and video on a DVD; where and when can I get them to you? A couple of shots -- the CW position and beam/tower against the moonlit clouds -- and perhaps they and some others might be sent to QST. The videos may be in a proprietary Olympus format but with some editing we could come up with a show from all our pictures. Some short video sequences might even be aired by a local TV station.

2257. QST QST QST - WQ8RP to be activated for Flight of the Bumblebees, July 28

Yahoo group: GRARA
Date: 2013-07-02 17:50:39 UTC
From: Hank Greeb
Topic: 2257 Message: 2257

Yep, the Flight of the Bumblebees, sponsored by the Adventure Radio Society is being held on Sunday, July 28, from 1700 to 2100 UTC (1 p.m. to 5 p.m. EDT). Rules are at http://www.arsqrp.blogspot.com/
Note this is an event dedicated to "Corn Whiskey" only - so polish up your left foot sending.

I've reserved the use of the Michigan QRP Club's call, WQ8RP, and have requested a Bumblebee number, "88."

The place we've used for the past few years seems a reasonable spot - it's Fisk Knob Park, 17533 Algoma Avenue, Cedar Springs, MI 49319.
http://www.accesskent.com/Parks/Directory/fiskknob.htm
Note the web site says the park is not open - but that means it is not open to vehicular traffic except by special permission. Since FOBB requires that Bumblebee operators in the field "get to their operating site principally under their own power by walking, biking, boating, and so on. The distance traveled to the site is at the Bumblebee's discretion." The 200 or so feet from the parking lot to the big shade tree has satisfied the "walking" requirement in the past. I'll be there, probably by 1630Z or so, and set up under the tree near the bend in the walkway/driveway.

If you get lost, call my cell phone (616) 828-9663.

I invite anyone interested in QRP operation to join in this event. The rules state we may operate multi-op, but only one transmitter at a time. But, if you wish bring your rig, and hook it to the antenna when it's your turn at left foot sending. (Note, sending with left foot is optional - but CW is the only mode permitted by the rules.)

Please let me know by return e-mail, private responses preferred.

Don't miss the Fox Hunt Saturday!
Saturday, July 20th at 9:00 AM

Announcing the come one, come all, "It's About Freaking Time" fox vixen hunt. Okay, if nobody else is going to step up and kick off hunting season, I guess I'll have to do it. So, on Saturday morning, July 20, have your antennas polished, your batteries charged and your tanks filled ☐ and those are not euphemisms. Starting place will be the Family Fare parking lot (6480 28th Street in Hudsonville, crossroads of Port Sheldon & 28th). Be there, get your odometer reading recorded, and be ready to take off at 9:00am. You'll spend the next two hours wandering haplessly across the countryside, twirling around with your antennas, logging readings, checking maps, and playing with your protractors, trying to track me down.

The boring details are that transmissions will be on 145.530 Mhz, with the backup frequency of 145.580 Mhz. The vixen will be hiding within ten crow flying miles of the starting point and will be using a foxbox, transmitting one minute on and two minutes off. I might even throw in some micro foxes and/or a geocache just to make things interesting. That info will be published later this week.

If you have fox hunting equipment, bring a friend. If you don't have fox hunting gear, just show up and ride along with one of the so-called experts. Bring the family! (Families ☐ bring something to occupy yourselves during the two hour car ride.) After the hunt, we'll meet up at a location to be divulged later for the post hunt brag and gag session.

88,

K8AJ

2268. FT-857 For Sale (Accessories include a 2010 Toyota Prius!)

Yahoo group: GRARA
Date: 2013-07-18 00:15:20 UTC
From: chip_wb8alw
Topic: 2268 Message: 2268

Mel Jaquays, N8MJ (our (Kalamazoo ARC) club's only nonagenarian) has decided to sell his FT-857. It is presently attached to his car!

He would like to sell his 2010 Toyota Prius, along with the installed Yaesu FT-857 with autotuner. He also has a back-up camera on the vehicle as well as a GPS. He purchased the vehicle new and has most/all of the maintenance records, as well as what sounds like a meticulous accounting of the MPG. The last tank he used drove 49.1 MPG, and he maintains an overall average of 40 MPG. Vehicle has been driven approximately 13-14,000 miles.

He is very attached to his car, but doesn't believe he will be driving again, or at least not for another year or so. He's 93 years young!!

If you are interested, or know someone who might be interested, please let them know and call Mel at:

269.649.1863 (Home)(Best number)
or
269.779.5045 (Cell)

for further details.

He is located in the Vicksburg, MI area SE of Kalamazoo.

He wanted to offer it to the area Ham community first, so don't wait!!

73

Chip Locke - WB8ALW (At N8MJ's request!)

(PS - He has difficulty retrieving voice messages from his phone device, so if you leave a message, make a mental note to call him back in a day or so to try and catch him!!)

There are those who are really good at Fox Hunting, and then there are those who are fun to watch Fox Hunting.

And so it was, starting at 9 am. The Vixen went on the air from an undisclosed location. Thirty minutes later, and in a direct road drive to the transmitter, Laryn, K8TVZ once again exhibited his RF nose.

The Vixen was located at the Chick'n Lick'n Restaurant, on the SW corner of 64th St. and Byron Road smack dab in the heart of downtown Vriesland. She was inside an air conditioned building, with her car with the Fox Box transmitter parked just outside her window. There was a sign on her driver door window, "Winner, winner, Chicken Dinner!'. Indeed, Laryn received a free breakfast. A note. Where else does a fox belong, but in a hen house named Chick'n Lick'n?

Ten minutes behind Laryn, but with a few more miles, was Tom, K8TB.

A while later, Mike, W8DER showed up, pulling up right alongside the Vixen's car.

Mike came inside and joined Sheila, Laryn and Tom in watching a show that should have been televised. There were two fox hunters, who were parked across the street, and for 30 very amusing moments, could not locate anything. Their names will not be released.

But, with 15 seconds to spare on the 2 hour time limit, Chuck, AJ8W James, K8JHR walked into the restaurant. Was it mentioned that the restaurant was air conditioned, has great food and bathrooms?

A good time was had by all. OK, a good time was had by most.

Next Hunt? It's up to Laryn.

Ten minutes behind Laryn, but with a few more miles, was Tom, K8TB.

A while later, Mike, W8DER showed up, pulling up right alongside the Vixen's car.

Mike came inside and joined Sheila, Laryn and Tom in watching a show that should have been televised. There were two fox hunters, who were parked across the street, and for 30 very amusing moments, could not locate anything. Their names will not be released.

But, with 15 seconds to spare on the 2 hour time limit, Chuck, AJ8W James, K8JHR walked into the restaurant. Was it mentioned that the restaurant was air conditioned, has great food and bathrooms?

A good time was had by all. OK, a good time was had by most.

Next Hunt? It's up to Laryn.

2275. Re: [HQRP] NEXT SUNDAY - JULY 28 - Flight of the Bumble Bees!

Yahoo group: GRARA
Date: 2013-07-21 19:12:28 UTC
From: Hank Greeb
Topic: 2275 Message: 2275

Attention all hams, especially those interested in "low power operating"

Note the upcoming "Flight of the Bumblebees. (FOBB)"

This is a great opportunity to assemble a "QRP in the Park" event. One may operate multi-single, or if desired, several people may congregate at the same location, use separate calls, and submit several entries.

A few of us will be wandering up to Fisk Knob Park, 17533 Algoma Avenue, Cedar Springs, MI 49319, arriving sometime between noon and 12:30 p.m. EDT, and operating Multi-single using the Michigan QRP Club call WQ8RP. If you're interested in joining the multitude, please lettuce no via return e-mail or calling me @ home 616-433-9050. I'll have a cell phone with me, but prefer NOT to publicize the number here on the wild world of the internet.

If you need more info on Fisk Knob Park, the web site is:
http://www.accesskent.com/Parks/Directory/fiskknob.htm
You may note that the park is listed as "closed." This means no vehicular traffic is allowed. Foot traffic is encouraged, which conforms to the FOBB requirement of "some" use of non-vehicular transportation to the operating site. It also means that there are no facilities, except one trash barrel and one picnic table at the park. Nearest restroom facilities are several miles down to road, so be forewarned.

Hope to see many fellow hams @ Fisk Knob next Sunday.

In case of inclement weather, we'll be at the picnic shelter along the Fred Meijer White Pine Trail in Sand Lake, Michigan. Map of this location is at

2279. Field day History tour

Yahoo group: GRARA
Date: 2013-07-24 22:46:28 UTC
From: Hank Greeb
Topic: 2279 Message: 2279

A member piqued my interest in past efforts by GRARA and other local clubs in which I've specific interest, so I looked up results from 2006, when I first joined the fray. I participated in the W8DC effort in 2006,and 2008 thru 2010, plus 2011 thru present. I partook of the W8LRC effort in 2007, and decided NOT to join any FD effort in 2010 because it coincided with our 50th Wedding Anniversary.

The "Ranking" are the rank amongst all entries,regardless of class, in Michigan. These results ain't nuttin' about which to write home, but of probable interest to local ham radiohistorians.

Year Call Score Category QSOs Power Mult GOTA Call Section Participants Rank Club
2006 W8DC 3,978 2A 1,036 2 N8DGD MI 40 15 of 73 Grand Rapids ARA
2007 W8DC 2,918 2A 1,192 2 MI 15 21 of 85 Grand Rapids ARA
2007 W8LRC 4,336 4A 1,196 2 MI 51 11 of 85 Lowell ARC
2008 W8DC 2,798 3A 784 2 W8GVU MI 50 27 of 92 Grand Rapids ARA
2008 W8LRC 2,766 2A 1,044 2 KC8REH MI 17 28 of 92 Lowell ARC
2009 W8DC 2,190 2A 529 2 MI 25 29 of 88 Grand Rapids ARA
2010 W8DC 2,978 3A 680 2 MI 25 21 of 88 Grand Rapids ARA
2010 K8LHS 2,132 2A 741 2 MI 9 Lowell AR Youth Club
2011 W8M 2,486 3A 772 2 MI 16 27 of 92
2012 W8M 3,634 3A 1,167 2
MI 20 13 of 85
2013 W8DC 2,976 3A 682 2
mi 25 ???? Grand Rapids ARA

Score for years 2006 thru 2012 are actual, for 2013 is claimed.

2280. Reminder: 2013 ARS Flight of the Bumblebees is Tomorrow (Sunday)

Yahoo group: GRARA
Date: 2013-07-27 14:45:34 UTC
From: Hank Greeb
Topic: 2280 Message: 2280

Yep, I know, I know, this is getting redundant, and possibly boring to folks who don't operate CW QRP, but, the internet is abuzz (pun intended, with news of the "2013 Flight of the Bumblebees."

At least three of us nuts.... errr, hardy souls, will be going out to either Fisk Knob Park or to the Fred Meijer White Pine Trail (depending on probability of precipitation at 11 a.m. tomorrow) and set up for this event. If you plan to come out, and have NOT provided contact information, please do so, because the last weather forecast was for 70% probability of rain tomorrow.

Note, if the weather forecast is wrong, we WILL be at the highest point in Kent County, Michigan - namely Fisk Knob Park, 17533 Algoma Avenue, Cedar Springs, MI 49319. Be aware - there are NO facilities, except a shade tree and a parking lot on site. Nearest restroom facilities are about 1.5 miles away, either north or south. And, it could be windy, because of he high location, so you may wish to bring a windbreaker and/or light jacket.

But, if it rains, or if the probability of rain remains high, we WILL transfer to the rest stop/picnic shelter along the White Pine Trail near 4th and Lake Streets in Sand Lake. I'll call everyone who has provided contact info (cell phone or home phone) - sorry, my 2 meter FM rig is not functional right now).

We encourage visitors, and/or ops who can operate ANY speed of CW. This is far from a "speed demon" contest. The average speed is probably between 10 and 15 WPM, and people WILL slow down to whatever speed in comfortable for you! So, come one, come all, and join the fray!

Latest "blog" by the organizers of the FOBB follows:

==========
Hooray! It's 2013 Flight of the Bumblebees Eve!

The four-hour contest will kick off tomorrow (SUNDAY) at 1700 UTC. That is 1 p.m. Eastern; Noon Central; 11 a.m. Mountain; 10 a.m. Pacific; and 7 a.m. Hawaii.

The buzzing will be around the standard, non-WARC HF QRP calling frequencies.

(These are 7030-7040 KHz, 7100-7125 KHz, 14060, 21060, 28060 KHz. - Ed)

We're up to 160+ bumblebees and still taking requests for BB numbers from stations planning to operate FOBB from the field. Visit the ARS

website for details:

http://www.ARSqrp.blogspot.com

As with all ARS events, please keep safety in front of mind when conducting operations in the field. Such things as weather, power lines, terrain, dehydration and fatigue can be lethal. Above all, we want all participants to have a fabulous and safe experience.

Thanx!

Richard Fisher, KI6SN

From: Hank Greeb
Topic: 2282 Message: 2282

I forgot to check whether the Projector which is supposed to be in the
W8DC radio room was actually there.

Would someone bring a 'backup" projector to be absitively sure we have one.

I'm putting together a slide show of picture which were taken by several
people @ Field day, so a projector is highly desirable.

Hi Rob!!

I apologize, I thought I got back with you about it. I still need one. I have found some but they do not work all that well. Most had a bad floppy drive, and that was one thing it had to have was a working floppy drive.

If yours is still available I can meet with you and pick it up. How much do you want for it.

Jack:

Thanks for the clarification.

There are many other things which are not obvious, even to an olde f**t fogey like me, who has been around ham radio for >60 years.? To me, there didn't seem any way to "turn on" the 2 meter rig which also had the the new d-star mode in it.? I didn't try anything in the room, but I thought I might be competent enough to push a "push to talk" button on a microphone and announce my presence had I been able to figure out where the "on-off" switch is on the new 2 meter rig.

I thought we had some sort of ossifer who is charged with education and training.? If we don't we certainly could use one, because there's at least one person (me) who doesn't have the foggiest idea of how things work @ W8DC.? Perhaps all others in the club know how everything works, so I may be the dunce of the crowd.

Thanks Joe:

You hit the bell right on the head.

Lessee, we claim (Or at least, at one time we claimed) we are (were) a "Special Service Club" yet we fail miserably on training.

The listing on ARRL web site says that Jack, AB8ND is president, and Richard Douglas, KC8NKA is newsletter editor,
and that we have

Club Newsletter (I ain't seen one in the 6 years I've been a member),
Entry-Level License Classes (occasionally),
Hamfest,
License Test Sessions,
On-The-Air Bulletins (on what bands/modes, schedule? - beats me)
Packet Radio BBS,
Repeater

Is anything in the above out of date?

Hank,

This was a link to a video Tom, N8DGD, made on operation of the HF with the external tuner and amp. He asked me to post it here at the meeting Friday.

The operative words are "could be."

The actual words are "haven't been" and "probably won't ever be" (knowing past history - mine is recent, only goes back 6 years or so)

2296. Thanks, Hank.... for the suggested updates

Yahoo group: GRARA
Date: 2013-08-09 15:14:31 UTC
From: W8DER
Topic: 2296 Message: 2296

Thank you Hank, I had forgotten to update our club information on the ARRL website. I submitted the changes today, so Tom is officially the president. (I'm sure he is glad to hear that!) They provide a little spot for general information, so I used the opportunity to brag about our great VE testing sessions also.

It takes a few days for the information to get updated online at ARRL.

Looks like officer information is ok on http://www.W8DC.org.

I also checked our information on QRZ.com. I DID remember that one. Life is good!

Hi Rob!!

No it can not be newer. If the processor speed is above 166mhz I can not do any programing. I could turn the radio into a BIG brick. 166mhz processor and slower is what I am looking for.

Thanks

Tom,

Ok, I do not have a laptop that old in technology. You may want to try Brim Computers on Lenard and Fuller. He did have older systems the last I checked.

Really, I am sorry to hear that. I always went to him for older equipment. If in my travels I find some older equipment I will let you know.

Sorry I could not help more.

2310. Repeater Information Clarification

Yahoo group: GRARA
Date: 2013-08-19 16:06:02 UTC
From: Robert S
Topic: 2310 Message: 2310

I notice in various repeater directories a few repeaters for W8DC.

1. 147.260 PL 94.8 Offset +
2. 147.760 PL 94.8 Offset +

Two questions:

1. The second listing, is it wrong or is that repeater not functioning? I try that frequency and am unable to bring up the repeater. The W8DC site does not show the that repeater.

2. Is there not currently a 70cm repeater available that is managed by GRARA?

Thanks everyone!

Rob,

Minor correction. The second repeater would be 146.76, minus offset (-600) and a 94.8 Hz tone. Try that and see if it works.

Me? I'm so old I remember the 76 repeater on 92nd St hill using Moseley DI-2 antennas and a tube type GE Progress line transmitter and receiver. Yup, that's old.

LOL!!! WOW You are old Tom. I know I have no room to talk. One more for us old timers. You could whistle it up if you did not have tone capability. I think the tone was 1600 c/ hertz.

From: Robert S
Topic: 2310 Message: 2314

Tom,

Well it would appear that I can not read the repeater directory correctly. I made the changes to the "correct" frequency and the correct offset and I am able to bring up the repeater as expected.

The repeater directories have a +600 KHz listed for that repeater. It would appear that I had two things going on.

I am such a new ham!

Smiles, thanks for the update and for the reply to my posting.

From: Robert S
Topic: 2310 Message: 2315

Tom,

Is there a reason that the both repeaters are not listed on the GRARA website?

I submitted an edit request on the Artsci Repeater Directory asking them to change the offset information on the repeater listing for 146.760.

I do not know if they will submit an email to the GRARA requesting verification or not. Hope that request is Ok with the club.

http://www.artscipub.com/repeaters/local/index.asp?state=Michigan&city=GRAND RAPIDS

You might try putting a wanted message on Craigslist. I did it for a part I needed and it worked for me... SOMEONE must have one sitting in a closet somewhere...

Really, I am sorry to hear that. I always went to him for older equipment. If in my travels I find some older equipment I will let you know.

Sorry I could not help more.

FREE magazines - Basement cleanout

Ham Radio magazine - 9 bundles of misc issues in no particular order,
post 1976 size

QEX magazine - 3 bundles of misc issues in no particular order

Communications Quarterly - 1 bundle of misc issues in no particular order

73 Magazine - 8 bundles of misc issues in no particular order, most pre
1976 size

QST magazine - 2003, 2004, 2005

Monitoring Times - 1998 - 2004

Popular Communications - 1995 - 2005

Nuts & Volts - 1999 - 2002

GROUND RULES:
Pick up at my place or
I'll bring them to GRAHamfest http://www.w8dc.org Saturday, September
7, ONLY IF SOMEONE HAS COMMITTED TO TAKING THEM

Requests are for ALL of a type of magazines. In other words ALL QSTs,
or ALL 73s, etc.

I will not separate out individual months. Take all or not.

Any not claimed after the hamfest go to county paper recycle.

I remember working with Tom and Gisele at several VE sessions.

That was a number of years ago. Didn't realize Tom's age. Time passes quickly!

I hope Gisele is doing OK. Wonder if she will need any help with the ham station?

The Grand Rapids Amateur Radio Assoc. Hamfest is coming up fast! It's on Saturday, September 7th. Check out full information on the http://www.w8dc.org web site.

Also we have recently added information on the site about the October Hamfests in Muskegon and Kalamazoo.

Check it out!

2325. Voice of Russia Radio Stops Shortwave Service

Yahoo group: GRARA
Date: 2013-08-23 23:42:39 UTC
From: Jack Amelar
Topic: 2325 Message: 2325

Voice of Russia will end shortwave service January 1, 2014
Those of us who tune outside the HF ham bands. should know what I'm
referring to.
Definitely a long ways from the Radio Moscow (VO Russia's predecessor)
in the cold war days when turning on a shortwave radio all you had to
do is spin the tuning dial about half a turn to find them. Anyone on 40
meter phone in the evening couldn't avoid them. Today's Voice of Russia
can be a challenge to find / receive, unless, of course, you audio
stream from their website http://www.voiceofrussia.ru/
There will still be domestic shortwave stations in Russia in Russian language.

To get an idea of how many frequencies Radio Moscow would simulcast on,
listen to this sign on from 1981
http://www.intervalsignals.net/files/rus-z-radio_moscow_000181.m3u
or this sign on from the first day of attempted coup in 1991
http://www.intervalsignals.net/files/rus-z-rmws_coup_190891.m3u

---

Report:
http://en.rian.ru/russia/20130821/182889844/Voice-of-Russia-Radio-Stops-Shortwave-Service.html

MOSCOW, August 21 (RIA Novosti) ☐ The Russian government☐s
international radio broadcasting service Golos Rossii (Voice of Russia)
will stop its shortwave broadcasts from January 1 next year, the
Digit.ru online journal reported Wednesday.

The shortwave service is closing ☐due to funding cuts,☐ Voice of Russia
deputy director Natalya Zhmai said in a letter dated August 15 to
Andrei Romanchenko, head of the Russian Television and Radio
Broadcasting Network (RTRBN), the journal said.

Voice of Russia, established in 1929, currently uses RTRBN transmitters
to broadcast to foreign countries using short and medium waves. After
the shortwave service goes off the air, only three low-power medium
wave transmitters will be used to broadcast to other countries, an
industry source told Digit.ru.

The radio will mostly use FM band transmitters based abroad, the source said.

At the beginning of the year, Voice of Russia cut the total volume of
shortwave broadcasts to 26 hours a day from more than 50 hours in 2012.

Steve,

To my knowledge, GRARA has two Google Accounts that are used for web functionality purposes. Both have usernames and passwords and mobile phone numbers that can _not _be linked back to GRARA or to any GRARA Member, especially to you as Technical Director.

Both of them contain non-sensitive data. _Information_ on the accounts could contain GRARA public information only to the extent that it is displayed on the website. (Like a GRARA meeting date.)

I checked them this morning and they are still active under our passwords and running.

I think that somebody is trying to give you gray hair.

I agree with Mark. Sounds like a phishing scheme. Contact Google direct. Like Mark said, do not use any links, in an email with that kind of content in it. That is how so many people are having there email hijacked and then using all your contacts to send out all the bogus stuff now a days.

I'm more inclined to suspect it was a typo on the username, and the person unwittingly tried to recover the password before realizing the error. I've encountered this before, and it's common especially if the username utilizes acronyms. There's simply not much gained by phishing an amateur radio association's Google account.

If two-factor authentication is enabled on the account(s), there's little need to worry, even with a successful phishing attempt that recovers the login password. If it's not enabled, do so (Google search two-factor authentication).

Not spam, not a phishing attempt.
It was me. It's a gmail originally set up as the contact for GRAHamfest
which hasn't been used in 3 years.
Ignore it.

2339. 160 m and an Extended Band AM station

Yahoo group: GRARA
Date: 2013-08-29 18:36:37 UTC
From: Cortland Richmond
Topic: 2339 Message: 2339

I live about 1500 meters from WPRR, a 10KW daytime, 680W nighttime AMBC station on 1680 KHz.

The past few weeks, there've not only been no spurs on HF,. they've been running the same power day and night; low power. This was still showing 50 dBuV (316 uV) with one meter of wire on a spectrum analyzer, but I could certainly live with that.

Today though, I thought the analyzer was malfunctioning. The good news is, it's not, but there's bad news too; they're fixing things; WPRR was was intermiitent adn weaker this past few days and they ve been on and off and REALLY weak (16 dBuV, 3.16 uV) today. Can't say I miss the blanketing, but they'll be back and if 680W was 50 DBuV, 10KW wil be 73 dBuV on the same 1 meter wire in 50 OHmz -- 4.6 MILLIVOLTS. Ouch.

Time for a loop antenna. And good RF chokes on the Rigblasters.

Cortland
KA5S

*Exhibit 16
Description:* REASONS FOR REQUEST

ON JULY 20, 2013, STATION WPRR COMMENCED OPERATION WITH REDUCED DAYTIME POWER. THE REDUCED POWER WAS ITS LICENSED NIGHTTIME POWER OF 0.68 KW. THIS WAS DUE TO DAMAGE TO A SECTION OF THE TRANSMISSION LINE. NOTICE OF THE REDUCED POWER OPERATION WAS GIVEN, AS REQUIRED BY SECTION 73.1560(D) ON JULY 30, 2013. IT WAS ANTICIPATED THAT FULL POWER OPERATION COULD RESUME WITHIN 30 DAYS. HOWEVER, SOME ADDITIONAL DAMAGE WAS DISCOVERED, THE REPAIR OF WHICH WILL TAKE SOME ADDITIONAL TIME. IT IS EXPECTED THAT THE STATION WILL BE ABLE TO RESUME NORMAL OPERATION WITHIN A FEW WEEKS. IN THE MEANTIME, THE STATION WILL CONTINUE TO OPERATE WITH ITS LICENSED NIGHTTIME POWER

2343. J-Pole Build Results

Yahoo group: GRARA
Date: 2013-09-03 14:58:41 UTC
From: <roberts358@...>
Topic: 2343 Message: 2343

Well, as a new HAM I wanted to get some input on my latest build results of a ½" copper j-pole.

I built to spec using the Ham Universe site calculator listed below. My results were not great and I thought that I would ask for some advice from the "Pro's".

http://www.hamuniverse.com/jpole.html (Building)

I built as close to the specs as I could and my results are listed below.

http://www.hamuniverse.com/testingswr.html (Testing)

Using an antenna analyzer (MFJ-259B - http://www.mfjenterprises.com/Product.php?productid=MFJ-259B). Thank you to Mark – K8GAP for his generous gift of allowing me the use of the analyzer in my build projects. I hope to purchase a device of my own soon. I tried hard to get better results using this analyzer, however, in the end my results ended as follows.

144 MHz - 2.1 SWR
146 MHz - 1.6 SWR
148 MHz - 1.2 SWR

It is very clear that the antenna resonates best at the higher end of the band. It would appear that the antenna is too short. I built the antenna to measurements calculated to 146 MHz.

Before I give my ideas I thought that I would ask for the opinion of others in their build results.

Thanks Everyone,

Rob - KD8VHV

2345. Re: [GRARA] J-Pole Build Results

Yahoo group: GRARA
Date: 2013-09-03 16:00:22 UTC
From: Hank Greeb
Topic: 2343 Message: 2345

You didn't say where you were measuring the SWR, i.e. how long of coax
you were using to connect to the antenna analyzers. With SWR on the
Coax, the "apparent SWR" can change depending on the length of the
feedline. It also appears that the MFJ-259B doesn't provide Resistive,
Inductive, or Capacitive reactance figures, so SWR, whilst useful, is
not a definitive matter.

Try adjusting the tap (point "C") up and/or down about 1/4" or so at a
time and see if the SWR @ 146 MHz improves.

You "should" be able to find a point where the coax sees 50 ohms resistive.

In my experience with VHF antenna, the general rule is that practical,
empirical, trial and error, generally trumps theoretical.

Besides, 1.6 SWR is not bad atall - most rigs tolerate SWR <= 2 with no
difficulty. So, I'm >99.44% sure you won't burn up the finals of your
rig if you use it as is.

Thank you N8XX for your suggestions and help.

Information: I tested SWR with 50' of RJ-58.

Regarding my adjustments I used only the tap C to adjust. The adjustment was alot higher than the 2 inches that the calculator states.

I might also add that this was my first time using an analyzer so in the end the results could be in part of low skill. Takes time to be proficient.

N8VWI

Bill J Zaidel

Bill, age 66, passed away Friday, August 30, 2013.

He was an Extra Class licensee who loved to work DX and

Special event stations. Bill, who served in the Army in Vietnam,

worked at the General motors plant in Grand Rapids.

He was involved with the Greyhound Rescue and provided many

Abused Greyhounds with a safe home in their later years. When

MARA purchased their first repeater, Bill and Connie helped set up

Our Operation Care Coffee Stop operation. He even let us use his motor Home till we could safely operate it ourselves. While his health

wasn't the best, he still was active in most of our club functions: Field Day, The Veteran's Special event station and maintaining the repeater grounds.

Bill loved to cook and spent many holiday's grilling everything one could eat! He loved to shoot and fish.

I will always remember Bill as the guy who helped me out in my time of need.

Bill's demons from Vietnam are finally gone. Rest in peace my friend.

Bill is survived by his wife, Connie N8WKQ and many family members.

Rich K8JX & Scooter the cat

Do not resent growing old.

Many are denied the privilege.

2348. Cheap SDR Testing Results

Yahoo group: GRARA
Date: 2013-09-03 17:18:00 UTC
From: <roberts358@...>
Topic: 2348 Message: 2348

Current Configuration:

HDSDR - Version 2.63 (SDR Software)

Zadig - Version 2.0.1.157 (USB Driver Installer)

USB Driver (WinUSB - 6.1.7600.16385)

NooElec Receiver (TV28T v2 DVB-T USB Stick (R820T))

NooElec Receiver (EzTV645 DVB-T USB Stick (FC0013))

Ham It Up - RF Upconverter (Version 1.2 125 MHz Model)

Antenna - Junk - Many Tears... (Waiting for HamFest Purchase - Smiles)

Operating System (Windows7 SP 1- 32 bit)

Dell (Latitude D620 - HD 250GB, Ram 4GB, Processor Dual Core T2300 1.66GHz)

I have had good results on the VHF 2m band. The issues that I am currently having are with quality and this is due to the "junk" antenna. I can tune NOAA Weather at 162.550 MHz and can receive with no issues and enjoy good signal quality.

I am waiting for the Hamfest on Saturday to grab an antenna setup for HF/VHF/UHF.

I am also testing another software (SDRadio) and have had very mixed results as again the antenna is junk. (Tears....). The software is buggy and stability has been a concern when I push areas hard. Example would be sampling rate and bandwidth.

I have really enjoyed working on this project and am looking forward to better results given a better antennas.

I am trying to keep portable as possible and as small as possible. I have begun to work on this project using a HP Tablet running Windows8. Thus far things are working great. Look forward to giving a better update with much more data.

From: Bob Hardin
Topic: 2343 Message: 2350

A balun is essential with a J-Pole. J-Poles are very sensitive to common mode currents.

Can be a commercial one or a simple as many wraps of coax around a torrid as close to the antenna as possible.

If different length coax changes things then you have a common mode current problem because the coax is part of the antenna. See the antenna hand book.

For what it is worth J

Subject: [GRARA] Cheap SDR Testing Results

Current Configuration:

HDSDR - Version 2.63 (SDR Software)

Zadig - Version 2.0.1.157 (USB Driver Installer)

USB Driver (WinUSB - 6.1.7600.16385)

NooElec Receiver (TV28T v2 DVB-T USB Stick (R820T))

NooElec Receiver (EzTV645 DVB-T USB Stick (FC0013))

Ham It Up - RF Upconverter (Version 1.2 125 MHz Model)

Antenna - Junk - Many Tears... (Waiting for HamFest Purchase - Smiles)

Operating System (Windows7 SP 1- 32 bit)

Dell (Latitude D620 - HD 250GB, Ram 4GB, Processor Dual Core T2300 1.66GHz)

I have had good results on the VHF 2m band. The issues that I am currently having are with quality and this is due to the "junk" antenna. I can tune NOAA Weather at 162.550 MHz and can receive with no issues and enjoy good signal quality.

I am waiting for the Hamfest on Saturday to grab an antenna setup for HF/VHF/UHF.

I am also testing another software (SDRadio) and have had very mixed results as again the antenna is junk. (Tears....). The software is buggy and stability has been a concern when I push areas hard. Example would be sampling rate and bandwidth.

I have really enjoyed working on this project and am looking forward to better results given a better antennas.

I am trying to keep portable as possible and as small as possible. I have begun to work on this project using a HP Tablet running Windows8. Thus far things are working great. Look forward to giving a better update with much more data.

2355. Re: D-Star Inquiry

Yahoo group: GRARA
Date: 2013-09-03 20:25:13 UTC
From: kb8zgl
Topic: 2353 Message: 2355

Hi Rob,
D-STAR is very active in West Michigan. See
http://www.dstarusers.org/viewrepeater.php?system=WX8GRR

I really like my dongle. It was a good way to get started into D-Star before buying the radio. It allows access to all of the REF and XRF reflectors (yes, there are at least two competing reflector technologies, but don't let that scare you). REF 001 C is a great place to meet hams on D-STAR.

The Dongle can be made to do other neat things as you become more familiar with D-STAR. I take it with me when on vacation as it is easy to pack and I can enjoy QSOs with my dongle, my laptop and a good headset.

If you are not in the process of buying a new radio and just want to try and learn if D-STAR is right for you this is a great way to get started. If you have a D-STAR radio already or are looking at a new radio, then I would consider a D-STAR radio which has other purposes for the place to invest the $200.

Have you done Echolink, IRLP or Allstar? These VoIP technologies can give you hours of similar fun without any investment up front. Google should help you find out more about these. I do a lot more on Allstar than on D-STAR these days, but still enjoy all that D-STAR has to offer.

2356. IRA Work Days _ Need Help

Yahoo group: GRARA
Date: 2013-09-03 13:57:34 UTC
From: Michael Smith
Topic: 2356 Message: 2356
Attachments: 1 described; binary payloads are missing from this source WARC

Fellow hams,

The IRA is in need of help. We have a serious roof issues.
We are in need of personal to help reroof and work site cleanup, donations of material for the roofing project or donations to help cover the cost.

The main transmitter building needs:

Rotted out plywood replaced

New high wind rated shingles.

Specialized flashing around tower leg structure that penetrates the roof.

Cost Approx. $400 - $600 in materials

Middle Building - nearly a flat roof.

Replacement of rotted decking plywood, fascia and soffits.

Counter flashing to meet lower building

Replace the roll tar roofing with new EMD solid rubber roofing - this would provide for the longest life time and easy maintenance

Cost Approx. - $2000 in materials

Walkway

Remove old insulation & repair Roof penetration of Tower support.

Cost Approx. - $175 in materials

How can you help:

We need personal to help with the roofing job. If you have no experience, we can teach. Also need to whack weeds, clear back some brush, etc.

Tearing off the old roofing

Repair water damage

Reroof

If we have the personal - Mow, Weed whack, Paint main gate, etc.

Material donation:

If you have any of the following or know someone that does -
we could use donations of:

Qty

Materials

Tools - Borrow / bring

PPE

13

4x8x 1/2 OSB

Hammers

Gloves

1-1/2" Ring shank Nail - Decking

Cordless Screw Gun

Hard Hat

10 lbs

2" Ext. Screws or = decking screws

Caulk Gun - larger & Small

Safety Glasses

Ice & Damn Shield - Rolls

Pry Bars

sun screen

8

AL Drip Edging 10'

5 lbs

AL finishing Nails

Shingle Removal Tools - assort.

1" Coil Roofing Nails

Trim / Aluminum Brake

4

1x6 x 8' Pine

Tin Snips

AL Fascia Flashing

Nail Set

Roof Caulk - PL

circular saw

Black Jack - Large Tube

Nail Biter Blades Saw blade (7 1/4)

2

2x8x8'

Jig saw & Blades

4

1/2 Plywood (CDX) - For Soffits & Fac.

Tape Measure

Roofing Square

3

High wind (100+ Mph rated) Shingles Per Sq

Chalk line

Soffit Vents _ round

wheel barrow

Soffit Vents Sq

sawzall & Blades

4

1/2 Plywood - Treated

Aluminum Coil Stock 4, 12 , 24" - White

Weed Whacker / string Trimmer

AL Trim Finish Nails

brush cutter

EDM Roof Roll - 12' x 36

AL Step Flashing

Finical assistance: Anything we can't get donated we will have to buy. I have lined up a roofing distributor that will give us a great discount on materials.

Currently we do not have anywhere the needed funds to cover this expense - so anything will help.

When: - September 14th. (15th if extra time is needed)

September 21 - rain day.

Where:

Grand Rapids Main transmitter sites - 92nd, just west of eastern. - talk in on 147.160 pl 94.

Please Pass this e-mail on to all the hams and friends that maybe able to help

If you can help with any of this and / or can make the work party - please RSVP to any board member (on the air, or in person) or e-mail - volunteer@...

Thank you for your continuing support.

Michael W. Smith, KC8WJA

President, Independent Repeater Association - W8IRA

Mike - KB8ZGL

Thank you for the suggestions and the information.

I have not looked into the Echolink, IRLP or Allstar yet. I am new to this area and there are so many things to get started with.

I have been working on SDR projects and have enjoyed them very much. I am hoping to start working on SDR with Rasberry Pi soon and the GNURadio holds some interesting ideas as well.

Thanks for the helpful suggestion and I will look into getting a dv dongle soon. I am hoping that later this year I can purchase a ICOM IC-2820H with the D-Star feature.

Thanks again for the information and feedback,

KD8VHV - Rob

A balun is essential with a J-Pole. J-Poles are very sensitive to common mode currents.

Can be a commercial one or a simple as many wraps of coax around a torrid as close to the antenna as possible.

If different length coax changes things then you have a common mode current problem because the coax is part of the antenna. See the antenna hand book.

Subject: Re: [GRARA] J-Pole Build Results

You didn't say where you were measuring the SWR, i.e. how long of coax you were using to connect to the antenna analyzers. With SWR on the Coax, the "apparent SWR" can change depending on the length of the feedline. It also appears that the MFJ-259B doesn't provide Resistive, Inductive, or Capacitive reactance figures, so SWR, whilst useful, is not a definitive matter.

Try adjusting the tap (point "C") up and/or down about 1/4" or so at a time and see if the SWR @ 146 MHz improves.

You "should" be able to find a point where the coax sees 50 ohms resistive.

In my experience with VHF antenna, the general rule is that practical, empirical, trial and error, generally trumps theoretical.

Besides, 1.6 SWR is not bad atall - most rigs tolerate SWR <= 2 with no difficulty. So, I'm >99.44% sure you won't burn up the finals of your rig if you use it as is.

Well, as a new HAM I wanted to get some input on my latest build results of a ½" copper j-pole.

I built to spec using the Ham Universe site calculator listed below. My results were not great and I thought that I would ask for some advice from the "Pro's".

http://www.hamuniverse.com/jpole.html (Building)

I built as close to the specs as I could and my results are listed below.

http://www.hamuniverse.com/testingswr.html (Testing)

Using an antenna analyzer (MFJ-259B - http://www.mfjenterprises.com/Product.php?productid=MFJ-259B). Thank you to Mark – K8GAP for his generous gift of allowing me the use of the analyzer in my build projects. I hope to purchase a device of my own soon. I tried hard to get better results using this analyzer, however, in the end my results ended as follows.

144 MHz - 2.1 SWR
146 MHz - 1.6 SWR
148 MHz - 1.2 SWR

It is very clear that the antenna resonates best at the higher end of the band. It would appear that the antenna is too short. I built the antenna to measurements calculated to 146 MHz.

Before I give my ideas I thought that I would ask for the opinion of others in their build results

Thanks Everyone,

Rob - KD8VHV

I built as close to the specs as I could and my results are listed below.
http://www.hamuniverse.com/testingswr.html (Testing)
Using an antenna analyzer (MFJ-259B - http://www.mfjenterprises.com/Product.php?productid=MFJ-259B). Thank you to Mark â☐☐ K8GAP for his generous gift of allowing me the use of the analyzer in my build projects. I hope to purchase a device of my own soon. I tried hard to get better results using this analyzer, however, in the end my results ended as follows.
144 MHz - 2.1 SWR
146 MHz - 1.6 SWR
148 MHz - 1.2 SWR

It is very clear that the antenna resonates best at the higher end of the band. It would appear that the antenna is too short. I built the antenna to measurements calculated to 146 MHz.

Before I give my ideas I thought that I would ask for the opinion of others in their build results

Thanks Everyone,

Rob - KD8VHV

2364. Friday's MOnthly Meeting ????

Yahoo group: GRARA
Date: 2013-09-04 05:11:38 UTC
From: <UncleFester@...>
Topic: 2364 Message: 2364

With Hamfest setup 7-9 PM Friday, will there still be a regular club meeting? I have Scout troops asking about Jamboree On The Air, which will be in October, and it needs some discussing, and volunteers/volentolds.

Jerry KD8SRH

Hello Jerry, There is no official meeting, just Hamfest setup Friday Night.\

Check out the club web site: http://www.w8dc.org

Maybe you would want to discuss Jamboree On The Air here on the Yahoo group. It sounds like a good opportunity promote this great hobby.

Hope to see you at the hamfest Saturday

Rob,

The choke coil is a good thing.

If you put those 5 turns thru a toroid say type 31 it will be even better. Mike in Holland repair shop has them.

Choke/balun/unun whatever you want to call it, does the same thing. J

Bob,

Thank you for your suggestion. I made a simple choke coil with five turns of the coax as suggested on one of the internet sites.. I will read about the use of a balun.

You didn't say where you were measuring the SWR, i.e. how long of coax you were using to connect to the antenna analyzers. With SWR on the Coax, the "apparent SWR" can change depending on the length of the feedline. It also appears that the MFJ-259B doesn't provide Resistive, Inductive, or Capacitive reactance figures, so SWR, whilst useful, is not a definitive matter.

Try adjusting the tap (point "C") up and/or down about 1/4" or so at a time and see if the SWR @ 146 MHz improves.

You "should" be able to find a point where the coax sees 50 ohms resistive.

In my experience with VHF antenna, the general rule is that practical, empirical, trial and error, generally trumps theoretical.

Besides, 1.6 SWR is not bad atall - most rigs tolerate SWR <= 2 with no difficulty. So, I'm >99.44% sure you won't burn up the finals of your rig if you use it as is.

From: Bryan Leenheer
Topic: 2369 Message: 2369

http://www.w9fz.com/midwestmania13/

A reminder that the VHF+ contest is happening this weekend. Click the above link for information about stations that will be on the air. Add your own station to the list and point your antennas in their directions!

And here's another one. It looks like there will be pretty good Rover activity also, so the points can really rack up quickly if you work many bands and many grids!

https://docs.google.com/spreadsheet/ccc?key=0AvU0R8d2qq2DdGVST0dBM3RmZHd4aUQyaGFkaFdCQ2c#gid=0

There are the two new operator categories to play in as well, FM-only and 3 band (6m, 2m, and 70cm) which is perfect for those of you with the "shack in the box" radios! Just remember that all VHF activity in SSB is on Upper Sideband and Horizontal Polarization works best - although you can make contacts if you're limited to vertical.

A link to the rules is here: http://www.arrl.org/september-vhf

I hope to hear many of you on the air this weekend!

Bryan Leenheer, KD8LDX

It is the VHF QSO party. It's a "beam pointing aid" to know where some stations are located and their plans for the weekend; just within the area we can reach even if the bands are dead. The Rover list is particularly useful as it shows the expected times of operation as well as the grids.

>
> On the Air: Get on the Air for the ARRL September VHF Contest!
>
> The ARRL September VHF Contest is this weekend (1800 UTC September 14 to 0259 UTC September 16), providing a chance for radio amateurs of all levels to experience contesting on our higher bands. This event is markedly different from the June VHF Contest, due to the heightened potential of excellent tropospheric propagation. Activity will center on 50.125, 144.200, 222.100 and 432.100 MHz. These are calling frequencies, however, and contest participants should avoid monopolizing them.
>
> On 6 meters, the most popular band, most SSB activity will take place between 50.125 MHz and 50.250 MHz, and CW between 50.080 MHz and 50.100 MHz. The frequencies between 50.100 MHz and 50.125 MHz are considered a "DX Window," for contacts between W/VE and DX stations, so avoid US-to-US contacts in that part of the band. Check the band plans for details on all bands.
>
> Even FM operators can get in on the fun by competing in the FM-only category. FM simplex activity on 2 meters will center around population centers. Remember: ARRL General VHF Contest Rules prohibit contest operators from using the national simplex frequency of 146.52 MHz to make or solicit contacts.
>
> Rules and entry forms are on the ARRL website. All logs must be e-mailed or postmarked no later than 0300 UTC on October 16, 2013. Electronic logs are preferred. Send paper logs to September VHF Contest, ARRL, 225 Main St, Newington, CT 06111.

2375. And, don't forget the NA-Sprint, SSB version Sunday 0000Z-0400Z

Yahoo group: GRARA
Date: 2013-09-13 21:57:36 UTC
From: Hank Greeb
Topic: 2373 Message: 2375

Yup, that's 8 p.m Eastern Daylight time to Midnight, the NA-Sprint, SSB will be held. It's a "very interesting" or "very maddening" or "very $%^&#@" event, depending on your viewpoint.

BUT, it IS SSB, so the operators who like to flap their jaws, rather than the nuts who twiddle their left feet to communicate can have a ball.

Rules are athttp://ncjweb.com/sprintrules.php <http://ncjweb.com/sprintrules.php>. Note the "special QSY rules" which are the "very interesting" or "very maddening" or "very $%^&#@" part of the event.

Since most everything with shorter wavelength than 20 meters is UHF to me, I won't be on the VHF contest. But, I'll be dabbling in the SSB Sprint, with my mighty 5 watts and an antenna which has been proven "somewhat better than a dummy load buried 6 feet under ground." So, if you have a modest antenna and any sort of phone rig, why don't you jump in and get your feet wet.

72/73 de n8xx Hg
QRP >99.44% of the time

p.s. And, since the VHF contest is on for 27 or so hours, you CAN do both the NA-Sprint plus the VHF contest. So, look for Dave, KF8QL, as he meaders around the area, finding high spots from which to operate .

From: Hank Greeb
Topic: 2376 Message: 2376

My brother, who lives in Denver, sent me this article from the Denver Post concerning flood relief activity during the recent floods of the front range of the Rockies (South the Colorado Springs to North of Fort Collins and many smaller towns in the foothills of the Rockies.

http://goo.gl/nxCVLx

This is not unlike relief efforts during some of the major floods along the Ohio River in which I helped while we were living just outside of Cincinnati.

We seldom had flash floods, though. Generally the floods along the Ohio River took days, or weeks, to develop and crest.

Many are saying the flood they're experiencing along the front range is a "1000 year flood" or a "Flood of Biblical proportions."

Comments: Just tuning up for the NA-Sprint, and heard some LOUD Europeans. Was a bit surprised that they could hear me! Too bad I'm listed as Low Power - Ain't no QRP section in WAE. :(Nice contest otherwise!

2380. Wayne Green W2NSD SK

Yahoo group: GRARA
Date: 2013-09-17 14:40:45 UTC
From: Jack Amelar
Topic: 2380 Message: 2380

Some liked him, others hated him, but he always spoke his mind.

http://www.arrl.org/news/ham-radio-publications-pioneer-visionary-iconoclast-wayne-green-w2nsd-sk

Ham Radio Publications Pioneer, Visionary, Iconoclast Wayne Green, W2NSD, SK

Wayne S. Green II, W2NSD (☐Never Say Die☐), of Hancock, New Hampshire, died September 13. He was 91. A well-known and often outspoken figure during what some consider Amateur Radio☐s golden years in the 1950s and 1960s, Green helmed CQ Magazine for 5 years before becoming the self-proclaimed ☐El Supremo and Founder☐ in 1960 of 73 magazine, which he published until 2003.

☐The purpose of [73] at that time was to get more hams building equipment,☐ Green recounted in a radio interview several years ago. A hallmark of 73 was Green☐s iconic, rambling, and wide-ranging ☐Never Say Die☐ editorials, in which he rarely missed an opportunity to tweak the ARRL and his magazine competitors for their perceived shortcomings. In 2012 Green contributed back issues of 73 to Internet Archive.

☐Wayne will be remembered in many different ways by many different people, but he will be long remembered,☐ said ARRL CEO David Sumner, K1ZZ. ☐He maintained his membership in the ARRL despite being a persistent critic. In the early days of packet radio he gave me some good advice as to how the ARRL should promote the new technology: ☐Talk about it as if everybody☐s doing it, and eventually they will be.☐☐

Indeed, Green often was ahead of the curve in promoting such technologies as single-sideband phone, solid-state, FM, and the marriage of computers and ham radio, and he went on to found and publish Byte and other computer-oriented publications. ☐I live mostly in the future,☐ Green was quoted as saying.

Former ARRL Contributing Editor Stan Horzepa, WA1LOU, once wrote in his ☐Surfin☐☐ web column, ☐We take computers and the Internet for granted today. I first became interested in computers when Wayne Green, W2NSD, started writing about them in 73 magazine in the 1970s. Back then, you had to build your own from scratch or from kits.☐

Green maintained a larger-than-life presence, even in the years after he faded from the Amateur Radio spotlight, and he never did really retire. ☐Hey old buddy, I will miss you,☐ radio talk show host Art Bell, W6OBB, posted to Wayne Green☐s blog. ☐NEVER SAY DIE is a phrase that will be with me till it☐s my time.☐ Green was an occasional guest on Bell☐s ☐Coast to Coast AM☐ overnight talk program. There hardly was

an issue that Green would not confront, and he expounded a variety of unconventional science, health, and medical theories ☐ from cold fusion and the moon landing to AIDS and cancer cures. He continued to write and speak frequently on these topics and others, as well as on public policy, even at hamfests where he was a guest.

The ☐Final☐ in his blog sums up Green☐s overarching philosophy. ☐Wayne Green passed away September 13, 2013 in a peaceful, painless transition from this life on Earth. An eternal optimist, and one who loved to share his never-ending zest for life, he was a friend to many and will be missed greatly. Wayne was not afraid of dying and was very much ready to embark on his next great adventure to the afterlife.☐

Tom,

I believe that you had a Icom mobile radio at the ham fest for sale. Is the unit still for sale? If so would you send me information on model and price to email listed below.

Hope that you are doing well,

KD8VHV - Rob Schroeder

In the latest bulletin published by the Michigan Antique Radio Club http://www.michiganantiqueradio.org there are two ads for antique radio repair and one for antique radio restoration. The repair guys are in the SW area of the state, the restoration guy in Ontario.

Is your hold up repair of the radio, the cabinet, or both?

I don't know anyone in the GR area, but could ask around.

Jack NY8D

W5KUB Broadcast

To:

Tom Medlin

Please join us this weekend, September 27th and 28th for our first live international broadcast of the National Hamfest from Newark, England. ?This is the United Kingdom's largest Amateur Radio Rally (hamfest).

The rally is sponsored by the Radio Society of Great Britain (RSGB), hosted by the Lincoln Shortwave Club, RSGB?s club of the year, and the video feed provided by the Sheffield Amateur Radio Club.? This will be the fourth National Hamfest held at Newark.? It keeps getting bigger and better each year. During the National Hamfest you will see major vendors with their new equipment; used equipment in the flea market area; and interviews with special guests.? As always, you will have the opportunity to meet and chat with other ham radio operators from all over the world in the W5KUB.com chat room.

During the past year, we have had over 40,000 viewers follow our broadcasts. W5KUB will not physically attend the National Hamfest but will work with members of the Sheffield Amateur Radio Club.? The club will use their new GX3RCM trailer (previously the RSGB G4FUN trailer) that they recently won.? This trailer will be used to promote amateur radio.?

????????? Friday, Sept 27: 0900 UTC (3:00 AM CT) ? 1600 UTC (10;00 AM CT)
????????? Saturday, Sept 28:? 0900 UTC (3:00 AM CT) ? 1600 UTC (10:00 AM CT)

To join the broadcast go to?http://W5KUB.com (http://w5kub.com/) .? Please join our group on Facebook at?https://www.facebook.com/groups/w5kub/?to keep up with us year-round.?

Also, please help spread the word by posting this announcement in Facebook and forwarding this message to your ham radio friends that may not have received this message!

We'll 'see' you at England?s largest ham rally this weekend!

*MORRIS, ILLINOIS ? *The Rainbow Council Boy Scouts of America will participate in the 52nd Jamboree-on-the-Air on Saturday, October 19, 2013 at the Rainbow Scout Reservation in Morris, Illinois.? Scouts from Grundy, Kankakee and Will Counties will talk with their Scouting peers around the world using two-way amateur radio.

?There will be nearly 400 Scouts at Rainbow Scout Reservation that day,? said Marc Ryan, Rainbow Council Scout Executive, ?Jamboree-on-the-Air will introduce these young men to a hobby that has lead thousands of people to careers as engineers and other technical fields.?

More than 500,000 Scouts from 100 counties participate each year.? Rainbow Council has scheduled contacts with other Scout groups in Switzerland, Japan, and Great Britain.

??Jamboree-on-the-Air is the inaugural event for the council?s amateur radio program,? said Brian McDaniel, Executive Board Member and Station Trustee, ?Next year, we plan several council-wide projects that will introduce amateur radio to Scouts, provide merit badge and other advancement, and establish a permanent radio station at the Rainbow Scout Reservation.?

When - Saturday, October 19, 2013, 9:00 AM to 9:00 PM Central Time

Where Rainbow Scout Reservation. 2600 N. Winterbottom Road, Morris, IL 60450

This was posted some time back (March 29 of this year). Sounds like KD8SRH has some good directions.

Jerry - what do you need the rest of us to do?

W8QZ

Already on it.

I just completed a year-and-a-half "working my tickets" period for Woodbadge (business-level Scouting management training), and one of my 5 ticket items, International Scouting, had a huge ham component.

I first had to get a license! I've been "into" anything radio waves since I was 6. Ham license was, like so many, "next month", even though all I really had to learn was the ham-specific stuff (I had Commercial 1st-class in high school and later added microwave & radar). I got my Tech in time to help set up a HF station at the Michigan Int'l Camporee last July (my Troop hosted a unit from Budapest). General came later, only 47 years late. Gonna "test the waters" Saturday with the last test in Lowell.

I put a huge chunk of research into JOTA. I was supposed to interview Scouts from at least 25 separate JOTA activities, but had to scrape the barrel to get 10. This is a shame, since JOTA should be a bigger ham recruiting tool than all other public activities combined.

From surveys, I've found the biggest JOTA killers are PROPAGATION and POOR PLANNING-- and the two go hand in hand. The most common complaints were along the lines of, "All we did was watch some old guy fiddle with knobs & buttons" and "All that work studying to get a license, just to talk to Jenison?"

Jumping to "NOW": the link posted the post before is dead; Lowe Peninsula is now "Michigan Crossroads Council", and the 616 & 231 area codes are the "President Ford Field Service Council". Website is [url] www.michiganscouting.org [/url]. It hits all 4 FSC's. Merger's been a PITA, but they're really pushing International Scouting statewide now, and I'm jockeying for a position on their committee.

We can discuss this more at an upcoming meeting, but what I'm looking at and dialogueing with COuncikl is:

For Grand Rapids area, a common location (Council?). The more other Scouts a Scout sees, the more interested he'll be. More radios and operators in one place means less of the dreaded "dead time". Opportunities for demos & presentations-- that QSL from the aircraft carrier Hornet, for example, carries a lot of weight with the Scouts. The new ATCS radio-based railroad signaling system does too, even though it's not ham. VHF/UHF hams should be DELIBERATELY PLACED all over the area who just "happen" to be on, doing something interesting, and/or have a story to tell. In short, everything planned.

Scouting introduced a new International patch; it now involves some work beyond the old one. Cubs need ONE year's JOTA, Scouts and adults need TWO. So, demand for JOTA will go up.

I'm currently discussing options for something at Council; so far there's been SOME interest in considering semi-permanent/permanent power for the parking lot, both 120 & 220. (we wouldn't be the only people using it). taht's wher it stands right now.

Happy Easter!
Jerry

2399. GRARA Website Has been re-certified virus free.

Yahoo group: GRARA
Date: 2013-10-07 00:42:55 UTC
From: <mike@...>
Topic: 2399 Message: 2399

Good news! As you may know, the http://www.w8dc.org was tagged by Google as a suspect virus attack website. Apparently the tool we have been using for years as a page access counter (bottom of home page) has the same name as a new virus on the web. Still we take this sort of warning quite seriously.

We have removed the page access counter so the Google crawler will be happy. Then we completely erased the existing website, changed webteam access passwords, tested all pages in our backup files and them reloaded the website. Then we tested the w8dc.org website with our anti-virus tools.

As a final step, we submitted the website to Google for testing on Friday. This evening (Sunday) we were notified that our site passed their tests and we were taken off their suspect site list. This list is used by the Chrome and Firefox web browsers to display a real scary warning message. If you use the Microsoft Internet Explorer, you didn't see the "suspect site" message.

We also signed-up for Google to notify us by email immediately if they suspect any problem again in the future. It is smart to be careful in this crazy world.

It has been long weekend. Did we miss the contest?

QST ...- ...- ...-

http://www.scouting.org/jota.aspx What do we need to do as a club to get ready for JOTA (next week Saturday, the 19th)?

I'm guessing that the main thing is to make sure we've got a good working HF setup(s), at the Red Cross. Seems like we should check that out in advance.

Jim - what's the status of room(s) at the Red Cross for the 19th?

Voice and PSK 31 seem like likely choices. If we're going to try and run 2 stations at once, we need to make sure they don't overload each other. What bands do we want to try?

Do we want to have the scouts build a little 555-oscillator, and try sending a little code to each other (while they're waiting for a turn at the radio) ? What pieces will we need? Who's going to supervise that activity? Jerry said he had some of the pieces to do that - maybe a breadboard setup - no need to fuss with soldering - ?

Any thoughts?

John W8QZ

The room is reserved. Then plan right now is to go from 9 am to 2 pm and then 6 pm to 9 pm. We will need volunteers to man the radio room for these hours. We are planning on using the north stairwell for the groups to enter and exit, Have a request in to get the light fixed.We do need to get some type of agenda for this event.

John,

I talked to Tom about PSK last night, if we leave the HF station where it is in the shack we can do PSK. I will make sure next Wed. that the software and interface work. Well, the software anyway, I'm not sure how the interface works, but I'm sure Bob or Tom can instruct us on it.

John,

My Flex xcvr and laptop are portable, and PSK/CW/SSB ready. I'm available to bring it if there's interest in having a no-knobs SDR in the mix.

I wasn't planning to lead this - but just stir the pot, and get the "creative juices" flowing. Where's our on-air director? N8XX de W8QZ . . . . .?

Anyway, it sounds like we've got several options going. I like the idea of using an SDR radio - that could spark some interest in itself. Whoever runs it will need to be able to explain it at the appropriate level.
Be sure and take a look at the website link below, and especially the sub-page addressed to radio operators.

Can we get together Friday evening (the 18th) and check things out / get things set up?

Bob, if you can get an IRLP station / link set up, that'd be great. I don't know anything about that. I assume there's some radio to all that, somewhere.
Or could we use the linking feature of the Lowell repeater?

Okay, update from the Scouting end--
Fliers went out to all the Scouting Roundtables (adult leader monthly meetings/training/presentations-- THURSDAY. The early session conflicts with some "Show and Do", so good thing we kept the evening session. I will be at Cub Hike (Cubs hike from event to event; my Troop is showing how to make 400+ bake apples)

Quick question: Can the CLub afford a few pizzas for the GRARA volunteers?

I don't expect Scout attendance to be very high, what with such late notice. But I really like each and every proposal/offer posted here, to the point where >> I << would like to see therm! After all, all I have is a 2m/70cm handheld. Next year, if you-all don't declare all this a waste of time & effort, we could add attendance "lures" like prizes & drawings, sec.

I'll be at both sessions, of course. Do we have a sign-up list anywhere?

2409. Mark your calendars for November Sweepsteaks

Yahoo group: GRARA
Date: 2013-10-13 03:18:40 UTC
From: Hank Greeb
Topic: 2409 Message: 2409

Yup, it's that time of the year again.

The SSB version of the ARRL November Sweepsteaks is scheduled to begin @ 2100Z (That's 4 p.m. EST) November 16, and end at 0259Z November 18 (That's 9:59 p.m. November 17). This is an ideal time to check out W8DC.

And, since we have local noise on 80 & 40 meters (and sometimes even on 20 meters) we might consider operating the ARRL 10 meter contest, which begins on 0000Z Saturday, December 14 (7 p.m. Friday, December 13) and end at 0259Z Sunday December 15 (9:59 p.m. Saturday, December 14) One never knows if Sporadic E or even F layer propagation will exist on 10 meters.

Please mark you calendars.

2411. Ham in a Day Class in Holland, October 26, 2013

Yahoo group: GRARA
Date: 2013-10-14 19:44:22 UTC
From: Bryan Leenheer
Topic: 2411 Message: 2411

We got some great press in the Holland Sentinel recently. Please forward the article and the information below to anyone you think might be interested in the class. This is the last time we'll be having a class until the spring of 2014, and I would like to make sure that anyone interested in getting their license has the chance. We also would strongly encourage people interested to sign up via the Online Registration form, as space is limited.

http://www.hollandsentinel.com/news/x2139016078/Holland-Amateur-Radio-Club-to-host-Ham-in-a-Day-class

The Holland ARC will host another Ham License in a Day, October 26, 2013 (a Saturday).

More information at http://www.hollandarc.org/?p=2846

Online information and registration at

http://tinyurl.com/October2013HIAD
Here is some additional information for where, when, and what to bring (It's also available in the tinyurl above):

Location: American Red Cross of Ottawa County

270 James Street

Holland, MI 49424

Date: October 26, 2013 (Saturday)

Times: 1:00 PM to 6:00 PM Study Sessions
6:00 PM to 8:00 PM License Testing Session

Cost: $35.00 (Includes FCC Exam fee) Light refreshments will be provided.

What to bring with you.....
If available bring a legal photo ID such as a Drivers License or Passport. If no legal photo ID is available then bring 2 pieces of legal ID. Anyone 16 years old or younger must have a parent or legal guardian present for the entire session..
Bryan Leenheer, KD8LDX

So - Jerry KD8SRH, are you saying we should not expect to see a lot of Scouts for the 9 - 2 session? That implies we need more volunteers for the evening session, and fewer for the morning.

I'm guessing we will need 1 (at least) volunteer to 'watch the door' and guide the Scouts, etc. (perhaps help and guide them on a 555 code practice oscillator project / send a little code to each other), along with radio operators. The operators need to be able to work the equipment and make some HF contacts, involving the Scout(s) as much as possible. Let's hope the bands are in decent shape! I think we should try to have 2 HF stations running, if practical (1 voice, 1 PSK).

Bob Robinson - the IRLP idea sounds great . Is there a way we can run IRLP from a radio out of the Red Cross? Could we get permission to use the W8LRC repeater for JOTA? (There is a designated node for JOTA calling.) Whoever runs that will need to be able to explain how it works.

Jerry KD8SRH - Do you have the pieces for the code oscillator project?

Maybe we can sign-up via e-mail:

Morning session 1. W8QZ
9 - 2 2.
3.

Evening session 1.W8QZ
6 - 9 2.
3.
4.

John:

Looks like Saturday evening is largest need for volunteers? I could help. Time is 6 p.m. to 9 p.m? Will there be someone there for access to the building?

One suggestion - perhpas we should have some "name badges" with a scouts "first name, troop number" unless all the folks are coming in Scout Uniforms? Cheep, stick on badges would work fine. And a "Working marker" definitely NOT like the ones which are typically in the room in the basement.

Oh, and we hams should wear our name badges, OR use one of the paste on name badges. It's appalling to me that 80 to 90% of the members do NOT wear name badges @ our meetings. They expect a dolt like me to remember names? Shucks, I can't even remember MY name some daze.

We will probably be having some discussion on this at the Open Radio Room this week. Get Some type on agenda set up.
Should be a fun event
Jim KD8CAN

2417. State QSO Parties this weekend

Yahoo group: GRARA
Date: 2013-10-18 00:03:18 UTC
From: Hank Greeb
Topic: 2417 Message: 2417

There are a bunch of State QSO parties this weekend

Iowa QSO Party: 1400Z-2300Z, Oct 19, Rules @
http://www.wa0dx.org/IAQSO/

New York QSO Party: 1400Z, Oct 19 to 0200Z, Oct 20, Rules @
http://nyqp.org/wordpress/wp-content/uploads/2013/09/NYQSO-Party_Rules_2013.pdf
If the above gets truncated in transmission, try this itty bitt url
http://goo.gl/8hceRo

Illinois QSO Party: 1700Z, Oct 20 to 0100Z, Oct 21, Rules @
http://www.w9awe.org/ILQP%202013%20Rules.pdf

An "interesting" specialty contest is the Stew Perry Top Band Challenge,
called the "Pre-Stew". This is a 160 meter only contest, but has an
interesting wrinkle, in that there are multipliers based on distance
between locations of the contacts (i.e, if you work Australia from
Michigan you get a larger multiplier than if you work your neighbor
across town). There is also a multiplier for working <5 watts
(typically called QRP). Even a High Power station gets a multiplier
for working a station who is running lower power! Anyway, the details are

Stew Perry Topband Challenge: 1500Z, Oct 19 to 1500Z, Oct 20, Rules @
http://www.kkn.net/stew/stew.rules.txt
Note the rules say December 2012, but they haven't changed.

There's an activity NOT related to contesting, but involving Scouting
this Saturday @ W8DC. If you're available, please let John, W8QZ
<streyle.j@...> know of your availability.

2422. Dummy Load

Yahoo group: GRARA
Date: 2013-10-22 20:22:00 UTC
From: Hank Greeb
Topic: 2422 Message: 2422

This dummy has lost track of the club in SW Michigan who generally sells small dummy loads. A colleague wishes to purchase a small dummy load, capable of 100 watts or so for a few minutes, but he generally runs QRP, so small is the first consideration.

Could someone tell me where to go to find details of these devices? I recall they were built into a small tin can a bit larger than a coffee cup. The can could be filled with transformer oil to increase the dissipation rating, if one desired to do so.

Please advise by private message.

2423. JOTA wrap-up

Yahoo group: GRARA
Date: 2013-10-23 18:36:13 UTC
From: <UncleFester@...>
Topic: 2423 Message: 2423

Low Scout attendance or not, I was absolutely thrilled with how JOTA turned out. A fabulous example of everyone showing their own interests and talents to (hopefully) future hams.

I still have a final report to send to BSA in Texas. I need the following information:

List of States contacted
List of countries contacted
Number of contacts made (ballpark figure)
Number of working stations we had (I'm guessing 5?)
Did we use Echolink, D-Star and/or IRLP? I'm guessing #1 & #3)
Any highlights worth reporting?
What's in the future? Wish list?

And, Jack, a few photos.

And, act quickly because they go fast, would anyone like a $4.00 JOTA 2013 patch? ABout 4" diameter, looks exactly like the globe-with-headphones artwork. I'd like to get an order out before the weekend.

I'm not interested in the patch, but - going from memory - , speaking for the 40M station I did the following whilst Scouts were involved:

States: NY, NJ, MD
Countries (other than US) 0
Contacts: 4
Total number of working stations (that were involved in JOTA): 3
IRLP used.
Highlights: Helpful hams on the East coast - willing to take time out of a contest (New York QSO party, I think) to help coax reluctant Scouts to take the microphone and talk! For voice operation, need to keep the operating position quiet - otherwise it's hard to hear the other station.
Wish list: More Scouts!

Note - K8GGL and KD8HNF will need to report their station activity, as well.

2427. Question

Yahoo group: GRARA
Date: 2013-10-25 23:59:58 UTC
From: <tigerfan158@...>
Topic: 2422 Message: 2427

I'm not a ham radio operator, but a radio listener. I have about a dozen old tube shortwave receivers which occasionally entertain me.

I also have four old scanners which I used several years ago to listen to police broadcasts.

My question is this: Does anyone have a list of the local (GR) scanner frequencies which I might find interesting to listen to? I need anything analog, I have no digital receivers. I've got an old list that I picked up at one of the hamfests about 25 years ago.

I'm a retired man who spends his winters with my wife playing golf in Florida with several other old dudes. However, my summers need another diversion, so I'm firing up my old analog scanners to listen in my recreation room.

Thanks!

Subject: Wake Island is a go
Date: 2013-10-29 12:18
From:W8GEX@...

Press Release #6

The Wake Atoll Commemorative DXpedition team has been approved for entry onto Wake Atoll. Our equipment is already on Wake and in safe storage awaiting our arrival. The 12-Operator team includes: Joe -AA4NN, John-K6MM, Craig-K9CT, Mike-K9NW, Ralph-K9ZO, Lou-N2TU, Jim-N9TK, Mark-NA6M, Dick-W3OA, Joe-W8GEX, Hal-W8HC, and Jerry-WB9Z.

The plan is for the team to assemble in Hawaii on 30-October, depart 01-November, arrive on 02-November and immediately erect antennas and set-up the stations. There will be two CW and two SSB stations on the air. The CW site will be located across from the Arrivals terminal and the SSB site will be housed in a "beach house" near downtown Wake.

We are planning on being QRV 03-November through 15-November (Wake time). If there are any changes, they will be posted on our website. http://wake2013.org/pages/bandplan.html [1]

Logs will be uploaded to ClubLog as time and internet access allows.

This is a commemorative DXpedition. Our prime objective is to honor the lives and contributions of the Forgotten 98 civilian contractors who lost their lives on Wake during WWII. Some of these men have yet to be identified. If you know any of the Forgotten 98 or their relatives, modern DNA testing may identify their remains and provide for a proper burial. Please take a moment to look through their names.http://wake2013.org/pages/forgotten98.html [2]

Wake Atoll is an active military base and access is extremely limited. The Team is most grateful to the United States Air Force for allowing this Commemoration to take place.

Also, Team wants to thank the DX community, including generous worldwide Foundations, Clubs, Individuals, Equipment manufacturers

and outlets for their outstanding support of the Wake commemorative efforts. These DXpeditions are extremely expensive and could not be accomplished without the support of the entire DX community Visit the website to view our sponsors and make your personal donation. http://wake2013.org/pages/sponsors.html [3]

Please note! A few other DXpeditions will be on the air during the Wake operation. To avoid the dreaded "not in the log", please be sure which DXpedition you are working! Our operators will announce the K9W callsign often to help identify your contact.

Please check our website frequently for updates.http:/wake2013.org/ [4]

And don't forget to sign our guestbook!

73,

K9W Wake Atoll Management Team

QST QST QST - - - -

G.R.A.R.A. meets this Friday, 7 PM, at the Red Cross on Fuller avenue. In addtion to the business of selecting club officers for next year (among other things) the 'after recess' program will be a show-and-tell by our own AC8ZX, of his home-brew remote antenna tuner project.

(The presentation that was planned, on MotoTrbo, will have to be postponed until some as-yet undetermined date next year, due to non-availability of the presenter this year.)

Hope to see you there -
W8QZ

2435. [GRARA] Mark your calendars for November Sweepsteaks

Yahoo group: GRARA
Date: 2013-11-02 02:21:36 UTC
From: Hank Greeb
Topic: 2409 Message: 2435

It was good seeing everyone at the GRARA meeting tonight.

As a reminder, I put in a plug for the ARRL November Sweepsteaks. The CW version starts tomorrow, Saturday, November 2, at 2100Z (which is 5 p.m. EDT), and ends at 0259Z, Monday, November 4, (That's 9.59 p.m. November 3) The CW nuts amongst us will be delighted with this event.

The matter of interest to more of the folks will be the SSB version. It is scheduled to begin @ 2100Z (That's 4 p.m. EST) November 16, and end at 0259Z November 18 (That's 9:59 p.m. November 17). This is an ideal time to check out W8DC. Several people indicated interest in firing up W8DC for this event. We'd more than likely operate as Multioperator, Single Transmitter, Low Power - Transmit with 150 watts or less. Spotting assistance and Skimmer use is allowed.

Rules, etc., for this contest are at http://www.arrl.org/sweepstakes

Please mark you calendars.

2436. Extra Class class

Yahoo group: GRARA
Date: 2013-11-05 00:42:04 UTC
From: K8TB
Topic: 1596 Message: 2436

The Grand Rapids Amateur Radio Association will hold an Extra Class class this winter on Wednesday nights, starting January 8, 2014 at 7:00 PM, for ten weeks.

The last class will be March 12 and will be followed by a testing session on March 19.
Cost will be $20 and you should have a copy of the ARRL Extra class manual or equivalent.

The class will be held at the American Red Cross, 1050 Fuller Ave, Grand Rapids.

2437. Red Cross new alarm panel process

Yahoo group: GRARA
Date: 2013-11-05 21:37:30 UTC
From: <stprovost@...>
Topic: 2437 Message: 2437

Hello, starting monday 11-4-13, the red cross building at fuller and leonard has three alarm zones (office, lobby-front door, and basement).

I have talked with Mark Burgess (facility manager) and he has asked GRARA members to still use the parking lot entrance when entering the red cross building.

If there is no one there, we are asked to turn off the lobby-front door alarm and the basement alarm.

If we are the last ones leaving the building, we are asked to set both alarms.

Mark stated that we can use the same codes for both zones.

The lobby-front door alarm keypad is located by the main secretary desk.
The basement alarm keypad is located by the stairwell door across the basement bathrooms.

this new arrangement was setup to have the life erms trainers and students only use the basement stairwell doors and not go through the upstairs at all.

Thanks
Stephen KC8WQL

Not totally.
We replaced the lo-band trap dipole with the Off Center Fed dipole that we had before but back then it ran in a east - west direction.
O.F.C. dipole is in the same posistion as the trap dipole was with the shorter leg over the Red X Bldg and the longer leg running along the direction of the fence.

I cut the wire of the 160M shunt fed tower hoping to replace it as well but the wind was too great to stay up on the tower. It could be easily spliced together again if we don't get a chance to replace the wire going up the tower.

Yes, Dustin instigated the opening of the radio room (good for him).
and we knocked out 60 contacts together Saturday evening and later on
Sunday afternoon I went back and did a few more (32).

I used the Heil boom mic/head phones with 100 watts no problems reaching
the desired station.
The O.C.F. dipole worked well on 20 and 40 M with no tuner needed.
Match on 15 M was 3:1 so tuner is good idea, 10M was better about 1.7:1
match.
Never made it to 80 M so I just don't know... yet.

Lot's of info exchanged over the air and I'm wondering if it would be a
good idea to move the shack PC over jist a bit to
allow the operator and logger a better operating post.

I'm going to submit the log to arrl.
How did you do?

Good job, glad the antenna work good.
Tried it Wednesday, but the bands where really dead

I got all set, even made sure N1MM was running on my notebook a week earlier. Got on the air 30 minutes before, made a few contacts. On the stroke of 2100 I made contact with a 0 call, both our number 1s. N1MM would not log the contact, I tried for 10 minutes, but kept getting an error message. Turned the computer and radio off, grounded the antenna switch and went back to my guitar.

2451. Skywarn Recognition Day at GRR

Yahoo group: GRARA
Date: 2013-11-21 01:11:57 UTC
From: K8TB
Topic: 2451 Message: 2451

This year, the Allegan ARC, along with other clubs, is going to be operating from the Grand rapids NWS location by the Kent County Airport, starting December 6 (Friday night) at 7pm until December 7 (Saturday) at 7 pm.

*2013 Grand Rapids SKYWARN Recognition Day***

SKYWARN Recognition Day was developed in 1999 by the National Weather Service and the American Radio Relay League. It celebrates the contributions that volunteer SKYWARN radio operators make to the National Weather Service. During the day SKYWARN operators visit NWS offices and contact other radio operators across the world.

There will be an attempt to have at least two low band operations on the air at all times.

For more information, go to

http://grrskywarn.eventbrite.com/

In addition, the national NWS page for this event is at:

http://www.wrh.noaa.gov/mtr/hamradio/

Even if you cannot operate at this location, look around the low bands for the various weather offices that will be on the air that weekend. There even are several station available using IRLP and Echolink.

For more information on the Grand Rapids event, contact
Jason Veenstra, kd8qnx@...

GRARA meets next Friday (December the 6th) at the Red Cross, 1050 Fuller NE. The gathering begins about 6:30 P.M., with the official meeting starting at 7 PM. Bring some food to pass - a variety would be good.

The after-meeting program (by request of our president) will be a short presentation on your very own off-air-director's home-brew 160 meter antenna.
If time permits (and if there's interest), some nostalgia ham videos from the ARRL may be presented.

(Note! The off-air-director position for next year has not yet been filled [as far as is know to this writer] - anyone having an interest, please contact our president. This meeting will conclude *my* term in the office.)

Hope to see you Friday

2463. Stew Perry Top Band Challenge, Decbmer 28/29

Yahoo group: GRARA
Date: 2013-12-16 06:04:52 UTC
From: Hank Greeb
Topic: 2463 Message: 2463

Now that ARRL 10 M contest is in the bag, how about this one for the next "challenge"?

The Stew Perry Top Band Challenge is coming up 1500Z December 28th to 1500Z December 29th, 2013. "Top Band" means 160 Meters in this context. Operate for a maximum of 14 hours. Off times are 30 minutes minimum and a maximum of four off periods are permitted.

The rules of this event http://www.kkn.net/stew/stew.rules.txt favor QRP operating because it gives a multiplier of 4, and there are distance multipliers. 160 can be fun, even with a cloud warmer antenna. But, there are many ops who choose Low Power, or High Power, it's a matter of preference.

2467. The Stew Perry Top Band Challenge TOMORROW!

Yahoo group: GRARA
Date: 2013-12-27 19:01:29 UTC
From: Hank Greeb
Topic: 2467 Message: 2467

Final reminder, yes the Stew Perry Top Band Challenge is tomorrow! It begins Saturday, December 28 @ 1500Z and continues until 1500Z Sunday, December 29th. Rules are @ http://www.kkn.net/stew/stew.rules.txt

Note - I was able to make contacts last evening during the NCCC NS Sprint, so it appears that the 1/4" or so of solid water on the antenna here doesn't affect the radiation all that much. And, with the temperature outside now exceeding 273 degrees Kelvin, and tomorrow supposed to be near 280 degrees Kelvin, most of this solid should change to liquid before 1500Z tomorrow.

See y'all on 160 tomorrow!

2469. Extra Class class, just in time for that New Years resolution..

Yahoo group: GRARA
Date: 2013-12-28 00:49:38 UTC
From: K8TB
Topic: 1596 Message: 2469

So, the Christmas presents have been opened and you are now eating left overs. Just a reminder for those who would like to look at upgrading to the Extra class:

The Grand Rapids Amateur Radio Association will hold an Extra Class class this winter on Wednesday nights,
starting January 8, 2014 at 7:00 PM, for ten weeks.

The last class will be March 12 and will be followed by a testing session on March 19.
Cost will be $20 and you should have a copy of the ARRL Extra class manual or equivalent.

The class will be held at the American Red Cross, 1050 Fuller Ave, Grand Rapids.

2470. Eye operations #1 and #2

Yahoo group: GRARA
Date: 2013-12-28 03:27:02 UTC
From: <UncleFester@...>
Topic: 2470 Message: 2470

Many thanks to all for the now-disappeared messages concerning my cataract operation. Left eye came out very well, with vision settling in at around 20/30, farsighted. I consider it nothing less than a miracle. Only problem was a post-operation reaction to the anesthesia; I aloudly called for my friend Ralph all the way home and for five days afterwards.

Right eye gets done Jan 2, so the Jan 3 meeting is highly doubtful. I had signed up for teh extra class, but will probably need a ride to/from the first class Jan 8. I live South of Woodland Mall (32nd & Shaffer), and if you can help, email me off-list.

2471. GRARA Extra Class License Training -- Starts Next Wednesday night!

Yahoo group: GRARA
Date: 2014-01-02 02:42:17 UTC
From: <mike@...>
Topic: 2471 Message: 2471

Just a reminder that next Wednesday night, January 8th, we will be starting Extra Class License training at the Grand Rapids Amateur Radio Association.

Once again Tom Bosscher, K8TB, will be coming to The Grand Rapids Amateur Radio Association to teach the classes. Tom's classes have been highly
successful in the past resulting in many upgraded licenses.

The Grand Rapids Amateur Radio Association will hold a Extra Class License training this winter on Wednesday nights,starting January 8, 2014 at 7:00 PM,
for ten weeks ending March 12th

The last class will be March 12 and will be followed by a testing session on March 19.
Cost will be $20 and you should have a copy of the ARRL Extra class manual or equivalent.

The class will be held at the American Red Cross, 1050 Fuller Ave, Grand Rapids.

For more information and to register, please go to:

http://tinyurl.com/n46jxd3

Or http://www.w8dc.org (and follow the links)

You can also contact Tom Bosscher, K8TB at 616-662-1080 or k8tb@bosscher.org

Al, glad to hear you are going to take the Extra license class. If I were you, I would order the book from Amazon.com and you will have it in a couple of days and cheap. Since it is so fast, you might want to wait until after the first class to see what books the other guys are using and what book is best for you.

You will need a book for home study, not necessarily for class participation. Tom has a great overhead presentation for class discussion.

The ARRL Extra License Manual and the Gordon West manual seem to be the most popular books as I remember. Both are available from Amazon along with CD's etc. Don't get carried-away, there are good sites for practice on the web, as Tom will explain.

2476. Just Worked W1AW/4

Yahoo group: GRARA
Date: 2014-01-07 05:17:18 UTC
From: Hank Greeb
Topic: 2476 Message: 2476

W1AW/4 about 0351Z on 3526 KHz. They were on 7027 as well, but I heard them loud and clear. Was it K4RO? He knew me. I didn't take time to ask who was op.

W1AW/8 wasn't on. Kept monitoring, but got interested in the BCS football game and missed them on 1817 KHz. Will look for them tomorrow, hope they can muster some RF before 0000Z Wenesday when their stint is over. I'm sure I didn't try hard enough to snag them - they were on 80 quite often, which is usually a sn*p from Michigan.

Hi, Bob! Thanks for the note.

Yep, look for W1AW/8 (which will be W8DC in disguise) on 20 and 75 phone on 19 February 2014 between about 7 p.m and about 10 p.m. eastern time (pending acceptance by AA8R for the times and modes). That's 0000Z to about 0300Z 20 February 2014 in UTC. If 20 stays open, we should be able to work you there. Not sure about 75, because of the usual noise level from all the RFI in the neighborhood.

I hope a few more GRARA members will take the bait and operate from their home stations. It's no big deal - operate at one's own pace, with one's own station, and at a time and mode convenient.

72/73 de n8xx Hg
QRP >99.44% of the time

p.s. Today the weather is quite balmy. Low as -7.2 °F on my thermometer, last time I checked it was above -5 °F, and THE SUN IS SHINING! I had to get used to seeing the sun, because it has been all but non existent for three or four days. :)

To: undisclosed-recipients:;

Greetings!

For those of you who I haven't had the opportunity to meet, I'm Hollis Locke II, WB8ALW. I go by "Chip" as there are 3 Hollis' in the family!! I am currently attempting to fill the Affiliated Club Coordinator position for the Michigan Section of the ARRL. I am located in Portage, MI and consider the Kalamazoo Amateur Radio Club as my Radio "home". (http://W8VY.Org)

Larry Camp, WB8R, our esteemed Section Manager, has asked that we spread the information about the ARRL's Centennial Celebration and year-long QSO Party to the clubs throughout the section. I have included the information below.

Time is of the essence as we need to get a bunch of volunteers in place and ready to go for February 19!

/(You are receiving this email, as you are currently (as of 1/12/14) listed as either the Club address, or the Club "Contact" address. If you no longer hold that responsibility for the club, please contact the appropriate individual currently holding that responsibility and have them update the club information athttp://www.arrl.org/find-a-club . Search for your individual club information, then click on the word "Edit" in the upper right corner. Update the information, then submit. The information will NOT UPDATE IMMEDIATELY, so please refrain from submitting the info several times while waiting for the info to update. The information will be reviewed by HQ, who will THEN update the information. Give it a few days and check back!!) //*Even if no information has changed, PLEASE re-submit the information annually. This will prevent your club sliding over to "Inactive" status.

*/

Thanks! Please feel free to contact either Larry or myself with any questions. (Contact information below!)

Greetings to the hams of MichiganJanuary 1, 2014

For those of you who were on the HF bands on January 1st, you may have heard the chaos accompanying the beginnings of the ARRL Centennial Celebration and year-long QSO Party. The ARRL?s HQ station (W1HQ) is on the air and the main station (W1AW) is on the air as W100AW.All in celebration of the League?s 100th birthday.

In addition, the first two ARRL sections were each on the air (North Carolina and West Virginia) as W1AW/4 and W1AW/8 respectively. The pile ups were enormous.

As part of the year-long QSO Party, each section will have two separate weeks during which operators will be able to work from their home stations as W1AW/8 using CW, SSB, and Digital modes.

There are hundreds of hours of operating time available and we are looking for stations that would like to take this opportunity to be the focus of a bunch of folks who want to work YOU!

All states will be on the air for a week at a time at least twice in 2014. Michigan will first be up to bat on February 19 ? 25. Randy, AA8R, is coordinating the first round of the big dance for us.

Dave, K8CC will be coordinating Michigan?s second go-round October 15 ? 21 and we will hear from him as that time grows near.

What we need are operators from Michigan who are willing to operate using the W1AW/8 call from their home QTH on any of the US bands and modes. No cross band or mode operations are allowed. No repeater contacts are allowed. The modes available are CW, Phone and Digital. Clubs can get in on the fun as well.

A log containing the calls worked, date, time and freq in an "ADIF" format must be maintained. You will need to send your log to Randy and

he will then merge all the logs into one .ADI log that will then be forward to ARRL HQ.

More detailed information is available here: http://www.arrl.org/centennial-qso-party.

Anyone interested can send Randy an email atAA8R@..., with your desired time/band/mode slot(s). Randy will do his best to accommodate your requests, but it is first come first served. Randy will send you a confirmation email of your scheduled operations.

Randy is available to answer your questions as we prepare for this once in a lifetime opportunity!

It is very important for Michigan to have lots of operators available for other hams to contact us. We certainly don?t want to be the section that is discussed as ?we could never find anyone to make a contact with. There are 9 HF bands and 3 modes, so for each hour, there are 27 slots that could be filled. This gives you an idea of just how many folks we can accommodate. Don?t wait, make your plans now. Join the fun!

We have a few weeks yet before we go live, but really the time is short. Please contact Randy right away and make arrangements to spend some time representing your section on the air. What fun it will be to actually BE W1AW for a few hours!

I look forward to hearing you on the HF bands during the Michigan week(s) and I hope you have as much fun as I plan on having.

73,

Larry, WB8R

2484. Morse Code in movies

Yahoo group: GRARA
Date: 2014-02-01 23:51:19 UTC
From: <UncleFester@...>
Topic: 2484 Message: 2484

While following a story about GPS data accidentally being overlaid on YouTube audio of a police chase, I came across this comment:

So what? It was still fun, as in "this Youtube video contains more data than meets the eyes. Let's find out what it is."
As a ham radio enthusiast, I get the same pleasure decoding the bits of morse code that can be heard in movies from time to time: usually it's pretend morse code, but once in a while you hear a bit of a real transmission that's been overlaid onto the soundtrack by the sound engineer who didn't have a clue that what he used actually meant something totally unrelated to the movie.
In fact, I heard a CQ call followed by a callsign in a scifi B-movie from the 90s once, and sent a QSL card to the owner of the callsign in question. He answered me saying I was one of only 5 people to have done so over the years. How fun is that?
So yes, the code is known, there's nothing special about it, but she had fun digging out unexpected information, and I had fun reading about it. Stop being so jaded.

I've fpund this to be true; Morse in movies is either unrelated or pure BS (L:ike the KORN News on Hee Haw, which is a repeating " . . . . . -" I'd like to gind taht movie mentioned, though.

I'd say that >99.44% of the weather spotting is done from one's home. Almost any handheld rig or mobile rig with a 13.8 volt power supply will do fine.

If you plan on weather chasing, that's a considerably different thing, and you should seek counsel from a psychiatrist or similar because the weather bureau generally discourages such activities.

Come on down to the GRARA meeting tomorrow, beginning with an eyeball QSO session (general chit chat) at 6:30 p.m, and the meeting itself starting at 7:00 p.m. I've been asked to tell a bit about the upcoming W1AW/8 effort we're planning for February 19 and 22, but there will be plenty time for you to get ideas of what kind of rig would be most useful for your interests.

Looking forward to meeting you.

The Grand Rapids Amateur Radio Association February Meeting will be held, beginning @ 6:30 p.m. with a general eyeball session (chit-chat), and the formal meeting starting a 7:00 p.m., Friday, February 7, 2013. (That's tomorrow as of the time this is being written)

I've been asked to give a run down of our part in the W1AW/8 activation - this will be on Wednesday, 19 February, beginning at 6:00 p.m. or so, and Saturday, 22 February, beginning at ??

We'll have a demo of procedures, (perhaps we can catch one of the W1AW/4 (Georgia), or W1AW/KH6 (Hawaii) stations (these are the currently active states) on the air and observe their tactics. Lettuce prey one or both of them are operating on a band which has sufficient propagation to be received here.

I'll have the latest N1MM logging software up and running for demo.

May we be sure of a computer projector availability? It surely would be nice.

Hope to see everyone there!

From what little I know, a good 2M FM mobile, and a good mobile antenna are the main things needed (along with proper training). I assume that most of the spotting activity happens from those located at strategic locations, as assigned.
I don't know about any local dealers, as I've bought my gear from local hams, mostly, or at hamfests, along with some from private sellers on QRZ.com.

Leonard,

You have received some good replies so far, but for a starting radio, one of the $ 50 Chinese handhelds, and a magnet mount 1/4 wave 2 meter antenna will do you well.

Do you have a amateur license yet? I've looked up your name and do not see a match anyplace. If you need to get a license, I would like to recommend that you look at the Ham License in a Day that the Holland club is putting on:

http://www.hollandarc.org/?p=3006

Five hours of studying, and 90% of the people get their license. Then the fun really begins.

2492. RTTY needed for W1AW/8 operation

Yahoo group: GRARA
Date: 2014-02-08 15:32:17 UTC
From: Hank Greeb
Topic: 2492 Message: 2492

Randy, AA8R says that the RTTY/Digital schedule for W1AW/8 is quite open. Please take a look at the W1AW schedule posted on the web @ http://www.learnerassociates.net/MICHIGAN_W1AW/

If one of the stations @ W8DC can operate RTTY, we could try 80 meter RTTY between 8 and 9 p.m. on Wednesday, February 19. Please let AA8R know if this is possible? I don't operate RTTY, at least not very much, so wouldn't have the faintest idea how to set up N1MM/MMTY so it could be used together. These two programs are often the "way to go" for contesting with RTTY, and would make it very easy to use RTTY at the club station.

On Saturday, there are MANY choices of bands for RTTY/Digital as well as choices for SSB, particularly 17 and 12 meters. 17 "Should" be open at our chose time, so we "could" volunteer for a second band/mode if we have extra ops signed up.

For those who listened to W1AW/KH6 last evening, the op was NOT operating 5Q's per minute, probably 2 Q's or so. This more relaxed mode should be of more interest to our members - we needn't be "top contest" types (we have only a few, if any in this category) - just operate at a pace comfortable to you. I'll be available at least at the start of our 7 p.m. slot on February 19, and it looks like I can be around for much of Saturday. I'm NOT a SSB op, so someone else will have to step up to the mic.

FWIW, we did manage to work W1AW/KH6 last nite on 15M SSB. It took about a dozen calls, and the amplifier ;)
The Yaesu 950 at W8DC has a Signalink hooked to it, so we should be able to run sound- card RTTY with that. Not sure how tricky it would be to get the software programs to cooperate, though. I'm willing to give it a try Wednesday night.
I plan to be at W8DC both nights.

2495. GRARA's Friday night VE testing session...

Yahoo group: GRARA
Date: 2014-02-15 02:28:46 UTC
From: K8TB
Topic: 2495 Message: 2495

A very successful night, and very good news for the West Michigan amateur radio community.

We have some new amateur radio operators.
Congratulations to the following new Technicians:

Leonard Misner of Wyoming
Matthew Rusco of Fremont
Robin Dawe of Fremont

We had two folks walk in to take their Tech, which they passed, and went on to pass their General:

Eric Isenhoff of Newaygo
Edward Curths of Dorr

And then Mike Gregory, KD8MMV, from Newaygo, took and passed his General.

And then we had four dropouts. Yes, four folks who dropped out of their current
GRARA/Holland ARC Extra class, halfway through the class.
But they dropped for a great reason, the following four passed their Extra:

Corey Grahn, KD8SZZ from Grand Rapids
Dustin Olsen, KD8PVZ from Grand Rapids
Mike Stark, KB8KB from Rockford
Bob Sheneman, K8EIO from Grand Rapids

Congratulations to all, and a special thank you to the GRARA VE Team!

2501. Tower Failure incident

Yahoo group: GRARA
Date: 2014-02-19 19:36:42 UTC
From: Hank Greeb
Topic: 2501 Message: 2501

This is something one NEVER should do with a crank up tower. It's in many books, many instruction manuals, yet it, unfortunately, happens.
==========

Ham radio operator loses hand and fingers in tower accident.

A52-year-old ham radio operator in Athol lost several fingers and one of hishands Thursday when his amateur radio antenna tower collapsed on him while hewas working on it.

Multiple agencies responded to Bearpaw Galindo's home on Caravelle Road after his wife, Gail Perry, phoned 911 and informed a dispatcher the man was hanging 20 feet in the air with his right arm pinned within a telescoping-type tower. Perry said Galindo was repairing a portion of the 40-foot-tall telescoping tower, when a cable holding it up snapped and caused the top portions of the tower to collapse on his hands.

"I saw his fingers fly off of his right hand," Perry told The Press. "I never want to see something like that again."

According to a press release from the Timberlake Fire Protection District, crews were dispatched to the scene at 11:58 a.m., and proceeded to raise the tower in an effort to free Galindo's arm. After 20 minutes, the man was extricated and lowered to the ground.

Galindo was trapped for a total of 45 minutes.

"I can't say anything better about them," Perry said of the emergency responders. "They were awesome."

Galindo was then transported by Life Flight to Kootenai Health.

Doctors told Perry her husband was in critical condition early Thursday evening. At 3 p.m., Galindo was taken into surgery, where doctors performed a partial amputation on his left hand and a full amputation on the right. Perry said doctors estimated the surgery would last more than four hours.

"They (doctors) said that he will be in the hospital for quite a few days," Perry said.

From: streyle.j@...
Topic: 2498 Message: 2503

GRARA members:

GRARA / W8DC was on the air last night (Feb. 19th local time) as W1AW/8, from 7 - 10 PM. Operators included N8DGD, KA5S, KD8SZZ, AB8NB, and W8QZ. There was even a cameo appearance by our on-air director, N8XX. We logged about 30 contacts on 40M SSB, and about 195 contacts on 20M SSB. (Operation on RTTY was considered, but abandoned due to lack of time to get N1MM logger and MMTY to work together.) It was a unique and exciting experience to be on the 'pursued side' of a pileup - at times, on 20M.

GRARA will be operating again as W1AW/8 on Saturday 6 - 8 PM, local time, on 40M SSB. Come join us if you can!
Again, here's the link to the Michigan schedule.

What band/freq/etc?

If it's a 2 meter FM rig, the offset is -600 KHz for 145 MHz repeater range, -600 KHz for 146 MHz range, and +600 KHz for the 147 MHz range.

440 rigs are out of my league. That's daylight to me. :)

We did get Mike's Orion II to operating after some false starts. First, RF from, the 920 was turning the rig off, which we fixed by connecting the PS ground stud to the rig's ground stud. Then, it seemed RF getting in set the rig's processor to some impossible states, but that cleared up after rebooting it. The hand mike is a possible problem for RF, as with the headset mike RF no longer bothered the Orion.

40 was not all that productive in the short time I was on tha tposition but at least the Orion proved useful even when both stations are on the air; there is some received noise from the 920, possibly due to ruining high power, but that can be worked around. Local QRN remains a problem and a couple of comments were heard on 40 that we needed to get a receiver. Perhaps we need another remote receive antenna.

2510. ARRL DX SSB, anyone?

Yahoo group: GRARA
Date: 2014-02-26 23:28:20 UTC
From: Hank Greeb
Topic: 2510 Message: 2510

The ARRL DX SSB contest is this coming weekend, beginning 0000Z Saturday (7 p.m.) Friday and ending at 2400Z Sunday (7:00 p.m. Sunday).

This should be a "natural" for the Jaw Flappers in the club who like to operated SSB - and we could operate multi-single (multiple op, single Transmitter) or even Multi-Multi. Best choice for our otherwise noisey location would be during daylight, but 20 meters stays open many nights until 0300Z (10 p.m. EST) or later, so we could start immediately after the Club meeting and operate until we get tired, or until the band closes. We might operate during the day on Saturday and even Sunday if there's interest.

Is there interest? Let me know, and/or let Tom, N8DGD <n8dgd@...> know. Lettuce discuss this at the meeting.

Oh, yes, the regular meeting is scheduled for Friday, 1 March, beginning with an informal gathering at 6:30 p.m., a business meeting at 7:30 p.m. The program will be a short rundown of operating W1AW/8 Michigan from W8DC during the meeting, and operating W8DC in the ARRL DX SSB contest after we adjourn.

Hope to see everyone there!

Thanks to all who helped with W1AW/8 Michigan from W8DC recently.

I have as a roster (courtesy N8DGD) - Thanks, Tom!

N8DGD-Tom
AB8ND-Jack
W8QZ-John
KA5S-Cortland
KD8SZZ-Corey
& me

There were a few visitors who gave moral support, but we couldn't convince them to get in front of the microphone.

Note: We will have another opportunity, between October 15 and October 22 to operate once more. So, please think about what bands/modes we'd like to try, so we can get first choice.

Another observation - we didn't have a "massive pileup" which we might have expected, so one needn't be a "crack" operator to handle the traffic. Please consider helping - the ops found it was a fun, rewarding event!

2518. FLDIGI and N1MM?

Yahoo group: GRARA
Date: 2014-02-28 23:17:06 UTC
From: Hank Greeb
Topic: 2518 Message: 2518

Anyone on this reflector use FLDIGI in conjunction with N1MM logger who would care to Elmer this novice at Digital Modes so I could experiment with PSK-31 and other digital modes and have a way to log and make an ADI file from the log?

Please do NOT just refer me to the N1MM/digital setup pages from the N1MM manual. Just call me a LID (I'll admit it within a heartbeat) but I've read these pages and need an Elmer to interpret the prose therein.

Thanks in advance.

2519. RE: FLDIGI and N1MM?

Yahoo group: GRARA
Date: 2014-02-28 23:40:21 UTC
From: <k8ggl@...>
Topic: 2518 Message: 2519

FLDIGI itself has a pretty capable logging feature, and with properly configured macros can be set up very similar to N1MM for both run and s&p operation. It does a a great job of exporting adi log files. FLDIGI does not have the degree of contest specific exchange capture that N1MM has, however. I started into making FLDIGI and N1MM work together for the W1AW/8 operations, but quickly realized it was much simpler to just use FLDIGI alone.
Are you looking to do contesting, or just general operation?

Hank,

There are good stations and good operators committed to operate on all
of the bands and modes from Idaho. That does include the WARC bands. I
am not too familiar with the plan for PSK and other digital operation,
but I do know there are about 30 stations involved so that all of the
bands and modes can be covered.

2526. SWR meter for sale

Yahoo group: GRARA
Date: 2014-03-08 14:30:19 UTC
From: streyle.j@...
Topic: 2518 Message: 2526

I've been asked to sell a "Calrad" SWR meter for a friend from my model airplane club.
It's a basic SWR (single) meter - in the original box (box in poor shape, though). Includes a short coax jumper, instructions. Says it's rated for 1kw.
The meter has been checked, and works. The screws on the back have corroded (but it looks OK otherwise).

I can provide pictures, if interested. Asking $10, picked up.

Tiny Drums Turn Faint Radio Signals Into Light
A laser and a membrane make a detector that could hear the radio whispers of the early universe

excerpt: "... signals detected by the antenna cause oscillations of current in the circuit, which in turn exerts a mechanical force on the capacitor. “In a normal capacitor, this force is completely irrelevant and very small,” Polzik explains. But the team made its capacitor more sensitive to the force by replacing one of its plates with a flexible sheet of silicon nitride about 100 nanometers thick, creating, in essence, a tiny woofer. They coated one side of the membrane with a 50-nm-thick layer of aluminum, turning it into a mirror. When the researchers bounced a laser beam off the metal, they could measure shifts in the reflected light caused by the membrane’s movement. Not only does that allow them to detect a weak signal, it also means ..."

From: K8TB
Topic: 2528 Message: 2528

At the GRARA VE testing session last Friday night, there was a flurry of activity.

From the joint Holland ARC-GRARA Extra class, four students dropped out to test, successfully.

Congratulations to:

Stephen Provost KC8WQL
Dennis Christian N8CUF
Jerry Elya KD8SRH
David Stycos KD8RPX

and to Paul Rock, N8KDF who walked in and took and passed his Extra.

And congrats to two techs who walked in and passed their general:

Mark Farver, KB9JMZ and Jeff Keene, KC8ZPD

And then, the eight new techs:

Brian Boomgaard
Deborah Cushman
Richard Shanty
Michael Stengel
Nathan Hardman
Jeff Keene
Daniel Culhane
and Alexander Pearson

15 new hams and/or upgrades. That made for a busy night.

2535. Two VE testing sessions right around the corner.

Yahoo group: GRARA
Date: 2014-03-21 15:08:55 UTC
From: K8TB
Topic: 2535 Message: 2535

If you are thinking about upgrading your license, or you know someone who has been studying for their technician license, there are two VE testing sessions coming up.

Tomorrow, Saturday, March 22, at the Holland Red Cross at 270 James St. in Holland, at 6 pm there will be a VE testing session. While it was scheduled to handle 12+ technician applicants, any walks in for any grade license are encouraged.

And then next week Wednesday, March 26, at 7 pm at the Grand Rapids Red Cross, there will be a special test session to handle the HARC-GRARA extra class class. Walk-ins for technician, general or extra are encouraged.

If you are testing for your technician, please bring two pieces of ID, one pictured, and $ 15.00 for the test. Cash is preferred.

If you are upgrading, please take your original license, and a copy of it, along with a picture ID, and $ 15.00. You also might want to bring a couple of pencils. (Erasers are allowed !)

2536. Anyone for Michigan QSO Party?

Yahoo group: GRARA
Date: 2014-03-24 17:30:38 UTC
From: Hank Greeb
Topic: 2536 Message: 2536

I see that the folks have put up a "planned operation entry form" for the 2014 Michigan QSO Party, to be held on Saturday, April 19, 2014 from noon EDST to Midnight EDST (1600Z April 10, to 03:59::59Z April 20).

This page is at http://www.miqp.org/plannedOpsEntryMiQP.html

I'd urge that GRARA fire up one or two transmitters for this event, and make W8DC's presence known.

Fortunately, I must be visiting our grand kiddoze when y'all are having your April meeting - Friday, April 4 - so I shan't be able to propose this formally at the meeting. I'm sending a private copy to our Esteamed Chief, President, (N8DGD) and I trust he will bring the subject up at the meeting. (Sidebar, Grand Kiddoze take precedence over most anything other than Death or Taxes, so I hope you understand.)

It has been a fun event in past years, so lettuce prey that we can get a good turnout on April 19!

John, that is a great idea. It is a good time to let www.grahamfest.org die. We have used it every year for a long time and it took some special programming each year. Once you get the brochure ready, Dave can put a link to the pdf file on the website at an appropriate spot, hopefully on the home page. Just write on the brochure to go to http:www.w8dc.org for more information.

A note to Rich, we could save the $10/year domain fee if we officially release the www.grahamfest.org URL at www.qth.com, our host server.

From: Hank Greeb
Topic: 2541 Message: 2543

Well, grahamfest.org is good until 2015, so if we have any flyers out there directing people to it, we should, as a minimum, put a "redirect page" to our W8DC page concerning the current hamfest. Details from "onewhois.com" as to "ownership,etc" are:

Registry Expiry Date: 2015-04-09T00:30:09Z
Sponsoring Registrar:eNom, Inc. (R39-LROR)
Sponsoring Registrar IANA ID: 48
WHOIS Server:
Referral URL:
Domain Status: ok
Registrant ID:72CD9C19A35ADD25
Registrant Name:William Cahill
Registrant Organization:Grand Rapids Area Hamfest
Registrant Street: 3736 Chanute Ave SW
Registrant City:Grandville
Registrant State/Province:MI
Registrant Postal Code:49418
Registrant Country:US
Registrant Phone:+1.6162610338

Since AD8BC is now in Texas, perhaps we should obtain a user name and password to get to the redirect information for that website, and, until it expires, redirect it to our W8DC.org website.

FCC TO REINSTATE MORSE CODE TEST
"It was a big mistake eliminating the Morse Code test," admits FCC official

By Dan Romanchik, KB6NU

Washington, D.C. – April 1, 2014 - Today, the Federal Communications Commission (Commission or FCC) approved Report and Order 14-987af which reinstates the Morse Code test for General Class and Amateur Extra Class licensees. "It was a big mistake eliminating the Morse Code test," admits Dotty Dasher, the FCC's director of examinations. "We now realize that being able to send and receive Morse Code is an essential skill for radio amateurs. As they say, it really does get through when other modes can't."

Not only will new applicants have to take the test, but General Class licensees who have never passed a code test will have one year to pass a 5-wpm code test. Similarly, Amateur Extra class licensees that never passed a code test will have one year to pass a 13-wpm test. Those amateurs that fail to pass the test will face revocation of their operating privileges. Materials for administering the examinations will be distributed to Volunteer Examiner Coordinators by the end of April, so that they can begin the testing on May 1, 2014.

"This isn't going to be one of those silly multiple-choice type tests," noted Dasher. "We're going to be sending five-character random code groups, just like we did in the old days. And, applicants will have to prove that they can send, too, using a poorly adjusted straight key."

Technician Class licensees will not be required to take a Morse Code test, nor will a test be required for new applicants. "We discussed it," said Dasher, "but decided that since most Techs can't even figure out how to program their HTs, requiring them to learn Morse Code seemed like cruel and unusual punishment."

When asked what other actions we might see from the FCC, Dasher hinted that in the future applicants taking the written exam may be required to draw circuit diagrams, such as Colpitts oscillators and diode ring mixers, once again. "We're beginning to think that if an applicant passes an amateur radio license exam it should mean that he or she actually knows something," she said.

For further information, contact James X. Shorts, Assistant Liaison to the Deputy Chief of Public Relations for the FCC at (202) 555-1212 orjim.shorts@fcc.gov. For more news and information about the FCC, please visitwww.fcc.gov.

2548. 74 Xenia tornado article

Yahoo group: GRARA
Date: 2014-04-03 12:13:59 UTC
From: Hank Greeb
Topic: 2548 Message: 2548

This is one of the most memorable events in my life. The building where I was employed had the north wall moved about 6", though no other major damage had occurred. The apartment complex just to the north of the our office complex was heavily damaged. Our building was only about 1/2 occupied because it was only a year or so old, so our company opened it up for storage of furniture and other valuables from residents of the apartments.

Our home, about 15 miles away, suffered no damage, though we traveled in a carpool across the route of the tornado. Fortunately we traveled a few minutes before the tornado hit. We arrived at a shopping center, which was our rendezvous site, and tornado sirens were blaring, so I dodged into a Radio Shack store and we huddled near the back wall which was the "tornado shelter" area. Luckily for us, the tornado hit about a 1/2 mile south of where we were, an no damage was done to the shopping center. When I arrived home a few minutes later, there was a large chunk of insulation in our yard, and bits of other debris.

I was called out by Red Cross to help with disaster relief efforts, though details escape due to a blur of such activity from time to time. This may be the time I was dispatched to Newtonsville, Ohio, where I met a Red Cross ERV. The operator of the ERV said he needed communications with Red Cross. He had a 50 watt FM rig on 47 MHz, but couldn't raise the base station. I contacted our club's Net Control on our 6 meter FM Net (53.05 MHz, not significantly different from the 47 MHz Red Cross frequency). Our NCS was equally distant as the Red Cross base station, but instead of parking next to the school building (between us and Cincinnati), I moved to the middle of a ball field with a clear shot toward NCS. I was able to request aid, etc. Later I found that the power output of my rig was probably less than 5 watts because a resistor in the screen grid supply of the final tube had opened up! It just shows to go that a bit of knowledge of radio propagation can make the difference between solid copy and absolutely no copy.

I advised the ERV operator of such necessity, and stayed until a telephone circuit was established to Red Cross HQ.

One NEVER wants to be within 1/2 mile of a tornado, except in a properly constructed storm shelter. I will vouch for that!

========== Original Message follows, thanks to W8LLY, Dayton, Ohio ==========

Today is the 40th anniversary of the April 3rd 1974 "Xenia Tornado." Below is a link to an article at NWS website.

Hello, I have received all the parts for the 12v volt phase of this project. I am planning on getting the local erv out at the red cross this saturday April 5th at 10am.
If you want to help, I will have the erv warmed up if needed :)

I will have at the meeting all parts except the heavy power supply..

I am planning on brining some led light kits that I have created to sell at the grara meeting tonight.

2552. Michigan QSO party?

Yahoo group: GRARA
Date: 2014-04-15 12:32:26 UTC
From: Hank Greeb
Topic: 2552 Message: 2552

I haven't heard much about plans to operate W8DC during the Michigan QSO Party this weekend. The event starts at Noon (Eastern Time) and ends at Midnight (Eastern Time). Rules are at http://www.miqp.org/

This is a "laid back" easy contest, which is a great way for a newcomer ham to become familiar with the station and HF contesting. It also has enough excitement for the Old Timer!

Please let Tom, N8DGD <1n8dgd@... <mailto:1n8dgd@...>>
know of your interest and availability.

I'll be out in Casnovia, just into MUSKegon County, attempting to beat the current QRP category record. Since that record currently is zero, it shouldn't be very difficult. Who knows? Unless there's another station in the category, I might even win a certificate for high score in the category for that county! :)

Space Weather News for April 25, 2014
From: http://spaceweather.com X-FLARE:
On April 25th, an active region near the sun's western limb erupted, producing an impulsive X-class solar flare. A pulse of extreme UV radiation from the flare ionized Earth's upper atmosphere and caused a shortwave radio blackout on the dayside of Earth. However, a CME hurled into space by the explosion will miss our planet.
Check http://spaceweather.com for updates.

Editorial note by N8XX: I wondered why W1AW/2 and W1AW/1 were weak on 7 MHz at about 5 p.m. local! Now I know!

2557. Get ready for W1AW/1 CT, and W1AW/7 NV

From: Hank Greeb
Topic: 2557 Message: 2557

Beginning at 0000z Wednesday, April 30 and continuing to 2359Z Tuesday, May 6, W1AW/1 will be operating from Connecticut, and W1AW/7 will be on from Nevada.

W1AW/1 NH and W1AW/2 NJ seemed rather easy to snag on several bands.

Lettuce prey that the gods of propagation smile upon the signals from CT and NV this coming week.

Perhaps we can try to work these two station from W8DC after the GRARA Meeting Friday evening? Might be an interesting challenge to find a suitable band and mode for these two hops?

72/73 de n8xx Hg
QRP >99.44% of the time

p.s. This is a sneaky way to announce that the Grand Rapids Amateur Radio Association will be holding their monthly meeting on Friday, May 2 beginning with a gathering at 6:30 p.m. Business session beginning at 7:00 p.m. and program with a special presentation by "Who will be doing this presentation?" about the subject "To be announced?" immediately following the usual very short (you must be kidding - we generally have a long, drawn out, boring) business meeting,

Topic: 2558 Message: 2558

I'm going, but I need to stay for a luncheon meeting, so probably can't leave until 1:30 p.m. or so. Anyone is welcome to join the Olde Fogeys who are hosting this luncheon meeting, the Chapter 10, Michigan, Quarter Century Wireless Association.

QCWA folks generally know hospitality, and choosing places with good food AND moderate prices. The very first QCWA dinner I attended was back in the dark ages @ the Dayton Minivention - I think we paid $15 for a very nice meal at a local place which the Olde Fogeys knew from antinquity, whilst other banquets were charging $30 or more - that was in the early 1980's when a dollar was worth a dollar!

So, if any other olde fogey is going, I'd be glad to share a ride, either as driver of my vehicle, or ride with someone else.

Please let me know via private response.

Tnx es 73 de n8xx Hg
QRP >99.44% of the time

p.s. you needn't be an olde fogey to join the QCWA luncheon - we just order off the menu at a local "Big Boy" restaurant and it's Dutch treat.

2561. New England, 7th Area, and Indiana QSO Parties this weekend

Yahoo group: GRARA
Date: 2014-05-03 04:54:58 UTC
From: Hank Greeb
Topic: 2561 Message: 2561

If you're looking to fill out some "rare" states, or just like to work state QSO parties, there's a trifecta of QSO Parties this weekend

Indiana QSO party - at http://www.hdxcc.org/inqp/
7th Area QSO Party - at http://ws7n.net/7QP/new/page.asp?content=start
New England QSO Party - at http://www.neqp.org/

There are several logging programmes which you can use to facilitate logging and log submission. The one I use is N1MM, which has a module called IN7QPNE which allows you to operate in all three QSO parties. It makes a combined log, which can be submitted to all three entities, and the organizers of each will figure out which Q's belong to which QSO party, and do the scoring for you.

There are a few others, but I've lost track of them.

2562. Organized day trip to Dayton Hamvention®

Yahoo group: GRARA
Date: 2014-05-05 16:27:23 UTC
From: Jack Amelar
Topic: 2562 Message: 2562

For anyone interested in a day trip to the Dayton Hamvention®, there are two Michigan clubs providing transportation. The Arrow Communication Association in Ann Arbor and the Southwest Michigan Amateur Radio Team in Kalamazoo. Details below.

/\/\/\/\/\/\/\/\/\/\/\/\/\

Dear Fellow Radio Amateur,

Once again, it is that time of year when lots of hams around the world start thinking of the Dayton Hamvention. After all, with 25,000 attendees from all amateur radio interest areas, what?s not to like!

Don?t you wish you were going? You?re not looking forward to that long drive? Don?t drive! Take the Arrow bus! It?s inexpensive and easy.

As in years past, The Arrow Communication Association is sponsoring a bus trip from Ann Arbor to Hara Arena and back. The date is Saturday, May 17. We leave the park-and-ride at 4:30 am and get to the show at 8:00 am. We come back comfortably at 5:30 pm. A continental breakfast is included on board. What more could you ask for?

There is more. If you want to sell your stuff in the flea market, we have reserved a space there just for you! Every year, Arrow reserves a swap spot just for the bus trip crowd. You save $70.00.

The cost is $65.00 for the round trip. That?s $60.00 if we receive your application before April 1.
Please mail all applications to ARROW Communication Association, 3322 Yellowstone Drive, Ann Arbor, MI 48105. Please note that this does not include the Hamvention ticket. That one you?ll have to do yourself! You may also use the link below to purchase a seat using Paypal.

We are trying to generate as much publicity as possible, which is why we are writing you. If you can, please share this information as widely as you are able. If you have a web page, please consider adding a paragraph about the trip and a link to http://www.w8pgw.org/activities/dayton-bus-trip/ or simply http://www.w8pgw.org. Talk it up on the air! If you check into a state

wide or regional net, please mention it there, also. Feel free to include us in your publications.

We at Arrow deeply appreciate your help in this matter and we thank you.

73,

John Wasciuk,
WA8TON / VO1TON
Activities Coordinator, ARROW Communication Association

The ARROW Communication Association is
once again proud to sponsor a motor coach
trip to the 2014 Hamvention in Dayton, Ohio.
Started in 2002, this annual club activity has
grown in size and reputation with hams across
Michigan. We have been host to over 400 hams
for this event.

Join us Saturday, May 17, 2014, when
we depart from Ann Arbor at 4:30 a.m.,
arriving in Dayton around 8:00 a.m. On
board, you can stretch out, relax, take a
nap, chat with other hams and enjoy a
continental breakfast with coffee as the
coach takes you directly to the country's
largest amateur radio event!
We arrive at Dayton early enough so that you
can enjoy a full day!
- Visit exhibits
- See what's new from major manufacturers
- Attend seminars
- Take license tests
- Shop the largest outdoor swap meet in the
United States

When Hamvention closes at 5:00 p.m., return
to the bus with your purchases for the ride
back home. No standing in lines waiting for a
shuttle bus or fighting traffic!
Got stuff to sell? We can help!
We will have an attended booth space in the
flea market. If you buy a bus ticket, you can sell
your stuff at our booth. All we ask is that you
volunteer for one hour at the booth. The cost of
the booth alone is $70.00, more than the cost of
the bus ticket, which makes the ARROW trip a
GREAT value!

For our out-of-town guests
If your QTH is too far away to drive to meet our
bus which leaves at 4:30 a.m., and you need
information about hotels in Ann Arbor, contact
us at the information listed below for details.
This is no ordinary bus trip ☐
it's an ADVENTURE!
Tickets are $65. This does NOT include your
admission to the Hamvention. We suggest
that you purchase your 2014 Hamvention

ticket(s) in advance to take advantage of the discount and enjoy the day without waiting in line for your tickets, or see how you can win one of two free Hamvention tickets below! When you add it all up, taking the bus with the ARROW is the most economical and relaxing way to attend Dayton. For more information on the 2014 trip, go to our website and click the Dayton bus trip link under Activities.
All ticket purchases RECEIVED by 4/9/2014 will be entered into a raffle drawing to win one of two free tickets to the Hamvention. Winners will be drawn at the April ARROW meeting on 4/9/2014 and winners will be contacted.

7th Annual Dayton Hamvention Excursion
Saturday, May 17, 2014
Sponsored by the Southwest Michigan Amateur Radio Team in Kalamazoo

Spend a day at the Dayton Hamvention in 2014 and enjoy the entire experience: No driving worries, parking inconveniences or ticket lines. No hauling your new treasures long distances. Lots of fun and fellowship

Price: $100.00 per person. Payment(s): $20.00 down payment to reserve your spot ☐ payable any time, non-refundable! The remainder of the payment is due by May 1, 2014.

All payments are non-refundable but may be transferred to another ham. In the event of the cancellation of the trip, all payments will be refunded.

Make checks payable to S.M.A.R.T. and send to: S.M.A.R.T.
PO Box 993
Portage, MI 49081-0993

Questions? Contact ☐ Mike Greis ☐ KD8GTX 269-998-2358 OR KD8GTX@...
Times (approx): Leave Kalamazoo at 3:45 am.
Pickup in Battle Creek (if required) at 4:05 am.
Arrive in Dayton at 8:00 AM.
Leave Dayton at 4:30 PM.
Arrive back in Kalamazoo at 10:45 pm.

Included: Luxury motor coach travel to and from the Hara Arena in Dayton, OH
Continental breakfast on bus.
Door-side drop off and pick up in Dayton.
Hamvention tickets.
Opportunities to place your purchases on the bus throughout the day.
Dinner on the return trip.

If anyone is interested, I have 6 spare Vendor class tickets. They are cheaper then the $25 you pay there, they are only $20 and allow Thursday access and earlier morning access then general admission.

I somehow ended up with 6 extra this year not accounted for.

Please contact me at 616-299-1700 or email kb8zgl@... and I will get them mailed to you. Payment in person or via PayPal.

Thanks,
Mike Wolthuis

From: streyle.j@...
Topic: 2562 Message: 2564

de W8QZ - - - I got this reply r/e the bus trip out of Kalamzoo:

Good Morning John,

The bus trip was cancelled May 2nd only 15 HAMs signed up. It takes a minimum of 35 riders to make the trip happen. The bus company wanted their money on May 3rd and we didn't have enough for the payment.

The SMART club has reserved the bus again for the 2015 Dayton Hamvention which should be the third weekend in May. This will be a one day Saturday trip. Hopefully there will be enough riders for that trip.
If you are associated with a club please let them know that we are making plans for next year and would welcome any HAM wanting to join in on the fun.

We will put your name on a mailing list and send you a flyer.

Should you have questions please contact me.

Mike Greis KD8GTX
SMART Club President

Subject: [GRARA] Organized day trip to Dayton Hamvention®

For anyone interested in a day trip to the Dayton Hamvention®, there are two Michigan clubs providing transportation. The Arrow Communication Association in Ann Arbor and the Southwest Michigan Amateur Radio Team in Kalamazoo. Details below.

/\/\/\/\/\/\/\/\/\/\/\/\/\

Dear Fellow Radio Amateur,

Once again, it is that time of year when lots of hams around the world start thinking of the Dayton Hamvention. After all, with 25,000 attendees from all amateur radio interest areas, what?s not to like!

Don?t you wish you were going? You?re not looking forward to that long drive? Don?t drive! Take the Arrow bus! It?s inexpensive and easy.

As in years past, The Arrow Communication Association is sponsoring a bus trip from Ann Arbor to Hara Arena and back. The date is Saturday, May 17. We leave the park-and-ride at 4:30 am and get to the show at 8:00 am. We come back comfortably at 5:30 pm. A continental breakfast

is included on board. What more could you ask for?

There is more. If you want to sell your stuff in the flea market, we have reserved a space there just for you! Every year, Arrow reserves a swap spot just for the bus trip crowd. You save $70.00.

The cost is $65.00 for the round trip. That?s $60.00 if we receive your application before April 1.
Please mail all applications to ARROW Communication Association, 3322 Yellowstone Drive, Ann Arbor, MI 48105. Please note that this does not include the Hamvention ticket. That one you?ll have to do yourself! You may also use the link below to purchase a seat using Paypal.

We are trying to generate as much publicity as possible, which is why we are writing you. If you can, please share this information as widely as you are able. If you have a web page, please consider adding a paragraph about the trip and a link to http://www.w8pgw.org/activities/dayton-bus-trip/ or simply http://www.w8pgw.org. Talk it up on the air! If you check into a state

wide or regional net, please mention it there, also. Feel free to include us in your publications.

We at Arrow deeply appreciate your help in this matter and we thank you.

73,

John Wasciuk,
WA8TON / VO1TON
Activities Coordinator, ARROW Communication Association

The ARROW Communication Association is
once again proud to sponsor a motor coach
trip to the 2014 Hamvention in Dayton, Ohio.
Started in 2002, this annual club activity has
grown in size and reputation with hams across
Michigan. We have been host to over 400 hams
for this event.

Join us Saturday, May 17, 2014, when
we depart from Ann Arbor at 4:30 a.m.,
arriving in Dayton around 8:00 a.m. On
board, you can stretch out, relax, take a
nap, chat with other hams and enjoy a
continental breakfast with coffee as the
coach takes you directly to the country's
largest amateur radio event!
We arrive at Dayton early enough so that you
can enjoy a full day!
- Visit exhibits
- See what's new from major manufacturers
- Attend seminars

- Take license tests
- Shop the largest outdoor swap meet in the United States

When Hamvention closes at 5:00 p.m., return to the bus with your purchases for the ride back home. No standing in lines waiting for a shuttle bus or fighting traffic!
Got stuff to sell? We can help!
We will have an attended booth space in the flea market. If you buy a bus ticket, you can sell your stuff at our booth. All we ask is that you volunteer for one hour at the booth. The cost of the booth alone is $70.00, more than the cost of the bus ticket, which makes the ARROW trip a GREAT value!

For our out-of-town guests
If your QTH is too far away to drive to meet our bus which leaves at 4:30 a.m., and you need information about hotels in Ann Arbor, contact us at the information listed below for details.
This is no ordinary bus trip ☐
it's an ADVENTURE!
Tickets are $65. This does NOT include your admission to the Hamvention. We suggest that you purchase your 2014 Hamvention ticket(s) in advance to take advantage of the discount and enjoy the day without waiting in line for your tickets, or see how you can win one of two free Hamvention tickets below!
When you add it all up, taking the bus with the ARROW is the most economical and relaxing way to attend Dayton. For more information on the 2014 trip, go to our website and click the Dayton bus trip link under Activities.
All ticket purchases RECEIVED by 4/9/2014 will

be entered into a raffle drawing to win one of two free tickets to the Hamvention. Winners will be drawn at the April ARROW meeting on 4/9/2014 and winners will be contacted.

7th Annual Dayton Hamvention Excursion
Saturday, May 17, 2014
Sponsored by the Southwest Michigan Amateur Radio Team in Kalamazoo

Spend a day at the Dayton Hamvention in 2014 and enjoy the entire experience:
No driving worries, parking inconveniences or ticket lines. No hauling
your new treasures long distances. Lots of fun and fellowship

Price: $100.00 per person. Payment(s): $20.00 down payment to reserve
your spot ☐ payable any time, non-refundable! The remainder of the
payment is due by May 1, 2014.

All payments are non-refundable but may be transferred to another ham.
In the event of the cancellation of the trip, all payments will be
refunded.

Make checks payable to S.M.A.R.T. and send to: S.M.A.R.T.
PO Box 993
Portage, MI 49081-0993

Questions? Contact ☐ Mike Greis ☐ KD8GTX 269-998-2358 OR
KD8GTX@...
Times (approx): Leave Kalamazoo at 3:45 am.
Pickup in Battle Creek (if required) at 4:05 am.
Arrive in Dayton at 8:00 AM.
Leave Dayton at 4:30 PM.
Arrive back in Kalamazoo at 10:45 pm.

Included: Luxury motor coach travel to and from the Hara Arena in Dayton, OH

Continental breakfast on bus.
Door-side drop off and pick up in Dayton.
Hamvention tickets.
Opportunities to place your purchases on the bus throughout the day.
Dinner on the return trip.

Red Cross Conducting Disaster Drill With Multiple Community Organizations

HOLLAND, Mich., May 13, 2014 – The American Red Cross of Ottawa County is inviting the media to attend a disaster drill at an assisted living facility on May 21.

The Red Cross is partnering with multiple organizations and agencies including Ottawa County Emergency Management, The City of Holland Public Safety, Holland Victim Advocates, and AMR Ambulance. The drill will take place at a retirement facility in Holland from 5:30-8:00 p.m. A mock Red Cross shelter will also be established near the facility as part of the drill.

“By conducting drills of this nature, organizations can provide an opportunity for their staff to work with each other and learn how they can rely on each other to service the needs of our community when disaster strikes,” said Mike Mitchell, Chapter Executive for the American Red Cross of Ottawa County. “This is the right time to find how we can improve our services, to respond should a disaster strike.”

This drill is the first of many exercises that will occur over the next few months as the Red Cross embarks on a community resiliency project. Several weeks of preparation have already taken place.

Media outlets interested in attending this disaster drill are asked to notify the Red Cross by 3:00 p.m. on May 21 by contacting Kelly Hudson, at Kelly.Hudson@redcross.org or by calling 616-862-9185. Details on the media staging area and arrival times will be shared upon media outlets RSVP.

For more information on how to donate funds or blood, get trained in lifesaving skills or become a volunteer with the American Red Cross, visit redcross.org or call 1-800-RED-CROSS.

About the American Red Cross: The American Red Cross shelters, feeds and provides emotional support to victims of disasters; supplies about 40 percent of the nation's blood; teaches skills that save lives; provides international humanitarian aid; and supports military members and their families. The Red Cross is a not-for-profit organization that depends on volunteers and the generosity of the American public to perform its mission. For more

information, please visit redcross.org or visit us on Twitter at @RedCross.

2567. Zoning regulation changes in Lowell Township

Yahoo group: GRARA
Date: 2014-05-14 15:52:00 UTC
From: Hank Greeb
Topic: 2567 Message: 2567

This last Monday, three ham radio operators attended the planning commission meeting at the Lowell Township offices on Alden Nash Avenue. One of the subjects was zoning changes for radio towers (including ham radio towers) over 35 feet in height. The proposal under consideration said that these would require a special use permit, with public hearing and review by the planning commission, which might result in up to $1000 expense, plus expenses involved with a building permit, to anyone who is considering putting up a tower over 35 feet in height.

We were able to convince them that they had not thoroughly considered FCC's PRB-1, so the subject was tabled until their June 9 meeting, where it will be brought up again.

I presented excerpts from zoning regulations for the several townships in Kent County, and gave them a copy of PRB-1. The grabbed hold of the two or three of the zoning regulations which mention "special use permits" for any such tower. The majority of the townships have height restrictions of 70 to 100 feet, or blanket exception of any tower for amateur radio use. Several of the township regulations which have no mention of "special use permits" have weasel words which say that the zoning administrator may waive the height restrictions upon certification by the amateur radio operator that 35 feet would not meet his needs (very vague language).

We were disappointed that there were no hams from the township present. With some 5200 residents (according to the 2010 census), there should be over 50 hams in Lowell township. I'm sure that if we could flood the chambers with even a dozen or more local hams, this would make a much bigger dent in the planning commission's decision.

The meeting will be Monday, June 9, 2014, 7:00 p.m, at 2910 Alden Nash Avenue SE, Lowell. Please pass the word along to any ham radio operator who lives in Lowell Township and encourage them to attend, whether or not they plan to put up a tower. Even if you aren't a resident, your presence will help.

From: Hank Greeb
Topic: 2566 Message: 2568

& what is the specific involvement of Amateur Radio in this drill? Does the Ottawa Chapter Need More Help? If so, how many volunteers? In what capacity (i.e. HF, VHF, UHF, digital)? For the entire length of the drill (5:30 to 8:00 p.m), or if someone can't devote that much time, would a portion of that time be useful? If a portion of that time is more critical for amateur radio communication, what time period is most needed?

This is quite short notice for many (most?) hams.

Just a few questions from a possibly interested amateur radio operator.

2571. Tower available

Yahoo group: GRARA
Date: 2014-05-22 02:17:23 UTC
From: streyle.j@...
Topic: 2571 Message: 2571

If someone's looking for a tower, this might be worth checking out - a free 40 footer. Doesn't say whether free-standing or guyed.

2572. Announcing the "It's about stinking time for a Foxhunt" Foxhunt, June 7

Yahoo group: GRARA
Date: 2014-05-23 00:03:48 UTC
From: K8TB
Topic: 2572 Message: 2572

May is almost over and we have not had a foxhunt yet this year.

Well, put June 7 on your calendar. The starting point will be the
parking lot of the IRA swap on June 7, 2014 in Hudsonville.

Details on that at www.w8ira.org

The starting time will be approximately 22.22 minutes after the last
prize drawing. (Usually around 12-12:30 PM).

This hunt will be targeted for beginning hunters. That is, the vixen and
fox will be in a vehicle in plain sight.
No changing of power or rotating antenna parts.

The most difficult question will be, what is the K8AJ-K8TB team up to?
Heh heh.

Sheila, K8AJ and Tom, K8TB

2573. CQ WPX Contest this weekend

Yahoo group: GRARA
Date: 2014-05-23 12:40:25 UTC
From: Hank Greeb
Topic: 1757 Message: 2573

Actually, starts at 8 p.m. EDST (0000Z) tonight. Runs until 2359Z
Sunday (7:59 p.m. EDST)

Nice contest. One gets a multiplier for each unique prefix worked.
And there are thousands of these prefixed here in the Untied States.
Plus many foreign countries have special event type prefixes or optional
prefixes which may be used for contests.

Details and rules may be found at http://cqwpx.com/

I'll be running with the "almost unique" prefix WQ8 as WQ8RP with my
"mighty 5 watts to a wet noodle antenna." Look me up!

A few folks have asked about getting 100 points for working me in the
ARRL Centennial QSO party. If you find me as WQ8RP this weekend, just
ask me to change to N8XX, and I'll do that in a flash! You can get a
two-fer within minutes. :)

2574. National 24 Hour Challenge, Saturday, June 14

Yahoo group: GRARA
Date: 2014-05-24 00:08:48 UTC
From: Jack Amelar
Topic: 2574 Message: 2574

To all Amateur Radio Operators

The National 24 Hour Challenge (N24HC) http://www.n24hc.org is a 126 1/2 mile bicycle route through Barry County that takes place on the day / Saturday before Fathers Day that attracts about 400 riders plus their support crews. Amateur Radio communications is an important part of the logistics of this annual event taking place this year on June 14. Communications positions are in need of volunteers for 4 check points and 3 vehicles (supplied with driver).

CHECK POINT 1, Lakewood Middle School, 8699 Brown Rd, west of Velte Rd., 9:15AM to 10:40AM - Reports to net control passing traffic from the check point to ground zero.
CHECK POINT 2, Baseline UM Church, south end of Barry County, 10:45 AM to 1:45PM - Reports to net control passing traffic from the check point to ground zero.
CHECK POINT 3, Delton Library, Delton, 11:00 AM to 3:35 PM - Reports to net control passing traffic from the check point to ground zero.
CHECK POINT 5, near Yankee Springs State Park (NOT in the park, no permit required), 1:30 PM to 4:45 PM first shift, 4:45 PM to 8 PM second shift - Reports to net control passing traffic from the check point to ground zero.
LEAD CAR, 7:30 AM to 12:45 PM. Vehicle and driver supplied.
SAG 1, 9AM to 2PM, vehicle and driver supplied.
SAG 2, 11AM to 6PM, vehicle and driver supplied.

The event coordinators provide shirts, limited refreshments, and Friday evening spaghetti dinner. Please contact the Ham Radio Communications Director if you are willing to help.

2575. Day of YL 2014

Yahoo group: GRARA
Date: 2014-05-24 07:17:13 UTC
From: tomkd8deg
Topic: 2575 Message: 2575

http://www.ylrl.org/index.php/upcoming-events

DAY OF YLs May 24-25th

HF/VHF CONTEST THE DAY OF YLs 2014 RULES

Aim of this day : To promote YLs activity around the world

THE INTERNATIONAL DAY OF THE YL'S - 2014

Time : 2014-05-24 06h00 UTC to 2014-05-25 18h00 UTC

Bands : 3,5 - 7 - 14 - 21 - 28 MHz & for the first time VHF also but outside the relays, of course.

To help competitors to find each other we propose to use frequencies +/- 10 kHz

from the following activity center frequencies:

CW: 3.533, 7.033, 14.033, 21.033 and 28.033 MHz

RTTY: 3.588, 7.044, 14.088, 21.088 and 28.088 MHz

SSB: 3.733, 7.133, 14.213, 14.240, 14.300, 21.233, 21.400 and 28.433 MHz

Modes : CW, SSB, RTTY

Exchanges : RS(T) + YL/OM (e.g. 59(9)+ YL/OM)

The same station may be worked once on each band and mode Award : An award will be issued to all participants (SWLs also) who has contacted or heard for the 33 points with YLs (pdf file):

For OM / YL 2 points

For YL/ YL 3 points

For YL / OM 1 point

Results will be published separately for OM and YLs according to the number of YLs logged

Logs : Mail log to f5isy at orange.fr not later than 2014-06-26

Mail object : call + OM/YL + Number of YL contacted + Total number of QSO
Log software :

You can use and many tnx N1MM for that : h

2576. Coming events, Morley, Hamfests, meeting, etc.

Yahoo group: GRARA
Date: 2014-05-24 15:40:11 UTC
From: Jack Amelar
Topic: 2576 Message: 2576

Calendar reminder of events.

Grounds cleanup at the Morley receive site is Saturday, May 31. Details below.

The annual IRA Hamfestival is Saturday, June 7 at the Hudsonville Fairgrounds. We'll have outside club tables for members to sell at. And don't forget the evening before the "Road Side Chilli" potluck. Also on Friday will be the June meeting of the Grand Rapids Amateur Radio Association following the potluck.
Check out http://www.w8ira.org or http://www.arrl.org/hamfests/ira-hamfest-w8ira-r for more details

The June meeting of the Lowell Amateur Radio Club (LARC) will be held on THURSDAY, June 12, 7PM. This is to avoid conflicting with the National 24 Hour Challenge (N24HC) on the 14th where some active members are volunteering communications help.

Saturday, June 14 is the N24HC. E-mail previously sent.

Saturday, June 21 is the West Michigan Youth Club Hamfest at Lowell High School. Again we plan to have inside club tables. Check out http://www.westmichiganyouthclub.org/Hamfest.html or http://www.arrl.org/hamfests/west-michigan-youth-club-hamfest for details.

///////

The following is an LARC event / responsibility, but certainly anyone inclined to participate is welcome.

Morley receive site grounds maintenance.

It's time once again for grounds maintenance at the 250ft commercial tower NE of Morley owned by T&W Electronics which, among other radio services, hosts the Lowell 145.27- (94.8Hz) Morley remote receiver 144.67 MHz. And now includes the K8SN 442.075 (103.5Hz) repeater!

Part of LARC's arrangement with T&W is upkeep of the grounds.

Being the site is a mix of field and woods located in a rural area near Amish families, this can also double as camping trip.

The main cleanup day will be Saturday, May 31. Figure start around 10AM. Rolls and coffee will be provided in the morning, and lunch provided. The "better half" and kids are certainly welcome.

There are no toilet facilities here, but I will have the rest room in my motorhome available. **It's not a problem, really!**

I plan to arrive Thursday and not leave "until I'm ready to".
Anyone else interested in a cheap non-crowded campsite is welcome.
Electricity is available. Questions? E-mail jamelar@... or
phone home: (616)438-5412 or cell: (616)438-1464. It's best to call the
"home" phone as it will be ported to Morley and connected to an outside
roof antenna.

On the cleanup agenda.
Work on the shed, replacing the roof / shingles, and siding will take
place, actually the priority for this trip. The usual mowing and light
trimming to keep it all clean.
If practical, bring an extra mower (in case the one I bring breaks
down, been there, done that) as well Extra chain saw a BIG plus.
BUT MOST IMPORTANT, YOURSELF!

HOW TO GET THERE?

Use your preferred mapping program and input: 3800 155th Ave, Morley,
MI 49336 Or follow the Google Maps with the links below.

Directions from Grand Rapids via US-131 Expressway are simple. If you
are arriving from Lowell, the "from Lowell" direction use paved county
roads and is really the shortest, quickest way.

FROM GRAND RAPIDS to Morley receive site.
http://goo.gl/maps/acPpw
Head north on US-131 expressway to Morley exit 125, Jefferson Rd.

FROM LOWELL to Morley receive site
http://goo.gl/maps/0BBL0

2584. It is Now Official, GRARA now has a field day site!

Yahoo group: GRARA
Date: 2014-06-05 22:12:46 UTC
From: stprovost@...
Topic: 2584 Message: 2584

Hello, I have finally got approval for us to use the Cannonsburg Elementary grounds for our Field Day 2014!

Click the link below to bring up the maps.google.com location.
The address is 4894 Sturgis Avenue Rockford, MI 49341

https://www.google.com/maps/place/4894+Sturgis+Ave+NE/@43.0525389,-85.4689438,17z/data=!3m1!4b1!4m2!3m1!1s0x881857af64d44e8f:0xc0363753cfb19f65 https://www.google.com/maps/place/4894+Sturgis+Ave+NE/@43.0525389,-85.4689438,17z/data=!3m1!4b1!4m2!3m1!1s0x881857af64d44e8f:0xc0363753cfb19f65

We have the site from friday night to sunday pm.
We will have access to the bathrooms in the school.
I have asked for the Local ERV from the red cross.

Please spread the word to all you know about this location for our field day!

Yahoo group: GRARA
Date: 2014-06-06 01:58:35 UTC
From: Hank Greeb
Topic: 978 Message: 2585

And, one (maybe the ONLY) item on the agenda will be a discussion of our day in the Field (otherwise known as Field Day), this year being held at Canonsburg Elementary School grounds, just off Canonsburs Road, in "downtown" Canonsburg. :)

If the Road Kill Chili doesn't kill you, be sure to show up for the meeting!

2592. Steam train

Yahoo group: GRARA
Date: 2014-06-11 03:52:46 UTC
From: Mike Kc8wja
Topic: 2592 Message: 2592

Fellow hams,

On June 28th and 29th.(Yes on the holy day for hams -field day) The Coopersville and marne railroad will be host a steam engine to pull the train. they are in need of volunteers that can provide eyes and ears along the 8.5 mile route, help keep people off the track, etc and above all communicate. only one group i can think of meets that need - HAMS!

i'm look for 10 -14 hams on saturday starting at 08:00 ish going to 5pm and sunday 09:00 ish going to 5pm.
may get a free train ride out of it and or even a chance to drive a real loco...
if some one what to get very creative - you could set up a field day stations, have tons of public, GOTA would be a great and may be even point for mobile.
you could also work part of this time and still make your field location

what'ca say? can we show what we can do - field day is to be a field op showing our capabilities to operate under adverse conditions and a moments notice

Please pass this on to all hams you know.
please get back to me by june 17th if you can help

thanks

From: stprovost@...
Topic: 2594 Message: 2594

Hello, I just posted our field day information on the arrl field day locator. The submission is being reviewed and hopefully will be on the page soon.
Look below this message for the url for the arrl field day locator.

I checked our website and notice there is "NO" mention of the field day!

We need the location and any information about GRARA's field day activities on our web page!
The location for field day is:

Cannonsburg Elementary School
4894 Sturgis Ave NE, Rockford, MI 49341

We need information on how many stations, etc posted on the web page!
I will post more information later today.

When would be a good time to survey the GRARA Field Day site @
Cannonsburg Elementary?

As an executive decision, as On Air *Dictator, errrrr.,* director, how
about this Wednesday, June 18, 7:00 pm (the usual open radio room time)?

If agreeable, could someone drop by the Chapter House and put a big note
on the door to meet us for a Field Day discussion at

Cannonsburg Elementary School
4894 Sturgis Ave NE
Rockford, MI 49341

And, NOTE, that HoneyCreek Avenue "probably" will still be under
construction and closed between 5 mile Road and Cannonsburg Road.

If someone has a better idea, please advise immediately so we can
publicize it here and on the membership list.

Good afternoon folks.

I just received this inquiry and knew you guys were on top of antenna restrictions, and zoning stuff, so I thought I'd pass it on to you. Can you help hm out?

Rich K8JX

Email:

kc8aco@...

Subject:

GR Antenna Restrictions

Message:

Looking for someone with knowledge of city, zone, or neighborhood

antenna restrictions in GR. The location is in the city of GR on

Leonard NW zoned as Traditional Business Area. The antennas would be

on top of a business roof where the roof is appx 35ft and the desired

antennas would be on masts of abt 20ft. The masts and antennas would

be clearly visible from much of the street.

The only thing I can find so far is Grand Rapids Zoning Ordinance

Article 9 Section 5.9.37 paragraph C Subparagraph 2 which simply

indicates that the section doesnt apply to amateur radio antennas

under 70'.

Somewhere i saw a limitation of antennas being at least their height

from the edge of a roof, but can't find that reference any more and

that would impact us as our desire is to affix the masts to the side

of the building rather than on the roof itself.

Any pointers to anything that would impose further restricitons would

be greatly appreciated.

Sincerely

Leon Salisbury, KC8ACO

2602. Free Steelcase Desk for Super Shack

I've got a great-condition, high-quality Steelcase desk -- the type that will hold about anything. Perfect for a ham station, including any and all heavy rigs. It has drawers on both sides and plenty of room in between for stretching out. This is not the cheap kinds sold at discount places.

Colors are brown and beige. Neutral tones to fit your fine interior decorating. ;}

I've attached a photo of the desk, but it has a lot of junque on the top right now because I am painting, etc. Imagine the desk with your Alpha amp on it. And a couple of fine boat anchors. No problem.

You have to pick up at my SE GR location by the end of this coming weekend. I have a towing hitch if on my van, if needed.

Fire me an email if interested: qschultze@gmail.com

FYI: 5 of us met at the Cannonsburg school this evening, and made some plans for the Field Day setup. (3) sections of tower from GRARA's stash in the Red X garage were brought out (including one with a rotator on top), assembled onto the experimental tilt base, and raised into position. The full setup, with an tribander beam, will take a larger crew, but the basic idea appears workable. Operating spots have been planned. The Red Cross ERV will power the CW station, and the 'Tom' station; a generator borrowed from KA5S will power the phone station. There should be room near the phone station for the KF8QL VHF / UHF setup. See below (please pardon the crude picture - I don't have good graphics capture tools at home!) If you're bringing a computer for field day, meet at the school Thursday evening, the 26th, to get the computer networking set up with Steve Provost (having troubles remembering his new call). We will meet at the school 7 PM on the 27th (Friday evening) to set up the antennas, etc. On behalf of Führer Greeb a.k.a. N8XX (who is currently without internet service). Hello, great job on meeting at the field day site to test out antenna placements. We can also borrow a generator from the red cross if needed.
Not sure how many generators can be running at one time before neighbors get upset.
Can anyone let us borrow their nice honda small generators?
They don't make much noise.
The two generators I have make loud noise!
I can meet people at the field day site next thursday or we can switch to the radio room.
Let me know.
I am planning on having the red cross ERV stationed sometime friday before 4pm on the site.
I am hoping to have the 12 volt project done on this erv before next thursday.

thanks
stephen

Hello, I am meeting with Hank N8XX today around 12pm at the field day site.

We are now in the ARRL Field Day Locator!

Please have people look us up via this locator at
http://www.arrl.org/field-day-locator http://www.arrl.org/field-day-locator

Have them enter "W8DC" in the location or call sign area.
The map will show a "Green" map point that will have our information.

Need to know for thursday night, where to meet for the N1MM setup.
Since we need power, the radio room would be easier,
The choice is yours by tuesday night.

thanks
stephen

2610. new rig?

Yahoo group: GRARA
Date: 2014-06-22 20:39:46 UTC
From: Hank Greeb
Topic: 2594 Message: 2610

We have a new rig which we recently bought from an estate.

Does that rig have a 500 Hz filter for operating CW? Or a DSP filter which does the same thing?

Does that rig have a cable to connect it to a computer for use with N1MM software?

If the above exist, could we snarf that rig for use as a CW rig during Field day?

If so, I'd like to get a tutorial session on it at the open radio room this coming Wednesday.

Please advise.

Hello, working N1MM logger program tonight. I plan on being at the red cross radio room this thursday at 7pm to help setup the program and work with my network access points with your laptop.

I am setting up a master laptop that will collect all the data during the field day. That way no laptop will be doing more than one station's activity.

Thus, I need to know by thursday the following:

How many stations are we running N1MM (not including mine)?
What each station will do?

Please update N1MM to the latest version with the latest update on your laptop:

Latest Installer is the "Full installer" located at

http://n1mm.hamdocs.com/tiki-list_file_gallery.php?galleryId=7
http://n1mm.hamdocs.com/tiki-list_file_gallery.php?galleryId=7

Latest update is V14.0.6

More details to come
Stephen

As far as I know, and I'm supposed to know, we have two confirmed stations (one CW and one Phone) and we believe that Tom, N8DGD, will bring a second SSB rig. KF8QL will be self contained, he doesn't want to be hooked to the network.

I trust that the folks arranging stations are encouraging folks to operate. I'm short at least two CW ops, so anyone who is interested in CW, please speak up!

Note, I ate a sandwich @ the gas station/general store in Canonsburg last Saturday, and the food was excellent. While it won't be free breakfast as it was last couple years at Calvin, we'll have a close by source of nourishment.

If people would tell me where WBBL and WLAV towers are, I might be able to do some mowing there. As is, I know of two towers, which were described to me as "On Pettis Road" and the tower where W8LRC/R is located at about 3 mile Rd and Lincoln Lake road. But IDing them as WBBL or WLAV makes zilch in the (lack of) synapses between my ears.

Since I'm retired, if notified a few daze in advance of such need, the probability is somewhere between 0.0000 and 0.9944 that I'd be able to bring a riding mower to bear on the subject.

However, since I don't do mental telepathy, I cannot help in this current sitiuation.

2622. Speaking of Field Day

Yahoo group: GRARA
Date: 2014-06-25 21:45:40 UTC
From: Hank Greeb
Topic: 2618 Message: 2622

I should be "in the loop" but there are several loose ends.

PLUS, today is our 53th anniversary of wedded bliss, so I won't make it to the open radio room. My wife and I will be celebrating otherwise.

I'd like to confirm that we have a third rig and team leader. We've been talking about Tom, N8DGD, as that person and using the rig which was used last year as the second SSB rig.

For CW, I'd like to snarf the new rig which we bought from an estate, but I can bring my ancient Drake TR-5 if needed. I understand, but need to confirm, that the DSP in this rig will have acceptable selectivity for CW (500 Hz or so). Bob, AC8ZX, is bringing his very nice tower and tri band antenna for our use.

Did we find a rotor box for the antenna and tower which W8QZ is bringing? This was not clear last week when we were at Cannonsburg Elementary School.

Cortland, KA5S, has offered his Honda generator for one rig (best use would be behind the school which is nearer houses. He will tell me where it can be found tomorrow - probably at the W8LRC radio room.

I'm delighted to hear plans for KF8QL's VHF station.

The one thing which I've no knowledge is if we've encouraged any of the new hams to set up a GOTA station. We are definitely missing out if we fail to provide such a station for training and the thrill of working HF!

Any other comments? Please advise.

2623. Field Day setup begins 7 p.m. Friday, June 27.

Yahoo group: GRARA
Date: 2014-06-26 00:58:12 UTC
From: Hank Greeb
Topic: 2618 Message: 2623

Yes, the rules now permit us to set up beginning almost anytime on Friday, so it behooves us to start setup Friday evening. I'll be on site from about 6 p.m. until dark.

As others have said in the past, many hands make light work.

The setup will continue beginning at 10 a.m. Saturday, with a goal of having all stations in checked out and in operating conditions by the 2 p.m. start of Field Day.

We plan to have two (primarily) SSB station and one (primarily) CW station. If anyone would like to run PSK-31 or RTTY, please work things out with one of the station leaders.

To refresh memory, the address is:

Cannonsburg Elementary School
4894 Sturgis Ave NE
Rockford, MI 49341

Sturgis is one block east of Honey Creek Avenue, off of Cannonsburg Road. There are two parking lots available.

Hope to see many people for field day 2014!

72/73 de n8xx Hg
QRP >99.44% of the time

p.s. Rules pertaining to setup are:
3.3. No class A or B station may begin its set-up earlier than 0000 UTC on the Friday (Thursday afternoon or evening local time) preceding the Field Day period. Cumulative set-up time shall not exceed a total of 24 hours.

As to the rotor control box - N8DGD has agreed to bring one, suitable cable, and a complete spare rotator / control. It may take some wrenching on things, but we should have enough pieces to get that working. Tom - if you see this, bring a set of rotator instructions too, if you have them.

I spent some time Monday evening checking out the tuning of the club's tribander - 10M was way off, so I re-adjusted all 3 bands for the phone end of things. It worked predictably, which was a good sign. It *should* be all set to reassemble and install.

Date: 2014-06-27 02:18:43 UTC
From: Hank Greeb
Topic: 2618 Message: 2626

At our setup meeting for the computers, several of us decided to be @ Cannonsburg Elementary by*5 p.m. tomorrow (Friday)*. We will welcome others to join us.

For those who have "paid work" there will be plenty going on at later times. If you want to be sure, you may contact us via the W8DC repeater, 147.26 MHz +600 94.8 CTSS tone squelche.

Or, if we're distracted, my cell phone number is 616 828 9663.

As someone said, "Many hands make short work."

And, as a reminder, on Saturday setup begins no later than 10 a.m., with a goal to have all stations ready to operate before the 2 p.m. official start time.

Address of the school:

Cannonsburg Elementary School
4894 Sturgis Ave NE
Rockford, MI 49341

We hope the predicted rain for Saturday evening doesn't happen, but we have shelters available for all rigs.

ARRL Field Day

Call: W8DC
Operator(s): KA5S KD8CAN KD8HNF N8DGD N8LRF N8UXN N8VLJ N8XX W8QZ
Station: W8DC

Class: 2A LP
QTH: Rockford, MI
Operating Time (hrs): 22

Summary:

Band	CW Qs	Ph Qs	Dig Qs
160:	0	0	0
80:	81	69	0
40:	238	38	0
20:	252	135	0
15:	23	54	0
Total:	594	296	0 Total Score = 1,484

Club: Grand Rapids ARA

Comments:

This does NOT include a VHF station, provided for and manned by Dave, KF8QL which had "expected results when no sporadic E nor Tropo inversions occur" (quote from KF8QL), and the Get on the Air Station provided by and otperated by members of the Grand Valley University Radio Club! Nor does the score include bonus points for copying ARRL Bulletin, sending a message to the Section Mangler, using 100% emergency power for the stations, being in a public place with a "Greetings Table", et. cetera.

We had a great event, beating last years # of Q's of 682 handily with 3 stations vs 890 Q's with two stations. When we add the VHF and GOTA Q's we may reach 1000 Q's! Mother Nature gave us two of her frequent gifts of a pouring rain late on Saturday evening and a lighter but still a nice refreshing rain on Sunday morning!

The list of Operators does NOT include members who did NOT used the CNTL O (O as in Oh) or those who just came to visit. Editorial note: We should work to get more of the new ops to whom we give licensing tests to come out and make some HF contacts. There's nothing like making a few contacts on HF to whet the appetite for more contacts!

2628. Canada Day contest

Yahoo group: GRARA

From: n8xx@...
Topic: 2628 Message: 2628

Tired of all the QRM from weekend contests? Are you rested up from Field day? How about a mid-week contest?

Yup, the Canadians are celebrating the founding of the Canadian Confederation in 1867.

Rules may be found at
https://www.rac.ca/en/rac/programmes/contests/files/2011%20Canada%20Day%20Rules%20-%20English.pdf https://www.rac.ca/en/rac/programmes/contests/files/2011%20Canada%20Day%20Rules%20-%20English.pdf
or, if that if the above gets truncated in transmission, try this itty bitty URL
http://goo.gl/7Brt9p http://goo.gl/7Brt9p'

the contest runs from 0000Z to 2359Z July 1, 2013. That means it begins this evening in many parts of these United States.

From: n8xx@...
Topic: 2631 Message: 2631

Not exactly specific to Ham Radio, but some (many?) of us LIDS (including this admitted LID) might find this one useful

Mr Lid - The Food Storage Container With An Attached Lid
Web page
http://goo.gl/y26SZj http://goo.gl/y26SZj

Note, I have no stock in Mr. Lid, but figured that some entrepreneurial ham might figure out how to put some sort of test gear, or a QRP rig inside one of the "Mr. LID" boxes and have a built in market with all us LIDS in the roster of this reflector.

Note #2 There are also references on the web that one may find MR LID boxes @ Wally World (Walmart), and other stores. YMMV, I haven't looked for them in Grand Rapids area.

72/73 de n8xx Hg
QRP >99.44% of the time
And, an admitted LID

p.s. I hope you aren't on the mailing list of MR LID. I've received at a least a half dozen ads for Mr. Lid. After the 5th one I figured out that my fellow LIDS deserved to know about this great invention.

2640. GRARA July meeting Friday, July 11

Yahoo group: GRARA
Date: 2014-07-10 22:20:00 UTC
From: Jack Amelar
Topic: 2640 Message: 2640

In an earlier message, it was announced the Grand Rapids Amateur Radio Association (GRARA) would not have a July meeting. Change of plan to hold the meeting one week latter.
From Jim KD8CAN:
We will hold a short meeting July 11. Eye ball QSO's will start at 7:30, short meeting at 8.
The reason for the delayed times is because of VE testing.
Hope to see you all there.

GRARA meetings are at the American Red Cross building on Fuller Ave between I-196 expressway and Leonard St.

//////

Lunch bunch resumes Friday, June 11, at Schnitz Deli South. Details previously sent.

//////

The July meeting of the Lowell Amateur Radio Club is this Saturday, July 12. Social 9:30 AM, meeting 10, at the "LARC Shack" in the Flat River Outreach Ministries (F.R.O.M.) building, 11535 Fulton St E., just west of the Lowell Meijer. Look for the 100 foot free standing tower.

2642. Fwd: [HARC] Good News for Hams with expired General and Extra Licenses

Yahoo group: GRARA
Date: 2014-07-11 15:44:57 UTC
From: Mike W8DER
Topic: 2642 Message: 2642

-------- Original Message --------
Subject: [HARC] Good News for Hams with expired General and Extra Licenses
Date: 11 Jul 2014 08:41:29 -0700
From: mike@... [k8daa] <k8daa@yahoogroups.com>
Reply-To: k8daa@yahoogroups.com
To: <k8daa@yahoogroups.com>

Hey guys, this is cool news for those hams who have expired licenses
over the 2-year limit.

Reference: QST Magazine, August 2014, page 68.

"The FCC has revised the Amateur Service rules to grant credit for
written examinations Elements 3 (General) and 4 (Amateur Extra) to
holders of "expired licenses that required passage of those elements."

A June Report and Order (R&O) detailed the changes. The FCC will
require former licensees -- those falling outside the 2-year grace
period -- to pass Element 2 (Technician) in order to be re-licensed.

"Our decision to grant credit for written examination Elements 3 and 4
for expired licenses that required [of those elements] will provide some
relief to former General, Advanced and Amateur Extra class licensees,"
The FCC said.

The Commission said that requiring applicants holding expired licences
to pass Element 2 addresses concerns about lost proficiency and
knowledge and would deter any attempts by someone sharing the name of a
former licensee to obtain a ham ticked without examination.

Pass this along guys and gals. Imagine taking the "Ham in a Day" class
on Saturday August 9th and ending-up with your old expired Amateur Extra
license back.

Hi Club Official,

As you know W4DXCC DX and Contest Convention is in its 10th year and happens again September 26th and 27th, 2014.

Please help distribute the following announcement to your club members via your club newsletter or club email. Please forward this email to your club newsletter person for distribution.

For Immediate Release

The W4DXCC DX and Contest Convention is the South East's largest and best attended ham radio event for 10 years running. Located at the MainStay Suites in Pigeon Forge Tennessee September 26-27th. A full schedule of popular presenters speak on DX and Contest subjects throughout the main convention with prize drawings between presenters, drinks and snacks included. Major equipment manufacturers are on hand to demonstrate new products and answer your equipment questions face to face. A banquet rounds out the day where the grand prizes are drawn.

The Convention is just a easy drive from Michigan.

A full range of shopping for the family is located nearby along with water parks, go cart tracks and Dollywood for the kids. Bring the family for a wonderful weekend full of Fun.

Check out the WEB site for more details, filling fast, book early
www.W4DXCC.com

We look forward to seeing you attend this year.

Thank You in advance, 73

Quin,
3.5 or 5.25? I have a 3.5 USB drive, still use it all the time, I usually keep 2-3 at work. You could borrow, it works with Win7, XP and possibly Win8 (but I haven¹t tried).

Otherwise, I have some 3.5 drives in the basement.

I also have a ton of 3.5 disks if anybody can think of a use for them.

2648. ARRL Legislative Update July 2014

Yahoo group: GRARA
Date: 2014-07-16 16:50:35 UTC
From: Hank Greeb
Topic: 2648 Message: 2648

The American Radio Relay League (ARRL) has encouraged introduction of HR 4969 ? The Amateur Radio Parity Act of 2014, by Representative Adam Kinzinger (R-IL -16th), with Representative Joe Courtney (D-CT-02) as cosponsor, thus ensuring bipartisanship.

The underlying principle of this legislation is to direct FCC to write regulations which preclude homeowners associations to from prohibiting and any all amateur radio antennae. The reasoning is that the FCC has overturned blanket restrictions to satellite TV antennae, and UHF/VHF TV antennae in homeowner's covenants, so they have the power to regulate amateur radio antennae.

ARRL is asking hams to write to their legislators to ask they be co-sponsors of the legislation. The rationale is contained in a 6 page Legislative Action bulletin available at

http://www.arrl.org/files/file/Legislative%20Update%20Newsletters/Issue%206.pdf

One does not need to live within a homeowner's association, nor be a member of the ARRL to express your opinion on this matter. Please look over the legislative bulletin, and contact your US representative with your comments. A sample letter is included in the bulletin, and it is always recommended to add personal comments. When you do, send a copy to the address at ARRL, which will forward it to our legal counsel in Washington for hand delivery. The best way to contact your congressional representative directly is via FAX or e-mail, because regular mail sent directly to Washington is intercepted and screened by security personnel which may delay delivery for up to 7 weeks. Some of the representatives, like my representative, Justin Amash, only accepts e-mail via his web site, which restricts the size and formatting of messages.

2650. ARRL President Issues Call to Action for HR.4969,

Yahoo group: GRARA
Date: 2014-07-17 12:26:45 UTC
From: Hank Greeb
Topic: 2650 Message: 2650

From the ARRL Letter, 17 July 2014

ARRL President Issues Call to Action to Gain Support for HR.4969, the Amateur Radio Parity Act!

In a video <https://www.youtube.com/watch?v=ema5FcIt-1Q&feature=youtu.be>, ARRL President Kay Craigie, N3KN, has issued an urgent call to action to all radio amateurs to get behind a grassroots campaign to promote co-sponsorship of HR.4969, "The Amateur Radio Parity Act of 2014." HR.4969 would require the FCC to extend PRB-1 coverage to restrictive covenants. It was introduced in the US House with bipartisan support on June 25 at the request of the ARRL, which worked with House staffers to draft the legislation. The measure would require the FCC to apply the "reasonable accommodation" three-part test of the PRB-1 federal pre-emption policy to private land-use restrictions regarding antennas. The bill's primary sponsor is Rep Adam Kinzinger (R-IL). It had initial co-sponsorship from Rep Joe Courtney (D-CT).

President Craigie also exhorted all radio amateurs regarding support for HR.4969 in remarks appearing in the /The ARRL Legislative Update Newsletter/ <http://www.arrl.org/files/file/Legislative%20Update%20Newsletters/Issue%206.pdf>. Craigie stressed in the /Newsletter/ that the legislation stands to benefit not just today's radio amateurs but those in the future.

"Chances are, those Americans of the future will grow up in communities having private land use restrictions," she said "That is the way the country is going, and it is very bad for Amateur Radio. How can Amateur Radio thrive, if more and more Americans cannot have reasonable antennas at home? You and I have to stand for the Amateurs of the second century."

If the measure passes the 113th Congress, it would require the FCC to amend the Part 97 Amateur Service rules to apply PRB-1 coverage to include homeowners' association regulations and deed restrictions, often referred to as "covenants, conditions, and restrictions" (CC&Rs). At present, PRB-1 only applies to state and local zoning laws and ordinances.

An HR.4969 page <http://www.arrl.org/hr-4969> now is open on the ARRL website. It contains information and resources for clubs and individuals wishing to support efforts to gain co-sponsors for the measure by contacting their members of Congress.

2651. I'm not a kid any more

Yahoo group: GRARA
Date: 2014-07-19 05:44:02 UTC
From: UncleFester@...
Topic: 2651 Message: 2651

A week ago I went with friends zip-lining near Boyne Falls. It was a rain check from a year ago, and my friends went to great lengths to make sure I could afford it-- meals, place to stay, etc. and they wouldn't let me pay for anything.

So how did I repay them? By sliding sideways into the receiving platform on the very first line, knocking both shoes off in the process. No pain or even a hint of trouble when it happened, but by the end of the course, I could barely walk, and by the time I got home, I couldn't at all.

Diagnosis was a very bad sprain, contusions, and a separation of some kind. I have a tubular ace bandage and a walking boot with a 6-week expected recovery time. Needless to say, I'm in agony no matter what the position or activity. Not a good thing to have happen right now, as it's brought my job search to a standstill.

I wanted to come down Wednesday, mainly for stir-crazy reasons, but it's extremely difficult for me to get around, and I've heard scary stories about the Red Cross elevator.

Maybe next week.

2654. Field Day Pictures

Yahoo group: GRARA
Date: 2014-07-25 03:38:59 UTC
From: Hank Greeb
Topic: 2654 Message: 2654

I'm about to send in a Field Day report to ARRL.

I need a picture of the info booth, which also served as a GOTA station site while the GVSU club operated the GOTA station.

Cortland took several pictures, put them on a DVD, which seems to be in limbo between W8DC shack and KF8QL's location.

I think I have enough other pictures to convince ARRL that we actually did run emergency power, did set up in a public place, etc.

If anyone else has pictures of Field Day, please send a copy to me. It doesn't need to be high resolution, even 480 x 640 would do find.;

Note: My e-mail can handle an attachment of up to 10 megabytes, so send what you have.

We done right good, fellers and gals, we done right good!

KC9ZYZ and the W8GVU bunch need a round of applause for their stellar efforts at QRP operation with a KX3 and lash-up antenna!

Even though we got wet at times from a couple of big thunderstorms, the weather otherwise cooperated - and no one suffered heat exhaustion.

Lettuce prey we can continue to do as well in the future!

72/73 de n8xx Hg
QRP >99.44% of the time
Except I was forced to operated at the ungodly power of 100 watts during Field day (and, I survived!) :)

p.s. I was unsure whether we had a "GOTA Coach" so I didn't claim it. Cortland, KA5S was conversing at length with KC9ZYZ and his contingent. Cortland, does this qualify as a GOTA coach?

School ID, Birth Certificate. I think, but not sure, a parent will have to sign the 605 form so they should be present.
They should also go the FCC web site and get an FRN number, so they don't have to give the kids SS number on the 605 form, one or the other is required.

Jerry, if for some reason your scouts don't pass the technician test on Friday, please note that there is a "Ham in a Day" class at the Holland Club on Saturday followed by a license testing session.

Your scouts could take the whole afternoon class for review and then take the test at 6:00 pm, or just show up at 6:00 for the VE testing session.

For more information see http://www.hollandarc.org (Scan down the home page. Click the signup link for more specific information on the times and place.)

The rule is 2 pieces of non-photo ID (which for minors can be things such as a report card, some mail addressed to them, SS card, etc.) School ID cards are good - many of the have photos - only one form of ID needed if it has a photo. For minors, some 'reasonable judgement' has to be exercised.

I'm not aware of any requirement for a parent to sign the 605.

If a photo ID is not available, then any two (2) of the items listed below, presented at the time of testing is acceptable .

· Non-photo ID/driver's license (some states still have them);

☐ Social Security Card;

☐ Birth certificate (must have the appropriate seal);

☐ Minor's work permit, school report card, school ID card or library card;

☐ Utility bill, bank statement or other business correspondence that specifically names the person; or

☐ Postmarked envelope addressed to the person at his or her current mailing address as it appears on the Form 605

Alan Scott W8KIZ SK memorial service

SCOTT, ALAN Alan W. Scott, born on April 22, 1935, went to be with the Lord on March 25, 2014. He is survived by his wife, Bernice; and four of his children, Beverly, David, Alan, Jr., and Edmund; as well as six grandchildren and 14 great-grandchildren and proceeded in death by his daughter, Tammy. Memorial services will be held this summer.

Memorial is scheduled Saturday, August 9, 1PM, Rosedale Memorial Park, O-50 Lake Michigan Dr, Grand Rapids, MI. Hwy M-45 just west of Hwy M-11 / Wilson Ave.
Back of cemetery in the Military section.
Gathering afterward, 3-5PM, at Ed Scott's home, 1037 Muskegon NW, Grand Rapids.

2670. need help to pick up ham equipment

Yahoo group: GRARA
Date: 2014-08-22 02:13:55 UTC
From: stprovost@...
Topic: 2670 Message: 2670

Hello, this saturday at 10am, I will be picking up ham equipment that Dwain Mitchell wants to sell at our swap meet in september.

He will give the club 30% of the proceeds.

His address is
3741 Shoshone Dr SW
Grandville, 49418

He has equipment in the basement and antennas.

thanks
stephen

2671. Next Week Saturday afternoon, Spark in the Park

Yahoo group: GRARA
Date: 2014-08-23 13:33:29 UTC
From: Tom
Topic: 2671 Message: 2671

This email is an invitation for you to join other amateur radio operators on August 30, 2014 for a "Spark in the Park".

The general start time is 5 PM, till o' dark hundred. The park is locked at 10
PM. &

This is a new event. It is not a hamfest, it is not a club meeting. You might want to call it a "science fair" for amateur radio. The event is free, courtesy of the four sponsoring clubs, Holland ARC, Lowell ARC, the Grand Rapids ARA and the Allegan County ARC.That said, donations will gratefully be accepted to help defray remaining expenses.

There is more information at: http://www.k8tb.org/sitp.htm.

In addition to the indoor and outdoor presenters, the newly revived Michigan VHF-UHF Society will be holding an informal meeting starting at 4 PM. I suggest that they grab an area around a few picnic tables. Maybe someone can bring a 6 meter halo on a ten foot pole as a "flag" for the group.

And a request. While there are many presenters scheduled to be holding continuous demonstrations, I encourage each of you who has a home-brew antenna tuner, or a cute QRP transmitter, or a portable low band antenna, to please bring it along, and grab a picnic table for your very own show and tell. Yes, just like in the first grade. Except that pet turtles don't count. Of note, we would like to see people's bug-out bags/go kits. Everyone has a different idea of what they want, and it is very interesting to see the solutions that other people come up with.

There will be no food supplied, as we are not allowed to sell any food or drinks at this county park. The GRARA club will be serving coffee, free of charge. I would suggest that you bring something along to drink and eat if you are so inclined.

Talk in will be on the 145.27 (-600, 9.8 PL) Lowell repeater.

Directions:

The Douglas Walker Park is located at 1195 84^th St., Byron Center, MI.
The GPS coordinates are
42-48-43 by 85-41-35 or
42-48.71 by 84-41.583 or
42.801183 by 85.69305

If you are coming from the south, go north on US 131 and get off at the 84th St exit, exit74. Turn left (going west) and go 1.25 miles and the

park is on your right (north side). Coming from the north, exit 84^th St. exit, #74, turning right (going west) and go 1.25 miles and the park is on your right (north side).

If you are coming from the east, either take I-94 to northbound US-131, or if you are coming using I-96, cut over to westbound M-6, exit #46 and continue to US-131 southbound, exit #8 on M-6. Then follow the instructions for coming from the north. If you are coming from the east, say I-96 eastbound, swing over to southbound US-131, and follow those instructions. If coming from Holland, you jump on M-6, and then to southbound US-131, or simply follow 84^th St. (Byron Rd in Ottawa county) and go east to the park. Make sure to honk your horn at K8IHY when you go by his house. :-)

If you have any other questions, please contact me.

This event is a first for all of us. There will be concerns and issues, but we should be flexible. The emphasis is to show other amateur radio operators the facet of the hobby you enjoy. Have fun and talk up a storm.

Tom Bosscher K8TB

2672. Ohio QSO Party today (Saturday, 23 August) Noon to mIdnight!

From: Hank Greeb
Topic: 2672 Message: 2672

Yup, and I'll be running as W1AW/8 from DELAware County, Ohio, on 20, 40, and 80 meter CW at various times. There are four other ops who are covering SSB and CW at other times and bands. And, there's even some RTTY operation, though OHQP doesn't have a RTTY category.

The full schedule of W1AW/8 is at
http://www.madriverradioclub.org/w1aw/index.php

If you need W1AW/8 OHio, this is the weekend to do this.

Note that the spreadsheets are listed first in UTC, but local time is right under. So, if you want to find the entire schedule for the OHQP, you'll need to choose August 23 and then August 24.

When I'm not scheduled for operating as W1AW/8 I'll be operating QRP as N8Q/DELAware, mainly CW but some SSB.

Hope to work many of my Michigan Friends!

Topic: 2676 Message: 2676

FYI:

I received a phone call this evening from a new vendor we've not had at our swap within recent memory: "Dit and Dash Radio Antennas and Accessories". While this is a good thing in general, the thing that caught my ear was this: they are 'reps' for Cable X-perts. While they will apparently not be bringing large amounts of cable - they can bring cable(s) etc. that are pre-ordered sufficiently in advance (not sure what the time limit is).

For 'Dit and Dash. . . ." the phone number of 815-462-0080. They do not have a business website.

(Cable x-perts website is: http://www.cablexperts.com

Newington CT September 4, 2014
To all radio amateurs

SB QST ARL ARLB016
ARLB016 New Amateur Radio Vanity Call Sign Fee Set at $21.40

The FCC has adjusted very slightly downward - to $21.40 - its proposed Amateur Service vanity call sign regulatory fee for Fiscal Year 2014. In a June Notice of Proposed Rule Making (NPRM), the Commission said it was planning to hike the current $16.10 vanity fee to $21.60 for the 10-year license term. The FCC released a Report and Order and Further Notice of Proposed Rulemaking (R&O) in the proceeding on August 29, in which it recalculated the fee to $21.40 for the 10-year license term. The $5.30 increase still represents the largest vanity fee hike in many years.

The new $21.40 fee does not go into effect until 30 days after the R&O is published in The Federal Register.

In the R&O, the FCC said it considered eliminating the regulatory fee for Amateur Radio vanity call sign applications but decided not to do so "at this time," because it lacks "adequate support to determine whether the cost of recovery and burden on small entities outweighs the collected revenue; or whether eliminating the fee would adversely affect the licensing process." The Commission said it would reevaluate this issue in the future to determine if it should eliminate other fee categories.

The FCC's Wireless Telecommunications Bureau sets the vanity call sign regulatory fee using projections of new applications and renewals, taking into consideration existing Commission licensee databases, such as the Universal Licensing System (ULS) database.

The FCC reported there were 11,500 "payment units" in FY 2014. The Commission said the vanity program generated an estimated $230,230 in FY 2013 revenue, and it estimated that it would collect nearly $246,100 in FY 2014.

The vanity call sign regulatory fee is payable when applying for a new vanity call sign or when renewing a vanity call sign, although some older vanity call signs are not subject to the regulatory fee.

If you renew your vanity license without paying the fee, the FCC will
issue a new call from the sequential callsign list. The only way to get
your old callsign, if you wanted it, is apply for, yes you guessed it,
a vanity call. Assuming it's still available.

IMO, it would have made much more sense if it were a one time fee. The
way the original bill was written, as passed by congress, allowing the
FCC to recover expenses related to operating a vanity call system, it
had to be an ongoing fee. I have a feeling there are those at the FCC
that would have just as well had it a one time fee. The way the law was
written otherwise.

Subject: [MiQP-Mail] 2014 MiQP Plaques Available at the Findlay Hamfest
Date: Fri, 05 Sep 2014 01:39:59 -0400
From: David Pruett <k8cc@...>
To: miqp-mail@...

MiQPers:

The plaques from the 2014 Michigan QSO Party have been received from the manufacturer, and I will have these with me at the Findlay Hamfest this coming Sunday. Any of the winners should will be at Findlay can receive their plaque in person, for instant gratification and helping the MiQP committee avoid shipping costs. If you can pick up your plaque, give me a call during the hamfest between 9:00 AM and 1:00 PM at the cell number shown below and will coordinate a hand-off.

All plaques that are not picked up at Findlay will be delivered to the MiQP Awards Manager, Mike Van Buren, WD8S the week after the Hamfest. Mike will ship the remaining plaques to the respective winners shortly afterwards, so everyone should have their plaques around mid-to-late September.

WD8S is a professional printer, and is starting on printing the 2014 MiQP certificates now. The should be in the hands of the winners in the same time frame (e.g. by late September).

The WLAV-FM tower and 147.26+ GRARA repeater site, on Pettis between 4 Mile Rd and 5 Mile Rd.
Look for 3966 Pettis Ave NE, a green "911" sign on the East side.
Head down the driveway. Keep going strait for about 1/2 mile, passing a house and barn. There is a fairly steep hill along the way. The drive makes a right turn, then a right turn again. You're there.

2688. LARC ANNUAL meeting this SUNDAY, September 14

Yahoo group: GRARA
Date: 2014-09-10 19:05:57 UTC
From: Jack Amelar
Topic: 2688 Message: 2688

To avoid conflict with GRAHamfest 2014 http://www.w8dc.org on
Saturday, Sept 13

The September meeting of the Lowell Amateur Radio Club will be SUNDAY,
September 14.
This is our "ANNUAL MEETING", with election of officers for October 1,
2014 thru September 30, 2015.
LARC is sponsoring a potluck picnic. Festivities begin at 1PM at the
Flat River Outreach Building in the court yard. LARC is providing the
meat and beverages (no alcohol). Bring something to pass. If you don't
have anything, no problem -Really- there will be plenty to go around.
As with all meetings, you do not have to be an LARC member to attend,
in other words, come on out.

In case of rain, we have the main board room available.

2689. September VHF Contest Saturday and Sunday

Yahoo group: GRARA
Date: 2014-09-11 21:02:30 UTC
From: kf8ql@...
Topic: 2689 Message: 2689

A reminder that the ARRL Sept VHF contest starts at 2:00PM local on Saturday, and runs until 11:00PM on Sunday night. Several of our members will be on the air for this event. So please get those radios turned on.

This contests is for all bands 6 meters and up, and all modes, including FM! 146.55 is the most common 2M FM frequency, and 144.200 is the SSB calling frequency. The 6M calling frequency is 50.125 on SSB.

The exchange is your grid square (probably either EN72 or EN73).

73 and Good Luck in the contest!

de KF8QL/R Listening 144.230 SSB

09/16/2014 A Hollywood-style Amateur Radio special event is set for later this month from the so-called “Seinfeld Stage” on the CBS Studio Center lot in Studio City, California. The K6H “Hollywood Hamnado” special event station will be on HF and D-STAR, September 28, from 1400 until 2200 UTC. Hosts for the event will be Amateur Radio crew members of the ABC television series “Last Man Standing.” On the show, actor Tim Allen plays Mike Baxter, KA0XTT. The show’s producer is John Amodeo, NN6JA

The Southern California-based PAPA Repeater System, in association with the Broadcast Employees Amateur Radio Society (BEARS) and Disney Emergency Amateur Radio Service (DEARS) are sponsoring the special event.
Operation will take place on 10, 20, and 40 meters on HF and D-STAR reflector 12A. Rob Antonacci, AA6RA, said K6H is planning to run three SSB stations, operating on or around 28.420, 14.250, and 7.260 MHz. The PAPA http://www.papasys.com/ website, the W5KUB http://w5kub.com/ chat room, and the Mike Baxter KA0XTT Facebook https://www.facebook.com/KA0XTT page will provide up-to-the-minute updates.
K6H also will use the Disney Amateur Radio Interconnect to link the WB6AJE repeater in Los Angeles to Disney/ABC-sponsored repeaters in Manhattan-Bristol, Connecticut; Washington, DC, and Orlando, Florida. Various IRLP and EchoLink nodes will be available. Those contacting K6H will receive a limited-edition QSL card.
Tom Medlin, W5KUB http://w5kub.com/, will be on Stage 9 to interview the participants and report on the special event activity. The PAPA http://www.papasys.com/ website will stream video directly from the operating stations. So far, 26 members of the “Last Man Standing” crew have been inspired by the show’s Amateur Radio component to get licensed. — Thanks to Rob Antonacci mailto:sideshowbob0374@yahoo.com, AA6RA

2694. Fwd: Legislative Call to Action

Yahoo group: GRARA
Date: 2014-09-22 17:31:33 UTC
From: Hank Greeb
Topic: 2694 Message: 2694

-------- Forwarded Message --------
Subject: Legislative Call to Action
Date: Mon, 22 Sep 2014 09:58:20 -0400 (EDT)
From: ARRL Members Only Web site <memberlist@...>
To: hgreeb@...

To the hams of Michigan:

Subject: Michigan PRB -1 Call to Action – Michigan Senate

On September 16, 2014, members of the Michigan PRB -1 Committee attended a Senate Hearing in Lansing regarding Senate Bill 0493. We are extremely pleased to report that SB 0493 Substitute S-2 to codify the language of 47 CFR Part 97.15 into state law was unanimously passed out of the Energy and Technology Committee. You can see SB 0493 S-2 on our PRB-1 website located here:http://www.miarrlprb1.org/

It is time for us to begin our letter writing campaign targeting our Michigan Senators in a effort to encourage them to look closely at SB 0493 and to vote in favor of the bill when it comes up for a vote on the Senate floor. A very important part of communication with our elected officials is that we need to keep our focus on the positive side. This is not the place to discuss his or her voting record or what other legislation they have supported or not supported. It is vital that we stay on topic and deal with only the subject at hand.

The appropriate documentation has been prepared on our Michigan PRB-1 website located athttp://www.miarrlprb1.org/ and you can read more and find sample letters there.

It is very important that we concentrate ONLY on the Senate right now. When and if the Senate passes the bill, then we will change the emphasis to the members of the House. The letters are identical except for the appropriate changes to reflect where the letters are going.

All you need to do is to copy the prepared letter from our website, add your Senator’s information and your information to the letter and email it to your Senator asking for his or her support. You can find out who your Senator is and how to reach him or her here: http://www.senate.michigan.gov/findyoursenator/michiganfys.asp

The website noted above will give you a direct email address for your Senator. When your letter is customized with your Senator’s information and your information, you can send your letter direction to your Senator. The lack of a physical signature is not important here. By the very nature of the method of contacting them, an actual signature is difficult to accomplish.

Please send me a copy of your letter (wb8r@...) as this will help our committee to gauge our effectiveness.

If things work the way we would like them to, our efforts will turn to the Michigan House once our bill passes the Senate. And when and if our bill passes the House, then we will turn our attention to the Governor’s office to urge him to sign our bill into law.

This is the very best opportunity we have to make a difference for the hams of Michigan. Talk it up, and step forward to make sure that your friends (ham and non-ham) have the information and that they are encouraged to act. We need to add our voices to this bill to help ensure that our representatives act on our behalf.

Thank you in advance and 73!

So, without further comment, here is the message.

-------- Forwarded Message --------
Subject: ATTN: Michigan Section Clubs: Michigan Legislative Call to Action
Date: Wed, 24 Sep 2014 20:39:36 -0400
From: Chip Locke <WB8ALW@...>
To: undisclosed-recipients:;

*Greetings to our Michigan Section Clubs!,

Our Michigan Section Manager, Larry Camp,**has prepared and sent out an email communication concerning Senate Bill 0493 that will begin arriving in the inboxes of about 2700 hams in Michigan shortly. This letter is a call to action for the Hams of Michigan to begin a letter writing campaign focusing on their Senators in an effort to encourage support of SB 0493 when it comes up for a vote on the Senate floor.*

*The letter is attached here and we would appreciate your efforts to get this in as many hands as possible.
*

Time is of the essence. Please encourage your club spokespersons to not wait for the next club meeting (unless it is in the next few days), but to communicate to their members however they can to get the word out. Also, please remind them to email a copy of each letter sent to Larry Camp at wb8r@... <mailto:wb8r@...> so we can gauge our reach and effectiveness of our message.

Thank you for your help!

/(IF YOU ARE RECEIVING THIS, YOU ARE LISTED AS A CONTACT FOR YOUR CLUB WITH THE ARRL. IF YOU ARE NO LONGER THE CONTACT PERSON, PLEASE FORWARD THIS TO THE CORRECT INDIVIDUAL AND ASK THEM TO CHANGE THE CONTACT INFORMATION THROUGH THE ARRL WEBSITE (ARRL.Org). THANK YOU!!)/

Though you probably have tried this..... Try running the rig into a dummy load, and listening to it on another receiver. Or, if you don't have another receiver handy, try the lowest power level and see if it still has the problem. It could be some RF feedback.

This is a good check prior to digging into the guts of a rig.

I've seen this several times with GE commercial radios.

First, do what Hank said-- make sure the problem is actually inside the radio.

There are a handful of 4.7uF (or smaller) Tantalum capacitors (usually bright blue) scattered about. These pass RF and audio and block varying DC bias voltages from invading adjacent stages. They go intermittent. Tap them sharply with the plastic end of a small screwdriver and, using Hank's suggested setup, listen for changes in howling. It won't be a 'judgement call', it'll be obvious.

2707. Hamfest attendance, thank you draft

Yahoo group: GRARA
Date: 2014-09-27 20:56:52 UTC
From: Jack Amelar
Topic: 2707 Message: 2707

For anyone interested, from ticket stub data, attendance at GRAHamfest 2Ø14 was 265. Keep in mind, not everyone fills out the stub, and some purchase extra.

As one would expect, most are from Kent County, second place Ottawa County, then Allegan, then the rest of Michigan. 2 from Indiana, 1 Pennsylvania, and 1 Arizona.

For those attendees we have an email address for, a thank you message will be emailed out.

Here is the message if anyone has anything to add, subtract, or change, let me know ASAP. jamelar@localnet.com

73 Jack NY8D

Subject: Thank you for attending GRAHamfest 2Ø14

Thank you for attending GRAHamfest 2Ø14 (Grand Rapids Area Hamfest), Saturday, September 13.
Your participation is most appreciated.
Hope you found some treasures, renewed some friendships, and made new ones.
If you were selling, now someone else is enjoying some of your former treasures.

The next Grand Rapids Amateur Radio Association (GRARA) monthly meeting is Friday, October 3. Social begins at 6:30 PM, meeting at 7.
On the agenda, the hamfest will be discussed, what went right, what went wrong, how successful, etc. If you have any input to share, you're encouraged to email John W8QZ streyle.j@... or you're most welcome to attend this, as well as any GRARA meeting, in person.
Meetings are the first Friday of the month at The American Red Cross building, 1050 Fuller Ave NE, Grand Rapids, Michigan 49503, between the I-196 expressway and Leonard St. Complete directions and map at http://www.w8dc.org/main/page_red_cross_dir.html

Jack - your e-mail sounds good to me.
Providentially, though, I will not be able to attend that meeting, as I as scheduled for surgery on that day.

Subject: [GRARA] Hamfest attendance, thank you draft

For anyone interested, from ticket stub data, attendance at GRAHamfest 2Ø14 was 265. Keep in mind, not everyone fills out the stub, and some purchase extra.

As one would expect, most are from Kent County, second place Ottawa County, then Allegan, then the rest of Michigan. 2 from Indiana, 1 Pennsylvania, and 1 Arizona.

For those attendees we have an email address for, a thank you message will be emailed out.

Here is the message if anyone has anything to add, subtract, or change, let me know ASAP. jamelar@...

Subject: Thank you for attending GRAHamfest 2Ø14

Thank you for attending GRAHamfest 2Ø14 (Grand Rapids Area Hamfest), Saturday, September 13.
Your participation is most appreciated.
Hope you found some treasures, renewed some friendships, and made new ones.
If you were selling, now someone else is enjoying some of your former treasures.

The next Grand Rapids Amateur Radio Association (GRARA) monthly meeting is Friday, October 3. Social begins at 6:30 PM, meeting at 7.
On the agenda, the hamfest will be discussed, what went right, what went wrong, how successful, etc. If you have any input to share, you're encouraged to email John W8QZ streyle.j@... or you're most welcome to attend this, as well as any GRARA meeting, in person.
Meetings are the first Friday of the month at The American Red Cross building, 1050 Fuller Ave NE, Grand Rapids, Michigan 49503, between the I-196 expressway and Leonard St. Complete directions and map at

http://www.w8dc.org/main/page_red_cross_dir.html

Are you running this as a mobile? If mobile it might be alternator noise. You do not always hear it when you are in the receive state, it shows up when you tx.

Dave,

Have you check the antenna connector on the back of the radio to see if you might have lost the shield going to the connector on the inside of the radio. You could be getting RF feedback into the mic. After all you have checked it sure sounds like an internal issue in the radio.

2714. GRARA October meeting Friday, October 3

Yahoo group: GRARA
Date: 2014-10-01 17:13:57 UTC
From: Jack Amelar
Topic: 2714 Message: 2714

Reminder, the October meeting of the Grand Rapids Amateur Radio Association (GRARA) is this Friday, October 3, at the American Red Cross Building.
http://www.w8dc.org/main/page_red_cross_dir.html
Social at 6:30 PM, meeting at 7.

Jack NY8D

2715. Anyone need W1AW/KHØ

Yahoo group: GRARA
Date: 2014-10-08 11:07:53 UTC
From: Hank Greeb
Topic: 2715 Message: 2715

Or W1AW/KH8?

Yup, W1AW/KHØ from the Marianas Islands has been heard on 18 MHz around
0400Z, even here in Michigan with a very poor antenna for DXing.
Propagation was mainly down - I'd hear W1AW/KHØ faintly on 18 MHz SSB
when QSB was "UP" but they'd fade into nothingness within seconds. I
never even tried working them. Right now they're on 24 MHz CW, but
propagation to North America isn't favorable. "Probably" the best
chance will be on 21, 24, or 28 MHz when it's daylight both in Michigan
and in the Pacific.

Some 10 operators will be heading from Ohio, Indiana, and surrounding
areas toward the American Samoas to activate W1AW/KH8 in early
November. I think I know some of these ops - not sure.

Anyway for those interested see
http://www.arrl.org/news/w1aw-centennial-operations-head-to-the-pacific-in-october-and-nov
ember
or, if the above gets truncated in transmission, try
http://goo.gl/WtTdjM

And, finally, remember the Hell-expedition, to W1AW/8 MI using Feld Hell
(Hellschreiber) - which is being done by N8XX and a cadre of suckers....
errr, volunteers who are going to Hell Michigan for a Helluva jolly good
time. For more info on this expedition, see:
http://www.arrl.org/news/w1aw-8-to-take-the-snowball-s-chance-this-fall
or, if that gets truncated, try
http://goo.gl/SJ1rtm

(Now THAT is a real segue from one "real" dxpedition to another "not
real" but "lots of fun and quite local" expedition.)

72/73 de n8xx Hg
QRP >99.44% of the time
But NOT while operating Feld Hell from Hell, Michigan

2716. US Islands contest from Murray Lake Island this weekend

Yahoo group: GRARA
Date: 2014-10-13 21:33:59 UTC
From: Jack Amelar
Topic: 2716 Message: 2716

The Lowell Amateur Radio Club (LARC), W8LRC, will be participating in the amateur radio US Islands contest, operating from Murray Lake Island at the DNR launches. DNR permits have been acquired. Organized by U.S. Islands Awards Program.
This is an open invitation anyone interested in visiting and/or operating our operation. Feel welcome to stop by. Operations begin Saturday October 18 12:NOON and end Sunday October 19 at 8:PM, although we'll likely start setting up before Saturday noon and leave before Sunday 8:PM. Talk-in on the W8LRC 145.27- (94.8Hz) repeater.

Map at http://goo.gl/t24FCH or use the address 3650 Causeway Dr NE, Lowell, MI 49331

This is a friendly contest that operates on ham radio HF frequencies, contacting other US and Canadian Island stations, and home stations seeking island operations. This will be the second time LARC has activated Murray Lake Island, designator MI089L, previously in October 2010. We will be using special event call N8M.

I'm well aware this is the same weekend as the Muskegon Hamfest http://www.mcecs.net/Hamfest.htm and Kalamazoo Hamfest http://kalamazoohamfest.com What can I say, we didn't schedule these events. If you're going to a hamfest, stop by Murray Lake Island afterwards.

For more information, contact LARC's coordinator, Bob Robinson KD8HNF kd8hnf@... (616)897-6164

Lowell Amateur Radio Club http://www.w8lrc.org/

U.S. Islands Awards Program http://www.usislands.org/

The following copied from http://www.usislands.org/rules.html

The United States Islands Awards Program, USI, covers saltwater and inland fresh water river or lake islands of the fifty (50) states of the United States and U.S Territories or Protectorates (See master island directory). USI was formed to further enhance "island chasing" that has become so popular on the amateur radio bands. The USI goal is to promote a simple but effective system of island collecting in a professional radio-manner and to operate totally on the "honor system". USI warmly welcomes all ham radio operators and island enthusiasts to yet another facet of island collecting. USI is open to anyone (Ham or SWL) interested in working toward the many and varied US Island Awards by collecting and activating US islands.

2717. KD8QXC tower base - help needed

Yahoo group: GRARA
Date: 2014-10-14 02:26:55 UTC
From: streyle.j@...
Topic: 2717 Message: 2717

My fellow club members:
Frank, KD8QXC has accumulated the funds to purchase cement for his 45-foot free-standing tower, and has asked me to take the lead in getting the tower base setup. Frank is no longer physically able to do this kind of work.

I'd like to pour cement on the 25th of October (weather permitting) - so I need help to:

a) dig the hole prior to the 25th
b) finish setup of the base
c) haul cement from U-Rent-It
d) pour the cement
e) clean up the cement cart(s)

Let's make this a GRARA club project - many hands make light work.

Who is able and willing to help?

2720. Michigan W1AW/8 Operation for the next seven days...

Yahoo group: GRARA
Date: 2014-10-15 02:09:40 UTC
From: Tom
Topic: 2720 Message: 2720

If you are interested in who might be on the air at any one for the
Michigan W1AW/8 operation, please take a look at the online database at:

http://www.k8sn.org/w1aw-schedule/index.php?date=2014-10-15

The 70+ operators registered for this week long operation can update
this database at anytime, so it will change from hour by hour.

Nice to see some local clubs booked for air time.

Tom K8TB

2725. Noob Alert - Help Request

Yahoo group: GRARA
Date: 2014-10-20 00:30:50 UTC
From: Doug Luurs
Topic: 2725 Message: 2725
Attachments: 1 described; binary payloads are missing from this source WARC

Greetings ..

I got my first HF station wanting to get into DX w/ Digital, and have been trying this weekend to get ahold of Hell (MI).

I can hear them just fine, but I am unable to figure out why the attached setup isn't working correctly.

When I Tune the antenna, I get a power reading on the SWR meter. When I try to reply to CQ via DM780 (in Ham Radio Deluxe)

The Radio's TX light comes on, but the Signalink USB remains dark (No TX), and the power meter remains at zero.

Any suggestions?

Thank you in advance,

Doug / W8ZUU

Dough:

I'm not familiar with the Signal Link USB sound card, and I've tried, but so far haven't figured out how to work the Ham Radio Deluxe and DM780, so can't help in that department. I suggest contacting Mike, KB8ZGL, who has successfully mated HRD with a DM 780 at W8LRC.

If you get your setup working before 7 p.m. EDT Tuesday, give me a buzzzzz @ 616 828 9663 (cell) and I'll work you on Feld Hell (sorry I won't make another trip to Hell just for you, but it will be a Feld Hell Q with W1AW/8)

72/73 de n8xx Hg
Recovering from the trip yesterday to Hell and back, operated Feld Hell as W1AW/8!

Doug:

Open Radio Room is "officially" every Wednesday from 7 p.m to "whenever."

If you're not bashful, and find someone who is knowledgeable about the equipment, you may even get a chance to dislodge whoever is occupying the operating chair, and actually get a tutorial on the equipment, and how to use it.

But if you're retired, or otherwise available during the day, this LID who operates N8XX might be coerced into opening the place up during the day on a weekday so the blind (me) may stumble through a "semi tutorial" for the eager student (you) on how to operate HF. These new things like CW, SSB, etc. sometimes befuddle me, since I grew up and fell in love with sp*rk gaps and coherers when I first got my license. I sometimes manage to muddle through, and actually use, more recent technology.

After all, ham radio is supposed to be fun - even freezing in Hell at the Hell Creek Ranch Campground had its high points last weekend; It wasn't actually freezing, not quite, but 45 ?F in a semi-open tent seemed akin to freezing at times.

How about a tube tester and several shortwave receivers? I don't have any transceivers, but several working tube model receivers that I could sell. I also have a high amp 12V power supply. If interested, send me an email at tigerfan158@...

2732. It's CQWW Phone contest this weekend

Yahoo group: GRARA
Date: 2014-10-24 13:12:31 UTC
From: Hank Greeb
Topic: 2732 Message: 2732

Anyone up to opening up W8DC for the contest?

It begins at 0000Z October 25Z (or 8 p.m local tonight October 24) and
runs for 48 hours until 2359Z October 26Z (8 p.m. Sunday Local time)

Best time for W8DC would be daylight hours.

Rules are at http://www.cqww.com/rules.htm

Please think about it. This came up earlier than usual, because the
first weekend of August starts on a Saturday.

2733. Skywarn Training for Ottawa/Kent County

Yahoo group: GRARA
Date: 2014-10-29 01:39:40 UTC
From: Tom
Topic: 2733 Message: 2733

The Skywarn training session for Ottawa/Kent County is now accepting reservations.

The date is Thursday, February 19, 2015 at 7:00 PM.

The location will be the Jenison Public High School Fine arts Auditorium.

There is no cost.

Registration is open for Skywarn training: via Facebook:

"https://www.facebook.com/groups/ottawaskywarn/470566146417100/?notif_t=group_activity"

Or the registration site direct:

"https://www.eventbrite.com/e/ottawa-kent-severe-weather-spotter-training-2015-registration-13992276275"

You do not need to be a member of any amateur radio club to go to the training session. nor do you need to be an amateur radio operator.

HF will give you hundreds of thousands more hams to communicate with but you should not think about a radio without considering the antenna and the communications mode(s).

If you aren't alone in the RV, voice may not be an option. I'd start with CW and use an Elecraft KX3. To expand digitally, add a small laptop and the panadaptor PX3. Later, if you want more power, add the KXPA100 amp.

For antenna, both the Par EndFedz or Buddipole are convenient and storable.

However, ask 4 hams and you'll get a half dozen opinions. Mine's based on my own experiences between 1957 and 2014. Others vary.

Hello James, I personally prefer separate radios. If you have an all band all mode single unit, if anything goes wrong with the radio, you have to get it repaired. And that would leave you without a way for you to stay on the air until the radio gets repaired. Just my preference for a station. 73 for now James.

I would always go more than you think you need- That means power supply's and radio equipment.
Feed lines too- Don't skimp or under equip, You will wind up spending more later to make up for short comings-

Same on radios too- I would go with an HF/VHF/UHF combo so you have it all covered just in case your operating interests change which they will-
The used market will yield some nice acquisitions too!

You don't need a huge base radio with gobs of functions you might never use- there are a good many compact all purpose radios out there that will work great-

IMPORTANT NOTICE - CALL TO ACTION

Michigan Hams: This is our time to get this done. Get this information to your friends and to your radio club. Unless your next club meeting is in the next week, don't wait for the next meeting - Send the information out in an email, make phone calls, and make every effort to get the maximum number of letters to the members of the House Energy and Technology Committee. Be creative and GET OUT THE VOTE!!

We can do this!

PRB-1 UPDATE

To the hams of Michigan:

Here is an important update from our State Government Liaison, Ed Hude, WA8QJE on the status of the PRB-1 project here in Michigan.

In September, 2014, Senator Nofs and the members of the Senate Energy and Technology Committee unanimously reported SB 0493 favorably to the Committee of the Whole. The Senate held the third reading of the bill on October 22, 2014 and the Senate passed the bill unanimously.

Now our bill is heading to the House of Representatives for their consideration. It is expected that the bill will be assigned to the Energy and Technology Committee in the House and it is time for our membership to communicate with the Chairman and the members of the Committee.

This is where I need your help. I am asking that each and every one of you contact the Committee Chair and the Committee Members of the House Energy and Technology Committee to encourage them to take action on

this bill.

This communication can be best done by email. Below the attached sample message is a listing of the Chairman and members of the committee and their House website where you can cut and paste your letter on their website or their email address where you can use your word processor to generate your letter. It is acceptable for anyone to send a note to all of the Committee Members, even if you don?t live in his or her district. Just make sure that your subject line is ?House Energy and Technology Committee?. That will get the necessary attention.

The following is a suggestion as to what to include in your message. If you deviate from this message, please be respectful and communicate in a professional tone. Please be sure to carbon copy or ?cc:? both myself and our Section Manager Larry Camp, WB8R.

You do not need to be a licensed operator to send this message. Even your spouse can send a separate message. (Just be sure to not place a call sign in the signature)

Let?s work together and keep this moving forward!!! Thank you.

Ed, WA8QJE

EMAIL MESSAGE EXAMPLE:

SUBJECT: House Energy and Technology Committee and SB 0493

Representative _____,

I am asking that you please give consideration to scheduling SB 0493 for review and passage within the House Energy and Technology Committee. Senate Bill 0493, if passed, will recognize the Federal Communications Commission pre-emption of PRB-1. This will help all licensed Amateur Radio Operators across the State of Michigan, especially in the times of needed emergency communications. Your assistance as well as that of the other committee members is urgently needed.

Regards,

From: Hank Greeb
Topic: 2741 Message: 2743

Yep, there WILL be a meeting of the Grand Rapids Amateur Radio Association on Friday, November 7, 2014. The place is the Greater Grand Rapids Red Cross, 1050 Fuller NW, Grand Rapids.

People start gathering around 6:30 p.m. Local, and the meeting will start at 7 p.m.

After the usual (hopefully short) business meeting, Jerry, K8GGL, and Hank, N8XX will describe the Feld Hell mode and mention highlights of a recent journey to Hell (Michigan) where they, and four others, set up and operated W1AW/8 from Hell Creek Ranch Campground, using (of course) the Feld Hell mode.

If things work out, we WILL have a demo of Feld Hell, with one rig connected to an antenna usually used @ W8DC, and the second @ K8GGL's home, but run remotely by Gerry who will be with us at the Red Cross.

Invite your friends - one needn't be a member of GRARA to attend our meetings.

2744. ARRL request sent today

Yahoo group: GRARA
Date: 2014-11-03 15:28:48 UTC
From: stprovost@...
Topic: 2744 Message: 2744

Hello, this is NOT a copy of last weeks call to action request, it is an UPDATE

Stephen AC8QE

As this PRB-1 drama unfolds with the Michigan House of Representatives, we find ourselves reacting to breaking news. This happens as a result of the House currently not being in session. Nothing is official and everything is speculative.

As you will remember, we just started a letter writing campaign which targeted the members of the Committee that we were told would be handling our bill. Things change and it now appears that we will deal with different committee.

Don’t think that all of those letters that we sent to the first committee members were sent in vain. Nothing could be further from the truth. Each of those representatives are now aware of our bill and aware that there are a lot of amateur radio operators that have an interest in having SB 0493 pass out of committee and out of the House itself. No wasted letters here.

It is time to shift gears.

Please go to our PRB-1 website at http://www.miarrlprb1.org/ http://www.miarrlprb1.org/.

Click on the ‘Sample Letters’ tab and click on ‘House of Representatives’ and enter your information to locate your representative’s website. Back on the Sample Letters tab, scroll down to Sample House Letter. Copy the letter and paste it into your Representative’s email form.

Be sure to add the Representative’s information as well as your information at the end of the letter to personalize the document. Sometimes it is easier to copy the letter from our website and paste it into a word processor to get it prepared and then paste into the Representative’s email form.

Once again, please send a copy of what you send to wb8r@arrl.org and wa8qje@arrl.net.

Thank you for all of your efforts and with your help we can accomplish this important task.

73,

Larry

2745. W8DC repeater status

Yahoo group: GRARA
Date: 2014-11-03 17:02:37 UTC
From: stprovost@...
Topic: 2745 Message: 2745

Hello, on saturday we had a great crew Mike KB8ZQL and Adam from Freedomnet, Nathan N8THN, and myself installed the donated (thanks Dave!) uhf 8 bank antenna on the 92nd street hill antenna. Also want to thank IRA for letting us install this antenna on their tower and accommodate our repeater cabinet.

Tom N8DGD came around 3pm to assist with the repeater controller move.

We were finished with the move around 11pm (gotta love this hobby!)

We are still working on some tweaking issues with the repeater.

Again a big thanks to everyone who helped with this project :)

Yup, as late in the month as is possible - Friday, 11/7
Gathering at ~6:30 p.m.
Meeting at 7:00 p.m.
Place: Red Cross Building 1050 Fuller Street NE, Grand Rapids (just south of Leonard)

Special presentation: Gerry, K8GGL, and Hank, N8XX will describe "Hellschreiber" or Feld Hell, and a trip to Hell, Michigan on October 18, to operate with the mode part of the ARRL Centennial Celebration using the call W1AW/8.

If things work out, we should have a "live" demonstration of Feld Hell, using the club's Kenwood TS-2000 and Rigblaster Pro. If for whatever reason this doesn't work, we can show Feld Hell from the shack at W8DC after the presentation.

From: qschultze@...
Topic: 2749 Message: 2749

Hey, gang.

Tom's note about the new general-class licenses reminds me that I've got a great beginner or mobile HF rig in perfect operating condition but with a few scratches. I also have the power cord (no supply) and a copy of the manual.

I'll post the specs below, but here's a link to the eham reviews for the rig (4.8 out of 5):

http://www.eham.net/reviews/detail/338 http://www.eham.net/reviews/detail/338

Please don't buy the rig to resell it. I would like to get it into the hands of a needy ham; hence, my low price.

One thing about this and other early ICOM rigs is the fact that they need a mic with a bit of pre-amplification if you want full output power on SSB. You don't need a full-bore audio amp, just the typical mic with some built-in punch. There is all kinds of info online about this, and you can buy such things on eBay and beyond. Just search for ICOM 730 mic.

Fire me an email if you're interested. First-come, first-served.

Here's a link to the basic specs plus a link to download the manual:

I have been informed, by a very reliable source, that the next "Red Badge Day" for the Centennial QSO Party is this Saturday Nov 22, 0000 GMT to 2400 GMT. "Red Badge" means that holder of offices which qualify them to have a "Red ID Badge" from ARRL will be on the air during this period. You can catch quite a few points for the "Leader Board" of the Centennial QP during this period.

I haven't seen the announcement on the ARRL web site, but my source "should know."

For a list of ARRL High Honchos and appointees who can give out "large value QSO's" one may look at the announcement for the previous event - on the ARRL Web site @ http://www.arrl.org/news/next-red-badge-day-on-september-21-is-a-chance-to-rack-up-serious-centennial-qso-party-points

if the above get truncated in transmission try this itty bitty url: http://goo.gl/DPRMdC

Note that this is considered an "Operating event" not a Contest, so we may use the WARC bands. Also, simplex operation on VHF/UHF/SHF will count. (No use of repeaters, though. :(

I'll be on from time to time this Saturday, and quite a few other much higher value contacts, should be available.

2751. Fair price for antenna and rotator

Yahoo group: GRARA
Date: 2014-11-18 03:12:54 UTC
From: streyle.j@...
Topic: 2751 Message: 2751

I'd like to get your opinions:

I am personally overseeing the SK estate of KD8QQ - but I also want to buy the TH-11DX antenna and Tailtwister rotator.
The antenna had (6) elements damaged - (about $150 in parts needed), but was otherwise in good shape.
The rotator had the control box, and moved when powered, but the direction readout did not work.

What would be fair prices for these items? (I want to be sure I personally don't take advantage of a widow!)

Thanks,
John W8QZ

John,

In my experience buying and selling radio gear, for a lot of things like these that are not "collectable", a rule of thumb is the value depreciates over time to an ultimate used value of about 1/3- 1/2 the new price if the equipment is in usable condition. So a TH-11 antenna, that would cost $1000 today if you bought one, might fetch $300-500 well used. Take away the $150 in repairs, and I'd guess the antenna is worth $150-$350. I think you could apply the same rule of thumb to the rotor.

You can also check eBay, but things go for a little bit more there than typical local hamfests and ham to ham personal purchases.

Some hams disagree, and think their stuff is worth more than this, but as we all know, the value of anything is exactly equal to what you can get for it when it sells!

2755. Saturday, December 13, Ham License in a Day Class

Yahoo group: GRARA
Date: 2014-12-03 00:45:50 UTC
From: Tom
Topic: 2755 Message: 2755

If you know anyone who has had the desire to get their amateur radio license,
the Holland ARC will be holding another "Ham in a Day" class, next week Saturday, December 13.

Directed study starts at 1:00 and continues till 6:00, when the test will be given.
For registration and more information, go to: http://tinyurl.com/harchiad .

This class, and the full VE session will be held at the Ottawa Red Cross, located at 270 James St, Holland.
At 6:00 PM, the test will be given for those in the class.
Also, anyone holding current technician and general licenses may arrive at 6:00 and take the tests to upgrade.
If you wish to skip the class and test for your technician class license, simply show up at 6:00 PM. If you are testing for an upgrade, please bring photo ID, your current license, and a copy of that license.

***If you or anyone you know has previously held an amateur radio license but let the license expire and now would like to get back into ham radio, recent rule changes now state that if you pass the technician license exam, you will be granted a license at your previous level.
For instance, if you were an amateur extra years ago, but let the license lapse,
you can now get your extra license back by passing the technician exam.
See the ARRL website http://www.arrl.org/exam-element-credit for details on proof of previous license.***

No Morse code is required for any grade license.

2756. Call for action from our State Government Liaison Ed Hude, WA8QJE for PRB-1

Yahoo group: GRARA
Date: 2014-12-04 13:03:54 UTC
From: stprovost@...
Topic: 2756 Message: 2756

To the hams of Michigan:

This message below from our State Government Liaison Ed Hude, WA8QJE is a call to action for what we hope will the last time for PRB-1 in Michigan.

To my fellow Michigan Amateur Radio Operators,

As I write this, Michigan Senate Bill 0493 is scheduled for a hearing on Thursday, December 4, 2014, before the House Energy & Technology Committee.

I want to personally thank each and every one of you for writing to the Committee Members as well as your House Representative for your District. Once again I am urgently asking for your help. We need each and every one of you to communicate once again to your current State of Michigan House Representative urging them to vote for swift passage of Senate Bill 0493.

I cannot emphasize how important your help is needed once again. I as well as your Section Manager Larry Camp and Committee members have spent many hours, countless telephone calls and visits with our elected officials working at getting Senate Bill 0493 passed.

Never before have we come this far. Please pass this notice on to every Michigan amateur radio operator, to every amateur radio club, to your spouse, to your family, to shortwave radio enthusiasts and everyone else that you know that is of voting age..

Let's get Michigan Senate Bill 0493 passed now by writing to your Michigan House Representative now!

73’s
Edward Hude, WA8QJE
Michigan State Government Liaison

Here is how to send correspondence to your Representative:

In order to make things easier to locate and write your representative, please go to www.http://www.miarrlprb1.org/ http://www.http://www.miarrlprb1.org/.

Once there, click on Sample Letters. Click on locate your representative which will take you to their web page where you can find

their email address.

On the same Sample Letters page, you can find the text of a letter that you can use by cutting and pasting into your email program. Don't forget to include your Representative's name and address and your name, call sign and address.

Please don't delay in sending your letters out. Time is of the essence as the last day of this legislative term is December 18. After that, we have to start all over again. We don't know for sure when the floor vote will be held, so we want to maximize the impact of our letters. We need to pull out all the stops here in order to get this project completed for the hams of Michigan.

I echo Ed's thanks for all of your efforts and urge you to respond to our request.

2757. Rookie Roundup CW coming soon...

Yahoo group: GRARA
Date: 2014-12-06 16:31:24 UTC
From: Hank Greeb
Topic: 2757 Message: 2757

Greetings!

I forgot to mention this event in an earlier message.

On Sunday December 21, the ARRL Rookie Roundup CW is happening from 1800z-2359z (1 p.m. to 7 p.m EST). Non-rookies are encouraged to come out and make contacts with the rookies.

I'm sure we have Rookies in our midst, since we give license exams at least once a month. In the Rookie Roundup, a Rookie is defined has having been first licensed in the current calendar year or the previous two calendar years, regardless of license class. CW for December might be a limiting factor - but thought I'd mention it......

I once started - I remember a predecessor to the Straight Key Night (or I was just bored one December 31, 1951 when I was a Novice) back in 1951 and stayed up until about 3 a.m. Central Time) and had some very interesting QSO's for the evening. My CW speed was barely 5 WPM at that time. Later, I ran November SS the next year and made about 50 contacts in some 20 hours on the air.

Lettuce thimk about this possibility.

2758. Urgent PRB-1 Update and Final Push to the Finish Line

Yahoo group: GRARA
Date: 2014-12-09 20:38:40 UTC
From: ARRL Members Only Web site
Topic: 2758 Message: 2758

December 9, 2014

Greetings to the Hams of Michigan:

On the morning of December 9, 2014, the Michigan House of Representatives Energy and Technology Committee held a hearing on SB 0493 with a subsequent roll call vote. The results of that vote was a unanimous positive vote and SB 0493 has been favorably reported out of Committee to the House floor for the bill's third reading and a vote in the days ahead.

This unanimous vote matches the unanimous votes our bill received in the Senate Committee and the Senate floor. After the vote on the House floor, if successful, the last stop on this long journey is the Governor's Office!

I am asking that everyone send another letter (below) to their Representative in a final push to complete our task at hand. Even if you have set a letter (s) previously, now is the time to send it again in order to accomplish our goal. More letters just emphasize how important this issue is to the hams of Michigan.

Visit our website at http://www.miarrlprb1.org/ Click on Sample Letters and you can find your Representative's information and their email address by clicking on 'House of Representatives" and enter either your District number or your residence address.

Locate and click on the spot "Find a Representative" and you will be taken to the website of your Representative. Once there, look for "Contact Rep. XXXX" and click there and locate his or her email address and paste it into a blank email in your email program. The email address is often similar to: His/HerName@...

Once you have copied his or her email address into the TO: line, enter these two email addresses; wb8r@... and wa8qje@... in the CC: line.

Copy and paste the sample letter from the website into the email body, make the necessary adjustments to get your Representative's name and address (find that info on their website) and then put your information at the bottom of the letter. After reviewing all for accuracy, then send it on its way. We have this last push to get us over the top!

Please have your ham and non ham friends send a letter. Get your spouse and voting age children to email a letter as well. We need to let our representatives know that we want them to vote yes on this bill.

One last thing: Please accept my personal thanks for all of your support and efforts over the many years that we have been working hard to get where we are today.

2759. Looking for a 4 pin female microphone plug

Yahoo group: GRARA
Date: 2014-12-12 06:00:15 UTC
From: Hank Greeb
Topic: 2759 Message: 2759

Does anyone have a defunct microphone with a 4 pin female audio plug? I need one for a project I'm doing, and would like to get it locally so I can have the project finished by 20 December.

I'll pay any nominal price - Mouser wants about $7.00 plus shipping for one, and I'm not sure it's the right connector.

Private responses seem most appropriate.

2763. PRB-1 Contact Governor Snyder's Office

Yahoo group: GRARA
Date: 2014-12-28 15:53:01 UTC
From: stprovost@...
Topic: 2763 Message: 2763

Greetings to the hams of Michigan:

As you know, both the Michigan Senate and the House of Representatives have unanimously passed Senate Bill 493, which is known to the hams of Michigan as the “PRB-1” bill. Our bill was passed on the last day of the legislative session and is now in the Governor’s office for his consideration and hopefully his signature.

If we cannot get this bill signed by Governor Snyder, the bill will die and we will be faced with having to start all over again in the 2015 – 2016 legislative cycle. I know that many of us have worked very hard to get our bill to this point and now we need to push it over the top.

Here is where we come in. We need to contact the Governor’s Office of Constituent Relations in two ways: at the Governor's website and by telephone.

Our message is simple: “I respectfully encourage Governor Snyder to sign SB 493.”

This message needs to be sent via the Governor's website at:

https://somgovweb.state.mi.us/GovRelations/ShareOpinion.aspx
https://somgovweb.state.mi.us/GovRelations/ShareOpinion.aspx

This web site will take you a form to be filled out. Easy to do and painless. No need to compose your comments. Simply use the provided verbiage.

By telephone at 517-335-7858, simply tell the person answering the phone “This is (your name) and I am a resident of (your city, town, village, or township) and I respectively encourage Governor Snyder to sign Senate Bill 493.”

This is the same message sent by two methods. Both are equally important.

Don’t forget to take advantage of the “family plan”. Encourage your family members that are of voting age to follow this process. Generally speaking, we can greatly expand our impact by asking family members and friends to follow the same procedure.

Please spread the word. Send this out on your Facebook page and to your club members and to your ham friends.

Time is of the essence and preferably we would like to blanket both the website and the telephone lines on Monday, December 29. If you cannot do this on Monday, then do it on Tuesday. If you can’t do it on Tuesday,

then do it on Wednesday. The important thing is to visit the website and fill out the form and to make that phone call. It is do or die for our bill.

Please send a short email to wa8qje@arrl.net and to wb8r@arrl.org to advise us that you have taken these steps and how many non-ham family members and friends did the same.

Thank you once again for all of your efforts to get this important bill signed into law.

We could "play" some PSK-31 with the TS-2000 and the Rigblaster in the PODXS Ø7Ø Club's Fourteenth annual PSK-Fest, which starts at 0000Z Saturday (which is 7 p.m. EST Friday, about the time most folks will be at the Open Radio room)

There "should" be some 20 meter activity at 0000Z - so we "should" stand a chance to make a contact or two.

For full rules see:
http://www.podxs070.com/o7o-club-sponsored-contests/pskfest

Do we have a computer attached to that station which will run FL-Digi?

I can bring my ancient Windoze XP computer with proper drivers for the USB to Com port adapter.

It would be a GRRR8 chance to lettuce c what the setup can do in the very noisy environment @ Red Cross.

From: ARRL Members Only Web site <memberlist@...>
To: hgreeb@...

Greetings to the Hams of Michigan:

We keep learning new things regarding how our legislature works…

We are in overtime. There is a significant quantity of bills that have been passed by both houses of the legislature and that have been ordered to be enrolled, printed and sent to the Governor. SB 493 is one of these bills. The department that performs that function is running behind and could not have gotten all of this done prior to Jan 1.

For reference, here is the pertinent part of “How a Bill Becomes a Law”:
(http://www.michigan.gov/som/0,4669,7-192-29701_29704-2836--,00.html)

>From the document "How a Bill Becomes a Law":

"If the Legislature has adjourned by the time the bill reaches the Governor, he or she has fourteen days to consider the bill. If the Governor fails to approve the bill, it does not become law."

It may be a week or two before our bill will be signed. We are firmly convinced that the Governor will sign SB 493.

For those that have contacted the Governor’s office as we have requested, thank you. For those that have not yet done so, here is the information:

We need to contact the Governor’s Office of Constituent Relations in two ways: by email and by telephone.

Our message is simple: “I respectfully encourage Governor Snyder to sign Senate Bill 493.”

This message needs to be sent via email at:

https://somgovweb.state.mi.us/GovRelations/ShareOpinion.aspx

This web site will take you a form to be filled out. Easy to do and painless. No need to compose your comments. Simply use the provided verbiage.

By telephone at 517-335-7858, simply tell the person answering the phone (or leave a message if calling after hours) “this is (your name) and I am a resident of (your city, town, village, or township) and I respectively encourage Governor Snyder to sign Senate Bill 0493.”

Please continue to contact the Governor’s office and send a note to wa8qje@... and wb8r@... telling us that you made contact with them.

A personal observation: What a civics lesson and my civics teacher left out a lot of stuff!!!

James:

Thanks for the inquiry. Did you try "one 'kerchunk'" to see if it was actually working? I haven't been on 2 meter FM for some time, but I do note that Grand Rapids Amateur Radio Association (GRARA) is the organization which supports the '76 repeater.

According to the Michigan Area Repeater Council, http://www.miarc.com/cnty/kent_rptr.html

Kent Grand Rapids SW 146.760 W8DC O 94.8 e Grand Rapids ARA 03/12/14

If you find the '76 repeater, or any other GRARA repeater with a problem (not working, etc) contact our trustee, N8DGD <1n8dgd@...> or our technical expert, AC8QE <stprovost@...>

Generally speaking, VHF repeater activity is quite low in many metro areas. GRARA's "Main" repeater is on 147.26 It has a bit more activity. Kent Grand Rapids SW 147.260 W8DC O 94.8 A e R Grand Rapids ARA 03/13/14

Thanks for your interest. If you wish to find out more about this, or any other thing associated with the Grand Rapids ARA, come on down to the special open radio room this evening from 7 p.m. to whenever. There's a rumor that Pizza will be served, but I haven't nailed down if that's a threat or a promise, so I can't guarantee anything.

72/73 de n8xx Hg
Defacto, drafted, etc., "On Air Director" which means I SHOULD know about any on air activities. (but often I don't. :)

Why hasn't anyone mention the
FOURTEENTH ANNUAL Ø7Ø CLUB PSKfest
Sponsored by the Penn-Ohio DX Society (PODXS) ????

It doesn't conflict with any contest which has been "plumped" on this reflector, since it begins this evening at 0000Z and ends as 2359Z tomorrow.

Doesn't PSK-31 interest any operators? Seems that running a mode which can occupy less than 50 Hz should be refreshing to all except those who believe that running RTTY @ 60 WPM with a 170 Hz+ bandwidth is the "Cats Meow."

Anyway, I'm going down to our Radio Club (W8DC) for a trial run of their new digital station, and would like a few local -8 land - contacts. For full rules see:
http://www.podxs070.com/o7o-club-sponsored-contests/pskfest

Hope to run across quite a few MRRC members during this event.

From: Hank Greeb
Topic: 2777 Message: 2777

Hope folks aren't tiring of this kind of info, but, Gov. Snyder now has the Michigan SB 0493 for signature. He has 14 days to sign it or it goes into the bit bucket.

IF you haven't sent an e-Mail and/or telephoned his office, please do so now. See the message below for info on how to contact the Governor's office.

January 2, 2015

Greetings to the Hams of Michigan:

I just received word that at 1008 this morning (January 2, 2015), Michigan Senate Bill 0493 (PRB-1) was presented to Governor Snyder for his consideration.

He has 14 days to act upon the bill, and we are hopeful that it will be sooner rather than later. By law he must sign the bill, veto the bill, or ignore the bill (pocket veto). In any event, sometime in the next 2 weeks we will have our answer.

Please continue to contact the Governor's Office of Constituent Relations by email and by telephone per the following instructions: Our message is simple: “I respectfully encourage Governor Snyder to sign Senate Bill 493.”

This message needs to be sent via email at:

https://somgovweb.state.mi.us/GovRelations/ShareOpinion.aspx

This web site will take you a form to be filled out. Easy to do and painless. No need to compose your comments. For the bill category, use "Unknown" and simply use the provided verbiage.

By telephone at 517-335-7858, simply tell the person answering the phone (or leave a message if calling after hours) “this is (your name) and I am a resident of (your city, town, village, or township) and I respectfully encourage Governor Snyder to sign Senate Bill 0493.”

After contacting the Governor's Office, please send a note to
wa8qje@... andwb8r@... advising us that you made contact
with them.

I will provide additional information as it becomes available.

Until next time,

73,

Larry, WB8R

2779. Re: [GRARA] The GR area 146.760 repeater

Yahoo group: GRARA
Date: 2015-01-03 03:30:33 UTC
From: w8nsi@...
Topic: 2772 Message: 2779

Thanks for the reply Hank.

From the opening page of this group... "You are welcome to visit our VHF repeater at 147.260 mhz (+) with a tone of 94.8 hz and our UHF repeater at 444.4000 mhz and a tone of 94.8 hz." with no mention of the 146.760 repeater also pl tone of 94.8.

Looks like the old 76 repeater is the red headed step child of the club?

Also no mention of it on the GRARA Facebook page or the GRARA web page. I was just curious.

Yes it does kerchunk! It really is still on the air, surprise surprise surprise (in my best Gomer Pyle voice). :)

A very good question. In my opinion, there are way too many repeaters in this area - so that the few users are spread out even more thinly.

2782. PODXS 070 Club PSKFest M/S AB LOW

Yahoo group: GRARA
Date: 2015-01-03 22:02:48 UTC
From: Hank Greeb
Topic: 2782 Message: 2782

A giant Thanks to Stephen Provost, AC8QE, and Tom Hansen, N8DGD for "hanging in there" when we were puzzled by my insistence that COM4 was the correct port for where the rig control was connected. It actually was COM7, and when we switched to COM 4, everything worked fine.

Neither Tom nor I were familiar with the FL-Digi software, so we both fumbled a while in a short learning curve.

But, all in all, it seems that the system works fine for PSK-31, and probably for other narrow band digital modes.

Perhaps we have a subject of "PSK-31 @ W8DC" for an upcoming meeting?

PODXS 070 Club PSKFest Summary Sheet

Start Date : 2015-01-03

CallSign Used : W8DC
Operator(s) : N8XX, N8DGD

Operator Category : Multi-Single
Band : ALL
Power : LOW
Mode : PSK-31

Name : Grand Rapids ARA

ARRL Section : OH
Club/Team : None
Software : FL-Digi 3.21.83

Band QSOs Pts MULTS
7 3 3 4
14 11 11 12
Total 14 14 16

Claimed Score : 224
Rig : TS-2000

Antennas : Vertical

Soapbox : Testing new setup, TS-2000 and Rigblaster Pro
System worked quit well, after we realized the Com port for rig control was not what I "knew" it to be. A few fits and starts with two ops who were unfamiliar with how FL-Digi works

Time limited to 1.5 hours, much of it in learning mode. Thanks to some patient ops who stuck around while we learned how to work the software.

2783. Re: [GRARA] The GR area 146.760 repeater

Yahoo group: GRARA

From: w8nsi@...
Topic: 2772 Message: 2783

You are right. Too many repeaters with not enough ops to use them all.

Most repeaters seem to be quiet most of the time. Vanity repeaters?

The GR area UHF repeaters are a great example. Only the K8SN 442.175 machine gets a lot of use though there are repeaters on 443.075, 443.800, 444.100, 444.325 which seem to be quiet all the time.

GRARA's 444.400 machine is linked to the 147.26 machine, so it is on the air but how many actually use it?

A scan around 2 meters, lots of local clubs with their own repeaters that are maybe used once a week for a net but are otherwise mostly silent, There are exceptions like the 146.270 Lowell repeater which has great coverage and is used by hams on the east side of the county.

The 146.76 machine is so forgotten that it is never mentioned in any online club web space. I wonder what the coverage of the repeater is? Where is it located now? Does anyone in the club really know, because no one uses it?

Minor typo: the Lowell machine is 145.270 not 146.270

2785. Smart Meters

Yahoo group: GRARA
Date: 2015-01-05 19:48:43 UTC
From: Hank Greeb
Topic: 2785 Message: 2785

I note in the Consumer's Energy website that smart meters have been installed in parts of Grand Rapids since 2012.

Does anyone know the frequenc(y)(ies) on which these devices operate?

I ask because back in SW Ohio (Middletown, Ohio and surrounding area) the power company decided, upon it's own recognizance, to plop down the the middle of the 80 meter Amateur Band and create quite a ruckus. It took considerable time and legal threats, including citation by the FCC, to get them to move.

The consumer's energy rep did not know the frequency or frequency band on which they operate, but promised to find out and advise me. She did say they "had their own frequency" which sounds like their operation may be licensed and sanctioned by the FCC, etc.

But, it's wise to know, because, even though they say there's a data dump only once a day, if thousands of installations are running simultaneously, they could be occupying a significant chunk of time.

2789. Re: Smart Meters

Yahoo group: GRARA
Date: 2015-01-06 13:33:48 UTC
From: w8nsi@...
Topic: 2785 Message: 2789

Hank, Jack, Here is the email reply I got from CE to an email requesting this info:

===
Hello,

Thank you for contacting us back regarding the smart meters.

Our solution is point to point meaning we use cell phone towers to transmit data back to us from. Each smart meter is individually tied to a cell tower, they are not meshed together in any way. The bands used by the smart meters are private.

Radio broadcasts from smart meters are on Verizon 2G and 3G (1900 MHz/800MHz) cellular technologies: Daily read data (with ongoing cellular/data events). External broadcast of a radio frequency from smart meters is to transmit customer electric use data to the cell phone tower. The encrypted information is much like a cell phone text message and will send customer electric use data once daily – most likely between midnight and 2 a.m. The transmission of the daily read from the smart meter occurs at a radio frequency in the 800MHz cellular band, the data is about the same level of RF it takes to send a text message from a cell phone.

Hope this information helps.

Sincerely,

Stacy

Actually, the meters will be transmitting once a day, usually between
about midnight and 3 a.m., on the cellular band, using cellphone technology.

2801. PRB-1 Last Minute Call to Action

Yahoo group: GRARA
Date: 2015-01-13 12:46:44 UTC
From: ARRL Members Only Web site
Topic: 2801 Message: 2801

Senate Bill 0493 was presented to Governor Snyder at 10:08 AM on January 2, 2015. He has until 10:08 AM on January 16 to sign it in order for it to become law.

As of this writing (8:00 PM) on January 12, 2015 our bill (along with many others) has not been signed by the Governor. We are down to the final days and we need your help.

This call to action is for those Michigan amateurs and other interested parties that HAVE NOT yet contacted the Governor’s via email or the Governor’s website to make that contact. If you have already expressed your opinion by web site and telephone, thank you. You have done your job.

Duplicate requests by the same medium do not help our cause. Each of us can use each method once.

If you have called on the telephone, but not sent a request via the website, by all means use the website medium and vice-versa. Be sure that you have made contact by both mediums.

Michigan family members and friends of voting age, ham or non-ham can participate.

Our message is simple: “I respectfully encourage Governor Snyder to sign Senate Bill 493.” There is no need to add anything to the message as additional information gets in the way of what we want to get across at this point.

This message needs to be sent via email at:

https://somgovweb.state.mi.us/GovRelations/ShareOpinion.aspx

This web site will take you a form to be filled out. Easy to do and painless. No need to compose your comments. For the bill category, use "Other/Unknown" and simply insert the provided verbiage.

By telephone at 517-335-7858, simply tell the person answering the phone (or leave a message if calling after hours) “this is (your name) and I am a resident of (your city, town, village, or township) and I respectfully encourage Governor Snyder to sign Senate Bill 0493.”

After contacting the Governor's Office, please send a note to wa8qje@... and wb8r@... advising us that you made contact with them.

We are very hopeful that this will accomplish our goal and get our bill signed into law.

Thank you for your assistance and I look forward to giving you good news in the coming days.

73,

Larry, WB8R

From: Hank Greeb
Topic: 2802 Message: 2803

I not expert (an EXPERT is an EX=Has been, SPURT= Drip under pressure),
but often repeaters have a "short lived" CTSS tone for use by mobiles
who are transient. This is 100 Hz, which is supposed to be a
"universal" tone for emergency use, and to find out the "normal" CTSS tone.

Thus, I'd suggest you used 107.2 Hz for normal use.

If I have incorrect info, perhaps some "EXPERT" can correct me.

Craig,
Welcome to the area! There is a NEW HAMS dinner scheduled for February 7th at 4pm at Old Country Buffett on 28th St. in Wyoming MI. While this is to honor new hams and hams that have upgraded in 2014 in the West Michigan area it will be attended by many clubs from this area this year. If you are looking to meet hams in the area and socialize this could be a great event to join! I think welcoming new hams to the area is also a great use of this universal club dinner (sponsored by many West Michigan Clubs).

More details will be here soon, so keep an eye on the listserv!

2808. New HAMS Dinner

Yahoo group: GRARA
Date: 2015-01-15 15:49:04 UTC
From: Hank Greeb
Topic: 2808 Message: 2808

Another plug for:

New HAMS Dinner Saturday FEB 7th at 4pm

Location:
Old Country Buffett
1038 28TH STREET SW
WYOMING MI 49509
Rogers Plaza Mall

RSVP: Mike Wolthuis KB8ZGL@...

Actually, we usually have plenty room for anyone who walks in.

But the place is large enough for an overflow crowd! So, come one, come all!

New Hams have complimentary entrance, please identify yourselves at the door.

Others pay a "reasonable price" (~$9.00 including tax and tip)

There will be door prizes, and sometimes an extemporaneous prize or something similar. I haven't heard who will be bringing the doors for prizes, but, who knows? :)

2809. Mark your calendars and Assistance with advice for planning New Hams Dinner

Yahoo group: GRARA
Date: 2015-01-15 15:53:08 UTC
From: Michael Wolthuis
Topic: 2809 Message: 2809

MARK YOUR CALENDARS: February 7th, 4pm at the Old Country Buffet on 28th St. More formal details to follow on a flier, but wanted everyone to be able to mark their calendars early.

Good morning everyone,
As many of you know - Bobbie (KD8WZI) and myself (KB8ZGL) are working hard on final prep. For the New Hams Dinner 2015!

This year our goal is to promote not only recognition of New Hams, Upgraded license hams and hams that have moved into the area but it is also my personal goal after last year's event to use this event to promote West Michigan universal club events and improve inter-club communication.

This year we have HARC (Holland), MARA (Michigan), GRARA (Grand Rapids), Saranac all signed up to join us at this event! I also invited Ionia and in the future we will see what it grows into.

THE EVENT IS OPEN TO ALL HAMS, POTENTIAL HAMS and FAMILY MEMBERS. YOU DO NOT NEED TO BE A MEMBER OF A CLUB.

I have not planned a New Hams Dinner in the past. My ONLY experience is what I witnessed and what occurred last year. Bobbie (who is helping me from LARC) has also not planned or even attended a previous event (she is a NEW ham). Therefore, we would be willing to take any input on items such as:

1) What was done that worked well at previous events?
2) The original purpose of the event was to honor NEW HAMS, what were some ways that this worked well?
3) We have some door prizes planned, what has worked well to draw a good # of people?
4) Anything else you wish to advise us about changes you would like, what you liked / didn't like, etc.
I know that originally the New Hams Dinner was a joint event between MARA, GRARA and LARC (from what I have gathered in research). While we are expanding the groups included, we want to recognize each club present and represented.

1) What are some good ways to do this?
2) What has worked well in the past and may be considered "tradition" that we don't want to forget or make sure we include?

It is also my goal for next year to establish a planning committee with a representative from each club involved and get them on a listserv together so that this event can continue in popularity and growth while nurturing

all of West Michigan amateurs and the various clubs they represent.

Please direct all feedback to kb8zgl@... - Bobbie and I will compile it at our planning session.

The event is fast approaching, please MARK your calendars for this fun (new format) event! We will work on a formal flier / notice to go out in the next week.

Please feel free to open this up on your respective club's listservs. Bobbie and I will work hard to read and implement (as feasible) the suggestions made.

We are excited for a great time of social interaction among the amateurs of West Michigan!

Sincerely,
New Hams Dinner Committee 2015

2810. Re: [GRARA] New HAMS Dinner

Yahoo group: GRARA
Date: 2015-01-15 15:58:06 UTC
From: Michael Wolthuis
Topic: 2808 Message: 2810

One item of correction – this year the clubs will be supporting door prizes instead of paying “complimentary dinner” for new hams. This is to make sure we limit financial impact of the event with the potential of how many new hams could come.

If this deters anyone personally, please feel free to talk to me directly and I will make it right, but this year our goal is to have door prizes and thus a fixed financial commitment for each club involved. As this event expands it is difficult to track and handle paying for the new ham’s dinners directly. Hopefully this model will work well.

Thanks for the PLUG Hank!

Those that I have talked to are very excited about the event this year and its growing popularity.

I admit, it's been a while since I've been on 2 meters - it is pretty surprising how quiet it is around here.. I figured GR would have been a bit busier. It also looks like there are a ton of repeaters around - is the problem a diluted band (too many repeaters), or the area isnt as active as it once was? It seems even the link is quiet.
Who manages the link now that Ira is gone?

One of the founders and former trustee, Abe W8HVG, passed a few years ago.
The link and the Independent Repeater Association (IRA) are still very
much active.
The IRA sponsors Hamfestival first Saturday in June at the Hudsonville
Fairgrounds.
The callsign is now W8IRA, http://www.w8ira.org

On the subject of hamfests, West Michigan Youth Club is scheduled near
the end of March as I understand. GRARA in early September.

2818. CQ 160 Contest on NOW!

Yahoo group: GRARA
Date: 2015-01-24 01:06:19 UTC
From: Hank Greeb
Topic: 2818 Message: 2818

Anyone doing the CQ 160 tonight/tomorrow? I forgot it starts tonight,
and mods to my antenna for 160 will have to wait for daylight tomorrow. :(

But, typically by time the second evening's session starts, the "big
guys" have worked out all the "easy to moderately hard" stations, so a
Low power or QRP op stands a "fair" chance of being heard.

Here's the basic info:

The 2015 CQ World-Wide 160-Meter Contest
CW: 2200Z January 23, 2015 to 2200Z January 25, 2015
Details at http://www.cq160.com/

Try it, you may like it!

Topic: 2819 Message: 2819

I presume this is olde news to Dave, KF8QL, who is probably already at some high spot or moving between high spots with his mobile/portable multi-band VHF rig. But perhaps some others would be interested in looking over the bands for some VHF contacts.

Note that FM simplex contacts are permitted, but using the national calling frequencies are discouraged.

If you have trouble with thereading parts of this e-mail, the rules and other info are on the web at:
http://www.arrl.org/january-vhf

Good luck on your efforts. Please be sure to send a log to the organizers even if you only make one or two contacts.

About

*Objective: *For amateurs in the US and Canada (and their possessions) to work as many amateur stations in as many different 2 degrees x 1 degree Maidenhead grid squares as possible using authorized frequencies above 50 MHz. Stations outside the US & Canada (and their possessions) may only work stations in the US (and its posessions) and Canada. Stations in KH0-9, KL7 & KP1-KP5, CY9 and CY0 count as W/VE stations and can be worked by DX stations for contest credit.

Contest Details

*January VHF Rules (Download PDF
<http://www.arrl.org/files/file/Contest%20Rules%20PDFs/2015/ARRLJanuaryVHFRules20150109.pdf>)
**updated 01/09/2015*
1. *Objective:* To work as many amateur stations in as many different 2 degrees x 1 degree grid squares as possible using authorized frequencies above 50 MHz. Foreign stations work W/VE amateurs only.
*2. Date and Contest Period: *The date will be announced annually by the ARRL but will generally be the third or fourth weekend in January. Begins 1900 UTC Saturday, ends 0359 UTC Monday (January 24-26, 2015).
3. Entry Categories:
*3.1. **Single Operator* (spotting assistance is NOT permitted)
*3.1.1. *High Power (1500 W PEP ormaximum power allowed by your Amateur license, whichever is less)
*3.1.2. *Low Power (200 W PEP on 50/144 MHz; 100 W PEP on 222/432 MHz; 50 W PEP on 902 MHz and higher)
*3.1.3. *Portable (10 W PEP or less, portable power source, portable antennas,cannot set up at a permanent station location)
*3.1.4. *3-Band (6m, 2m & 432 MHz only; 100 W or less on 6m/2m, 50 W or less on 432 MHz.)
*3.1.5. *FM Only (6m-446 MHz, 100 W or less on all bands)
*3.2. **Single Operator Unlimited *(spotting assistance is permitted)
*3.2.1. *High Power (1500 W PEP ormaximum power allowed by your Amateur license, whichever is less)
*3.2.2. *Low Power (200 W PEP on 50/144 MHz; 100 W PEP on 222/432 MHz; 50 W PEP on 902 MHz and higher)
*3.2.3. *Portable (10 W PEP or less, portable power source, portable antennas,cannot set up at a permanent station location)
3.2.4. Spotting assistance is not permitted for Single Operator 3-Band or FM-Only. Operators using assistance in these sub-categories will be reclassified as Single Operator Unlimited Low Power.
3.3. *Rover*
3.3.1. *Rover *A rover is comprised of no more than two operators that moves among two or more grid squares during the course of a contest. An operator may perform any or all rover functions, but a driver's function shall be limited to driving the vehicle. Drivers may be switched out during the event. Any number of observers is also allowed, however observers may not perform any rover function at any time. Rover vehicles with only one occupant are allowed to perform all functions listed above.
3.3.1.1. A rover vehicle may transport only one station using a single call sign. An exception is provided for in "General Rules for All ARRL

Contests" number 3.5 (Family Rule).
3.3.1.2. Rover vehicles must transport all the equipment, power supplies, and antennas used at each operating site.
3.3.1.3. Rovers MUST sign "rover" on Phone and /R on CW and digital modes after their call sign.
3.3.1.4. All Rovers are encouraged to adopt operating practices that allow as many stations as possible to contact them.
3.3.1.5. Rover operators may submit separate logs for single operator (fixed station) in addition to their rover entries. Rovers submitting a score for inclusion in a club competition must also include a secondary summary sheet indicating the portion of the score that counts for the club score if any of the QSOs submitted take place outside of their club's territory.
3.3.1.6. Rovers are permitted to use APRS. Rovers using APRS transmit only their call sign and position. Any multi-op or single-op unlimited station may access rover APRS data directly or via the Internet.
3.3.1.7 Rovers are not permitted to use assistance. Any Rovers using assistance will be re-categorized as an Unlimited Rover.
3.3.1.8. A rover may not make more than 100 QSOs with any other one rover.
3.3.2. *Limited Rover* (1 or 2 operators, 6m - 432 MHz only; 200 W PEP or less on6m/2m, 100 W PEP or less on 222/432 MHz.)
3.3.2.1. Limited Rovers are not permited to use assistance. Any Limited Rovers using assistance will be re-categorized as an Unlimited Rover.
3.3.3. Unlimited Rover (all bands above 50 MHz, 1500 W PEP ormaximumpower allowed by your Amateur license, whichever is less, but may use more than two operators and are exempt from rules 3.3.1.2 and 3.3.1.8.)
3.3.3.1. Unlimited Rover scores may NOT be applied to a club score for Club Competition.
*3.4. Multioperator *(spotting assistance is permitted.)
*3.4.1. Multioperator *(1500 W PEP ormaximum power allowed by your Amateur license, whichever is less)
*3.4.2. Limited Multioperator *(Limited to any 4 bands above 50 MHz, 1500 W PEP ormaximum power allowed by your Amateur license, whichever is less)
4. Exchange:
4.1. Maidenhead grid-square locator (see www.arrl.org/grid-squares)
4.2. Exchange of signal report is optional.
5. Scoring
5.1. QSO points:
5.1.1. Count one point for each complete 50- or 144-MHz QSO.
5.1.2. Count two points for each 222- or 432-MHz QSO.
5.1.3. Count four points for each 902- or 1296-MHz QSO.
*5.1.4. *Count eight points for each 2.3 GHz (or higher) QSO.
5.2. Multiplier: The total number of different grid squares worked per band. Each gridsquare counts as one multiplier on each band it is worked.
5.3. Final score: Multiply the total number of QSO points from all bands operated by the total number of multipliers for final score.
5.4. Rovers only: The final score consists of the total number of QSO

points from all bands times the sum of unique multipliers (grid squares) worked per band (regardless of which grid square they were made in) plus one additional multiplier for every grid squarefrom which they successfully completed a contact.
5.4.1. Rovers are listed in the contest score listings under the Division from whichthe most QSOs were made.
6. Reporting:
*6.1. *Email electronic Cabrillo-formatted logs to *JanuaryVHF@...* <mailto:JanuaryVHF@...>; hand-written paper logs or diskettes should be mailed to ARRL January VHF Contest, 225 Main St, Newington, CT 06111.
6.2. Entries that have been electronically generated must submit their log file in the Cabrillo file format. Paper printouts of electronic files are not acceptable substitutes.Logs created with word processing or spreadsheet software are considered electronic logs and must be submitted in Cabrillo format.
*6.3.*Entries must be emailed or postmarked no later than *0359 UTC Wednesday, February 25, 2015.*
6.4. Entries may be submitted using the *web applet* <http://www.b4h.net/cabforms>.
6.5. Rovers who submit scores for the club competition must submit a second summary sheet indicating QSOs and score/ if they make any contacts from outside of the club territory./ Indicate clearly on the summary sheet and in log if the log is the total entry or that portion to be counted for the club score.
7. Miscellaneous:
7.1. Stations may be worked for credit only once per band from any given grid square,regardless of mode. This does not prohibit working a Rover station from more than one grid square with the same call sign.
7.2. All stations may have only one signal per band (6, 2, 220MHz, etc) at any given time regardless of mode.
7.3. Multioperator stations may not include QSOs with their own operators except onfrequencies higher than 2.3 GHz. Even then, a complete, different station (transmitter,receiver and antenna) must exist for each QSO made under these conditions.
*8. Awards: *Certificates will be awarded in the following categories:
8.1. Single Operator
8.1.1. Top Single Operator entrant in each ARRL/RAC Section for High and Low Power.
8.1.2. Top single operator on each band (50, 144, 222, 432, 902, 1296 and 2304-and-up categories) in each ARRL/RAC Section where significant effort orcompetition is evident. (Note: Since the highest score per band will be the award winner for that band, an entrant may win a certificate with additional single-bandendorsements.) For example, if KA1RWY has the highest single-operator all-band score in the CT Section and her 50- and 222-MHz scores are higher than any other CT single operator’s, she will earn a certificate for being the single-operator Section leader and endorsements for 50 and 222 MHz.
8.2. Top Single Operator, Portable entrant in each ARRL/RAC Section where significant effort or competition is evident. (Single operator

portable entries are not eligible for single-band awards.)
*8.3.*Top Single Operator, 3-Band entrant in each ARRL/RAC Section where significant effort or competition is evident.(Single Operator, 3-Band entries are not eligible forsingle-band awards.)
8.4. Top Single Operator, FM Only entrant in each ARRL/RAC Section where significant effort or competition is evident. (Single Operator, FM Only entries are not eligible forsingle-band awards.)
8.5. Top Single Operator Unlimited entrant in each ARRL/RAC Section for High and Low Power.
8.6. Top Single Operator Unlimited, Portable entrant in each ARRL/RAC Section where significant effort or competition is evident. (Single operator unlimited portable entries are not eligible for single-band awards.)
8.7. Top Rover, Limited Rover and Unlimited Rover entrant in each ARRL Division and Canada where significant effort or competition is evident. (Rover entries are not eligiblefor single-band awards.)
8.8. Top Multioperator score in each ARRL/RAC Section where significant effort orcompetition is evident. (Multioperator entries are not eligible for single-band awards.)
*8.9. *Top Limited Multioperator in each ARRL/RAC Section where significant effort or competition is evident. (Limited Multioperator entries are not eligible for single-bandawards.)
8.10. Top DX stations where significant effort or competition is evident.
9. Other:
9.1. See “*General Rules for All ARRL Contests* <http://www.arrl.org/general-rules-for-all-arrl-contests>” and “*General Rules for ARRL Contests on bands above 50 MHz (VHF)* <http://www.arrl.org/general-rules-for-arrl-contests-above-50-mhz>”

Subject: [GRARA] CQ 160 Contest on NOW!

Anyone doing the CQ 160 tonight/tomorrow? I forgot it starts tonight, and mods to my antenna for 160 will have to wait for daylight tomorrow. :(

But, typically by time the second evening's session starts, the "big guys" have worked out all the "easy to moderately hard" stations, so a Low power or QRP op stands a "fair" chance of being heard.

Here's the basic info:

The 2015 CQ World-Wide 160-Meter Contest
CW: 2200Z January 23, 2015 to 2200Z January 25, 2015
Details at http://www.cq160.com/

Try it, you may like it!

Big surprise and change in plans from my kidney specialist. Appointments are being made left and right for me to HOPEFULLY receive a new (well, slightly used, actually) kidney. Appointment #1, starting the whole circus, includes extensive blood tests and tissue typing, takes place Monday.

This throws just about every aspect of my life out of whack, including job search, driving, outdoor activities, etc.

I am thinking of getting the dstar board for my IC-2820h and was just checking. Where is WX8GRR repeater located. What band is it on and what coverage does it have.

I am looking at dstar so I can program my own radio.

My mototrbo rigs (XPR 4550 and 6550) need updating and I can not program the changes. I liked using statewide 2 and apparently that moved to talk group 52 or some such. My 6550 has never worked on the North America and World Wide channels. I have the programming cords for both rigs just not the Motorola software.

ARRL Bulletin 4
ARLB004

>From ARRL HeadquartersNewington CTJanuary 29, 2015 To all radio +amateurs

SB QST ARL ARLB004 ARLB004
FCC "Paperless" Amateur Radio License Policy Goes into Effect on February 17

Starting February 17, the FCC no longer will routinely issue paper license documents to Amateur Radio applicants and licensees. The Commission has maintained for some time now that the official Amateur Radio license authorization is the electronic record that exists in its Universal Licensing System (ULS), although the FCC has continued to print and mail hard copy licenses. In mid-December the FCC adopted final procedures to provide access to official electronic authorizations, as it had proposed in WT Docket 14-161 as part of its "process reform" initiatives.

Under the new procedures, licensees will access their current official authorization ("Active" status only) via the ULS License Manager. The FCC will continue to provide paper license documents to all licensees who notify the Commission that they prefer to receive one. Licensees also will be able to print out an official authorization - as well as an unofficial "reference copy" - from the ULS License Manager.

"We find this electronic process will improve efficiency by simplifying access to official authorizations in ULS, shortening the time period between grant of an application and access to the official authorization, and reducing regulatory costs," the FCC Wireless Telecommunications Bureau (WTB) said. According to the WTB, the new procedures will save at least $304,000 a year, including the cost of staff resources.

In comments filed November 5, the ARRL had strongly recommended that the FCC "give serious consideration to continuing a default provision for

sending an initial paper license document to new licensees in the Amateur Radio Service, along with detailed, simple instructions for how to make the elections set forth in the notice relative to future modified or renewed licenses."

The FCC said that applicants or licensees who include a valid e-mail address under "Applicant Information" in the ULS will receive an official electronic authorization via e-mail. New license applicants who do not provide a FCC Registration Number at the examination point will receive a printed license as well as an FRN and a temporary password to access the Commission Registration System (CORES).

The ARRL and other Amateur Radio commenters also worried that unless a license document is printed on distinctive paper stock, its authenticity could be questioned in such situations as obtaining vanity call sign license plates. To address this, the FCC said the watermark "Official Copy" will be printed on each page of an official authorization that a licensee prints out from the ULS. The WTB recently stopped using distinctive paper stock to produce hard copy licenses and has been printing these on "standard, white recycled paper." The Bureau noted that the distinctive paper stock it had used was six times more expensive than the plain recycled paper it now uses.

The ULS License Manager now includes settings that allow licensees to notify the WTB that they prefer to receive official authorizations on paper. Once the final procedures go into effect designating electronic access as the default, licensees can change the ULS License Manager setting so that the Bureau will print and mail a license document. Licensees also may contact FCC Support via the web at, http://esupport.fcc.gov/index.htm?job=contact_fcc_support , or via telephone or mail to request paper licenses.

The FCC rejected as "outside the scope of this proceeding" an ARRL argument that Section 97.23 of the Amateur Service rules be amended to replace "licensee mailing address" with other alternatives, including e-mail, for use in Commission correspondence. The rule, which requires that any licensee mailing address be in an area where the licensee has US Postal Service access, has precluded FCC issuance of location-specific call signs in such areas as Navassa Island (KP1) and some Pacific islands.

I was using SW2 until it changed and now I cant access it on my trbo rigs. Let me know when and where we can get together so you can fix 'em up for me. I have programming cords for both the 4550 mobile and the 6550 (the cord also is for the 7550).

Also I now have the D-Star board in my IC-2820H (on the base) and have spent the last several hours knocking my head against setting it up to work with WX8GRR but so far no work. I have watched all kinds of youtube vids telling how to program it.

A reminder that the 2015 Vermont QSO Party is next weekend, starting at 0000 Feb 7.
Details can be found at:
http://www.ranv.org/vtqso.html

We have been working hard to round up more VT stations for you to work!

The rules are pretty much the same. Some minor changes:
1. the power multiplier is 1 for over 100w, 1.5 for 10-100w and 2 for under 10w. Please make sure your Cabrillo file clearly shows this.
2. There is no separate category for VT mobiles, although stations can certainly operate mobile
3. If you mail an entry, we must have it within 2 weeks. Otherwise the log deadline is 1 month if you submit electronically.

Participants are reminded to copy the entire exchange - signal report and QTH. In the past some participants looked up the station's QTH on-line with their logging software. That will make you a check log.

Once again will be offer VT Maple Syrup to the 3 highest outside Vermont entires. Fire up your stations and work hard for this sweet prize!

I'll be on from the host station W1NVT. See you next week!

Mitch

From: Hank Greeb
Topic: 2837 Message: 2837

International Pi day (3.14159.......) (and Albert Einstein's Birthday)
is coming on 03.14.15 (14 March 15)

As I announced earlier, John, KC8ULE, and the Lake Effect ARC (Michigan)
is sponsoring a PI-Day on the air celebration. If you wish to join the
effort, please contact John at kc8ule@... <mailto:kc8ule@...>

Help is cordially invited, any time, any band, any mode for as long as
you care to operate.
A preliminary web site for this event is at
http://qsl.net/kd8dku/2015_Pi_Day_Band-Ops.htm

Note: W8P and N8P have been reserved for this celebration. Quite a few
other W*P, K*P, N*P are still available. Contact ARRL VEC via the

1x1callsigns.org web site at http://www.1x1callsigns.org/

As a courtesy, please advise kc8ule@... of your intended operating
plan.

Note, you MAY use your own call if you wish - it is Not mandatory to
have a special event call, but these may attract more attention.

The more, the merrier!

*PLUS: *For all the Mathematical Geeks and would be Geeks, there are at
least two places which are selling PI day t-shirts and other paraphernalia

For those who've been asking, here's my present kidney status:

After dealing with multiple phone messages of "set up appointments now, now, now, now, now", I've discovered what's really happening, and the pushing seems to be false advertising more than anything else.

It actually takes a series of appointments/interrogations over many, many months before any decisions are made. I have no relatives qualified or willing to donate, so there's no shortcut to take. The nurse presenting the transplant program hemmed and hawed when I asked for specific statistics until I finally forced her into an answer: 25% after seven years.

Friday I go in to be "edumacated" about dialysis; apparently it's one heck of an owner's manual. I get the port put in my arm the 23rd, and it'll be several months before it heals, which explains why it's being taken care of WAY ahead of time

Monday night I found out that our Legion post's Cubmaster's dad had one, and it was a miserable existence for him. She was in tears telling me about it.

So, I guess the plan is to watch the diet, cut out the salt (nearly impossible the way food is made nowadays, try to find a low-impact job, and not worry about going under the knife for a long time.

2839. Service opportunity THIS Saturday

Yahoo group: GRARA
Date: 2015-02-04 07:55:57 UTC
From: UncleFester@...
Topic: 2839 Message: 2839

Melissa Wright, Cubmaster for Cub Pack 3281, is organizing/running the big Cub Extravaganza THIS Saturday at HAGAR PARK in Jenison, Cubs in 5 big groups go from activity station to activity station in two sessions, AM & PM. In between sessions are two sled dog demonstrations.

She planned all this solo (amazing), but she didn't take into account communications. When I talked to her, she said she needed one person to shadow each group, and one person to shadow her. I landed that assignment and am already being called "Pink Shadow." (she has pink dye in her hair; if I did that, I'd look like a giant Froot Loop)

Anyone interested? I guess we can use the Hudsonville repeater. There is >NO< child management involved, you just shadow the group guide(s). There's food, and a few activities involve mass quantities of fire. Five, Six, Seven people? I won't turn down extra people, since I have poor thermal regulation and my body temp wanders.

I'll try to make it to Wednesday as well as the Friday meeting.

2840. Reminder New Hams Dinner this Saturday - 2/7/15 at 4pm

Yahoo group: GRARA
Date: 2015-02-05 16:18:43 UTC
From: Michael Wolthuis
Topic: 2840 Message: 2840

This is a friendly reminder that the Greater Grand Rapids Area New Hams Dinner is scheduled for this Saturday 2/7/15 at 4pm at the Old Country Buffett located on 28th St. in Wyoming, MI.

https://www.google.com/maps/place/Old+Country+Buffet/@42.912208,-85.691401,15z/data=!4m2!3m1!1s0x0:0x5d8cbe10c84a005b

The cost of dinner is $13 per person and includes a $0.50 group gratuity charge.

This year's event has been sponsored by the following clubs:
Grand Rapids Amateur Radio Association – W8DC
Holland Amateur Radio Club – K8DAA
Independent Repeater Association – W8IRA
Lowell Amateur Radio Club – W8LRC
Michigan Amateur Radio Alliance – W8USA
Riverside Radio Amateurs of Ionia County – WA8RRA

All New Hams and Upgraded Hams (during 2014 and the first part of 2015) are eligible for one of several door prizes. The door prizes include Hamfest tickets, MFJ equipment, multi-meters and flashlights and MORE! Also each New Ham and Upgraded Ham will receive a special gift for attending.

The goal of this year's New Hams Dinner is to connect New Hams with clubs in the Greater Grand Rapids Area and honor them for joining this exciting hobby we all love while promoting growth between clubs in the Greater Grand Rapids Area.

All Grand Rapids area and beyond hams are welcome to join! You do NOT need to be a member of one of the above clubs to come hang out and get to know people in this wonderful hobby.

On behalf of this year's co-chair Bobbie Miller KD8WZI and myself Mike Wolthuis KB8ZGL – we look forward to seeing you Saturday!

If you have any questions, do not hesitate to email them to kb8zgl@...

Yahoo group: GRARA
Date: 2015-02-09 14:31:22 UTC
From: Hank Greeb
Topic: 2847 Message: 2847

I've stumbled across a quite interesting operating event for GRARA's W8DC club station.

It is the ARRL's School Club Roundup? It finally dawned on me that club stations are encouraged to operate in this event. There IS a CLUB category for clubs like us! It's a low key event, designed to get folks in schools (and clubs) in touch with each other.

Details are at http://www.arrl.org/school-club-roundup

It's going on right now,
Monday through Friday from 1300 UTC Monday (February 9 through 2359 UTC Friday (February 13).
May operate 6 hours of a 24 hour day, and a total of 24 hours during the week.

This would be a great event for the open radio room on Wednesday evening, doing something other than just jaw-boning locally!

I have another committment on Wednesday evening, but I encourage the participants at the open radio room to fire up the rig and contact other clubs and school clubs!

2849. Equipment for sale

Yahoo group: GRARA
Date: 2015-02-12 02:38:39 UTC
From: Tom
Topic: 2849 Message: 2849

Hello, everyone.

I have the following pieces of equipment for sale. I am selling this gear in order to acquire the funds to help with the purchase of a high-power auto-tuner, and an Amaritron ALS600 solid-state amplifier as an upgrade to my current home station. If interested, please e-mail me at:

Tombehler@... <mailto:Tombehler@...>

In addition, feel free to pass this info along to anyone else who you feel might be interested.

***Ten-tec Scout 555 HF Transceiver, including all 9 Band Modules, Ten-tec 607 Paddle/Keyer & Ten-tec 937 Power Supply. Included are all Manuals and documentation, Power Cords, and Ten-tec Mic. All equipment is in excellent condition, and comes from a smoke-free environment. This is a complete station that was previously owned by our silent key friend, Bill Eckels (W8ZNH). Am asking $600, or best offer. Local pickup can be arranged in order to avoid shipping costs.

***Ameritron AL811H Amplifier in good working condition. The amplifier has a matched quad of 572B tubes. An extra set of four (4) 811A tubes will also be included. The amp has been very successfully used on 20 and 40 meters, and tunes on other HF bands, from 80 through 10 meters. Manuals and other documentation will be provided. The amplifier has been in a smoke-free environment. Asking $600, or best offer. Local pickup can be arranged in order to avoid shipping costs.

Ten-tec 238A Manual Tuner in good condition. The tuner handles up to 2000 watts, and functions quite well on all HF bands, despite a slightly-noisy roller inductor). Manuals and other documentation will be included. The tuner has been used in a smoke-free environment. Asking $200, or best offer. Local pickup can be arranged to avoid shipping costs.

2015 MiQP Publicity

*Announcing the 2015 **Michigan QSO Party***

Just Have Some Fun!!!!!

*
*

?*Chance to get on the air*

o*Single Op, Multi Op, Mobile, EOC*

o*Be the station others want to work*

o*Maybe activate a rare county?*

**

?*Excellent Club Activity*

o*Reason to get together as group*

o*New ?EOC? station category*

o*Excellent Training opportunity!*

o*Get new members on the air!*

o*Friendly Competition*

Let?s all help make Michigan ?radio-active? on the 18^th of April!!!!

The 2015 Michigan QSO Party, sponsored by the Mad River Radio Club, is
from 1600Z April 18 until 0400Z April 19.

Stations may operate the full 12 hours. Phone and CW on 80/40/20/15/10 meters.Single-op, multi-op, and mobile categories.Work stations once per band and mode.MI-to-MI QSOs allowed. Work portables and mobiles again as they change county, state or province.Exchange QSO number and location (county for MI stations, state/province or "DX" for others).

Suggested frequencies: CW-3545, 7045, 14045, 21045, 28045; Phone-3825, 7200, 14250, 21300, 28450.One point per phone QSO, two points per CW QSO.Count multipliers once per mode.

Multipliers are MI counties for all entries, plus states, provinces and "DX" for MI entries only.Final score is total QSO points times total multipliers.

Submit logs no later than 30 days after the contest.Electronic logs in Cabrillo format are submitted via the Log Submittal page on the MiQP web site http://www.miqp.org/submitLogFileMiQP.html.Mail paper logs with summary sheets to: Mad River Radio Club, c/o Dave Pruett, 2727 Harris Road, Ypsilanti, MI 48198.

For full rules, along with free logging software, log and summary sheets, see http://www.miqp.org.

First Ever "Michigan Cabinet Counties" award to be available during the 2015 MiQP

Add a little more fun to your MiQP action!

The first ever *_Michigan Cabinet Counties Award_* will be available during the 2015 Michigan QSO Party (April 18, 2015). Work one or more of the 10 Cabinet Counties during the hours of the MiQP and you qualify for the award.

Michigan Cabinet Counties? Perhaps a little bit of history is in order - In an attempt to influence then-president Andrew Jackson in favor of creating a new State of Michigan (and awarding it the land being disputed in what was known as the "Toledo War") the Michigan Territorial legislature named 10 of its new counties after President Jackson and members of his cabinet. Jackson eventually did sign legislation making Michigan the 26^th state in 1837 but gave the land to Ohio instead while Michigan got the Upper Peninsula.

A list of the 10 Cabinet Counties and rules for the Michigan Cabinet Counties Award can be found at:

http://www.qsl.net/w8jrk/

The Michigan Cabinet Counties award is administered independently of MiQP by Joe, W8JRK and a group out of the Lansing

area, but with the cooperation of the MiQP Organizing Committee.

Well this certainly makes it easier to get to (and from)

From Grand Rapids:
US-131 south to I-94 eastbound
Exit 80 Sprinkle Road
turn right (south) to Vanrick Dr.
You are there...

Going back to GR go back to Sprinkle Rd, turn left, stay in the right hand lane, pass under the I-94 overpass and get on I-94 west to US-131 northbound. Easy Squeezy... It is expressway all the way to within 1/2 mile or less of the hamfest site.

2859. Hell for sale

Yahoo group: GRARA
Date: 2015-02-27 18:42:12 UTC
From: Jack Amelar
Topic: 2859 Message: 2859

For those into Hellscriber, and people like Hank N8XX and Cortland KA5S and others who have been to Hell and back when Hell froze over.

73 Jack NY8D

PUTNAM TOWNSHIP, Mich. -- An artist and leader of a group that produces an art show around Halloween each year in Detroit wants to take his Damned ideas to Hell.

The organization known as Damned has launched an online Kickstarter campaign in the hopes of raising enough money to purchase John Colone's holdings in the Putnam Township hamlet of Hell.

Colone's businesses in Hell include Screams Ice Cream and Diner, a wedding chapel, a souvenir shop and a miniature golf course. The unofficial mayor of Hell announced this month -- on Friday the 13th -- that he was putting all of it, including the rights to merchandise and Hell-themed slogans, up for sale for the devilish price of $999,666.

Anthony DVS, as he is known, is the leader of Damned, which hopes to raise $1,333,666 to purchase Hell and build a performance art center where events could be held year-round.

"Our idea is ... to build an enclosed, temperature-controlled structure that will allow for more elaborate event productions in Hell," he said in an e-mail to the Daily Press & Argus. "This would allow us to expand our productions to include an annual festival with performance, music and art. It will also allow for other productions to consider Hell for their events, such as small concerts, theater productions, wedding receptions, corporate parties and the like."

As of Tuesday evening, the Kickstarter campaign had pledges totaling $47,102 from 11 backers. It needs to raise the full amount by March 22.
For the past eight years around Halloween, Anthony DVS' group has

organized the annual Damned Exhibition, which he said allows artists to "share a glimpse within their diverse shadows of id and ego." Damned produces a number of other events each year as well, including its Purgatory Film Exhibition coming March 13-14 to Detroit's Tangent Gallery.

Anthony DVS said he has not been in contact with Colone, but he is familiar with Hell.

"I have visited since I was a small child and still have a photo of 5-year-old me poking my head through a devil cutout," he said.

If the Kickstarter campaign falls short of its goal, Anthony DVS said the group will continue to do what it's done for the past eight years in Detroit, where it had been seeking an abandoned church to build a large art space for its events.

Wow. Whatta pile of garbage. It's obvious that Verizon doesn't know anything about morse code. IT is NOT a print mode, it's an audio mode. At least it has been an audio mode since a few years after Samuel F. B. Morse invented it. For the first few years operators would read an inked tape with the dots and dashes printed thereupon, but soon learned that audio transcription was possible so inked tape became pass?.

Besides, the "print edition" of their attempt to be cute or whatever is in incorrect code. It is in International Morse Code, and the landline code use by the railroads and Western Union was called the American Morse Code, with quite a few different characters that the International Morse code.

I give Verizon an "F" in their attempt to be "cute." It's obvious that it was NOT proofed by anyone cognizant of the code used in the 1800's through mid to late 1900's for wired telegraphy. As for the legal "merit" of their complaint, I'll let the lawyers and judiciary decide.

Thanks, Jack. I think I'll pass on donating to the Kickstarter campaign to purchase Hell. I don't think the place is worth even 1/1,000,000th of the asking price. :)

And, you've been in Sunny Floridiidia too long - Our high honcho in chief, namely President Tom, N8DGD, told me last night that the digital rig with the Kenwood TS-2000 works *Hell*schreiber quite well, He attempted to make contact on 14 MHz Wednesday evening. He chose a frequency a bit off the recommended calling frequency for Feld Hell, so didn't make any contacts, but we seem to have another *sucker.... errrr....* aficionado of *Hell*schreiber amongst us. :) It's not ONLY Cortlandand me who have gone nuts over *Hell*schreiber :)

Are you coming back soon? We miss you at the Friday noon luncheons at the 44th Street diner.

You shit head. Verizon knows less than 1% of the audio can copy CW and fewer than that understand the difference between American Morse and international morse. That wasn't the point. You deliberately refuse to acknowledge their point because it conflicts with your hard leftist ideology. Verizon had heretofore been a very liberal organization therefore you and your liberal buddies have to destroy them for leaving the fold.

Now why is your shit still coming in after I turned off the group? Get outta my email. You take too much energy and give nothing in return.

P.S. I dint say you were my opponent, I said I was yours. Another DELIBERATE twist of words

I'm at a loss as to why you think I'm an opponent. I've invited you to join GRARA's Field Day effort and other on air-activities. I believe that GRARA will activate W8DC for the

Michigan QSO party on April 18. You're more than welcome to participate, either from W8DC, or set up at home or a portable location and operate by yourself.

Ask the membership chair about the ratio of ARRL members to Non ARRL members. The last data are 80 members 75 ARRL members. I question that, because we have quite a few brand new members who get a free year membership after they successfully pass a test. Please don't argue with me about the fact that I question these data. I'm "reasonably certain" that many ARRL members (perhaps a majority) do NOT receive ARRL Bulletins directly from the league, even though, as you point out, all it takes is access to the ARRL web site a few clicks of the mouse to get signed up.

I said that some people will NOT enter into a discussion or argument with you. I believe that you have considerable technical knowledge about engineering and computers. I think you're a person, and as a person you're allowed your opinions. Scum bags? Where did I ever say that you were a scum bag?

Your numbered points:
1. I listen to what people say. I don't consider you an opponent. I consider you a colleague within the ham radio community.
2. My comments about "scum bags" etc., are included in a paragraph above.
3. Again, I don't consider you an opponent. I see some differences of opinion, but if we all agreed life would be very boring. I don't "attack" you. I try to use reason.
4. I don't consider myself superior to others. I like parts of ham radio, such as CW, low power operating, and for many years, formal traffic handling, which are different from majority interests, but its a personal preference.
5. Again, who is the "opponent?"
6. I have no personal connection, nor have ever met anyone on the list you provide.
7. Filibuster? Really?
8. I've said that politics, left or right leaning, isn't germane to a ham radio forum like GRARA's yahoo group. Anything related to ham radio is fine.

On 3/4/2015 12:16 PM, Steven Kaney wrote:

There you go putting words in my mouth in order to open up new lines of attack. I did NOT say that the better info you send isn't useful to ANYONE. I said it wasn't useful to me however that is an interesting argument. Its essentially the same one Satan used with Eve. And no, I don't want to be the guy that sends bulletins out. I should think that most club members are ARRL members and any ARRL member can click the boxes in their member profile to get any bulletins that float their boat.

And there is the argument that I am a scum bag, my parents are scum bags, I come from a long line of scum bags, my friends (assuming I have any) are scum bags, and NOBODY likes me. You argue this the same way pretty much all liberals argue. I am familiar with most of your tricks including but not limited to:

1) NEVER EVER acknowledge any point made by your opponent

2) Slander your opponent and assert that NOBODY likes them. They are scum bags, their parents are scum bags, ALL their relatives are scum bags, and their friends if they have any are scum bags

3) Be agile and open as many lines of attack as possible. Attack from every direction simultaneously so as to overwhelm the opponent

4) Behave so as to imply that their points are so mind numbingly stupid that your superior intellect can't even comprehend such a thing. Rolling your eyes is good.

5) Never stop arguing, spitting, and kicking until long after your opponent has ceased to show any sign of life

6) Assert that you are personal friends with Senator Levin, Nancy Pelosi, Obama, Lee Deforest, Einstein, God, etc and you have discussed this at length with them therefore you have info that others don't have. This is a good one, you should use it more often. Its a real conversation stopper.

7) Fillibuster and don't give them a chance to respond until they get tired and go home

8) If you're not winning, say that this isn't the forum for this discussion (it is fine until it appears you might be loosing the issue or you run out of ideas).

Did I miss any? Give me a hint and I'm sure I'll remember it.

de N7MUT/8

On Monday, March 2, 2015 11:42 PM, Hank Greeb wrote:

There are several folks amongst the membership and the leadership who
don't bother trying to reason with you.

You are one of a (probable) minority who get ARRL bulletins, etc.,
direct from ARRL. If you'd like to be an "unofficial bulletin station"
and put the ARRL Bulletins, etc., on the GRARA reflector, that would be
great! You'd really not need to be appointed, just do it. You'd be
surprised how many hams do NOT get these bulletins otherwise. If I see
that someone else has put an ARRL bulletin, I don't bother doing it.

The "station organizers" are in charge of their setups - so I don't
meddle in their affairs. It amazes me what the other stations put up
for antennae, and how they staff the operators. And, getting things
organized is like herding cats - Field Day just "seems to happen."
You're welcome to join the effort.

As far as accepting criticism, I always listen. I do not take kindly to
negative "harping" about obvious deficiencies. Yes, other groups take
Field Day much more seriously. If you want to be with a "top 10% club"
for Field Day, GRARA's effort is not for you. I haven't studied
standings in Michigan enough to know which groups are in the top 10%,
but I do know that if GRARA shows in the top 50% it is a good year.

To be removed from the list is best done by the individua operator.
Log into yahoo, then go to the groups.yahoo.com/group/grara and change
membership. Asking in a message to be removed "should" work, but isn't
guaranteed.

Politics, left or right leaning, has no place in a ham radio reflector.
I think I've said that before.

2866. International Pi Day and Einstein's Birthday Celebration - 3.14.15

Yahoo group: GRARA
Date: 2015-03-05 22:33:05 UTC
From: Hank Greeb
Topic: 2860 Message: 2866

It's that time of the year again. It's International (and Irrational) Pi Day on 3.14.15. (PI is the Circumference of a circle divided by the diameter). Dr. Albert Einstein was born on March 14, 1897, so this is a cause for double celebration.

For several years John Forslin, KC8ULE, and the Lake Effect Amateur Radio Club from Marquette, Michigan has been celebrating this day. He asked me to join the effort this year, and also asked the Dial Radio Club, K8PI, to join!

John will be operating as N8P, I'll be using W8P, and the Dial Radio Club will be using their W8PI call. See the qrz.com pages:

http://www.qrz.com/db/N8P
http://www.qrz.com/db/W8P
http://www.qrz.com/db/K8PI <http://www.qrz.com/db/K8PI>

for proposed schedules of operation.

See http://www.qsl.net/kd8dku for general information about the International (and Irrational) Pi Day, and a short bio of Albert Einstein.

In addition to the published schedules, I'll show up on 145.27, 147.16, and 147.26 MHz FM repeaters from time to time for local contacts. Let's have a fun, and very irrational time, on Saturday, March 14!

72/73 de n8xx Hg
Operating as W8P on 3.14.15, including 9:26:53 (A.M. and P.M. local and UTC)

2867. ARRL DX SSB Contest this weekend

Yahoo group: GRARA
Date: 2015-03-06 14:32:05 UTC
From: Hank Greeb
Topic: 2867 Message: 2867

Forwarded from the ARRL Letter dated March 5, 2015

In Brief...

A Reminder: The ARRL International DX Phone Contest is March 7-8! The SSB weekend of the ARRL International DX Contest is Saturday and Sunday, March 7-8 (UTC), and the DX will be looking for stations in the US and Canada. W/VE amateurs work as many DX stations in as many DXCC entities as possible on the 160, 80, 40, 20, 15, and 10 meter bands. Participating DX stations work as many stations as possible in the 48 contiguous US states and Canadian provinces. US and Canadian stations send a signal report and their state or province abbreviation. DX stations send a signal report and their output power. The contest gets under way March 7 at 0000 UTC (Friday, March 6, in US time zones) and continues until March 8 at 2359 UTC. Complete rules and forms are on the ARRL website.

Note:
W8DC has participated in these in past years. It coincides with our March meeting. I suggest that interested ops stick around the shack after the meeting and make a few contacts. 20 meters SHOULD be open (but not guaranteed)! If operation is desired on Saturday and Sunday, arrangements to open the radio room must be made.

Good Luck!

2868. ARROW Dayton Bus Trip

Yahoo group: GRARA
Date: 2015-03-07 01:31:05 UTC
From: John Wasciuk
Topic: 2868 Message: 2868

Dear Fellow Radio Amateur,

Once again, it is that time of year when lots of hams around the world start thinking of the Dayton Hamvention. After all, with 25,000 attendees from all amateur radio interest areas, What’s not to like!

Don’t you wish you were going? You’re not looking forward to that long drive? Don’t drive! Take the Arrow bus! It’s inexpensive and easy. I'm attaching the Arrow bus brochure.
http://www.w8pgw.org/activities/dayton-bus-trip/

As in years past, The Arrow Communication Association is sponsoring a bus trip from Ann Arbor to Hara Arena and back. The date is Saturday, May 16, 2015. We leave the park-and-ride east of Pioneer High School at 4:30 am and get to the show at 8:00 am. We come back comfortably at 5:30 pm. A continental breakfast is included on board. What more could you ask for?

There is more. If you want to sell your stuff in the flea market, we have reserved a space there just for you! Every year, Arrow reserves a swap spot just for the bus trip crowd. You save $70.00.

The cost is $65.00 for the round trip. Please mail all applications to ARROW Communication Association, 3322 Yellowstone Drive, Ann Arbor, MI 48105. Please note that this does not include the Hamvention admission ticket. That one you’ll have to do yourself!

We at Arrow think that this is the ultimate way to breeze down to the convention and we know you'll love to come with us.

73,

John Wasciuk
WA8TON / VO1TON
Activities Coordinator,
ARROW Communication Association

Toledo Radio/Computer/Electronics Hamfest

March 15th 8:00 am - 2:00 pm

Same Location as 2010-2014

* Owens Community College – Student Health and Activity Center 30335 Oregon Road Perrysburg, OH 43551 GPS N 41° 35.575’ W 83° 32.051’*

Talk-in: 147.27+ & 442.850+ (W8HHF - 103.5PL)

This Huge Hamfest is Indoors and Security is Provided! On Campus Parking is Free and Close to the Hamfest!
Tables are $20.00 (floor) $25.00 (wall) All tickets are $7.00

*INFORMATION ON FORUMS, VE (Ham Radio Licensing) TESTING AND TABLE APPLICATION FORMS WILL BE ON OUR WEBSITE -**www.tmrahamradio.org* <http://www.tmrahamradio.org/>

PRIZE DRAWINGS

Three, $100.00 cash prizes - drawn at 9:00am, 10:00am, 11:00am (*Must* be present to win)

One, $250.00 cash prize - drawn at 12:00pm Noon (*Must* be present to win)

One, $500.00 cash prize - drawn at 2:00pm (Need *Not* be present to win)

DRIVING DIRECTIONS TO TMRA 2015 HAMFEST:
Owens Community College – Student Health and Activity Center
30335 Oregon Road., Perrysburg, OH 43551

From Southbound I-75: Take I-75 South to Exit 198-Wales Road. Travel east on Wales Road and turn right onto Oregon Road (first intersection). After crossing the railroad overpass, turn left at the stoplight (before the arch walkway) onto Biniker Rd. You'll shortly enter a roundabout. Take the roundabout 3/4 of the way around (in effect turning left off Biniker) to Championship Dr. W. On your right you will pass several buildings, continue past these then turn right when you come to the large parking lot. Follow this down, the last building on your right will be the Student Health and Activity Center (SHAC), which is the location of the TMRA Hamfest.

From Northbound I-75: Take I-75 North to Exit 198-Wales Road. Travel east on Wales Road and turn right onto Oregon Road (first intersection). After crossing the railroad overpass, turn left at the stoplight (before the arch walkway) onto Biniker Rd. You'll shortly

enter a roundabout. Take the roundabout 3/4 of the way around (in effect turning left off Biniker) to Championship Dr. W. On your right you will pass several buildings, continue past these then turn right when you come to the large parking lot. Follow this down, the last building on your right will be the Student Health and Activity Center (SHAC), which is the location of the TMRA Hamfest.

From the Ohio Turnpike: Take the Ohio Turnpike to Exit 64, where it intersects with Interstate 75. Exit the turnpike heading north on I-75. Then follow the northbound I-75 directions above.

I have a serious problem with October 3. I had been communicating with the forks in Petoskey, the Straits Area Amateur Radio Club, if they were planning to hold their hamfest on "the first Saturday in October" this year and I got a reply they were. I replied back we would avoid the date. For readers of this list wondering why this came up, SAARC has had their hamfest on the 3rd Saturday in the past, but missed in 2014. Which is why I contacted them about this year. Sure, they would have minimal effect on our hamfest, but it's a matter of professional courtesy.

We would be far better off sticking with September 12 IMO.

2875. International Pi Day and Einstein's Birthday Celebration - 3.14.15

Yahoo group: GRARA
Date: 2015-03-10 13:42:48 UTC
From: Hank Greeb
Topic: 2860 Message: 2875

Latest information on the International (and Irrational) Pi Day
celebration for this coming Saturday, 3.14.15.

KC8ULE will be operating as N8P, I'll be using W8P, and the Dial Radio
Club will be using their W8PI call.
Latest schedule info on the qrz.com pages:

http://www.qrz.com/db/N8P
http://www.qrz.com/db/W8P
http://www.qrz.com/db/K8PI <http://www.qrz.com/db/K8PI>

See http://www.qsl.net/kd8dku for general information about the
International (and Irrational) Pi Day, and a short bio of Albert Einstein.

In addition to the published schedules, I'll show up on 145.27, 147.16,
and 147.26 MHz FM repeaters from time to time for local contacts. Let's
have a fun, and very irrational time, on Saturday, March 14!

72/73 de n8xx Hg
Operating as W8P on 3.14.15, including 9:26:53 (A.M. and P.M. local and UTC)

2876. USB to COM Port schematic?

Yahoo group: GRARA
Date: 2015-03-11 00:18:58 UTC
From: Hank Greeb
Topic: 2876 Message: 2876

I know there are several computer experts within the ranks of GRARA, so I figure I'd ask the question here:

I have built a computer to rig isolation box, for operating "Non CW Digital Modes.It uses rectified audio to turn the rig on an off. Or, as an option, it uses the VOX circuit in the rig.This works fine for most instance when I'm using PSK-31, RTTY, Feld Hell, etc. But, I'd also like to be able to key the rig with a serial port.

Problem is that my computer has no serial ports. Yes, I know, I know I can buy a USB to serial port adapter. I have two which work with my older XP computer, but none for my newer computer which uses Windows 8.1.I figure that, since these can be purchased for as little as $10 or so on the open market, they must be relatively easy to build.And, many new boxes one buys these days have USB connectivity rather than needing a com port.So, before I buy two USB to COM port adapters, I'd like to determine how easy it would be to put a "small board" inside the isolation box so I could use a USB instead of a COM port for keying CW or turning on/off my rig for the non-CW digital modes.

I don't recall seeing the circuit diagram for doing this in the literature I read, nor the software needed for Windows (or Linux, etc.) to recognize the serial port so generated.I suspect the circuitry may be in computer literature, which is unfamiliar to me.

What am I missing?Where should I look?Would someone please tell me where to go (to find how to do this with easily available parts)?

Thanks in advance.

I don't recall seeing a design for a roll-your-own USB to serial converter (although it must be out there). I have 2 purchased converters on my computer now, for those same 2 functions, and would like to add a 3rd port to do CW keying.

From: Hank Greeb
Topic: 2876 Message: 2878

Thanks, John:

I should have done an internet search for USB to COM Port schematic.
The chip or chips inside these converters, which typically fit inside
something which look like a standard RS-232 serial port plug, these
devices have considerable hardware and software inside them, in one or
two very small chips.

I see the "next generation" which are compatible with Windows 7 and 8.1
for $15 on the internet, so I'll purchase one of them instead of trying
to cobble together something which is already elegantly and
inexpensively done.

The olde adage, "Engage Brain before opening mouth" can be segued to "Do
and Internet Search before asking a (stupid) question." Mea culpa."

Fortunately, there's considerable room inside the interface box for a
RS-232 socket, and I know how to build the RS-232 to keying circuit with
an opto-isolator for RF isolation.

Hank,

I know you found a solution. Anyway, you didn't specify if you have a PC or Laptop. For PCs, you can add a serial port (or multiple serial ports) card in an open slot.

FWIW, I am using an HP PC Win 8.1. I wanted a printer parallel port for an HP LaserJet 6L printer. Still a fine printer, but PCs and Laptops these days don't come with parallel ports. With a Rosewell RC-302E Parallel PCI Express card installed, the printer works fine. I know Serial PCI Express cards are available.

Welcome Marcelo! Don't be a "new guy" for long! Be sure to drap in for a Wednesday evening "open radio room" at W8DC (1050 Fuller NE, Grand Rapids, just south of Leonard) People start arriving typically a few minutes before 7 p.m., and stay until ???

Also, meeting times are at 7 p.m. First Friday of each month - most months.

Anyone interested in helping out at Detroit Maker Faire? https://groups.yahoo.com/neo/groups/westmhm/conversations/topics/143;_ylc=X3oDMTJxYnQ4NmFpBF9TAzk3MzU5NzE1BGdycElkAzgyNzA2MzI0BGdycHNwSWQDMTcwNTA2MzEwOARtc2dJZAMxNDMEc2VjA2Rtc2cEc2xrA3Ztc2cEc3RpbWUDMTQyNjc1MjA1NQ--

Wed Mar 18, 2015 7:52 am (PDT) . Posted by: "James French" w8iss mailto:w8iss1@gmail.com?subject=Re%3A%20Anyone%20interested%20in%20helping%20out%20at%20Detroit%20Maker%20Faire%3F

Sending this out very early to give everyone a heads up.

I am starting to work on the planning stages for this years Detroit
Maker Faire amateur radio exhibit. This will be the sixth year for
the faire and the sixth year for the exhibit at the Henry Ford museum
in Dearborn.

If anyone would be interested in attending and helping out showing
off something that they are doing to the attendees or just simply
coming out to make contacts, let me know. Dates are July 25 & 26,
2015.

We have had 2 hf stations (cw and voice/digital), a portable hf station,
satellite station, and a VHF station each year. Last year the Livonia
club brought out their balloon package that was sent soaring a few
weeks before.

Please use the following email to contact me:
jcfrench@hawkmail.hfcc.edu mailto:jcfrench@hawkmail.hfcc.edu
The above email address gets very few emails(my college email) and
will be easier for me to keep track of things this year.

The main fringe benefit you'll get with helping out is free admission to the
Henry Ford Museum. If you can arrive on Friday, you'll be able to attend
the maker gathering that night at the museum. Free food and drinks
(including beer) along with they usually operate the Life-size Mousetrap
exhibit.

2892. H.R.1301 Congressional Action

Yahoo group: GRARA
Date: 2015-04-04 14:41:19 UTC
From: Hank Greeb
Topic: 2892 Message: 2892

From Larry Camp, WB8R, Section Manager

==========

March 31, 2015

Greetings to the Hams of Michigan:

HR-1301

The Amateur Radio Parity Act of 2015 -- H.R.1301 -- has been introduced in the US House of Representatives. The measure would direct the FCC to extend its rules relating to reasonable accommodation of Amateur Service communications to private land use restrictions. US Rep Adam Kinzinger (R-IL) introduced the bill on March 4 with 12 original co-sponsors from both sides of the aisle -- seven Republicans and five Democrats.

HR 1301 would require the FCC to amend its Part 97 Amateur Service rules to apply the three-part test of the PRB-1 federal pre-emption policy to include homeowners' association regulations and deed restrictions, often referred to as "covenants, conditions, and restrictions" (CC&Rs).

At present, PRB-1 only applies to state and local zoning laws and ordinances. The FCC has been reluctant to extend the same legal protections to include such private land-use agreements without direction from Congress.

H.R. 1301 has been referred to the House Energy and Commerce Committee. Rep Greg Walden, W7EQI (R-OR), chairs that panel's Communications and Technology Subcommittee, which will consider the measure.

Once again it is time for us as constituents to write to our Congressperson and request that they support HR 1301 and consider signing on as a co-sponsor on this important piece of legislation.

All of the necessary information is available on the ARRL website here: http://www.arrl.org/hr-1301. On this webpage you will find everything that you need in order to contact and urge your congressperson to support HR 1301 and to sign on as a cosponsor. You will find a spot to determine who your Congressperson is and from there you can get the necessary information to complete the sample letter that is provided for you.

Once again, we are asking you to send your letters (snail mail or email) to the ARRL for hand delivery to House members. This is important as a stack of letters from constituents carry a large impact.

The instructions are there if you choose print your prepared letter, sign it and snail mail to ARRL. If you choose to convert your signed letter to a PDF and email it to ARRL, you can save the cost of postage and envelope. The snail mail and email address for each method is on the website.

One tip for you: review the list of Congress persons who have already signed on before asking him or her for support. Your letter writing may turn to a thank you letter if your representative has already agreed to become a co- sponsor.

This is the case in the 1st and 7th Michigan Districts as Congressmen Benishek and Walberg are co-sponsors. For those who live in the 1st and 7th district, please take a few minutes to send them your thanks for supporting HR 1301. You can easily thank them by going directly to their individual websites and emailing your thanks.

Asking for support is important, but it is just as important to thank them for their support if they become co-sponsors.

As you know, Michigan has just become the 31st state to pass a PRB-1 law, and HR 1301 is the next logical step in the process. If we are successful in convincing the FCC to give us parity, then we will go back to the Michigan Legislature to update our PRB-1 law.I ask that each of you who sends a letter requesting support of HR-1301 to send me a short email advising me that you have sent a letter to your Congressperson.

By doing so, you will help us to determine our effectiveness and coverage of our grassroots effort here in Michigan.

You can reach me at wb8r@....

Thank you for doing your part in this important effort. Please pass this information to your local clubs and to your friends and family, hams and non-hams alike.

Larry, WB8R

From: stprovost@...
Topic: 2894 Message: 2894

GRARA (Grand Rapids Amatuer Radio Association) has an annual trip to dayton hamvention.
We stay at the Dayton University Dorm Rooms During our stay
We still have some openings left.
The cost is $98 for four nights (thursday, friday, saturday, and sunday) per person
We leave thursday in the morning and come home monday evening.
You can come and leave on a different schedule if needed.

If you think this arrangement will work for you, please contact Tom N8DGD by April 13th, 2015.
He has to confirm the reservations for the rooms.

Dear Ham Radio Friends,

Things are shaping up for our Ann Arbor bus trip to Dayton on May 16. There are still places for more riders on the trip. Let your ham radio friends know about it. A full bus would be great!

We have lined up a number of great door prizes again this year. We have received donations from DX Engineering, Elecraft, HamTestOnline, MFJ and Ham Radio Outlet, among others.

Again, there are seats available. We have a flea market spot again this year and the Continental breakfast.

I encourage everyone to come aboard and enjoy the trip to Hara Arena with us this year.

It will be fun!

73,

John Wasciuk

From: Anthony Luscre <k8zt@...>
To: North Coast Contesters <ncc@...>, mrrc@...

It might not be your most exciting contest of the year:
Your rates will definitely be low.
You are unlikely to work much DX.

But it maybe some of the best hours you can devote to operating to encourage new contesters in Northeast Ohio--

****

"Here's a contest you can win with just an HT
. . . and by making only one contact!

Imagine a contest based on the first mode that most Hams use, 2 Meter FM simplex. Add an emphasis on mobile and portable operation, throw in some antenna building, introduce Maidenhead grid squares, encourage Elmering, include club recognition, and add an element of chance and you've got it: The Northeast Ohio 2 Meter FM Simplex Squares contest.

Mark your calendar now, reserve the weekend of April 25th and 26th, 2015, and plan on working the First Annual 2 Meter FM Simplex Squares contest."-

Full details are available athttp://www.cfarc.org/contest15.php

****
Thanks in advance for your participation, no matter how many contacts.

Anthony

2902. Field Day Shirts - Special

Yahoo group: GRARA
Date: 2015-04-20 00:34:22 UTC
From: Hank Greeb
Topic: 2902 Message: 2902

I have received a flier from the ARRL which provides essentially free shipping for as many Field Day shirts as we desire to order. (Note there are other supplies, but I can't get involved with orders for the whole range of items available for Field Day, sorry.) The order must be placed between May 1 and May 31 to receive this deal.

I'll gather $15 for each T-Shirt (list price is $14.95, but I don't want to handle change.) There are two colors listed on the web site:
http://www.arrl.org/shop/Field-Day-Supplies/
I'll have a sign up sheet with info on color and size.

I'll be at the Club meeting on Friday, May 1, to collect orders and money. If you wish to write a check, make it payable to me, Henry R. Greeb. I'll place the order on May 11, the Monday after the Lowell Club meeting, and deliver the shirts to the open radio room after they come in (probably a couple weeks later). If you can't make it to an open radio room, please contact me via private e-mail for alternate delivery arrangements.

If you can't make it to the meeting or to an earlier open radio room, you may mail a check with your Name, call, address, size and color you wish, to:

Hank Greeb, N8XX
5727 11 Mile Rd NE
Rockford, MI 49341-9502

2908. Hamvention, Need a place to stay? 3 spots available at the dayton campus south apartments

Yahoo group: GRARA
Date: 2015-04-28 04:00:09 UTC
From: stprovost@...
Topic: 2908 Message: 2908

Hello, every year the Grand Rapids Amateur Radio Association rents apartments from the Dayton University while we enjoy several days at the Hamvention!

We arrive late thursday afternoon and go home monday morning.
Each person pays $97 total (flat rate) for the whole stay (thursday night to monday morning).
You can come later or leave earlier and the cost stays the same.

The apartments we rent is the Campus South at Dayton University.
Campus South is a high-rise building located at 311 Irving Avenue consisting of 53 three-bedroom apartments, each bedroom houses two people. Apartments are furnished and air-conditioned. Each apartment has a living/dining room, three bedrooms, a kitchen with microwave, and large divided bath. Linen and towels are provided.

This link will bring up an interactive map of the Dayton campus:
http://map.udayton.edu/ http://map.udayton.edu/

Look for Irving ave and Glendora ave intersect to find the Campus South University.

2911. K8EGQ SK estate - help needed

Yahoo group: GRARA
Date: 2015-05-02 15:16:59 UTC
From: streyle.j@...
Topic: 2911 Message: 2911

A neighbor of mine - Phil Burton, K8EGU at 3939 Hall St. SW, became a silent key last fall. As I am acquainted with the family, I offered to help with disposal of his ham gear. John Meyer K8IHY has assisted with the larger and more valuable gear. I've been asked to help with what's left.

This ham had a lot of pieces / parts, and some antennas.
I've planned to meet with the son at the house next Saturday afternoon (after the River Bank Run). I need several club members to assist in sorting out what is saleable (or at least will be claimed if marked 'free'), and what should go into a dumpster (the son will have one one hand then).
I'm guessing there may be up to 2 van-loads of stuff (nothing like Gary Springfield, don't worry). I'll try to upload some pictures to the Yahoo group. I told the son that the club would want 30% of the sales - he's fine with that. I'm hoping that some of this stuff can be taken to Dayton - some of it is valuable, but only to certain buyers (some antique / collector type pieces). There are a lot of tubes - some transmitting, some unusual older military types, lots of receiving types.

There is also some antenna things: there's a tribander (Mosely I'm guessing) with rotator with control, a dual-band vertical, and a wire dipole mounted on a mast above a pole. The son said those are free for the taking down (at your own risk to remove). I assume the coax, etc. would go with the antenna. There is a pile of aluminum antenna pieces / parts - some HF beam parts, some antennas that look like 2M beams. These are also free for the taking.

So - a few good hams are needed for another GRARA SK club estate effort! Who can come assist next Saturday afternoon?

John W8QZ

To those who know Bob,

It is Saturday May 16th. Linda, Bob's wife phoned me this morning late with info on Bob's condition. Many of you know that as a result of his cancer treatments to his face, his jaw bone fell apart and had to be replaced with a bone from his leg. It is a very painful procedure and will take some time for Bob to get back to where he wants to be.
He is unable to talk at this time, and he is on a feeding tube. They are still in Tuscon and will be there until at least the end of May and maybe longer.
Linda said she would keep me posted.
Lets all remember to pray for Bob and Linda as Bob continues to recover and heads back to Grand Rapids.
Send Bob an email if you get a chance. He would like to hear from you.

2917. Ham Radio Exhibit - National Trails Day, May 30

Yahoo group: GRARA
Date: 2015-05-18 22:04:30 UTC
From: Hank Greeb
Topic: 2917 Message: 2917

Attention everyone:

I'd like a bit of help with a demonstration of ham radio ----- one, two, three, or up to six hours, on May 30, Saturday, from about 10 a.m. to about 4 p.m.) Any volunteers? Please respond via return private e-mail.

I've been *suckered i**nto**errr.....* volunteered to set up a ham radio demonstration station as part of the "National Trails Day" celebration on May 30, from about 10 a.m. to about 4 p.m. ± foot traffic on the North Country Trail.

Oh, you've never heard of the North Country trail, really? Well, until just a couple months ago, I hadn't heard of it, or only heard of it in passing. Anyway, there's a hiking trail, which was authorized by Congress a few years ago, and which has recently received some funding from them, which runs from New York to North Dakota on a somewhat meandering route. For more information, please see http://northcountrytrail.org/ In these parts of Michigan it runs from south of Lowell, up through Vergennes, Cannon, Courtland, Solon, etc., into Newaygo county.

The American Hiking Association sponsors a "National Trails Day ®" to promote hiking in the outdoors, and the West Michigan Chapter of the North Country Trails (http://northcountrytrail.org/wmi/) is sponsoring an exhibit to promote hiking.

How did I get involved? It's too long of a story.... Anyway, I plan to set up two stations, probably only operate one at a time. One will be a SSB/CW and maybe other modes, running about 100 watts. The other will be a itty bitty CW rig, which runs on a 9 volt battery, about 3 watts output, built into an Altoids tin. The 100 watt rig will be a "somewhat typical" rig. The "itty bitty" rig will show what miniaturization can do.

I've reserved W8T for this event.

Please let me know if you're interested in helping. Right now, I have one volunteer, but could certainly use 2 or 3 more for a few breaks in the day, etc.

Thanks in advance.

Please be advised that on Saturday, May, 30, between 1600Z and 2000Z, 5 or more hams, mostly from the Lowell ARC and Grand Rapids Amateur Radio Association will activate W8T as part of the Michigan Chapter, North Country Trails Association's National Trails Day Celebration. We will be operating from Long Lake Park, 13747 Krauskopf NE, Sparta, MI 49345, near the enclosed pavilion.

All hams in the area are cordially invited to join us for an eyeball QSO and to operate your favorite band/mode. We plan to start setting up at 1400Z or earlier, and operate until 2000Z or whenever the number of hikers dwindle. So come on out any time during that period.

We will have two or three HF stations on various bands and modes - primarily on CW and SSB. For those who can't make it to the park, look for us on QRPspots.com, or any of the several DX clusters, including dxwatch.com. Look for CW spots on the Reversebeacon.net, specifically by putting
http://reversebeacon.net/dxsd1/dxsd1.php?f=0&c=w8t&t=dx
in your browser.
IF the above long url gets truncated in transmission, try this itty bitty url:
http://goo.gl/BMwd0y

CW bands may be crowded because of the CQ WPX contest, so we may retreat to 30, 17 and 12 meters for CW. But, we may be giving out a few points for the CQ WPX contest, just for the fish (halibut.)

We hope to see many of the local hams - either in person on on the air. So, if you think about it, please look for us on the bands, and give us a shout.

We will have a special QSL available for those interested. See the W8T QRZ page for details. Also, shortly after I'll put all the QSO info into the Logbook of the World. If I ever figure out e-QSL, I'll put the info there, also.

Lettuce prey that the predicted rains won't materialize, else the hikers amongst the general public may stay away.

2926. June GRARA meting at Hudsonville Fairgrounds

Yahoo group: GRARA
Date: 2015-05-31 02:08:23 UTC
From: Jack Amelar
Topic: 2926 Message: 2926

The June meeting of the Grand Rapids Amateur Radio Association (GRARA)
is Friday, June 5 at the Hudsonville Fairgrounds, NOT at the Red Cross.
The meeting will take place following "Ray's Road Kill Chili" potluck
at the fairgrounds, the evening before the IRA Hamfest.
http://www.w8ira.org
A hamfest ticket is not required on Friday, but I certainly hope you
are planning on Saturday's hamfest.

From: Jack Amelar
Topic: 2927 Message: 2927

Notice to GRARA members. As have done for every IRA Hamfest since they located to the Hudsonville Fairgrounds, I will have table space available for members to bring some items to peddle. The only requirement is, unless you plan to stay at the table for the entire event (who would, we all want to see the goodies), YOU MUST HAVE A PRICE ON YOUR ITEMS!
As always, I plan to set up outside between the main buildings. Look for the 80s style Georgie Boy Motorhome.
See ya there.

And don't forget the June GRARA meeting is at the fairgrounds Friday following "Ray's Road Kill Chili" potluck.

2931. 2015 GRARA Field Day

Yahoo group: GRARA
Date: 2015-06-14 23:27:49 UTC
From: stprovost@...
Topic: 2931 Message: 2931

Hello, it is less than 14 days before field day happens.
I am writing this message to have people know what program to install on their computers for the n1mm logger plus program.

I need all people who are bringing their laptop for field day to install the following files for n1mm logger plus

Note this is the NEW version of n1mm logger program.
here is the link for the full version of the installer:
http://n1mmplus.hamdocs.com/tiki-list_file_gallery.php?galleryId=7
http://n1mmplus.hamdocs.com/tiki-list_file_gallery.php?galleryId=7

after rebooting your computer, install the "latest" file from this link:

http://n1mmplus.hamdocs.com/tiki-list_file_gallery.php?galleryId=15
http://n1mmplus.hamdocs.com/tiki-list_file_gallery.php?galleryId=15

I am planning on meeting the wed night before field day to provide the config file that all computers will use.

Please review the documentation to be aware on how to use this great program.
thanks
stephen

2932. Anyone have a 1977 to 1986 callbook?

Yahoo group: GRARA
Date: 2015-06-16 01:48:11 UTC
From: Tom
Topic: 2932 Message: 2932

I am trying to help Warren, WD8BWF prove that he had his tech from 1976 to 1986. If he shows up in the callbook, we just have to take a picture of the proof, and he can get his earned general class license.

If you have a callbook in that range, please let me know..

2933. Re: [GRARA] 2015 GRARA Field Day

Yahoo group: GRARA
Date: 2015-06-16 02:40:27 UTC
From: Hank Greeb
Topic: 2931 Message: 2933

I case anyone is interested, there's a Field Day coming up. So far I've queried quite a few operators, and have exactly zero response as to who will actually be showing up, and who is planning to set up a station.

Please advise, by return e-mail if you're planning to be at Field Day, an approximate time(s) you'd like to operate.

I do know that we will have a network and N1MM+ running for whatever station or stations we have set up.

Lettuce prey that we have a robust cadre of operators, who can fill 24 hours of operating time with the station(s) we may have set up.

Please, pretty please, with sugar on it, please advise if you're planning to operate, and will be available to set up a rig (or rigs) at the Field Day site, which is Cannonsburg Elementary School, 4894 Sturgis Avenue, Rockford (Cannonsburg), Mi This is just one block east of Honey Creek and Cannonsburg, and one block southy.

Topic: 2931 Message: 2936

Hello, yesterday we made more decisions about field day.

Location is at the Canonsburg Elem School
address is 4894 Sturgis Ave, Rockford, MI 49341
This link will bring up google map of location:
https://www.google.com/maps/place/4894+Sturgis+Ave+NE,+Rockford,+MI+49341/@43.0525388,-85.4689623,17z/data=!3m1!4b1!4m2!3m1!1s0x881857af64d44e8f:0xc0363753cfb19f65 https://www.google.com/maps/place/4894+Sturgis+Ave+NE,+Rockford,+MI+49341/@43.0525388,-85.4689623,17z/data=!3m1!4b1!4m2!3m1!1s0x881857af64d44e8f:0xc0363753cfb19f65

I have done more research of N1MM Logger Plus
I would recommend watching the following video that explains doing field day with N1MM Logger Plus
The video is about 17 minutes Long:
http://n1mmplus.hamdocs.com/tiki-index.php?page=Video+-+N1MM+LoggerPlus+on+Field+Day#Video_N1MM_LoggerPlus_on_Field_Day http://n1mmplus.hamdocs.com/tiki-index.php?page=Video+-+N1MM+LoggerPlus+on+Field+Day#Video_N1MM_LoggerPlus_on_Field_Day

The following link is a getting started document for N1MM Logger Plus.
Please review for preparation of field day:
N1MMplus GettingStarted 2015-05-29.pdf
http://n1mmplus.hamdocs.com/tiki-download_file.php?fileId=2182

Schedule is the following:
June 26th Friday 5pm start setup at the location.
June 27th Saturday 12pm finish setup for 2pm start.

Please reply with any questions for this great event!

stephen AC8QE

2938. USB to COM port adapter?

Yahoo group: GRARA
Date: 2015-06-20 17:34:26 UTC
From: Hank Greeb
Topic: 2938 Message: 2938

Does anyone in the club have a USB to COM port adapter which works with Windows 7 and Windows 8.1. My venerable, 10 year old adapters use USB 1.1 and there's no driver for Windows 7 or 8.1. And, my equally venerable Windows XP computer is lacking some part which is necessary to run N1MM+ logger, and the operating system has a bug in it which will not allow updates to work.

I have two of the newer adapters on order, they should arrive Wednesday or Thursday, but to be sure we have a backup computer, I'd like to find one locally which I could borrow for Field Day. If we don't have a failure of a computer, it will be redundant, but it's always nice to have a standby computer.

Thanks in advance.

72/73 de n8xx Hg

p.s. Thanks to Tom, N8DGD, and Stephen, AC8QE for helping to "get my act together" with recruiting, organizing, etc. for Field Day. We still would like more people to lettuce no their availability for this event.

2939. GRARA Field Day info - June 26/27/28

Yahoo group: GRARA
Date: 2015-06-20 17:35:19 UTC
From: Hank Greeb
Topic: 2939 Message: 2939

In case any on this mailing list have missed earlier announcements,

Location is at the Canonsburg Elem School

address is 4894 Sturgis Ave, Rockford, MI 49341

This link will bring up google map of the location:
https://goo.gl/oxJHKj

Plan to be at the site on Friday, 5 p.m. for setting up antennae, etc. and work until dark or whenever we get "too pooped to pop."
We will be setting up two main rigs (one primarily SSB, the other primarily CW, but each capable of working both CW or SSB)
The crew from W8GVU, Grand Valley University Amateur Radio Club will be with us, operating as a "Get on the Air" station using their call.

Saturday, continue setup starting 9 a.m.
Field Day officially begins at 2 p.m. Saturday, June 27 and runs until 2 p.m. Sunday, June 28.

Hope to see everyone there. Remember, this is NOT a "full blown contest." We're around to have fun. You do NOT need to be a "gung ho" contester. We encourage all to sit down and operate a few minutes to a few hours and make contacts. This is a good way to learn basic HF operating skills! And, a license is NOT required. If you're interested in ham radio, there will always be at least one Extra Class licensee on site as control operator, so don't be mike shy! Jump in with all four feet flailing. Operating is the "only way to learn."!!!!!

I have Windows 7 and have no problem with my old USB 1 flash drive. You may have USB ports for USB-3 which will not work. However, my computers only have one USB-3 input which only works for USB-3 Flash drives. (yes, I have one of these too) You should have a USB-2, or a couple of USB-2 inputs which will recognize the old USB 1.1 flash drive. Try it. Normally USB-2 will default back to USB-1 when required to do so.

2941. Field Day propagation forecast

Yahoo group: GRARA
Date: 2015-06-23 18:24:57 UTC
From: Hank Greeb
Topic: 2941 Message: 2941

Right now it seems that the HF spectrum is blacked out due to a massive Coronal Mass Ejection of plasma from the sun. This happens from time to time, I remember at least three or four of these events which have bothered my operation over the years.

Typically, when something like this happens, the ionosphere is disrupted to the point where HF propagation is NIL, Nothing, NADA, Zilch for an hour or two. So far, this event, which hit the earth's atmosphere yesterday afternoon, is still affecting us today.

Let's hope that this event does not continue until the weekend, or we may be talking on ground wave on all bands. :)

See y'all at Canonsburg Elementary, Friday 5 p.m. (as many as can make it for setup.

And, even if you're not inclined to operate very much, come on out starting around 9 a.m. to finish setting up, and doing at least SOME operating. Even if you only make 1 contact, we'd like everyone, licensed or not, to "make a show." We won't insist, but it would be nice. Note you do NOT need a general class license to operate this event. We have have at least one extra class licensee to act as control operator, and the only request is to "sign the log" with your name or call letters before you operate.

Canonsburg elementary is at
4894 Sturgis Avenue,
Rockford (Canonsburg), Mi

This is just one block east of Honey Creek and Cannnsburg, and one block south

We will try to monitor 147.26 MHz repeater, but no guarantees because we will be setting up and operating.

72/73 de n8xx Hg
QRP >99.44% of the time
BUT, we will be using Low Power (100 watts) for Field day.

10 ESSENTIAL ITEMS IN YOUR HOME DISASTER RELIEF KIT
Radio
BY THOR JENSEN
A natural disaster can incapacitate many traditional means of communication, severing phone lines and knocking out cell towers. The last thing you want is to be isolated from the outside world and badly in need of rescue. That's why disaster survival experts recommend investing in a ham_radio_ (http://graywolfsurvival.com/2716/ham-radio-best-shtfdisaster-communication/) . Radio signals will transmit just fine no matter what the conditions, and ham radio bands are shared by the National Weather Service, giving you the ability to get additional information on any other trouble coming your way. They do require a license to own and operate, but they're fairly easy to get.

QST QST QST - come one, come all to Field Day!

Hear yea, hear hear ye! The Grand Rapids Amateur Radio Association (GRARA) is holding Field Day Saturday, June 26 from 2 p.m. EDST to 2 p.m. June 27, at Canonsburg Elementary School, 4894 Sturgis Ave, Rockford, MI 49341 We will be operating as W8DC (the club call), with W8GVU as the Get On the Air station. All are welcome!

This link will bring up Google map of the location:
https://goo.gl/oxJHKj

Several of us were at the site earlier this evening (Friday, June 26) and set ropes plus configure AC8ZX's tower for antennae, etc.

We will have two main rigs (one primarily SSB, the other primarily CW, but each capable of working both CW or SSB)

The crew from W8GVU, Grand Valley University Amateur Radio Club will be with us, operating as a "Get on the Air" station using their call.

Saturday, we bill begin with breakfast at 9 a.m. at the Grist Mill, Canonsburg Road and Honey Creek Avenue, followed by setup (about 10 a.m. or earlier, depending on service at the Grist Mill)

Field Day officially begins at 2 p.m. Saturday, June 27 and runs until 2 p.m. Sunday, June 28.

Operators are welcome - we need more who are willing to operate SSB and/or CW. All are welcome, the only requirement is an interest in Ham Radio! License is NOT required. We will always have at least one Extra Class licensee on site as control operator. So, come on out to chew the fat (eyeball QSO) and do a bit of operating! The weather is predicted to be good (knock on wood), so we should have no problem with excessive heat or cold.

Pass the word!

From: Hank Greeb
Topic: 2947 Message: 2947

Any and all who took pictures of our Field Day effort are encouraged to bring them to the Open Radio Room (on a flash drive or thumb drive) and I'll put them together for a collage to be presented at Friday's GRARA Meeting.

The Next GRARA meeting will be held at the usual time, Friday, July 3, at Red Cross, 1050 Fuller Street NE, Grand Rapids, 49503.

gathering time 6:30 p.m.
Meeting time 7:00 p.m.

A presentation of happenings, and a collage of pictures taken at Field Day will be the major point of discussion.

We had a grand time @ Field Day - if you missed it, do plan to come to the meeting, and also mark June 25/26, 2016 on your calendar for the next Field Day!

2948. Pettis repeater site grounds cleanup

Yahoo group: GRARA
Date: 2015-07-05 23:51:09 UTC
From: Jack Amelar
Topic: 2948 Message: 2948

Grounds cleanup / mowing at the The WLAV-FM tower and 147.26+ GRARA repeater site is this Tuesday, July 7, at 6:30PM. This is part of the agreement with WLAV-FM / Cumulus Broadcasting for hosting our repeater. Your help is appreciated.

The WLAV-FM tower and 147.26+ GRARA repeater site is located on Pettis Ave between 4 Mile Rd and 5 Mile Rd.
Look for 3966 Pettis Ave NE, a green "911" sign on the East side.
See map here https://goo.gl/maps/hU1R6
Head down the driveway. Keep going strait for about 1/2 mile, passing a house, barn and a fairly steep hill along the way. The drive makes a right turn, then a right turn again. You're there.

2949. Holland ARC Monday night meeting, July 13, Bring your coax to the club night...

Yahoo group: GRARA
Date: 2015-07-06 23:50:55 UTC
From: Tom
Topic: 2949 Message: 2949

You got coax? We got answers.

Bring those old pieces of questionable coax to the next Holland ARC club meeting, this July 13. a Monday night.

Bring your new coax to the meeting and see if meets spec.

The club meets at the Ottawa Red Cross at 270 James St, about 1.5 miles west of US 31.

The meeting starts at 7 PM, and the program will follow a short business meeting.

The piece of test of test gear we will be using is a Array Solutions UHF VNA, or Vector Network Analyzer. This is tied into a laptop, and it will sweep the coax from 1 to 450 Mhz and display a graph of the loss by the frequency. Accuracy is less than 0.1 Db

No coax is large or small. If you can carry it in, we'll test.

Tom K8TB

2950. Results - Pettis repeater site grounds cleanup

Yahoo group: GRARA
Date: 2015-07-08 21:43:17 UTC
From: Jack Amelar
Topic: 2950 Message: 2950

Thanks to Jim K8CAN and Jack NY8D for mowing at the WLAV-FM / GRARA W8DC repeater site Tuesday evening. A mystery person had weed-wacked the outside of the security fence earlier. Speculation is Bob AC8ZX did the earlier weed-wacking.

Outside the security fence is done, unfortunately, without a key to the security fence gate, the area inside the fence was not done.

2951. Roadside and transmitter grounds cleanup, 443MHz repeater back on the air

Yahoo group: GRARA
Date: 2015-07-12 02:00:31 UTC
From: Jack Amelar
Topic: 2951 Message: 2951

To make this easier, I'm sending GRARA and LARC info to both club emails.

The American Red Cross / Grand Rapids Amateur Radio Association highway road side pickup is this Tuesday, July 14. The area is a two mile stretch along Hwy M-57 / 14 Mile Road east of Hwy US-131 and Northland Dr between Ritchie Ave and Myers Lake Ave. Assignments will be to a 1/2 mile stretch.
Meet 6:00 PM at the Mobil / J&H Family Stores / Subway. The NE corner of M-57 and Northland, 11800 Northland Dr, east of Hwy US-131 exit 101.
Map at https://goo.gl/maps/Y9IuX
Ham radio talk-in will be on W8DC 147.26- (94.8Hz), however during the pickup, the Cedar Springs NW8J 146.88- (141.3Hz) will be used. Any non-hams will be paired with a ham while out on assignment.
(I'm also going to see if I can get the Red Cross to email to their people)

As discussed at Saturday's Lowell Amateur Radio Club meeting.
Grounds keeping, mowing, Wednesday, July 15, 5PM at the WBBL-FM and W8LRC 145.27-(94.8Hz) main repeater site. 6 miles north of Lowell, 2900 Lincoln Lake Ave NE (Lowell/Vergennes Township) just north of 3 Mile Rd.
Map at https://goo.gl/maps/LJXPy
This is part of our agreement with WBBL-FM / Cumulus Broadcasting for hosting our repeater. Your help is appreciated. If you can bring a mower, that would also be helpful.

The 443.850+(94.8Hz) repeater in Lowell is back on the air, thanks to Jim AA8JR. He is sponsoring and hosting the repeater at his QTH about 5 miles north of Lowell on his 130 ft tower. This is the repeater previously operated as K8LHS at the Lowell High School. Give a shout and start some activity.

The stretch of Hwy M-57 roadside pickup happened with
Tom N8DGD
Hank N8XX
Jim K8CAN
Jack NY8D and
Bob KD8HNF

Thanks so much for your help.

Part of the section was accomplished. It takes a minimum of 8 and ideally 12 to do the entire 2 mile stretch. We have one more pickup sometime in September. Consider participating then and we can have the entire area nice and clean.

The following events for the ham community.

--------Lansing Hamfest Saturday July 25----------
From: Julie McLain <kb8zxr@...>
Subject: 2015 CMARC ?OUTDOOR? HAMFEST

Greetings Ham Enthusiasts,

I KNOW you?re all looking forward to attending CMARC?s 2015 ?OUTDOOR? HAMFEST on Saturday, July 25th, because it's going to be a day FULL of FUN for Ham Radio, Computer, and Electronic equipment enthusiasts, as well as their families! Once again, it?s at the Holt Christian Church located at 2424 S. Washington Road in Lansing, Michigan from 8am-1pm (Vendor set-up at 6am). Admission is still only $3.00 per person, with kids 15 years and under FREE!! Admission for Vendors/Sellers is also still $3.00 each and that includes 1 sales space (additional sales spaces are $5.00 each). The ?RF ADAPTER GUY? will be back as well as our local Independent ?Amsoil? Dealer, plus many more.

We?re having VE testing (11am?Walk-ins are Welcome!); a GOTA Station (Get On The Air) for unlicensed visitors so they can find out why Ham Radio is such a fun Hobby; a Forum on ?APRS FOR YOU & ME!? with a time for Q & A from 9am-10:30am. We also have a lot of great hourly prizes again this year, and our Grand Prize is a Yaesu FT-60R Dual-Band HT, which will be drawn at 1pm and mailed, if you?ve already left!) We even have some really nice Ladies prizes for all the Ladies that attend!

We have Donuts and Coffee in the morning and later on be sure to stop by the Food Tent where we?ll have BBQ Pulled Pork Sandwiches, Hot Dogs and Brats fresh off the grill with all the trimmings. So if you can?t find something to buy, sell, or trade?you?ll definitely find something good to eat!!

While you're having fun shopping and rag chewing with your friends, please don't forget to stop by the ARRL table and visit with Larry Camp WB8R, our Michigan Section Manager. Talk-in for the event will be on the 145.39 repeater (100 Hz PL). To register for a Hamfest sales spot, or if you have questions, please contact Julie McLain/KB8ZXR via the contact information below. I?ve attached our flyer for your convenience or to share with your Club and friends.

73,
Julie McLain KB8ZXR

----------Hamfester's Hamfest, Sunday August 2, Peotone IL (South of
Chicago)---
From: WB9FMC
Subject: HAMFESTERS HAMFEST
RE: Drawing And Invite!

Well, it□s that time of year! Well, we're giving away $50 again this
year!. Yup: that's right, $50. And all you have to do is submit your

call and e-mail address at our Hamfest on Sunday, 2 August (at the Will county fairgrounds in Peotone, IL (South of Chicago)). Well, okay, it's not *exactly* free: You'll have to get in to the fest first! Afterword, we'll draw two submissions randomly and they'll each get a $50 check. The "rules" are below... Oh yeah, YOU COULD ALSO WIN $500, $300 or $100 in the entry ticket drawing!

E-Mail drawing rules: 1) You must enter at the Hamfesters Hamfest. 2) You must give a valid e-mail address (we'll be contacting you by e-mail!). 3) You must respond to the "winner" notice within 1 week of when it is sent out (should be either that Sunday night or the Monday after). 4) Only one entry per attendee. 5) Enter this number (000b:d43a and DOUBLE your chances of winning $50!

Who: Hamfesters Radio Club
What: 82nd Annual Hamfesters Hamfest and Computer Festival
When: Sunday 2 August 2015, Will County Fairgrounds
Main gate opens at 6AM
Main exhibition hall opens 8 AM
Activities: VE Testing 8 AM - 10:30 AM
Scheduled Presenters! * Val, NV9L from Ham Nation will be talking on contesting! *
Weather Spotting by Dave, N9KPD
Blood Mobile will be on the premises!
Where: I-57 Exit 327 on the East side of Peotone (about 30 miles South of Chicago)
Web Info: https://hamfesters.org/hamfest/
E-Mail Questions: WB9FMC@...

Donation: In advance $8: DOUBLE STUB! $10 at the gate (Single stub!)
Tickets On-Line: http://hamfesters.org/hamfest/buy-tickets
Tickets via Snail Mail: Dave Bukowski, N9KDP, PO Box 1135, Oak Forest, IL 60452

----------AND SAVE THE DATE----------
for GRAHamfest 2Ø15 (Grand Rapids Area Hamfest) Saturday October 3.
Grand Rapids Amateur Radio Association.
Same location as Spark in the Park, but earlier in the morning. More information as time approaches. http://www.w8dc.org

From: Tom
Topic: 2958 Message: 2958

/SPARK IN THE PARK!/

Saturday, August 1, 2015

3:00 p.m. - 8:00 p.m.

Home School Building

5625 Burlingame SW, Wyoming, MI

(Site of GRARA Hamfests)

Be sure to put Saturday, August 1, from 3PM to 8PM on your calendar.Head on over to the Home School Building, located at 5625 Burlingame SW, Wyoming (same location as the GRARA hamfest).Check out what's going on outdoors and then come into the air conditioned gym to cool off and enjoy all the indoor demos and displays.Grab a drink and a bite to eat while you explore the exhibits.Better yet, bring an exhibit!

What is Spark in the Park?Think of a science fair for amateur radio. This event is absolutely free, both to the exhibitors and the attendees. This is not a hamfest – it is an afternoon event geared toward all radio enthusiasts and their families. This event is free thanks to the sponsorship of these West Michigan amateur radio clubs:Holland ARC, Lowell ARC, Grand Rapids ARA, Allegan County ARC, and the Kalamazoo ARC.

There will be demonstrations of amateur satellite, Motorola Turbo, HF digital modes, VHF-UHF roving, Mesh networking, remote transceiver operation, Arduino projects, amateur television, software defined radios, and more.

We will also have a "Made in Michigan" row, featuring items made for amateur radio here in Michigan, including solar equipment from Solar 24, antennas from Tenna-Dyne, study guides from Dan Romanchik, electronic kits from John, KC9ON and more.Meet the makers and pick their brains.

Do you have rolls of coax in your garage or basement that you have no idea if they are good? Bring them down, and we will check them for loss..Look for the Michigan VHF-UHF Society tableHave you built an antenna tuner? A QRP transmitter? Anything with electronics in it for amateur radio? Vintage equipment?Take it along, grab a table and show it off to others. You made your very own linear power amplifier? Others would like to see it. Almost everyone has a "bug-out" kit or go-bag. Bring yours in - displays don't need to be elaborate.What is ordinary to you may seem like a stroke of genius to others! Even new equipment, bought or homebrewed. A one watt transmitter in an Altoids can, or the latest transceiver with gold-plated trim? Bring it down and show it to

others.

The Michigan VHF-UHF Society will hold its annual meeting at 5 PM.SATERN and several other amateur radio public service groups will be in attendance as well.

Pictures of last year's inaugural event are located athttp://www.k8tb.org/sitpp/sitpp.htm. Additional information for this year's upcoming event, which promises to be bigger and better than last year’s, can be found athttp://www.k8tb.org/sitp.htm.

The Home School Association will have their concession stand open, which will sell coffee, soft drinks, snacks, hot dogs, and other items.

2961. A call for Help for Spark in the Park this saturday

Yahoo group: GRARA
Date: 2015-07-30 02:57:42 UTC
From: stprovost@...
Topic: 2961 Message: 2961

Gentlemen,

We get access to the HomeSchool gym at 5625 Burlingame this Saturday at 1pm.

I would like to ask each club involved to have two people, who can move tables around, to be there right around 1 or so. We need to set up tables before 3 pm, and I need everyone's ideas on how to set this up. I have some ideas, but I would like some alternatives.

Don from Kalamazoo, Don, I'm not sure who is coming up from Kalamazoo to help or present, but I had your email, so if you could pass this on to whomever, I would appreciate it.

73 and thank you to everyone for your help...

From: Jack Amelar
Topic: 2963 Message: 2963

Reminder, this Friday, August 7, is the Grand Rapids ARC montly meeting
at the American Red Cross on Fuller Ave between the I-196 Ford
Expressway and Leonard St.
Social at 6:30PM, meeting 7. After meeting usually Chinese or Mexican TBD.
All are welcome.

2964. Radios for sale

Yahoo group: GRARA
Date: 2015-08-08 20:26:43 UTC
From: <tigerfan158@...>
Topic: 2964 Message: 2964

I have some antique short-wave receivers (no transceivers) which all work that I would like to sell. I also have some other radio equipment that I would include. I am not a ham operator. I know when I die, my daughters will just dump this valuable merchandise which I have enjoyed over the years. I would hate to see this equipment destroyed.

I don't want to sell the equipment at a hamfest, because I would end up taking some of it home. Here is what I have.

1. Hallcrafters S-38 D
2. Hallicrafters Model SX-110 With Hallicrafters Model 46B Speaker
3. Lafayette Model SX-110 With Model HE 48 Speaker
4. RCA Victor Model 3-BX-671 Short wave receiver (tan)
5. Brown RCA Trans-Oceanic Short wave receiver
6. Black RCA Trans-Oceanic Short wave receiver
7. Realistic DX-100 Short wave receiver (transistor)
8. Realistic DX-390 Short wave receiver (transistor)
9. Tube tester with some extra tubes for the above radios.
10. Pyramid phase 3 110 Volt 20 amp power supply
11. 250 W. Linier Amplifier (12 Volt input) (transistor) also some sundry electronic items

I would like $ 500.00 for the entire lot. If anyone is interested, please send an email to: tigerfan158@...

2965. Great story about WWII radio efforts

Yahoo group: GRARA

2968. Clean Up

Yahoo group: GRARA
Date: 2015-08-16 08:23:43 UTC
From: Jim Leys
Topic: 2968 Message: 2968

Grounds cleanup / mowing at the The WLAV-FM tower and 147.26+ GRARA repeater site is this Tuesday,Aug 18, at 615 PM. This is part of the agreement with WLAV-FM / Cumulus Broadcasting for hosting our repeater. Your help is appreciated.

The WLAV-FM tower and 147.26+ GRARA repeater site is located on Pettis Ave between 4 Mile Rd and 5 Mile Rd.
Look for 3966 Pettis Ave NE, a green "911" sign on the East side.
See map here https://goo.gl/maps/hU1R6
Head down the driveway. Keep going strait for about 1/2 mile, passing a house, barn and a fairly steep hill along the way. The drive makes a right turn, then a right turn again. You're there

2982. Meeting Friday 4 September 2015?

Yahoo group: GRARA
Date: 2015-09-03 20:17:33 UTC
From: Hank Greeb
Topic: 2982 Message: 2982

I haven't seen any announcement, but according to the constitution and bylaws and the Grand Rapids Amateur Radio Association, it seems that 4 September is the first Friday of the month, and I beleive (except my short term memory may be failing, along with other stuff getting along with age) that the regular meeting date is the first Friday of the month, unless otherwise noted.

If it has been otherwise noted, I missed the notice.

So, someone please tell me either "go to the meeting" or, the "meeting has been cancelled/rescheduled/et. cetera"

Thanks for telling me where to go.

2984. Anyone going out on the ARRL September VHF Contest?

Yahoo group: GRARA
Date: 2015-09-08 04:15:34 UTC
From: Hank Greeb
Topic: 2984 Message: 2984

Operates the second full weekend of September. Begins 1800 UTC Saturday and runs through 0259 UTC Monday (*September 12-14, 2015*).

We often have one or two VHF gurus who like to activate high spots in the area (like Fisk Knob, etc), and corners of grid squares (Someplace in NW Kent county or in Newago county, or where?) etc....

New Rules changes allow self spotting on the Dx Clusters, and other forms of communications amongst the participants.

See
http://www.arrl.org/september-vhf
for details.

If any GRARA member, or any non member is reading this message, please lettuce no your plans for operation, so those capable can contact you at as many locations as you plan to activate.

Date: 2015-09-09 00:46:23 UTC
From: Hank Greeb
Topic: 2985 Message: 2985

I'm considering going, but don't want to drive the 230 miles or so. I'd be happy to pay for gasoline or share other costs for the trip.

Anyone making the trip?

Please lemme no.

2987. September VHF Contest This Weekend

Yahoo group: GRARA
Date: 2015-09-12 01:30:45 UTC
From: David DeVos
Topic: 2987 Message: 2987

Hey everyone - this weekend is the Fall VHF contest, and it runs from 2PM Saturday local time to 11PM on Sunday night. 6 meters and up, any mode. Or as the ARRL describes it:

"For amateurs in the US and Canada (and their possessions) to work as many amateur stations in as many different 2 degrees x 1 degree Maidenhead grid squares as possible using authorized frequencies above 50 MHz."

K8DOG and I will both be roving, and here is my rough schedule:
Saturday 2-4PM Coopersville Grid Corner EN62/72/63/73Travel to EN82
Saturday 6-7:30PM GP Hill in EN82 (or until the park closes, if later than sunset)Travel Home
Sunday 9AM-12PM EN71 near Coldwater, MI
Sunday 7-11PM EN72 near Grand Rapids, MI
Please text me if you want to know where I am so you can point at me. We are allowed to do that with the new VHF rules adopted this year. My 2m hangout frequency is 144.230, or the call frequency 144.200. I will have 10 bands in the rover: 6 meters to 10GHz.
73, and let's have some fun! Dave DeVos - KF8QL/R - 616-706-8736

2990. Verizon Tower Project Latest Status

Yahoo group: GRARA
Date: 2015-09-21 03:14:53 UTC
From: stprovost@...
Topic: 2990 Message: 2990

Hello, last friday Sept 18th, I met with the project manager of the Verizon Tower Project. It appears that within the next six weeks (about the first week of november), the new tower will be up and installed.

We have been asked to provide a final list of hardware (radios, antennas, etc) for this project.

I want to host a meeting this wednesday Sept 23rd at 8:30pm at the Red cross Building.

I want to finalize the list this week so I can give list to the project manager.

I need to confirm what groups want what equipment installed.
We will be discussing the MARS install, Amateur TV install, HF rig install, etc.

Please spread the word for this meeting.

thanks
stephen AC8QE

2993. Steidman park - Peanut Power Sprint - Sunday Sep 27 4 p.m to 6 pm

Yahoo group: GRARA
Date: 2015-09-24 13:02:12 UTC
From: Hank Greeb
Topic: 2993 Message: 2993

Hear ye, Hear ye! QST QST all area hams and friends!

Please peruse the rules for the North Georgia QRP Club's "Peanut Power Sprint" at:
http://www.nogaqrp.org/peanutpower/rules.pdf

I've been cogitating on a private effort, but after mentioning the subject to others, it seems that a multi-multi effort may be possible. I looked around and Steidman Park seems very reasonable for Sunday, September 27, 2000Z to 2200Z (4 p.m to 6 p.m. Eastern Daylight) for the Peanut Power Sprint! AND, I've reserved the use of N8P as a "special event" call. This is a "laid back" event - no pressure, just fun! The more the merrier! I haven't found the park on a topo map, but it appears on high ground, with power lines not immediately overhead, so I hope it will be quiet for RFI!

You will find a map of the park at
http://www.kentcountyparks.org/document_center/park_maps/Seidman_Park.pdf
or: http://goo.gl/jR4c8X

A Google map is at
https://goo.gl/7GtGWR

Note - this is a QRP effort. Many folks will be operating at 10 to 15 WPM, so if you're just learning the code, give it a try!

The event starts at 4 p.m., so I'll show up around 3 p.m. Please let me know if you plan to join the effort, and what kind of rig & antenna, if any, you'll be bringing. There is NO commercial power at this location, so bring your battery or generator with your rig!

I'll be setting up near the parking area along Honey Creek Road, just south of 2 mile road. I'll be bringing a portable table. There is one and only one covered picnic table at this site. "Facilities" include one porta-potty. I think there are flush facilities at the other parking area along Conservation Street to the south.

Both SSB and CW are encouraged! If you prefer SSB, be sure to bring a rig along, because the rig I'm bringing is a very small CW rig, built into an Altoids Tin, operating on 20 and 40 meters.

If you prefer to operate from home, here's another link to the rules, etc., for this event:
http://www.nogaqrp.org/peanutpower/rules.pdf

You MAY operate with over 5 watts (cw) or 10 watts (SSB) in the RAW category, so have fun at any legal power you wish!

Hope to see you either at the park, or on the air!

Tower erection can go smother when you have someone who's handy with a helicopter. As far as the guys on, or should I say, inside the tower, that is one job that can't be over payed.

From: CR
Topic: 2996 Message: 2996

From WIRED:
http://www.wired.com/2015/09/watch-weekends-total-lunar-eclipse/?mbid=nl_92415
(excerpt)
Peak eclipse will be at 2:47 am UT on September 28th—so, 10:47 pm ET on Sunday, September 27th. If you're in the eastern United States, that's good news! You should be able to see the eclipse just fine. The moon will start darkening at 8:11 pm Eastern time, and it will start to pass through the Earth's dark umbral shadow at 9:07 pm. It'll be completely shaded for about an hour starting around 10 pm (the last total eclipse, on April 4, lasted for a mere five minutes <http://eclipse.gsfc.nasa.gov/LEplot/LEplot2001/LE2015Apr04T.pdf>). That means the fully eclipsed moon will just be rising as viewers on the west coast tune in. So, you know, squeeze your magickal rites in appropriately.

From: Michael J. Wolthuis
Topic: 2998 Message: 2998

Everyone,
I wanted to let you know that I won the estate out in Spring Lake. There is some good Heathkit stuff, which I personally don’t know much about or use.

If you are interested in any of the items that were pictured, prior to Dayton Hamvention, please let me know and we can probably work something out.

Lots of HF radios, IC-271a, IC-471a, TS-850s, etc.

Email me kb8zgl at kb8zgl.net if looking for stuff.

I should have most of it online on the Virtual Hamfest Site by next week.

Mike

3015. CQ WW SSB October 24 & 25

Yahoo group: GRARA
Date: 2015-10-20 19:48:37 UTC
From: Hank Greeb
Topic: 3015 Message: 3015

CQ WW SSB contest is coming up, 0000Z October 24 to 2400Z October 25
(Friday evening to Sunday evening here in the Eastern Time Zone)
Rules @ http://www.cqww.com/rules.htm

This can be a fun contest - I've dabbled in it as SOSB/QRP 10 meters for four years. With good propagation power helps, but good conditions are a boon to the low power and QRP operators! Bands like 10 meters, which are often devoid of contacts, often pop up with lots of activity when a big contest like this starts!

Depending on the antics of Olde Sol and the tendency of Coronal Mass Ejections (CME) which have been shot in the direction of Mother Earth, it could be an interesting contest! Sometimes the after effects of a CME are a boon to propagation. Other times it's a dud. One never knows. :) Why not give the CW WW SSB a try?

Greetings, We have a second Michigan Section school contact scheduled with the International Space Station. This contact will be with the Dearborn Public Schools. Here is the information that I have: An International Space Station school contact has been planned with participants at Dearborn Public Schools, Dearborn, Michigan on 27 Oct. The event is scheduled to begin at approximately 16:01 UTC. It is recommended that you start listening approximately 10 minutes before this time. The duration of the contact is approximately 9 minutes and 30 seconds. The contact will be direct between NA1SS and K8UTT. The contact should be audible the eastern U.S, and adjacent areas. Interested parties are invited to listen in on the 145.80 MHz downlink. The contact is expected to be conducted in English.

I have no information about Twitter, IRLP or Echo Link feeds for this contact.

73, Larry, WB8R

I made 78 qsos, and snagged about 10 new countries. Now to see if I can get confirmations - 10M wasn't so great, but 15 was pretty good, I thought. Was kinda fun, even if on 'sloppy side band'. Boy, there were a number of over-modulated splattery signals on 40M, Friday night. What a mess! "All knobs to the right" seems to be the operating practice of some.

3024. ARRL Sweepstakes This Month

Yahoo group: GRARA
Date: 2015-11-01 19:51:02 UTC
From: Hank Greeb
Topic: 3024 Message: 3024

One of the longest lasting contests in the United States, if not the world, is coming up this month. This contest started in 1930 as a two week event in January, with the rules requiring a complete ARRL formatted message be transmitted from one contestant to another. There were some 200 or so contestants that year, and high score was a bit over 13,000 points. The rules then specified that an entire ARRL formatted message be sent as the exchange. CW was the majority of the entries, with only a smattering of AM phone. SSB was still a Laboratory curiosity, if used at all on the bands. Wow! what a change from those days.

Anyway, the ARRL CW Sweepstakes will start this year Saturday, November 7, at 2100Z (5 p.m. EST), and run until 0300Z (Monday) November 9 or (10 p.m. Sunday November 8 EST).

The Phone version of this contest will be from 2100Z, Saturday,November 21 (or 5 p.m. EST), and run until 0300Z (Monday) November 23 (10 p.m. Sunday, November 22).

Details are at http://www.arrl.org/sweepstakes

Will W8DC be operational by November 21/23? If so, it has RFI problems on 80 and 40, so I'd suggest that if members wish operate Multi operator-Single Transmitter, the best times would be during daylight hours, when 20, 15, and (hopefully) 10 meters would be open. And, most ops prefer SSB, so Sunday, November 22 would seem the day to operate.

I can't be at the November 7 meeting, so please talk about SS over at the monthly meeting. Personally, I'm not sure of my availability. If I'm in town, I have an obligation to a contest club, so someone else would have to be "organizer and cheerleader" for any organized club activity. But, the "organizer" doesn't need to do much except encourage folks to "give it the olde college try." We have a nice station - and it should be used to acquaint members in its operation, and to be sure that it would be usable in a real communications emergency.

Oh, and if any member prefers to operate solo from home, please fire up on either weekends. It a "fun" contest. I "cut my teeth" on Sweepstakes in the early to mid 50's with very few Q's, and a score of around 2000 - but the rest is history.

3025. Upcoming General and Technician Classes

Yahoo group: GRARA
Date: 2015-11-05 01:14:02 UTC
From: Tom
Topic: 3025 Message: 3025

There will be a nine-week General class held in Grand Rapids at the Kent County Red Cross building starting Wednesday, January 13, 2016 at 7 PM. The last class will be March 9, and there will be a GRARA VE test session two days later on March 11.

More details and registration are available at:
*http://tinyurl.com/general-k8tb

*Also, the Holland ARC will hold their tenth "Ham-in-Day" class Saturday, December 12 starting at 1PM at the Holland Red Cross building at 270 James Street, Holland. If you have any unlicensed friends or relatives who have thought about getting their amateur radio license, send them to this event. In the last 3 years, 76 people have been licensed using this 5 hour class. At 6PM that day, a VE test session will be held for the 'Ham in a Day" participants. That session is also open to anyone wishing to obtain their Technician, General, or Extra class license.

More information and registration can be found at:

Greetings to the amateurs of Michigan:

We have learned that Senate Bill S 1685 may soon come up for a vote in the Senate Committee on Commerce, Science, and Transportation.

Michigan Senator Gary Peters is a member of that committee and we need to urge him to support S 1685.

WE NEED TO TAKE ACTION NOW!

This can be done easily by contacting his office by telephone at: 202-224-6221.

The following simple message will get the point across:

"Good morning/Good afternoon,

My name is _____ from _____, Michigan.

I urge Senator Peters to support S. 1685, the Amateur Radio Parity Act, when it comes up for a vote in committee. Thank you."

This action is only for Senator Peters, because he is a member of the committee where S 1685 is being considered. Our letter writing campaign for both Senators Peters and Stabenow still continues, but this special telephone call to action is for Senator Peters only.

Thank you for your prompt assistance. Time is of the essence, so please pick up the telephone and make that call. It takes only about a minute of your time to make the difference.

Please send me a brief note telling me that you have made that call. (wb8r@...)

73,

Larry, WB8R

3033. Neat article on why we should maintain a Strict Listening Watch during an event (races, etc)

Yahoo group: GRARA
Date: 2015-11-18 13:11:25 UTC
From: stprovost@...
Topic: 3033 Message: 3033

Quiet Periods, Listening Watches and Amateur Radio
He knew about the quiet periods and listening watches of old and the stories of lives lost and saved. He also knew that the necessity of maintaining a strict listening watch has not been lost to time and technology. In fact, it's a greater necessity than we may have considered in our own Amateur Radio service. The very first Amateur Radio public service event I was responsible to organize included this concept. "Let's keep an ear on the radio, so we might be less tied up with getting your attention and have more time to pass actual traffic." Time and experience reveals that other problems such as the limitations of newer digital modes are mitigated by the maintenance of the strict listening watch.
My local club, the Police Amateur Radio Team http://www.wb1gof.org/ (PART) of Westford, Massachusetts, operates a 2-meter analog repeater that is a fantastic performer. It's reliable. It has a wide reach. It is well maintained. Still, there are instances where the combination of interference, distance from the repeater site, and operator technique combine adversely.
The Boston Athletic Association Boston Marathon http://www.baa.org/ communications system offers excellent fodder for study. With almost 300 communications volunteers and a few dozen unique repeaters and other radio-communication systems all pressed to the limit within a very short time span, anything and everything that can go wrong generally does go wrong. I have, as a volunteer (this is my 15th year), listened in pain to dreadfully long attempts at getting a simple message between two units, which generally begin with several unanswered calls, adding to the mess. In 2015, in a leadership capacity, I targeted the only variables within our immediate control: the operator on both ends of the circuit. Maintaining a strict listening watch became a mantra, and it will continue as long as we hold a radio in one hand and a cup of coffee in the other.
At a public service event many of us clip our radio to the belt. Body fading, the same physical phenomena that aids us in Fox Hunting, attenuates what's coming in and of course what goes out. I now encourage my Net Control Operators (NCO) to request that field units "raise the radio over your head and try again" in the first instance where that unit is unreadable. This solves the input problem in almost all cases. With sufficient practice, it's hoped that awareness will spread, and the reminders be made obsolete.
The output problem - the ability to receive the repeater output in the field - is rarely that the (stronger) repeater transmission cannot be heard. It's simply that the operator is not focused, not listening for the call. The operator is chatting with friends, tired and glazed, or listening to other communications. One volunteer insisted that he bring along another radio so he might "listen in on public safety." "That's nice," I replied, "but it's not in our job description." I feared that, while lost to more exciting radio banter, my volunteer would lose awareness - of our situation and responsibility -- so necessary to maintain. I was right. He was often difficult to reach and generally ineffective. Hopefully it was a lesson learned.
Sure, our work can sometimes involve simply waiting for that one call, and this can be boring. But think of how interesting we can make our listening watch when we form a picture in our mind of what's happening at the event overall, and what has happened in the past, to grasp that we perform a life or death function. 100% focus on our duty and assignment is critical to our "client" event officials being able to secure the public's safety as best

they can, at the rest stop, intersection, or Red Cross facility to which we are assigned. Maintaining that strict listening watch repeatedly overcomes the limitations inherent in our technical communications method, promotes situational awareness, improves our effectiveness to the teams we support, and in the end is a discipline that keeps us focused on the reason we're standing underneath that silly orange hat in the first place: to provide instant, reliable communications.

So maintain that strict listening watch. Your performance and overall satisfaction, and public safety at the next public service event will be all the better for it. --

Mark Richards, K1MGY [Richards serves as a member of the Boston Athletic Association Communications Committee, and is a frequent public service event volunteer and organizer. He is employed in the technical design and product development of hand-held environmental monitoring instrumentation].

3034. Amateur Radio Parity Act of 2015 Senate Activity

Yahoo group: GRARA
Date: 2015-11-19 20:01:04 UTC
From: Hank Greeb
Topic: 3034 Message: 3034

Amateur radio and the ARRL had a successful day on November 18 when the US Senate Committee on Commerce, Science and Technology endorsed Senate Bill 1685. This bill is the Senate version of the Amateur Radio Parity Act of 2015. In addition to this small victory, we gained another cosponsor when committee member Senator Jerry Moran from Kansas signed on as cosponsor for S1685.

Of the 24 committee members, only the Senators from Florida and Hawaii went on the record as voting no. Those Senators choosing to endorse the bill included Michigan's Senator Gary Peters.

As you will recall, we just recently completed a telephone campaign to urge Senator Peters to support our bill. While I am not suggesting that our phone calls were the sole reason that Senator Peters supported our bill, I will say that our calls and letters did play a part in that decision.

Here is the link to the complete ARRL news from the ARRL website:
http://www.arrl.org/news/amateur-radio-parity-act-passes-senate-committee-gains-cosponsors

This committee action is just another step in the process and we still have work to do.

We have been collecting signatures on letters to our Michigan senators for a number of weeks now and we need that process to continue.

If this has not already been done, your club can (and should) do this:

Download a copy of the letters for Senators Peters and Stabenow using these links:

http://www.k8tb.org/Stabenow.pdf
http://www.k8tb.org/Peters.pdf

Print the appropriate number of copies. At your next meeting, ask that all hams that have not yet sent a letter to their Senators to add the date and their signature, printed name, callsign, address, city, state and zip code to a letter for each Senator. Bring a handful of pens so that no one has to stand in line waiting for a pen to use. In 10 minutes you can have 30 or more letters signed for each Senator.

Collect the completed letters, and mail them to ARRL HQ at:

ARRL
225 Main St
Newington, CT 06111
Attn: S1685 Grassroots campaign

Or, if you would like to avoid the postage costs, you can scan the signed letters into PDF format and then email them to: reginfo@... <mailto:reginfo@...>.

Please include “S1685 Grassroots Letter” in the subject field of your email.

Please send me a note at wb8r@... <mailto:wb8r@...> telling me how many letters your
club generated and sent to HQ.

This is a pretty simple process and a very important one. The actions we take now can pay us huge dividends in the future when it comes time to install our antennas. Even if you are a person who just uses an HT for your ham activities or if you are fortunate enough to live in an area where there are few or no antenna restrictions, please think about the other folks that for whatever reason find themselves restricted because of where they live. We all make conscious choices, but sometimes the need to live in a certain area really gives us few choices of what neighborhood we settle in.

Remember that the Amateur Radio Parity Act of 2015 does not guarantee that you can erect that huge tower and major league antenna array no matter where you live. Rather, it simply requires that Homeowner’s Associations and the enforcers of the Covenants, Conditions, and Restrictions (CC&R’s) sit at the table with us and negotiate in good faith. No longer would they be able to simply say “NO” when we request permission to erect and amateur radio antenna. Our PRB-1 law here in Michigan only affects regulation by government entities and the Amateur Radio Parity Act of 2015 is part two of our efforts for parity.

Thanks to all who have helped us get this far. The challenge remains and we need to continue to keep the pressure on.

I look forward to hearing from all those clubs that have not yet had the letter-signing event at your meeting! If your club has already done this, at subsequent meetings, be sure to offer letters for those that may have not been present when letters have been signed. This will ensure that everyone has a chance to sign and send letters.

Thanks for your help and 73,

Larry, WB8R

3035. Upcoming General and Technician Classes

Yahoo group: GRARA
Date: 2015-11-22 21:45:33 UTC
From: Tom
Topic: 3025 Message: 3035

There will be a nine-week General class held in Grand Rapids at the Kent County Red Cross building starting Wednesday, January 13, 2016 at 7 PM. The last class will be March 9, and there will be a GRARA VE test session two days later on March 11.

More details and registration are available at:
*http://tinyurl.com/general-k8tb

*Also, the Holland ARC will hold their tenth "Ham-in-Day" class Saturday, December 12 starting at 1PM at the Holland Red Cross building at 270 James Street, Holland. If you have any unlicensed friends or relatives who have thought about getting their amateur radio license, send them to this event. In the last 3 years, 76 people have been licensed using this 5 hour class. At 6PM that day, a VE test session will be held for the 'Ham in a Day" participants. That session is also open to anyone wishing to obtain their Technician, General, or Extra class license.

More information and registration can be found at:
<http://tinyurl.com/harchiad>http://tinyurl.com/harchiad

3036. Verizon Antenna Project status 11-23-15

Yahoo group: GRARA
Date: 2015-11-25 00:42:09 UTC
From: stprovost@...
Topic: 3036 Message: 3036

Hello, just a quick fyi on this project:

The new radio room is completed and waiting for cabling from the tower and old radio room.
The equipment will be arriving next week tuesday.

The vendor is completed with the verizon part of this project.
They will be pulling cabling for our platform monday Nov 30th.

I am waiting to hear when they will remove sections from our old tower.
I need to know if anyone wants these tower sections.
The vendor will remove the tower section if we don't have any takers.

thanks
stephen

3037. Red Cross Antenna Project

Yahoo group: GRARA
Date: 2015-11-26 16:20:23 UTC
From: stprovost@...
Topic: 3037 Message: 3037

Hello, here is what information I have for the tower located by the red cross building.

"please reply this message in the group so everyone can read it."

More information on the antenna removal process:

I am waiting to hear when a crane will be on site to remove the sections of the GRARA tower.
The vendor will attempt to separate the 10 ft sections by removing bolts at the joints. Should this process not work, they will cut the sections apart.

The red cross antenna will be moved from the 100 ft level to the 60 foot level to keep the transportation department going with their radio service.

Here is the list of equipment that will be provided from the verizon antenna project for the red cross tower:

Mosley TA-53M HF Beam (due to arrive in mid-december)
Alfaradio AS RAK rotor kit and control (is here in the garage by new radio room)
Comet CX-333 Triband (145/220/440Mhz) VHF/Uhf Antenna (due to arrive next week)
Comet GP-15 Triband (52/146/446Mhz) Antenna (is here in the garage by new radio room)

The vendor will install four LMR600 cables at the top of the tower
The vendor wil install three LMR600 cables at the forty five foot level of the tower.
each cable will be terminated with an N-Male Connector at both ends.

Grara will need to purchase triplexer units for the two tri-band antennas.

I will need someone to come up with a wiring diagram for the antennas to radios.

looking forward to hearing with new antennas and cables!
stephen

From: wd8usa@...
Topic: 3037 Message: 3039

We should already have the triplexers on site for the comet triband antennas.

All of the old triband antennas should have been saved when they were taken down hopefully properly and with care as they are not that old and are in good working condition- JB

$ = zero (a donation to the Red Cross would be good)
2 sections
20' each
60' of the tower stays up; just 2 of the sections come down, Probably separated (but if not, merely removing the bolts will separate the sections)
You must haul. (These sections will require a crane to set them back up.)

3049. Contest this weekend

Yahoo group: GRARA
Date: 2015-12-16 23:31:44 UTC
From: Hank Greeb
Topic: 1298 Message: 3049

Perhaps some folks are looking for some activity this coming weekend?

Well, one "fairly large" contest coming up is the Canadian Winter
Contest. This is sponsored by our neighbor's national Amateur Radio
Association, namely the Radio Amateurs of Canada (RAC).

The contest starts at 0000Z Saturday, December 19, (7 p.m. ES T Friday)
and runs through 2400Z, (or 7 p.m. Saturday EST). It's all bands
(except, WARD bands) both CW and SSB.

Rules are at
http://wp.rac.ca/wp-content/uploads/2015/07/2015-Winter-Contest-Rules-English-French.pdf
If the above gets truncated in transmission, try
http://goo.gl/oJguhE

I'll "probably" be pecking away at CW with my J-38 and my left foot, and
possibly even exercising my vocal cords with SSB.

A couple weeks ago I inquired about a source for a 3" OD mast.
I want to thank everyone who responded.
I got some good ideas:
Well pipe (2.5" ID, 2.875 OD)
Galvanized water pipe (same as well pipe)
Chain link fence post (ditto)
Horse fence post, TSC store
DX Engineering (mail order)
Central Iron and Steel, Alpine Ave GR

I ended up using Frank N8UVI and "above2014" lead and went to
Elenbaas Steel Supply Co in Greenville. They had what I was looking for
plus some square stock I was in the market for, cut to spec.
Just note, as I found out, you don't just walk in and out with your
order, you have to come back a day or so later.
In case you're curious, a 3" 11 gauge x 7 ft ran $39.58 + tax

Thank again everyone.

73 Jack NY8D

3051. FT-767 Radio for sale

Yahoo group: GRARA
Date: 2015-12-19 18:16:06 UTC
From: John Streyle
Topic: 3041 Message: 3051

Hope it's OK to post a for-sale -

I have for sale my FT-767 HF radio, good used condition (may have a few scratches, minor wear, etc.) 98% operational - only known defect is that the built-in antenna tuner does not work correctly. Includes band modules for 6, 2 and 440, matching Yaesu speaker / phone patch, CAT interface, homemade audio interface for digital modes, cables, 2 USB-to-serial converters, original owner's manual, factory service manual, and Yaesu hand mic. Radio has been opened up to allow 60M transmit. Pictures available on request. (Selling because I have recently upgraded to a Flex 5000). $500 firm. Local sale & pickup preferred.

RAC Winter Contest

Call: N8XX
Operator(s): N8XX
Station: N8XX

Class: SO CW QRP
QTH: MICHIGAN
Operating Time (hrs): 6

Summary:

Band	CW Qs	Ph Qs	CW Mults	Ph Mults
160:	0	0	0	0
80:	21	0	3	0
40:	24	0	4	0
20:	41	0	8	0
15:	17	0	92	0
10:	0	0	0	0
6:	0	0	0	0
2:	0	0	0	0
Total:	103	0	19	0

Total Score = 12,198

Club: Mad River Radio Club

Comments: Nice Contest, great conditions, what more could one ask?

Probably NOT to have a major station glitch! Yep, first time in my 60+ years of hamming that a chunk of coax broke during a contest. I thought the finals had for some reason gone out on my "trusty Drake TR-5." I could still hear signals, but no transmit power. Finally decided the rig was the problem, didn't dawn on me when receiving signal level came up dramatically as I was removing the coax from the back of the rig. (DUH!) The somewhat older TR-7 was put into service and it had no power. (That SHOULD have been clue.) About 30 minute later of fussing around, I figured that the coax between the rig and the matching until was defective. A new chunk of coax solved the problem!

Had to leave early - conditions were still great! But, an evening on the town with my lovely bride took precedence!

Thanks to the Radio Amateurs of Canada/Radio Amateurs du Canada for a fine festival!

Can anyone supply this need for a cloning cable & Software?

Contact Al Eckman, WW8WW aeckman@...
<mailto:aeckman@...>
if you have one each which could be used for a few days for the Lowell Youth Club's effort.
==========

Hank. Do you know of anyone I could borrow the Yaesu Ft-60 software and cloning cable from. Our youth club members are going to that handheld. In fact, we have 4 of the handhelds that just arrived. I have the software & cable ordered but it will be several days before it will be delivered.

Hi, I have a USB cable for the FT-60R. I'm in East GR, if someone wants to pick it up, you can use it until your new cable(s) arrive.

If interested, just shoot me an email.

Regarding software, CHIRP is free but I recommend G4HFQ's FTB60 ($15).

3057. Winter Storm Warning

Yahoo group: GRARA
Date: 2015-12-28 14:33:24 UTC
From: Hank Greeb
Topic: 3057 Message: 3057

From the National Weather Service Grand Rapids, courtesy Tom, K8TB, via the West Michigan Hams Reflector - Thanks Tom!

1. It may not be nice in the next few days...
Posted by: "Tom" k8tb@... k8tb_en72
Date: Sun Dec 27, 2015 2:25 pm ((PST))

*URGENT - WINTER WEATHER MESSAGE
NATIONAL WEATHER SERVICE GRAND RAPIDS MI
353 PM EST SUN DEC 27 2015

Winter storm warning in effect from 10 am Monday to 6 am EST Tuesday...

The national weather service in Grand Rapids has issued a winter storm warning.which is in effect from 10 am Monday to 6 am EST Tuesday. The winter storm watch is no longer in effect.

Hazardous weather...

* Sleet and freezing rain are expected from Monday into Monday night.

* Ice accumulations of one quarter to one half of an inch are possible between 10 am Monday morning and 5 am early Tuesday morning.

* Strong east winds of 20 to 30 mph with gusts to 40 to 50 mph are expected Monday afternoon and evening.

Impacts...

* Significant icing on trees and power lines.

* Strong winds and icing may lead to widespread power outages.

* Travel could be dangerous to nearly impossible.

* The Monday afternoon and evening commute will be impacted...as the precipitation will spread in during the day

Precautionary/preparedness actions...

* Now is the time to ensure you have gas for backup generators and deicing material for you sidewalks and driveway.*

3058. N8XX, National Parks on the air, January 1, 2016

Yahoo group: GRARA
Date: 2015-12-29 01:05:58 UTC
From: Hank Greeb
Topic: 3058 Message: 3058

I just found out that the North County Trail has been authorized for the National Parks On the Air (NPOTA) event. For general info on this year long event, see
http://www.arrl.org/npota

So, I'll be out on the trail

North Country National Scenic Trail
NPOTA # TR04
Call used N8XX
Start Time 2016-01-01 17:00Z
End Time 2016-01-01 19:00Z
Start and end times are approximate. I'll be operating QRP, battery powered, CW only. Frequencies around 7030, 10116, and 14060. If you hear me or work me, please spot me on the DX cluster network

I'll appreciate any and all contacts. Exchange will be RST and Unit number (TR04) for me, for people not at a National Park or affiliate, a RST is all that's necessary. (I'll accept a RST plus S/P/C).

Thanks in advance for your support.

Note, you do NOT need to be portable, I'll gladly work you if you're in the comfort of your home shack. :)

72/73 de n8xx Hg
QRP >99.44% of the time

Op Note: Lest anything think this isn't related to contesting, I say it's similar to the W1AW portable operations during 2015, which had many features in relation to contesting.

Topic: 3058 Message: 3061

Hi, John:

Thanks for the inquiry. And pardon my lack of defining an acronym before I used in in a sentence. S/P/C is State (USA)/Province (usually Canada*)/Country
* Of course, this is a look at the world from the vantage point of the USA. One example of another view: Worked all Germany contest requires copying of a province (state) and a few other administrative units within Germany.

RST is typically not even checked, and most people use 599 or 59 (for Sideband)

Logbook of the world doesn't even store the RS(T), I've been told, but don't hold me to that, it's only hearsay.

I'll accept anything a person sends, 221 for RST is OK with me. :)

The idea is to
1. activate as station operating from an "administrative unit" like I'll be doing on Friday, or
2. to contact the station who is within a unit administered by the National Park Service, like I hope you and others will be attempting to do.

The weather forecast is for a somewhat low temperature, but I'll stay inside my automobile, so things should work out OK.

One problem is that my "Plan A" operating site (Russel Street near Summit)j near Russel hasn't been plowed of sn*w. I might have to go to plan "B" which is somewhere close to downtown Cedar Springs or Rockford. Last time I was at Cedar Springs it had lots of RF noise, but Rockford is considerably lower in elevation. I may go to both locations tomorrow or Thursday and see how propagation goes from each place.

And, I sure hope you're around on Friday between noon and 2 p.m. to work me!

3062. [GRARA] Verizon Antenna Project status 1-3-16

Yahoo group: GRARA
Date: 2016-01-04 02:53:22 UTC
From: stprovost@...
Topic: 3036 Message: 3062

Hello, at the next GRARA meeting I will have all the details on this project.

I have received Ron's latest email stating how he will setup his ATV connections to his antennas on the new tower.
I will be working with Joe WD8USA on getting the MARS equipment installed and have T&W perform the needed adjustments on the radio and diplexer.

We have received all the radios, antennas, and cabling as promised by Verizon.

On Jan 4th, 2016; the tower crew will be on site to finish the cabling process.

We did have one expense that has been approved by Tom N8DGD for this project.
We needed to purchase covers and other hardware for the cabling piping and cable holes in the walls.
This expense is around $800. I have forwarded this quote to Tom and Rich Douglas via email.

I have several spools of Times Microwave LMR 600 Ultraflex cable that GRARA can sell to offset this cost.
I believe we have 11 spools with at least 100 feet of cable on each spool.

I will have a spreadsheet ready by the next meeting that will show how much GRARA has received in equipment and new antennas from this project.

stephen

From: Tom
Topic: 3064 Message: 3064

Now that the New Year is behind us, it's time to start thinking about
STORM SEASON!
The Ottawa and Kent County SkyWarn Teams are proud to present

NWS SkyWarn Basic Spotter Training

Click on the link below to register for the class.

https://skywarn2016.eventbrite.com
<http://kentcountyskywarn.us10.list-manage.com/track/click?u=7d8d0bd94fab9459d33b16cfe&id=364db619a1&e=f576fa211f>

Please share this email with anyone you feel would be interested in
attending this training.

View this email in your browser
<http://us10.campaign-archive1.com/?u=7d8d0bd94fab9459d33b16cfe&id=bdc29ef538&e=f576fa211f>

This course covers the basics of being a SKYWARN Spotter. The goal of
the course is to provide baseline training for all spotters through
multiple modules covering the procedures for spotting (including
communication and spotter report criteria) and safety considerations for
all hazards.

NOAA's National Weather Service
<http://kentcountyskywarn.us10.list-manage.com/track/click?u=7d8d0bd94fab9459d33b16cfe&id=5599edc302&e=f576fa211f>
meteorologists across the country could use a hand – or more precisely
extra eyes – to help them produce the most accurate weather information
possible. If you are fascinated by weather, you have the opportunity to
become a trained volunteer SKYWARN®
<http://kentcountyskywarn.us10.list-manage2.com/track/click?u=7d8d0bd94fab9459d33b16cfe&id=6f68bf5368&e=f576fa211f>
storm spotter for your local weather forecast office.

Storm spotters provide valuable information on all types of weather
hazards to meteorologists in their local National Weather Service
forecast offices. Meteorologists use this information, especially when
it comes to severe storms, to create a more complete picture of area
weather conditions.

The SKYWARN program helps improve the timeliness and accuracy of weather
warnings. When coupled with Doppler radar imagery, satellite and other
data, reports from storm spotters help forecasters know exactly what is
happening on the ground with rapidly developing storms.

“The more lead time we can provide with our warnings, the more time people have to take cover from life-threatening storms,” says Christopher Maier, who oversees the national SKYWARN program.

The Ottawa and Kent County SKYWARN groups are proud to once again offer this training to the residents of the counties surrounding the NWS office in Grand Rapids, Michigan.

The SKYWARN training will be held at the Jenison Center for the Arts, located at...

8375 20^th Ave

Jenison, MI 49428

*_Please enter off the Bauer St. entrance, just north of the Center. _*__

Our training this year will be held February 26th 2016, beginning at 6:30pm. Doors will open at 5:30pm. There will be several organizations with booths set up for you to enjoy. Please feel free to arrive early to take a look around and reserve your seats.

PLEASE REMEMBER TO PRINT AND BRING YOUR TICKETS WITH YOU FOR ADMISSION.

FAQs

Are there ID requirements or an age limit to enter the event?

There are no age limits or requirements for attendees, however this event is best suited for those ages 11 and up.

What are my transport/parking options getting to the event?

Please enter from the Bauer St entrance, located just North of the Center. Ample parking is available, however if the lot fills up - please use the Jenison Jr. High School parking lot located south of the Center.

Is my registration/ticket transferrable?

Sorry, your registration is not transferrable to another attendee.

Can I update my registration information?

You may update your registation information as many times as you wish, up to the actual event.

Do I have to bring my printed ticket to the event?

Your printed ticket will help faciliate a quick and easy entrance for everyone, however if you forget your ticket - your registration can be looked up online at the entrance to the facility.

The name on the registration/ticket doesn't match the attendee. Is that okay?

Your ticket holds information that we collect for use with the National Weather Service and SKYWARN activities. Please update your ticket information to include your correct name and contact information.

Share this event on Facebook <http://kentcountyskywarn.us10.list-manage.com/track/click?u=7d8d0bd94fab9459d33b16cfe&id=185e3f83af&e=f576fa211f> and Twitter <http://kentcountyskywarn.us10.list-manage.com/track/click?u=7d8d0bd94fab9459d33b16cfe&id=8f6290d763&e=f576fa211f>

We hope you can make it!

Cheers,
Ottawa / Kent Skywarn

3065. NPOTA update

Yahoo group: GRARA
Date: 2016-01-14 02:08:53 UTC
From: Jack Amelar
Topic: 3065 Message: 3065

A follow-up to what I wrote last month about the ARRL sponsored National Parks On The Air (NPOTA). https://npota.arrl.org
As I'm sure you are aware, the status of the North Country National Scenic Trail has been elevated by the National Park Service (NPS) so is now included in the ARRL list of qualifying NPS Units. The ARRL code is TR04.
But note the bill before congress, HR3511 and S1074 ☐The National Scenic Trails Parity Act☐, is still valid. Passage would elevate the NCT to full NPS Unit status. Since the trail now qualifies for NPOTA, why should we care? Because the Lowell NPS and NCTA offices are supporting us as much as they can, read on. And besides, it's the right thing to do for our area. Contact your Congressman (HR3511) and Senator Stabenow (S1074) to urge their support. Senator Peters is already a cosigner to S1074, send him a thank you. Information to who your Congressman is and how to contact your Congressman and Senators is at https://www.congress.gov

I stopped in the Lowell NPS office and NCTA office, they are next door to each other. Talking with Superintendent Mark Weaver at the NPS office, he is very enthusiastic about ham radio participation. You may have read his welcome in the January 7 ARRL Newsletter. His biggest request is to be sure to upload any operations to the Logbook of the World. He will be using this data in support of the trail. Mark, BTW, is studying for his Technician Amateur Radio license.
Keep in mind, although the trail is national, most of the land the trail passes on is not. On Michigan State Game Areas, County/State parks, etc., day use is generally OK. To do an overnight operation, you need to obtain a permit from the DNR or Parks. Much of State Forest and National Forest areas allow boondocking, but be sure you are in an area allowed and follow their rules.

At the NCTA office, I talked with the Executive Director Bruce Matthews. I got the same enthusiastic response from him. They know who we are and are very supportive of us, which is why we should support them by supporting the bills in congress.

One of the NPOTA rules, besides operating with-in 50 yards of the trail, is for documentation of an operation.
☐An official 'cancellation' from the NPS unit☐s 'NPS Passport Program.' This is a free date/location ink stamp available for most NPS units, available at each unit☐s main Visitors Center or Ranger Station. This is the preferred method of verification and should be sought out by Activators first. More information on the NPS Passport Program is available at en.wikipedia.org/wiki/National_Park_Passport_Stamps☐
Other forms of documentation are accepted if requested by the ARRL. If

you want an NCT Stamp, the stamp is located at the NCTA office, not the NPS office. You can bring or mail in a copy of your log and they will gladly stamp it for you. Be sure to enclose an SASE for mail in.
The address is NORTH COUNTRY TRAIL ASSOCIATION, 229 East Main St., Lowell, MI 49331. Their hours are Tuesday-Thursday 1:PM-4:30PM, Friday 10:AM-4:30PM. If arriving in person, they encourage to call ahead (616)897-5987. Website http://www.northcountrytrail.org

In NCTA's January edition of the Blue Blaze Bulletin, sent out the 13th, there is a nice shoutout for ham radio and the New Year's Day operation by Hank N8XX:

NPS and Ham Radio put NCNST on the Air!

As part of its year-long centennial celebration, NPS has teamed with amateur radio to give ham operators incentive to operate from parks and trails to tell the world about the NPS system.

There were 70 NPS units "activated" over New Year's, and our own NCNST was one of the first on the list! Hank, callsign N8XX, operated from the Trail in the snow near Rockford, MI and made 55 contacts.

Hundreds of amateur operators have already jumped in, and making these special contacts is becoming a global competition. The word is getting out!

Learn more about how the National Association for Amateur Radio (AARL) is working with the National Parks Service to mark the National Park Service Centennial in the link below.

So with an NPOTA qualified unit so close to many of us, let's have fun this year.

WEST MICHIGAN AREA AMATEUR RADIO BANQUET
Announcing the 21st ANNUAL
West Michigan Hams
GET OUTTA THE CABIN DINNER
Formerly called “The New Hams Dinner”
SPONSORED BY:
www.w8dc.org www.w8lrc.org www.hollandarc.org
SATURDAY, FEBRUARY 27, 2016, 1:30PM
At the OLD COUNTRY BUFFET
IN ROGERS PLAZA
1038 28th St SW (Hwy M-11), Wyoming, MI
From the US-131 expressway, exit #81, 28th St (Hwy M-11), head west past
Clyde Park Ave, turn left into
Rogers Plaza. The restaurant is inside near the west end of the plaza.
BRING YOUR SIGNIFICANT OTHER, the KIDS, FRIENDS, anyone involved or
interested in ham radio is
welcome, regardless of any club affiliation. In tradition, we especially
like to encourage and welcome any new
licensees or new to the area hams. Dress casual.
LET THE NEW HAMS KNOW WE WELCOME THEM, and enjoy each others company
without the need to
split so not to miss that hamfest deal! And you don’t want to miss out on
the door prizes, nothing spectacular like
a new rig, but a prize is a prize. We’ll all have a good time!
Buffet style. Pay at the door. Normal restaurant rates, gratuity apply.
No reservations, just show up.
Questions? Contact Jack NY8D, callsign @..., (616)438-5412

From: stprovost@...
Topic: 3068 Message: 3068

Hello, on Saturday Jan 30th at 10am, I will be at the red cross radio room to assist a vendor in managing the cabling between the red cross radio room and the new remote radio room located in the red cross garage.
All are welcome to come and help out and see what we have going on.
I know this is late notice (sorry), but the vendor confirmed with me today around 4pm that he will be there.

3076. GRARA announces cable for sale and 7 slots available at Hamvention 2016

Yahoo group: GRARA
Date: 2016-02-10 04:16:03 UTC
From: <stprovost@...>
Topic: 3076 Message: 3076

Hello, GRARA has recently finished the verizon project and has high end
Times Microwave Systems LMR600 ultra flex cable to sell.
We are asking $2 per foot.
Upon review on the internet, pricing ranges from $2.60 to $7.50 per foot
for this top of the line cable.
Use this link for a pdf on this great cable:
https://www.timesmicrowave.com/documents/resources/LMR-600-UF.pdf

If interested, please contact Stephen AC8QE at 616-648-5983 (cell/text)
or email at stprovost@...

Hamvention 2016 lodging options
GRARA has two 6 people suites at the Dayton University South tower.
This is the location that has parking right outside of the tower.

We have seven slots left to fill.
The charge is $100 for thursday night to monday morning stay per person.
You can come later or leave earlier for this great rate!
If interested, please contact Tom N8DGD at n8dgd@...
Details about Hamvention 2016 at http://hamvention.org

Any questions, please contact Stephen AC8QE at stprovost@...

3077. February LARC mtg, NPS guest speaker

Yahoo group: GRARA
Date: 2016-02-10 14:48:38 UTC
From: Jack Amelar
Topic: 3077 Message: 3077

The February meeting of the Lowell Amateur Radio Club is this Saturday, 13th.
We will welcome Mark Weaver, Superintendent of the North Country Trail
Lowell NPS office. He will discuss the trail and our role in the year
long ARRL NPOTA.

We will also be voting on bylaw amendment proposals.
All are welcome, only paid LARC members may vote on the proposals.

The "shack" opens 9:30AM, meeting 10. 11535 Fulton St E (Hwy M-21),
just west of the Lowell Meijer. Look for the 100 foot tower on the
north side of Fulton at the Flat River Outreach Ministries building.

LARC will have flea market spots at Dayton Hamvention(r) next to GRARA
this year. Flea market reservation and ticket purchase will be
finalized at the meeting.
Email from Stephen AC8QE for accommodations was sent. The floor plan
for the South Tower may be viewed at
https://www.udayton.edu/studev/housing/residential-facilities/secondyearhousing/Campus%20South/campussouthfloorplan.php

3080. Tonights VE test session

Yahoo group: GRARA
Date: 2016-02-13 03:02:37 UTC
From: Tom
Topic: 3080 Message: 3080

It may have been cold outside, but it was 74 degrees and sunny inside the Red Cross Building in Grand Rapids tonight.

First up were two "regular" citizens who took and passed their technician class exam.

Congratulations to Glen Johnson from Sand Lake and to Hercules Andrus from Lowell on their techs.

Then we had two techs step to take their general, and they passed.

Congratulations to Joshua Hoekwater from Jenison, KE8CWW and to John Kuiphuf, KD8KMA, from Holland, on their generals.

And from the GRARA/Holland general class being held at the Red Cross, testing out early were three of the students:

Ron Alberda, KD8ZWB from Wyoming and Doug Ballast, KE8BZF, from Rockford took and past their general.

But the shining star was the general class student Bob Anderson, KD8ZVX, from Belmont who took and passed his general.
Asked if he wanted to take the extra, Bob said yes. 35 minutes, Bob became an extra. Cool moment there.

If you run into or hear any of these folks on the air, congratulate them.

Tom K8TB

I heard at the last meeting that there was going to be a technical presentation of some sort. Any word on what that will be? It might encourage a few more people to show up!

If we don't publicize these presentations, the folks who come expecting the same old humdrum drivel of endless "club business" will be the only ones who show up.

Date: 2016-03-03 21:00:13 UTC
From: Hank Greeb
Topic: 3086 Message: 3086

Please note:

The ARRL International DX Contest, SSB: 0000Z, Mar 5 to 2400Z, Mar 6
will start at 7 p.m. Friday, and run to 7 p.m. Sunday (Eastern Time).

In past years a few of us have activated W8DC for part of this time. I
don't know what kind of antennae we have for the station at this time,
so I don't know if participation this year is feasible.

Anyway, Lettuce talk about this on Friday evening, and see if we have
any*suckers... errr...* volunteers who wish to partake of the event.

Marcelo:

Sure, anyone interested in ham radio is cordially invited to the GRARA meetings. Sounds like many folks has small lots and/or live in apartments, so the subject of antennas suitable for use in apartments and similar locations should have wide applicability and of interest to many.

3091. The "It's Almost Spring" Fox Hunt... Saturday March 12

Yahoo group: GRARA
Date: 2016-03-05 00:47:23 UTC
From: Tom
Topic: 3091 Message: 3091

Warm up your antennas, charge your batteries, and gather up your maps. Hunting season is open - and you don’t even need a license for this one! For the first time in a while, we’re having a Fox Hunt! The “Spring is Almost Here” hunt will be held on Saturday morning, March 12. Starting place will be the Family Fare parking lot (6480 28^th Street in Hudsonville, crossroads of Port Sheldon & 28^th). Be there, get your odometer reading recorded, and be ready to take off at 9:00am. You’ll have two hours to roam the countryside looking for the vixen (female fox) before we call it quits and meet up for the post hunt session where we’ll hear all the coulda, woulda, shoulda excuses.

If you have fox hunting equipment, bring a friend along and show them the ropes. If you don’t have fox hunting gear, just show up and ride along with one of the so-called experts. Remember - being inexperienced doesn’t mean you can’t win. Bring the family! (Families – bring something to occupy yourselves during the two hour car ride.)

The details are that transmissions will be on 145.530 Mhz, with the backup frequency of 145.580 Mhz. The vixen will be hiding within ten crow flying miles of the starting point and will be using a foxbox, transmitting one minute on and two minutes off.

Let’s plan on a long, fun hunting season this year.

88,

K8AJ

3092. Ham In A Day - Saturday, March 26

Yahoo group: GRARA
Date: 2016-03-05 04:27:11 UTC
From: Hank Greeb
Topic: 3092 Message: 3092
Attachments: 1 described; binary payloads are missing from this source WARC

Since the attachment might not make it through the Yahoo Groups system,
I transcribed the text of the pdf attachment which was sent to me about
a Ham In a Day course. If the attachment makes it through, it is
probably more easily read.

==========

Muskegon County Emergency Communication Services and Muskegon Area
Amateur Radio Council in cooperation with Muskegon Community College
Present:

HAM IN A DAY

HIAD is an intense exercise in the use of memory. All of the correct
answers will be shown during the class and some discussion will take
place but the exam will be based on the applicant's ability to remember
the correct answers.

Five (5) reservations are needed by March 20 to be able to conduct the
class and test session.

Please contact Tom Porritt (see below) to reserve a spot. The contact
information you provide will be used in case the class needs to be canceled.

Date: Saturday, March 26, 2016
Time: 9AM to 3PM
Location: Muskegon Community College
221 S. Quarterline Road
Muskegon MI 49442
Rm 1204 and Rm 1206 (Stevenson Center)

Classwork and Training 9:00AM to Noon

Lunch (on your own) Noon to 1PM

Practice Testing 1PM to 2PM

Exam: 2PM to 3PM

Cost: class is free: $15.00 for the exam (correct amount and cash preferred)

Picture ID required for the exam

For more information and to reserve a spot contact: Tom Porritt, K8EOD
231 955-6857

To:

All,
Please find attached an announcement for a Ham In A Day class to be held at Muskegon Community College on March 26, 2016. I hope you will know someone who is interested in ham radio and could benefit from this opportunity and will pass the flyer on to them. The deadline for reserving a spot is March 20. We can accommodate about 15 participants which is determined by the number of spaces in the computer lab.
Tom, K8EOD

3093. Reminder, this Saturday, The "It's Almost Spring" Fox Hunt... Saturday March 12

Yahoo group: GRARA
Date: 2016-03-10 19:29:24 UTC
From: Tom
Topic: 3093 Message: 3093

Just a quick reminder,

Warm up your antennas, charge your batteries, and gather up your maps. Hunting season is open - and you don’t even need a license for this one! For the first time in a while, we’re having a Fox Hunt! The “Spring is Almost Here” hunt will be held on Saturday morning, March 12. Starting place will be the Family Fare parking lot (6480 28^th Street in Hudsonville, crossroads of Port Sheldon & 28^th). Be there, get your odometer reading recorded, and be ready to take off at 9:00am. You’ll have two hours to roam the countryside looking for the vixen (female fox) before we call it quits and meet up for the post hunt session where we’ll hear all the coulda, woulda, shoulda excuses.

If you have fox hunting equipment, bring a friend along and show them the ropes. If you don’t have fox hunting gear, just show up and ride along with one of the so-called experts. Remember - being inexperienced doesn’t mean you can’t win. Bring the family! (Families – bring something to occupy yourselves during the two hour car ride.)

The details are that transmissions will be on 145.530 Mhz, with the backup frequency of 145.580 Mhz. The vixen will be hiding within ten crow flying miles of the starting point and will be using a foxbox, transmitting one minute on and two minutes off.

Let’s plan on a long, fun hunting season this year.

3094. Intergalactic PI Day/Einstein's Birthday 3.14.16

Yahoo group: GRARA
Date: 2016-03-11 14:06:52 UTC
From: Hank Greeb
Topic: 3094 Message: 3094

Yes, at least four quite (ir)rational operators will be celebrating

Intergalactic PI Day & Albert Einstein's Birthday on Monday, 3/14/16,
or 3.1416 if you denote the day in a slightly different day.

Look at the QRZ Web sites for

N4P (AKA K4AKC) @ http://qrz.com/db/n4p
N8P (AKA KD8DKU) @ http://qrz.com/db/n8p
W8P (AKA N8XX) @ http://qrz.com/db/w8p
N9N (AKA N9UXU) @ http://qrz.com/db/n9n

On each of these pages is description of the mathematical significance
of 3.1416, and a brief biography of Albert Einstein, who was born on
March 14, 1879.

Each of us are (ir)rational enough to believe that this is worthy of a
celebration, and what better way to celebrate is to get on the air, have
a few QSO's, and generally spread the word.

Tentative operating schedules for the day are on each of the above web
sites beginning at 0000Z and ending at 2359Z. There will be CW, SSB,
PSK31, and other modes!

Please pass the word!

3095. Intergalactic PI Day/Einstein's Birthday Added Info

Yahoo group: GRARA
Date: 2016-03-13 11:51:42 UTC
From: Hank Greeb
Topic: 3095 Message: 3095

There is one more quite (ir)rational operator who just joined the fray for operating during the celebration of Intergalactic PI Day & Albert Einstein's Birthday on Monday, 3/14/16.

This is Chas, W2SH, who will be using the special event call W2P, operating from New Jersey. So far Chas has not listed his operating schedule, but look for him on CW and SSB, QRP.

The operating schedules PI Dar day begin at 0000Z Mar 14 and end at 2359Z. There will be CW, SSB, PSK31, RTTY and other modes! Look for us W2P, N4P, N8P, W8P, and N9N! If you work any of us, please spot us on the DXcluster network (DXwatch.com or any other web based spotting site, or your favorite Telnet Dxcluster.)

Please pass the word!

3096. 2016 River Bank Run

Yahoo group: GRARA
Date: 2016-03-14 13:30:19 UTC
From: jamelar@...
Topic: 3096 Message: 3096

River Bank Run 2016 Communications Volunteer Sign up

If you cannot read this email please go to: http://www.kcest.org/rbr

Why should you help out with the 5/3rd River Bank Run?

1. As amateur radio operators we should give back to the community.

2. Time to dust off those radios and hone our communication skills.

3. Great opportunity to show the community what ham radio operators can do to support their community.

4. For those of you who volunteer in the emergency community it is a great time to work with other emergency service personnel.

5. See old friends.

6. We think this is fun.

Please pass this invitation along to your local clubs and friends.

Several things to keep in mind. We have 2 Events.

#1) The JR Event which we will need about 15-20 People to help. May 11th 2016 from 4PM - approximately 8PM

#2) The Main Event Which is on May 14th 2016 from 6AM - 1PM with varying end times.

We will also have a RBR Pre-Meeting on Friday May 13th 2016 at KCSD

701 Ball Ave from 6:30PM - 8:30PM. (We need about 80-85 People to help with the main event in various positions)

For those who have never worked the River Bank Run.

This is the PREMIER Communications event in Kent County. This event is one that you'll enjoy and come back every year for more! The RBR event is HUGE and keeps growing!

Please sign up @ http://vrm.cc/rbr

Any questions please email: rbrsafety@...

3097. Results from the "It's Almost Spring" Fox Hunt. And a word about an upcoming one!

Yahoo group: GRARA
Date: 2016-03-17 00:55:29 UTC
From: Tom
Topic: 3097 Message: 3097

This past Saturday, March 12, at 9AM, we had a bunch of people show up for our first fox hunt in quite a while. They included:

Nick, KB8JBG
Ken, AC8OF
Mike, W8XMI and Bob, KD8QIJ
John, KE8ARJ and his son John
James, K8JHR and Chuck, AJ8W
Bob, K8EIO and Mike, KB8KB
Mike, W8DER
Dan, N8DJY and Tom, K8TB

The vixen was in the parking lot at the Family Fare at Byron Center and Gezon Parkway, running 10 watts to a roof mounted 1/4 wave mag mount antenna.

Three vehicles found her:

Dan and Tom, 8.6 miles
James and Chuck, 10.6 miles
Bob and Mike (K8EIO/KB8KB), 15.4 miles (1st hunt)

There were four cars that had never hunted before.

It has been decided that we need a "tune up party". So put April 30, 2016 (Saturday) on your calendar. At 10AM, we will meet at the Douglas Walker Park, located at 1195 84th St. SW, Byron Center, MI. This park is 1.25 miles west of US 131, exit 74. Talk-in will be the IRA repeater, 147.16+

There will be at least three Micro-Foxes hidden in the park, which will allow you to take your time to calibrate your equipment, and pick up some of the nuances of fox hunting. At 12 noon, once again, there will be a hidden transmitter hunt. The transmitter will be within 8 miles of the park, and will be a simple set up transmitting from the car.

Put April 30th at 10AM on your calendar, and plan on a good time.

In case of a downpour, this event will be rescheduled.

73 de Tom K8TB

3098. Kent County Auxiliary Communications (ARES/RACES/AUXCOMM)

Yahoo group: GRARA
Date: 2016-03-19 16:08:39 UTC
From: jamelar@...
Topic: 3098 Message: 3098

All:

Kent County ARES / RACES is restarting its auxiliary communications program. We will be holding a meeting on March 24th 2016 at the Kent County Sheriffs Department. Starting at 7:00PM. The building is secure, so you must arrive a few minutes before 7PM to get in. Doors will be open starting at 6:30PM.

If you have an interest in participating please sign up using the link below.

http://vrm.cc/auxcom

We will be discussing the following at this meeting:

- Whats the plan
- 2016 Calendar
- Application process for RACES specific members
- Go Kits
- Skywarn 2016

Date: 2016-03-22 02:33:47 UTC
From: jamelar@...
Topic: 3099 Message: 3099

For those who are looking for basic SAR training.

Our Spring Operations class.

Please share with your folks.

Saturday, April 2, 2016 from 8:00 AM to 11:00 PM (EDT)

To sign up or check out our other upcoming trainings:

http://www.kentcountysar.org/training-classes/

The most comprehensive and highest quality class in the state of Michigan. This Class (Sponsored by Kent County Search and Rescue) is a crash course in search and rescue operations. Following the standards outlined in the FEMA (Federal Emergency Management Agency) Working Group, this class is designed for the professional responder.

The course begins with a 6 hour lecture on many aspects of search and rescue as practiced by professional teams around the United States.

The topics include, SAR Resources, Legal Aspects, Incident Command, Lost Person Behavior, Rapid Search Techniques, Search Patterns, Techniques for increasing detection, Man Tracking Concepts, Containment Techniques, Search Management, K9 operations, and a variety of other topics to prepare the individual to serve as a Search and Rescue responder.

3100. Ride for Wednesday?

Yahoo group: GRARA
Date: 2016-03-23 02:49:28 UTC
From: UncleFester@...
Topic: 3100 Message: 3100

Haven't been around for quite a while. I first ran out of cash, then out of car, then out of health. Dialysis started almost a month ago, and it seems like it's all I do -- sit in the chair for four hours, then recover from it.

If anyone lives convemniently close to Shaffer and 32nd in Kentwood (South of WOodland Mall) and is going to Open Mic tomorrow (Wednesday), can I get a ride both ways? My phone is six three five four four six two.

"(d) Club Competition – Scores attributed to any amateur radio club will be credited towards that club."
Sounds like it is a 'club aggregate' - although not worded clearly or explicitly so. I interpret this to mean that I could operate from my home station, and attribute the score to GRARA (although if the weather is good that day, I will probably be out with my flying toys!)

Can we get clarification on this?

3108. Ann Arbor to Hamvention Bus

Yahoo group: GRARA
Date: 2016-03-24 01:45:48 UTC
From: John Wasciuk
Topic: 3108 Message: 3108
Attachments: 3 described; binary payloads are missing from this source WARC

March 23, 2016

2878 Ticknor Ct

Ann Arbor, MI 48104-6921

Dear Radio Amateur Club Members,

Here is just a gentle reminder of the Dayton Hamvention Bus Trip from Ann Arbor, Michigan to Hara Arena on May 21, 2016. We guarantee the *most fun, most prize-filled* ham radio bus trip anywhere in the world!

As in years past, The Arrow Communication Association is sponsoring a bus trip from Ann Arbor to Hara Arena and back. The date is Saturday, May 21. We leave the park-and-ride at 4:30 am and get to the show at 8:00 am. We leave Hara at 5:30 pm and arrive back to our large park-and-ride site by 8:30 pm. A continental breakfast is included on board. Even if you come from out of town, you still relieve yourself of almost 8 hours of drive time! What more could you ask for?

There is more. If you want to sell your stuff in the flea market, we have reserved a space there just for you! Every year, Arrow reserves a swap spot just for the bus trip crowd. You save $70.00. All we ask is that you keep your items to a reasonable limit and that you volunteer at least one hour of your time at the swap tables. (We just ask that you keep your amount of sale stuff reasonable, to give others room on the swap tables!)

There is still more! As in the past several years, we are giving away *DOOR PRIZES*! In 2016, we have *OVER $1,400.00* in donations from Ham Radio Dealers around the U.S! (And Germany and India!!) Please see the list at the end of this email! You read correctly: One-Thousand Four-Hundred. Even if you have to drive from Escanaba (in the moonlight! It *will* be full moon on the 21st.) It will be worth your while to come on this trip. The list is growing!

I just want to thank a few of our sponsors (more than 20 of them). Actually, I would like to see more than *$1,400.00* *in donations*! There was an email response from a beam antenna manufacturer who has been in business since before I became WN8TON fifty years ago. They asked for a final possible ship date. While nothing is certain, I’m hoping. Shucks, maybe some well-to-do DXer will offer us a K3s (I can dream, can’t I?)

Heil Sound: Our top prize. Bob Heil has given us a great prize for years. I read that his audio enterprise is celebrating fifty years in the rock-n-roll concert PA business. I wonder if he can get his old buddies Pete Townshend and Roger Daltrey to perform an unplugged version of “Magic

Bus" for us next year?

EAE Sales: Our second-place contributor so far. You've met Bruce Sander at numerous ham swaps in the 8th and 9th call areas. EAE Sales is the third successful career for Bruce. Amazing! Among other things, he's given us a EDSYN 951SX Soldering Station.

DX Engineering: Three 24 hour analog wall clocks with the DX Engineering logo. Beautiful to behold!

Five Dash, Inc.: Retired Purdue Engineering Alum Tony Parks, KB9YIG, has been doing *Software Defined Radio* for over ten years since he introduced the "Softrock 40" receiver. There is a Yahoo Group devoted to his receivers and transceivers. Kit or built, Tony's products are still the easiest – and most fun – way of getting into SDR. He has been reviewed in both ARRL publications QST and QEX. He offers us a built-and-tested one-watt SDR transceiver for 80/60/40.

Tigertronics: SignaLink USB Interface. More digital modes than you can name, I'll bet!

Mike's Electronic Parts: Crystal sets you can build with your grandkids!

Skilman: 6-CD Morse Code Course designed by a PhD in learning and memory. Simply outstanding!

RT Systems: Gift Certificate for their great rig-programming software. She even included a small gift for each passenger!

Borden Radio Company: WB5REX is a retired NASA/Shuttle Communications Engineer. He sells a number of nostalgic type radio kits. For you "old-timers" (and OTs at heart), he's given us a classic one-tube regen receiver for the AM Broadcast Band with instructions on how to wind the coil to cover 80 and 40 meters. Maybe you'll be able to tune George and Gracie?

Ham Radio Outlet: This is the third year they have been generous with us. We generally get a big box filled with ARRL Repeater Directories, Yaesu DX Wall Maps, Icom Pens, Kenwood Flashlights, QSTs, and more – a gift for nearly everyone!

And there is even MORE!

Please Note! If anyone purchases their bus seat *BEFORE APRIL 1*, the ARROW club will be having a drawing to give away A HAMVENTION TICKET to TWO of these early birds on our April 13 meeting! You can still use *PayPal* on our web link:

http://www.w8pgw.org/activities/dayton-bus-trip/

The cost is $60.00 for the round trip. (This increases to $65.00 on or after April 1.) Please mail all applications to ARROW Communication Association, 3322 Yellowstone Drive, Ann Arbor, MI 48105. *Please note that

this does not include the Hamvention ticket.* That one you'll have to do yourself! You may also use the link below to purchase a seat using *PayPal.*

We are trying to generate as much publicity as possible, which is why we are writing you. If you can, please share this information as widely as you are able. If you have a web page, please consider adding a paragraph about the trip and a link to http://www.w8pgw.org/activities/dayton-bus-trip/ or simply http://www.w8pgw.org. Talk it up on the air! If you check into a state wide or regional net, please mention it there, also. Feel free to include us in your publications.

We at Arrow deeply appreciate your help in this matter and we thank you.

Tom,
In the past I had an issue when I tried to do this for Michigan State University where it had to be an ARRL recognized contesting club. Is that different in the MIQSO Party?

"(d) Club Competition – Scores attributed to any amateur radio club will be credited towards that club."

Sounds like it is a 'club aggregate' - although not worded clearly or explicitly so. I interpret this to mean that I could operate from my home station, and attribute the score to GRARA (although if the weather is good that day, I will probably be out with my flying toys!)

Can we get clarification on this?

Does this count for GRARA folks like me who are going to another county to activate it? or, is it only for operation @ W8DC vs W8USA? IF it's a club aggregate score, count me in.

I didn't know anything about this last year, but I was at operating QRP, I think from Kent County.

Mike,

I dunno. The MIQSo party is not run by the ARRL. K8CC does it, and he changes the rules every year so his group can win. I've been thinking about getting the Holland club to run the combined score method, and join the fray. I'm going to look at the miqso party website and look at the rules.

Hank, and everyone else,,,

Hank, are you suggesting that we have a multi-club revival/challenge? Like a GRARA/MARA/LARC/HARC highest club wins?

Well, count the Holland club in. Oh minor problem, I checked the MIQSO website, and the Holland and Lowells clubs were not listed as "attributable" clubs. One email. and the folks at the MIQSO have taken care of that. So now, Holland and Lowell can compete with the , um, big boys.

I'll rally the West Coast Club, and we will all see each other April 16 and 17.

You have a great idea. I congratulate whoever thought of this challenge.

But, how about challenging the North Ottawa ARC (W8CSO), the Muskegon Area Amateur Radio Club (W8ZHO), the Allegan County ARC (AC8RC), the Montcalm Area ARC (N8MA), the The Auto State Young Ladies ARC (TASYL), The Barry Amateur Radio Association (K8BMI), West Michigan Venturing Crew (KD8PGT), The MICHIGAN VHF-UHF SOCIETY (AD8U), The WEST MICHIGAN LIGHTS AMATEUR RADIO CLUB, KD8SET

All as close as Holland is to Grand Rapids. Just because we, rather narcissistic and insular groups don't know about them is no reason to discriminate against them. As you say, any of these club who wish to join the challenge can become an "attributable club" with one message.

Maybe we should have a traveling trophy to the winner, inscribing the name/call letters of the winner for each year?

K8CC is in charge of the MiQP. He will recognize most any group which shows interest in a combined score of members plus their club station. In 2015, club aggregate scoring runs from several hundred thousand points, to a thousand or two for a club which had 2 entries. The idea is to get as many folks in the "fray" as possible.

To be recognized as a club desiring to be listed by ARRL in the club aggregate scoring the only requirement asking for such listing prior to a contest, and that 3 or more entries be submitted. I'm not an expert on the subject, but I believe that once a club is so listed, it needs not submit another request - just submit 3 or more entries in subsequent contests.

IF the MSU club wishes to be listed with the ARRL, that's all that is necessary. If it wishes to be listed as a club with an aggregate score listed for the MiQP, send a message with such request to David Pruett <k8cc@... <mailto:k8cc@...>>. I'm sure that Dave will oblige. And, since clubs with two entries are listed in the 2015 spreadsheet of club aggregate scores, it seems that the requirement for listing is 2 or more entries from a club need to be submitted. Good luck. I hope to work W8SH and/or WB8ZGL during the MiQP 2016!

Hank Greeb <n8xx@...> <mailto:n8xx@...>, GRARA@yahoogroups.com <mailto:GRARA@yahoogroups.com>, k8tb@... <mailto:k8tb@...>

All,

Most of what has been written on this thread is true, but some of it is wrong, most likely unintentionally.Since my callsign has been bantered about during the discussion, and falsely maligned by K8TB for some reason, I think it's only fair to set the record straight.

The club portion of the MiQP rules, published on http://www.miqp.org, states in section 6.d:

Club Competition – Scores attributed to any amateur radio club will

be credited towards that club. All clubs with two or more credited

scores will be included in an overall ranking of those scores with a

certificate awarded to the club with the highest score. It is not

necessary for the club to submit a roster or list of claimed

entrants.Michigan and non-Michigan clubs will be ranked separately.

Again, if we get two or more logs claiming to be part of a particular club, the individual scores are simply added up and the club name is credited with that score in the listings. There is no requirement to be an ARRL club, or for the club to pre-register to be included in the listing.The only requirement is to have two or more scores attributed to the same club name.This is consistent with the published MiQP rules.

BTW, the MSU ARC was listed in the 2015 MiQP club competition results with 130,544 points from logs submitted by NF8M, W8SH and W8JRK.The MSU ARC finished seventh out of twenty-one Michigan clubs.A link to the full MiQP listing of results from the 2015 MiQP as an Excel spreadsheet file is available at:

http://www.miqp.org/2015/MiQP_2015.htm

Some people get concerned because of the pull down list of club names on the MiQP log submittal site.They should not be worried if their club name does not appear there.If they submit a log for MiQP, but their club is not on the pull down list, as long as the club name in the Cabrillo file they submitted comes close to matching the logs of other club members, the club will get credit for their score.The club name from the pull down list is there for convenience and to provide clarity when necessary.For example, some people will just put the initials of their club name in their Cabrillo file and we have to guess what it is.If you live in the local area of the club (or perhaps are a member) you know what it means, but when the log checker lives 200 miles (or more) away, he's stuck trying to guess what it means :-(

For ARRL contests, a club has to be "ARRL-affiliated" to be in the club competition.To be affiliated it must submit a report to the ARRL listing things like the club officers, how many club members are ARRL members, the primary interests of the club, whether it has a newsletter or web site, etc., then the affiliation must be approved.For a club's affiliation to remain "active", this report must be updated with the ARRL annually or the club becomes "inactive".ARRL club rules require that after a contest, a club must submit a list of members eligible for their scores to be counted for the club in that contest, but it appears that this requirement is seldom enforced.

Now, to address K8TB's comments when he wrote:

On 3/28/2016 10:52 AM, Tom k8tb@... <mailto:k8tb@...>
[GRARA] wrote:

>

> Mike,

>

> at the rules.

>

> Tom

I became chairman of the Michigan QSO Party in 1999.The rules were clarified and published at that time.The club rules have not changed since.Tom statement that K8CC "changes the rules every year" has no basis in fact.

As for his comment "so his group can win", I am a member of the Mad River Radio Club.The MiQP rules specifically state in section 6.d:

As the sponsoring club of the MiQP, the Mad River Radio Club is

excluded from this competition, although its members may attribute

their scores for other clubs to which they belong.

So, have I not been changing the rules every year so that "my" group can win, the rules specifically state the "my" group *cannot* win.And just who authored this clause in the MiQP rules?I did...

Looking at the time stamp of Tom's e-mail, it appears he started hurling insults before he read the rules, and before he sent me an e-mail this morning asking to have the Holland ARC and the Lowell ARC added to the pull down list on the MiQP log submittal page.We responded to his request in at most an hour or two and let him know that we had done it. Further evidence that his accusations to the GLARA list were unfounded...

3117. Allegan County ARC Annual Trunk Swap, April 2

Yahoo group: GRARA
Date: 2016-03-30 10:26:52 UTC
From: Jack Amelar
Topic: 3117 Message: 3117

Allegan County ARC Annual Trunk Swap, (Saturday) April 2
Posted by: "C. Michael Long" madblogr

Allegan County ARC's Annual Trunk Swap is returning to the Salem Township Hall (http://www.salemtownship.org/) for the second year in a row, April 2, from 8AM-12PM with vendor setup at 7AM. Event will occur rain, snow, or shine. Admission is just $5 per car whether a vendor or an attendee. For more information, contact Jim Gillis, AC8AG.

73,
Mike
W6RP

Location is in Burnips in Allegan County, corner of 30th st (Inter County A37) and 142nd Ave. From US 131, Exit 68, west 9 miles.

3118. FW: Recommendations for activations on the North Country National Scenic Trail

Yahoo group: GRARA
Date: 2016-03-30 10:49:17 UTC
From: Jack Amelar
Topic: 3118 Message: 3118

Forwarding from "Weaver, Mark" <mark_weaver@...>, NPS
Superintendent, North Country National Scenic Trail:

I thought it would be a good thing to consolidate recommendations for
Centennial associated activations on the Trail.

My apologies since some of this may be redundant.

The National Park Service/North Country Trail does not "own/manage"
land thru which the trail passes. We are a partnership of various
public and private landowners, with each relationship often being quite
different. Most authority lies with the property owner.

Regardless of where activations are planned to occur it is imperative
to make contact and receive permission to activate from the "landowner".

For Federally owned lands, there is a list of contact information on
the Trail website:
https://www.nps.gov/noco/learn/management/trail-partner-organizations.htm

For other public lands- state, local, etc, we do not have a list- it
would be prohibitively overwhelming to collect it. Googling the name of
the public land unit should give you a number to call.

For private lands, we don't recommend that activations occur on private
lands. If for some reason it is important, please contact me directly
and I'll connect you with the North Country Trail Association state
trail coordinator who MAY be able to help.

When contacting public land managers seeking permission to have an
activation, ask to speak with their special events person. Be sure to
indicate that your actions are in direct support of their partner
National Park Service's 100th birthday. And if there is uncertainty
expressed by your contact, ask them to give me a call.

Don't do an activation without a hardcopy permission in hand.

Sorry for all the bureaucracy, I just want everything to go off without
a hitch.

Contact me with questions.

3120. 4 Week Notice, West Michigan Fox Hunt Practice and Hunt

Yahoo group: GRARA
Date: 2016-04-03 00:08:08 UTC
From: Tom
Topic: 3120 Message: 3120

A reminder that in 4 weeks, there will be a combined fox hunt practice session with a fox hunt.

When: Saturday, April 30, starting at 10:00AM

Where: Douglas Walker Park, located at 1195 84th St. SW, Byron Center, MI. This park is 1.25 miles west of US 131, exit 74. Oh, where we will be in the park is not known yet. Just look for a bunch of grown men twirling antennas like a baton. Or not. Talk-in will be the IRA repeater, 147.16+

What: Starting at 10:00AM, there will be at least four "Micro-Foxes" operating within the park. These will all be within walking distance. You will have plenty of time to assemble your equipment, and acquaint yourself with how it all works. The Micro-Foxes will operate on a 30 seconds on, 30 seconds off schedule. There will be one Micro-Fox that will be essentially on the air the entire time. This one can be used by you to check out different methods and equipment hookups.

At 12 noon, once again, there will be a hidden transmitter hunt. The transmitter will be within 8 miles of the park, and will be a simple set up transmitting from a car. Power will be around 10 watts to a 1/4 wave mag mount on the roof.

If you are interested in 2 meter fox hunting, but have no equipment, please stop by and observe us all in action. With a four week notice, you have plenty of time to either build your own equipment, or even buy it.

Recommended is to either build your own "tape-measure" antenna, or buy one. Look up "tape-measure" antenna on the Internet, and find plenty of instructions on how to build your own. If you would prefer to simply buy a kit, look at http://www.west.net/~marvin/wb2hol.htm

The next item you should have is called an "active attenuator". Again, look this up on the Internet, or you can buy a kit or assembled unit from KC9ON (in Gaylord, MI) at: http://kc9on.com/store/kits/fox-hunt-offset-attenuator/ There are others on the 'net, like Arrow Antennas, http://www.arrowantennas.com/main/4ofha.html . However, this one comes in at $59.00 Another more reasonable site is http://www.west.net/~marvin/k0ov.htm

There is an amazing amount of information on the Internet about 2 meter Fox Hunting. It's fun, and you learn a lot about your equipment, multipath and strategy.

This event is open to all in the west Michigan area. We are aware of pockets of activity and interest in Muskegon, Kalamazoo and other west Michigan cities. You are more than invited to join us.

Put April 30th at 10AM on your calendar, and plan on a good time.

In case of a downpour, this event will be rescheduled.

WIRES-X ACTIVE NODE ID list https://www.yaesu.com/jp/en/wires-x/id/active_room.php

WIRES-X ACTIVE NODE ID list https://www.yaesu.com/jp/en/wires-x/id/active_room.php WIRES-X ID list,WIRES-X Active ID list

View on www.yaesu.com https://www.yaesu.com/jp/en/wires-x/id/active_room.php
Preview by Yahoo

Follow link to the active room list. My digital Wires-X Node is RF linked to the W8DC 146.760 for all to experiment with. Access is available via C4FM mode. To dial up a room press the buttons on your microphone (WITHOUT keying up). Press & hold # then the 5 digit room number then # again (i.e.: "#21080#" will access "AMERICA LINK". To disconnect press & hold * (again all without keying up). The last node name will flash signifying that it has been disconnected & the node will automatically return back to my room 21924 WEST-MICHIGAN after about 10 seconds after disconnect. If you (or someone else keys up in C4FM it will re-establish the connection back to the last room so let it do it's thing or manually select another room. When you are done please remember to press * to disconnect so not to tie up the repeater in case you are in a busy room.

Any questions or need help you can down load they WIres-X manual for your radio at yaesu.com or give me a reply or email at ab8dt@yahoo.com and I will see if I can assist. I am not familiar with the FT-1 so I hope to meet up with someone who has one sometime.

If there is any interest I can set it up to run on the analog side with use of DTMF codes to access & disconnect then no C4FM is needed.

Ron AB8DT

My C4FM Rigs:
FT-991 HF thru 6M w/UHV & VHF
FTM-400XDR using as node radio w/HRI-200 interface going into WiFi internet via RCA Cambio Win10 tablet
FTM-100DR using as base radio
FT-2DR hand held

3122. Local Red Cross Needs volunteers for fire alarm installs including amateur radio volunteers

Yahoo group: GRARA
Date: 2016-04-06 20:09:13 UTC
From: stprovost@...
Topic: 3122 Message: 3122

Hello, I was just informed that on April 23rd, the local red cross will be going to mobile homes to install free fire alarms.

Thanks for volunteering!
Stephen AC8QE

They are asking for volunteers to help install the fire alarms and amateur radio volunteers to use local repeater to assist with communications.

Here is the details:

April 23rd
Kentwood Home Fire Campaign
11:00AM–6:00PM (time may be subject to change)

Join this one day event to help local Kentwood fire fighters and
Red Crossers install free smoke alarms in neighborhood homes.

Volunteers and Amateur Radio volunteers (for communications) very much needed!

Email lily.fossel@redcross.org to RSVP for this fun event!

Here is some details provided by Leslie from the Red Cross:

Here’s the tentative plan. Things will change a bit as we get closer and get appointments scheduled.

Here are the mobile home parks in Kentwood we will be canvassing and installing
Paris Estates
Windmill Pointe
Brentwood
Pinewood
Brookside.

Here’s the tentative schedule.

Meet at Red Cross (1050 Fuller NE, Grand Rapids, MI 49503)
at 11a.m for instructions and training.
Leave and meet at Kentwood fire station at noon

12:00 to 5:00 or 6:00 for installing fire alarms

Meet back at KentWood fire station for pizza and review of the day.

We would love to have radio guys involved and hopefully help with the installations as well.

Leslie

3123. License Exam on April 8th?

Yahoo group: GRARA
Date: 2016-04-07 04:40:26 UTC
From: mspl15@...
Topic: 3123 Message: 3123

I've been studying for the Extra exam over the last couple weeks and was hoping to take it this Friday.

Looked on the ARRL website and did not see GRARA listed for an exam location (at all for any dates).

Is GRARA planning to have an exam this Friday, April 8th? If so, GREAT! And if so, why isn't GRARA listed on the ARRL website anymore?

Thanks,

Mike

Yes, there is a VE exam on this Friday. They are on the 2nd Friday of each month unless conflicted with a holiday. As to why no listing on ARRL... don't know.

Topic: 3128 Message: 3128

The story below was taken from the ARRL Letter dated April 7, 2016.

Be sure to click on the "news report" link at the end of the story for the video.

==========

Voice of America Antenna Farm in North Carolina Leveled: A field of 48 antenna towers that the Voice of America (VOA) once used to broadcast around the world, was dropped by explosives on April 4. The VOA had not used the towers, located in Beaufort County, North Carolina, for 10 years, although it still broadcasts news and information to Latin America, Cuba, the Caribbean, and Africa from antennas in a nearby county. According to news reports, it took less than 1 minute to fell the towers, which were hauled away as scrap. Television station WITN said the VOA site has been sold to the North Carolina Wildlife Resources Commission for conservation. See the towers go down in this WITN TV news report:

From: Hank Greeb
Topic: 3138 Message: 3138

What: QRP To the Field: http://www.zianet.com/qrp/qrpttf/2016/ttf.htm
Where: Seidman Park, 1768 Honey Creek Avenue NE, Ada, (GPS 42.9970, -85.4711)

Map at https://goo.gl/OkSmpu

Date/Time: Saturday, April 23, 1700 Z (1 p.m. EDT) to whenever we "give up" or 2200Z (6 p.m. EDT), whichever is earlier.

Why Seidman Park, you may ask? The North Country National Scenic Trail is coincident with the Ada Township trail at this location, and we will be operating as TR04 for the National Parks on the air! Besides being a great time to enjoy Nature, this is great publicity for the trail, and for ham radio in general!

Note that we will be using both Phone (SSB - 10 watts or less) and CW (5 watts or less). We will be using the Lowell ARC club call W8LRC.

Right now we have at least two rigs, probably three, but the more the merrier. So, bring your QRP rig, or just yourself, and join the effort!

If you can't make it to this location, why not set up in a park near your home, or operate from your home QTH, and join the fun! The rules accommodate, "Any Old Park", and home stations.

The weather is predicted to be in the mid to high 60's. There's a chance of rain, so be alert. We have an alternate covered site, so if it rains, contact me at my cell 616-828-9663 for directions.

Please let me know if you plan to attend! RSVP <n8xx@...>

I was browsing 20 meters and there was a minor pileup on HG225M, so I worked him after a few tries.

Turns out the Hungarian Amateur Radio ops are giving out awards for spelling SAMUEL MORSE with their HG225? calls. You need to get enough contacts with the various HG225 prefixes to spell the entire name.

I doubt that I'll try to spell the name, but thought I'd publicize this here on QRP-L

See http://www.mrasz.org/morse-award-rules

for details of how this is done, how to apply for the award, etc. It's all done through the Logbook of the World, so no postage or hard copy QSLs are needed. You can get paper QSL's if you wish for suitable SAE and $$'s or IRC.

3145. Allegan Fox Hunt Sunday -- everyone welcome

Yahoo group: GRARA
Date: 2016-04-22 23:08:51 UTC
From: Michel
Topic: 3145 Message: 3145

Just a reminder guys and gals, the Allegan Fox Hunt is coming up this Sunday. Everyone is welcome and invited.

Sunday, April 24th at 1:30 pm.
Sponsored by the Allegan ARC, Wes Miller, Chairman

Location: Allegan High School
1560 M-40, Allegan MI, 49010
(Visitor and faculty Parking lot out my the road)

Please come a little early so that we can get you added to the list of hunters and record your Odometer reading.
(see K8CAN, Jim, to sign-in)

The fox will be transmitting on 145,530 mhz, and will be located within 7 miles of the high School. The fox transmissions have been tested to be readable in the high school parking lot.

The winning team will be in the car that has the lowest trip odometer reading _and_ finds the fox within the two hour deadline. In the case of a tie trip odometer reading, the team that found the fox first will be the winner.

Let's have a safe hunt!

Posted for Allegan ARC, Wes Miller, KD8VQH, hunt chairman.

3146. NPOTA Kent County activations + QRP and VHF

Yahoo group: GRARA
Date: 2016-04-23 11:29:59 UTC
From: Jack Amelar
Topic: 3146 Message: 3146

Reminder / announcement of NPOTA activations this weekend.

SATURDAY (April 23) Seidman Park north of Ada on Honey Creek Ave just
shy of 2 Mile Rd. 1PM to 6PM give or take.
From Hank N8XX:
What: QRP To the Field: http://www.zianet.com/qrp/qrpttf/2016/ttf.htm
Where: Seidman Park, 1768 Honey Creek Avenue NE, Ada, (GPS 42.9970, -85.4711)

Map at https://goo.gl/OkSmpu

Date/Time: Saturday, April 23, 1700 Z (1 p.m. EDT) to whenever we "give
up" or 6 p.m.,
whichever is earlier.

Why Seidman Park, you may ask? The North Country National Scenic Trail
is coincident
with the Ada Township trail at this location, and we will be operating
as TR04 for the
National Parks on the air! This is great publicity for the trail, and
for ham radio in
general! So, it's a 2-fer, QRP TTF and NPOTA!

Note that we will be using both Phone (SSB - 10 watts or less) and CW
(5 watts or less). We will be using the Lowell ARC club call W8LRC.

Right now we have at least two rigs, probably three, but the more the
merrier. So, bring
your QRP rig, or just yourself, and join the effort!

If you can't make it to this location, why not set up in a park near
your home, or
operate from your home QTH, and join the fun! The rules accommodate,
"Any Old Park",
and home stations.

The weather is predicted to be in the mid 60's. We have an alternate
covered site, so if it rains, contact me at my cell
616-828-9663 for directions.

Please let me know if you plan to attend! RSVP <n8xx@...> (It's
OK to just show up -ja)

Add a VHF station will be set up operating 146.46 simplex. If in the
vicinity, give a shout on 2M FM.

SUNDAY (April 24), Boy Scout Cabin north end of Lowell.

Anyone interested in participating or observing a National Parks on the Air event along the North Country Trail (TR04) at the Boy Scout Cabin in Lowell. The cabin is in range
of the trail. Setup starts about 1:30, operation should commence about 2PM. The cabin is at 848 N Washington Rd, the very end of the street. Map here:
https://goo.gl/maps/fMoUkcnuo732 Your hosts Riverside Radio Amateurs (Ionia County).

3150. Reminder, this Saturday, April 30th, a West Michigan Tune up and Fox Hunt

Yahoo group: GRARA
Date: 2016-04-28 12:28:58 UTC
From: Tom
Topic: 3150 Message: 3150

A reminder that this Saturday, April 30, there will be a combined fox hunt practice session with a fox hunt.

When: Saturday, April 30, starting at 10:00AM

Where: Douglas Walker Park, located at 1195 84th St. SW, Byron Center, MI. This park is 1.25 miles west of US 131, exit 74. Oh, where we will be in the park is not known yet. Just look for a bunch of grown men twirling antennas like a baton. Or not. Talk-in will be the IRA repeater, 147.16+

What: Starting at 10:00AM, there will be at least six "Micro-Foxes" operating within the park. These will all be within walking distance. You will have plenty of time to assemble your equipment, and acquaint yourself with how it all works. The Micro-Foxes will operate on a 30 seconds on, 30 seconds off schedule. There will be one Micro-Fox that will be essentially on the air the entire time. This one can be used by you to check out different methods and equipment hookups.

The park is still spring wet, so you might want to wear boots to slug through the grounds.

At 12 noon, once again, there will be a hidden transmitter hunt. The transmitter will be within 8 miles of the park, and will be a simple set up transmitting from a car. Power will be around 10 watts to a 1/4 wave mag mount on the roof.

If you are interested in 2 meter fox hunting, but have no equipment, please stop by and observe us all in action.

Recommended is to either build your own "tape-measure" antenna, or buy one. Look up "tape-measure" antenna on the Internet, and find plenty of instructions on how to build your own. If you would prefer to simply buy a kit, look at http://www.west.net/~marvin/wb2hol.htm

The next item you should have is called an "active attenuator". Again, look this up on the Internet, or you can buy a kit or assembled unit from KC9ON (in Gaylord, MI) at: http://kc9on.com/store/kits/fox-hunt-offset-attenuator/ There are others on the 'net, like Arrow Antennas, http://www.arrowantennas.com/main/4ofha.html . However, this one comes in at $59.00 Another more reasonable site is http://www.west.net/~marvin/k0ov.htm

There is an amazing amount of information on the Internet about 2 meter Fox Hunting. It's fun, and you learn a lot about your equipment,

multipath and strategy.

This event is open to all in the west Michigan area. We are aware of pockets of activity and interest in Muskegon, Kalamazoo and other west Michigan cities. You are more than invited to join us.

Put April 30th at 10AM on your calendar, and plan on a good time.

In case of a downpour, this event will be rescheduled.

73 de Tom K8TB

3151. request to help with selling equipment for a fellow ham

Yahoo group: GRARA
Date: 2016-04-29 02:51:21 UTC
From: stprovost@...
Topic: 3151 Message: 3151

Hello, this saturday (I know another event for Sat April 30th at 10am to consider), some of the GRARA group is going to help Ron K8DMR with picking up equipment to sell for an amateur radio operator who can't use his equipment anymore. Here is the email from Ron:

Hi Stephen et al,

Shirley Keesler has asked for help selling her husband Mel's vintage but mostly excellent shape ham year. Mel is a former Lear Siegler engineer and independent consultant now retired. He and Shirley were good friends of my wife and I especially back in the 80’s and 90’s. However Mel was somewhat of a work-a-holic however and constantly bought gear he then never used or rarely used and I lost contact with him for the last 7-8 years.

It turned out the reason was Mel is pretty much bedridden with multiple physical problems but he never admitted it to me). His call is W8HLT and while able to play with a code oscillator, small receiver and perhaps 2 meter HT from bedside that's about it. The house is sold and they are moving back to Mel's original home town of Grand Ledge later this spring after Shirley holds a big garage sale. Dave, W8DO, a long time ham friend from Kalamazoo came over earlier this week and helped move everything to the garage for easy pickup before Shirley's garage sale.

We will meet this Saturday, April 30, at 10 AM for equipment pick-up at Mel and Shirley Keesler’s home at 2000 Frontier Ct. SW Wyoming, MI 49519. Frontier Court is a short Cul-d’sac that runs west off of Pinnacle SW just south of where Pinnacle intersects 52nd avenue. You are invited to help Stephen and me and perhaps purchase some of the gear for yourselves. The offer is to spilt sales proceeds 50:50 between the club and Mel's wife.

Most of the stuff will go back with Stephen in his van. Our plan is to put some of the equipment on E-bay after testing, take the unsold stuff down to Dayton in the trailer and sell the rest at the IRA swap and/or our own swap in October. We will dumpster anything left. Below is a very partial list:

Drake 2B Receiver and matching speaker
Ten-Tec Omni D transceiver and 243 Remote VFO and power supply
Heath Model HO10 SSB station monitor scope
Trac CMOS Electronic Keyer
B&K 30 MHz Dual Trace Scope
Heath Cantenna
Antenna selector switch
Polamar R-X Noise Bridge
E-F Johnson TR Switch
Knight VFO (I am repairing it at my QTH--probably needs a replacement tube)
Fluke portable multi-meter
Four PL175A Pentodes (4-400A equivalents from Mel’s torn apart Johnson Invader which he never finished modifying the way he wanted it)
High Power TX Variable Capacitors (at least a half dozen)

High Power Tx Variable inductors for antenna tuners (2) as well as homebrew high-power tuners
Several SWR bridges (high and low power ones)
Several 12 volt Power supplies up to 15-20 amps
Heath 2036 2 meter rig and matching Heath power supply
Yaesu FT 227R dual band HT (never used and in original carton with uncharged battery)
Pierce Simpson and Realistic CB radios (never used and in original cartons)
Two CB mag mount whips
Hy-Gain 5/8 wave ground plane antenna for CB and 10 meters (unused and in original carton)
~100' Open wire line, ~100' RG8 (both apparently never used)
Rolls of solder and a soldering station
Variac Transformer
Isolation Transformer
Speakers in enclosures
Alliance Antenna Rotor control unit
ARRL books
Boxes of small parts, microphones, resistors, capacitors, plugs, jacks, etc. with plastic trays
8-element KLM beam for 2 meters (has a cracked insulator but repairable if someone wants it)
Tons of wire in boxes and even more parts (we may pitch these)

Consider joining Stephen and me at 10 AM this Saturday at W8HLT's place in Wyoming.

Thanks

Ron

Guys,
Just a thought, if you want to sell some of it local, maybe consider the 2nd HAM shop?

I have already sent the list to a Heathkit collector that Tom sent my way yesterday, he is really interested in some of the pieces.

Just a thought if you want to keep it local, Tom has been great to work with at the shop and gets a lot of views on equipment.

3154. About the Saturday, April 30th West Michigan Tune-up and Fox Hunt

Yahoo group: GRARA
Date: 2016-05-01 14:18:17 UTC
From: Tom
Topic: 3154 Message: 3154

There is a movie out called "The Hunt for Red October." Well, this should have been called "The Hunt for a Red Pontiac Vibe'!

Yes, everyone knew that the Vixen would be in a red Pontiac Vibe, and that's what they all looked for. Then there was the Jet's Pizza by the slice with a red Vibe out front. Let’s not talk about that.

But, I digress. After 2 hours of tuning up in the park, we had an even dozen cars start the hunt.

The red Vibe was located in a back corner parking lot of the Kalamazoo and 68th Meijers. Parked between the yellow lines in a legitimate parking spot, but nicely hidden from view.

And the results.

#1. Laryn, "I smell the RF" Lohman, K8TVZ came in at 6.7 miles at 55 minutes.
#2. Bob, K8RJB, Rick, N8XQJ and Tom, K8TB came in at 6.8 miles, at 53 minutes.
#3. Bob, KD8HNF and Jack, NY8D came in at 7.3 miles
#4. Ralph, KD8RPP, from Dorr, came in at 9.1 miles, but he found the car first at 49 minutes.
#5 . Nick, KD8JBG at 11.0 miles
#6. Mike, KB8KB and Bob, K8EIO at 15.6 miles
#7. John, “I don't need no stinking attenuator” Reed, KE8ARJ (and his son John) 28 miles.

I find the fact that John found the fox without an attenuator to be remarkable.
He was manually pulling the antenna connector off slightly and adjusting the spacing for attenuation.
That is difficult to do in the workshop, much less in a traffic situation. He says he will get an adjustable attenuator. His next hunt should be interesting.

Congratulations to all on a great hunt.

Laryn, you're up for a May hunt!

3155. The Fox Hunt through the Eyes of the Vixen

Yahoo group: GRARA
Date: 2016-05-01 14:24:09 UTC
From: Tom
Topic: 3155 Message: 3155

There is a movie out currently (not from 25 years ago) called “Whiskey Tango Foxtrot”.That describes the reaction from the hunters who focused on finding a certain color/make of car rather than the transmitter.I could have hidden in the front Meijer parking lot, but then the hunters would just be playing “Where’s Waldo?”, which is what happened when I hid in the Family Fare parking lot.The description of the car didn’t come into play this time, but I thought in all fairness, everyone should know what it looks like.No, I wasn’t hiding in front of the pizza place either, although I certainly would have if I’d known they sell pizza by the slice.

The selection of hiding place was made by sitting home in front of my computer for hours on end looking at Google views of the area in an eight mile radius of Douglas Walker park.The first site I selected was a good one, but I thought it might be too difficult for this hunt.I still like that spot so I’m keeping it in my pocket for later this summer.In retrospect, it may have been an easier spot than the one I used.Who knew?

My second choice for a hiding spot was on Gezon Parkway.After finding that one on the computer, I drove to check it out in person.This was behind a small strip mall.Perfect.I couldn’t be seen until the hunters were upon me.The drawback that haunted me all that night was that it was dangerous for the hunters due to the high speed limit and crazy traffic.So, back to the drawing board.

My chosen hiding spot was located by computer and I didn’t even drive over to check it out in person because I’d shopped there before.Gotta love that little street view thingie though.I dragged that little yellow body to every school, park, subdivision, dead end street and parking lot in the county.What I didn’t take into account was that the Google pic of the Meijer parking lot was taken when the garden center was not in use.When I arrived at my spot, I found it wasn’t just at the side of the parking lot in plain view, but completely hidden by pallets of fertilizer and bark.

What a crummy spot for hiding - a view of bags of bark and the sound of cars whizzing by on the highway just behind me.I think I was happier to see Ralph KD8RPP when he showed up than he was to be the first to find the fox.My favorite hunter though was the youngest one, John Reed (son of KE8ARJ), who ran up to the car asking if he were the first to find me.Sadly, not this time, but I wouldn’t be surprised if he’s first next time!

From: Tom
Topic: 3157 Message: 3157

If you like having a good time, and non getting paid, you might be interested in helping out with next weeks Tulip Time parade medical communications. We need 15 amateur radio operators for Wednesday and Thursday, and 25 on Saturday, to handle the needs of the Red Cross. You will be busy from about 10 am to 3 pm Wed/Thu, and 10 am to 5pm on Saturday. You would probably walk a two block area with the Red Cross Medical teams. You will need a 2 meter handheld with the Holland repeater frequencies in it (147.06 and 147.5/146.5)

If you are interested, please contact me at k8tb (at) bosscher.org

Maybe we need a way to "blast text messages" to everyone interested in signing up for such messages. This could be used to notify folks in case of cancellation of the open radio room. It happens very seldom, but even once could "turn off" a newcomer. In a previous generation I was associated with a club which had a "call up" via pagers, which was also used to "call off" an event in case it had to be cancelled. Now a daze text messages could probably do the same thing.

We can discuss this at the meeting on Friday - hope it won't make the business meeting go beyond the usual *"twice as long as a business meeting should run."*

3167. hamvention 2016 Vendor Tickets available from Mike KB8ZGL

Yahoo group: GRARA
Date: 2016-05-06 17:52:08 UTC
From: stprovost@...
Topic: 3167 Message: 3167

Note: Mike kb8zgl has extra vendor tickets for hamvention 2016.
These tickets allow you in early and can stay later for the same price as a regular admission ticket.

I will announce at tonights GRARA meeting his tickets, you can give me the $$$ for the ticket and I will get the tickets from Mike for you.
Otherwise, you can text/call him via his phone number listed below.

Stephen ac8qe

I have at least 6 extra Dayton tickets (these are vendor passes - the good ones) that I am looking to unload for the cost I paid for them ($20 each). Would like to get them to people in West Michigan, but if not, I will sell down there.

Let me know if interested,

Mike

3168. National Parks on the Air – Dayton..

Yahoo group: GRARA
Date: 2016-05-12 02:05:34 UTC
From: Hank Greeb
Topic: 3168 Message: 3168

Note, this is from the Ohio Section Mangler, but I'm sure the fellow organizing the NPOTA event in Dayton won't turn down a Michigander if she/he volunteers to help out. And, as a bonus for helping the the management of the event, I'm sure you can fit into the operating schedule and learn how to manage a "pileup" not quite as bad as being on in a rare country on a DXpedition, but certainly more than 1 or 2 folks may be calling at once. I can vouch for the adrenaline rush of being at the DX end of a pileup from activities along the North Country National Scenic Trail here in Michigan.

If you're available for an hour or so during the hamvention hours, please contact John, KD8MQ, the Ohio Affiliated Clubs Coordinator, KD8MQ@....

Hi everyone,

I wanted to bring you up to speed on the Dayton On the Air event that the Ohio Section will be doing during the Dayton Hamvention. We are still looking for volunteers to mind the store between 12 & 2 on Friday, and 10 & 2 on Saturday.

Saturday AM is really important as that Saturday is a very busy day for everyone and we definitely need to have this booth staffed. If you are able to take an hour or so out of your busy schedule, we would greatly appreciate your help with this big project.

The site is at 22 South Williams Street, in Dayton; about 6 miles from Hara Arena. There appears to be a parking area in the rear. I'll be there around 8 AM each day to set up the stations, and again around 4:30 - 5:00 to tear down

If you know anyone who may want to do a couple hours at the site, please ask them to contact John, KD8MQ at kd8mq1@...

73, for now..

3170. Ann Arbor to Hamvention Bus is FULL!

Yahoo group: GRARA
Date: 2016-05-12 17:24:55 UTC
From: John Wasciuk
Topic: 3170 Message: 3170
Attachments: 3 described; binary payloads are missing from this source WARC

May 12, 2016

Dear Fellow Radio Amateurs,

The ARROW Communication Association of Ann Arbor, Michigan is announcing that our annual bus journey from Ann Arbor to the Dayton Hamvention is FULL!

I would like to thank all of you from throughout the state of Michigan and the Province of Ontario who either signed up or inquired about the trip.

This is the first time in a number of years that we have gotten such numbers. ARROW has worked really hard to make certain that the bus was not a money losing event this year.

We will definitely run this excursion next year with the same diligence and effort.

Attached, you will find a five page listing of all our prize donors (at this moment) as well as a one-page summary sheet of the donations. Our brochure is attached, as well.

We will do all we can to get information out to as many radio clubs as possible as early in 2017 as we can.

If you know of a club or persons who we should add or remove from this list, please let us know.

However, please send me a new email! Do not hit the respond button! Because this is a mass mailing, I get back a lot of bounce-back from email addresses that are obsolete. Combing through dozens of pages of electronic junk to find your response is difficult, at best. So please send me new mail.

jwasciuk@...

wa8ton@...

Again, Thank you so much for your support and interest.

The ARROW Communication Association wants to make next year's Hamvention excursion the most fun and most prize filled ham radio bus trip in the world!

www.w8pgw.org

(This address might be changed next year to www.w8rp.org. We have been offered the call sign of Ron Purchase, who ran Purchase Radio and Purchase Camera in Ann Arbor for over fifty years. We are working on making the

change as this is being written.)

73,

John F. Wasciuk

WA8TON / VO1TON

Activities Coordinator, ARROW Communication Association, Ann Arbor, Michigan

3173. May 24, 2016 Fox Hunt in Allegan at 6:30 PM

Yahoo group: GRARA
Date: 2016-05-16 00:36:30 UTC
From: Tom
Topic: 3173 Message: 3173

Gather up the antennas and the maps. And include Allegan County.

Starting at 6:30 PM on 145.53 the Robo Fox will be transmitting 1 minute on, 2 minutes off. May 24, a Tuesday.

The starting location will be the Allegan High School at 1560 M-40 in Allegan. Talk in will be the 147.24 repeater.

The Fox will be within 5.85 miles of the starting point.

This hunt is open to all folks, licensed amateur radio operators or not, and you do not have to be a member of the Allegan County Radio Club.

Sheila, K8AJ and Tom, K8TB

3176. Mowing at Petis site status

Yahoo group: GRARA
Date: 2016-05-18 03:05:43 UTC
From: stprovost@...
Topic: 3176 Message: 3176

first off, my sincere apologies for missing monday night's mowing party at the Petis site.
I was not feeling well and went to the med center and totally forgot about the mowing event
:(
I went to the site tuesday and used my weed wacker on all the tall grass.
The site could use a mower touch.
I want to state I appreciate anyone who went monday nite only to have no access to the area due to not having keys.

stephen

3183. Need a 2.5" to "standard" (I believe 3.5") adapter for hard drive

Yahoo group: GRARA
Date: 2016-06-01 20:37:20 UTC
From: n8xx@...
Topic: 3182 Message: 3183

My now defunct computer failed me while on vacation, and I need to see if the hard drive is still readable.

All I did was operate for a few minutes out in the field in VINTon county, to check a possible site for the OHIO QSO party, shut it down, and put it away in my car. When I got to my son's place in Cincinnati, the computer wouldn't log in. Rather than screw around with it, I found a new computer @ Microcenter near where our son lives, but I'd like to get a bunch of files off it

I have a home computer with an extra connection for a second disk drive, but it take the larger disk drives (I think that means 3 1/2" mounting.

I know I can buy an adapter, but haven't even looked to see what one would co$t, because I probably won't need one for another 20 years. the last time I needed one I took my drive to a friend who had such an adapter, and he made a clone of the disk for me to use.

Anyway, please advise.

From: Jack Amelar
Topic: 3187 Message: 3187

PLEASE FORWARD TO ANYONE INTERESTED IN OBTAINING THEIR HAM LICENSE!
Saturday June 11 and October 8 in Lowell
Saturday August 13 and December 10 in Holland

Check out http://w8lrc.org/hiad/ for full info

Give us an afternoon and we?ll give you the world!

No previous technical knowledge or Morse code requirements are needed.
This class is for anyone who would like to obtain their technician
level amateur radio license. The class consists of guided study
sessions and hourly breaks, followed by the FCC testing session.

Please understand that this is a ?study hall? session, where you
will memorize the test questions and the proper answer.

What to bring with you?..

If available bring a legal photo ID such as a Drivers License or
Passport.

If no legal photo ID is available then bring 2 pieces of legal ID.

Your Social Security Number. If you do not wish to use your SSN then
you will need an FRN from the FCC.

You may apply for an FRN in advance on the FCC
<https://apps.fcc.gov/coresWeb/publicHome.do>
website by clicking the link.

Anyone 16 years old or younger must have a parent or legal guardian
present for the entire session..

A calculator, you may not use your phone as a calculator. The memories
must be cleared before testing.

Pencils and pens for filling out answer sheet and license forms. (we
will have some to borrow)

Preregistration <http://tinyurl.com/holohiad>
is preferred as seating may be limited. (Latest dates and times
listed on form)

3190. Lowell ARC Ham in a day.

Yahoo group: GRARA
Date: 2016-06-12 02:12:09 UTC
From: Tom
Topic: 3190 Message: 3190

Congratulations to the Lowell ARC on their first ham in a day. Eight students, and seven passed their tech. In addition, one tech came in and studied and passed his general.

Now, all of these people are important, but one of the new techs is noteworthy. None other than Mark Weaver, who is the Superintendent of the North Country National Scenic Trail, of the National Park System. This is known on the ARRL National Parks on the Air (Npota) as TR04, a small 4,600 trail across seven states. His office and the trail headquarters, cool enough, is right in Lowell.

We will let you all know his call when he gets it, and we should hear him on the air.

Tom, K8TB

All

We have received a few signups, but we can always use more help.

We are looking for volunteers to work this years Rockford Area Kids Triathlon. We are looking for 10 to 15 ham radio operators to help out.

The event supports Rockford Explorers and D.A.R.E. programs. We would be helping out in all aspects of the event from Registration, traffic control to runner safety. The event is Saturday July 9th at the High School. We would be there from 7AM to 1PM, but we can be flexible on the times. This is a great opportunity to get out into the community. Kevin Sweeney who is the event organizer has been a friend and supporter of the group for many years. Lets show our support for him and his event. Come out and show your support for the community and get the word out about who we are and what we do. This is a fun low key event. Food will be provided.

Please sign up at http://vrm.cc/rocktri

Event information is available at http://www.rocktri.com/

3193. Kenowa Hills FD Lookover

Yahoo group: GRARA
Date: 2016-06-17 23:25:12 UTC
From: n8dgd@...
Topic: 3193 Message: 3193

GRARA meets tomorrow to look over our Field Day location for next week. Meet time 12 noon. Kenowa Hills 3825 Hendershot NW near 4 mile and peachridge. Call on 147.260/R for more info.

3194. Anyone want to enlighten us plebians/mere members?

Yahoo group: GRARA
Date: 2016-06-20 02:16:32 UTC
From: Hank Greeb
Topic: 3194 Message: 3194

AOf what is going on with Field Day, which is less than a week away?

A few questions:

Will we be able to set up Antennae Friday evening? If so, when do we start?

How many stations will we have?

How far apart will the stations be physically? The reason for this question should be obvious to anyone trained in the art of minimizing cross interference between stations.

Where do we sign up for an operating shift? (I like the midnight to sunrise shift for 40 and 80 CW for example)

I didn't get to the Saturday's look-see because of the short notice, and lack of transportation. I guess I should have publicized my wish for carpooling rather than trying private e-mail.

Please advise.

3195. Fwd: ARLX006 2016 W1AW Field Day Bulletin Schedule

Yahoo group: GRARA
Date: 2016-06-20 21:15:10 UTC
From: Hank Greeb
Topic: 3195 Message: 3195

In case anyone is interested in making a few points for GRARA's Field Day effort.

Should be relatively easy for anyone with a semi-skill in RTTY, PSK31, or CW to copy the bulletin.

Tom and other organizers for FD 2016

Last night we were discussing where to put the two rigs. I was musing about the need for physical separation, to minimize same band interference between the two rigs. But, upon further thought......

Let's put two rigs in the press box. I'm sure I won't operate anywhere near full time, so it will be easier to coordinate phone/PSK31/RTTY, etc. if the rigs are co-located.

The TS-2000 should work fine for CW, even though it generates wide band RFI within a few hundred KHz of the working frequency because of lack of filtration of the Digital VFO. Same for any rig which doesn't have super filtering, but that should be workable if we are sure NOT to operate on the same band with the two rigs. This should be only a minor inconvenience.

I'll bring my 130 foot dipole and an assortmment of rope. It is fed with 400 ohm window line. We can use it "as is" or if we have extra coax, it would operate as a 75/80 meter dipole fed with coax. The other antenna could be a G5RV (do we have one of those?) or a 40 meter dipole. And Bob's (AC8ZX) tri band beam could be shared (manually) with the two rigs if needed.

I was asked to contact Cortland, KA5S. He says his generator will be in use during field day. If we need another generator, we need a plan "B" of which I'm not aware.

Lettuce prey we have an abundance of operators for the daylight and early evening. I'd like to operate most, or all, of the midnight to dawn shift for CW. The two rigs could both operate SSB or any other mode (CW/RTTY/PSK31, etc.)

Hope to see a bunch of folks on Friday evening (about 6 p.m.) and Saturday morning - confirm time and where breakfast Saturday will be, please. Goal is to be at the Field Day site no later than 10 a.m. Saturday?

Having stations in the press boxes is a good idea, especially of it rains, nice in closed building. Question though, are all visitors and operators able to walk the steps to the top of the breaches to reach the the boxes? Just throwing this out there.

Jack:

Great thinking. I hadn't considered the difficulty for some of our folks to get to the top of the stadium. It might be a turn off, especially for visitors.

Forecast is for rain to come in later Sunday, but we all realize that predicting weather is sorta like gambling on the lottery. :) But, if we have sides for a canopy in case of rain, we should be okay. (Let's hope they don't have sprinklers which come on Sunday morning. :)

Lettuce talk about this Friday evening. I, for one, will love NOT having to walk up so many steps to get to an operating position.

From: Hank Greeb
Topic: 3201 Message: 3201

*For those who attended GRARA's Field Day 2016, all I can say is "WOW!**
**
For those who didn't, you missed out on a great event!
**
No stats yet, but band conditions were great! Cranking along at >1 contact per minute for over 4 hours was a real pleasure. (minus a few "stretch breaks" to exercise the aging muscles.)
**
**There were many visitors. I didn't keep track of the sign in sheet, but during the day we didn't do nearly as well with contacts, because we were explaining ham radio to the public. The Skywarn folks likewise were showcasing their activities in their "welcome to ham radio" canopy. The food at the concession stand help ward off hunger pangs. The demo of radio controlled model airplanes was great!
**
The rainstorm, which washed us out around 9 a.m. Sunday morning, provided an exercise in getting electrical equipment from an open canopy to cover from the elements. :) It also provided a "shower" for those who were dodging raindrops during this exercise The one downside was that we didn't operate 24 hours, but we were tired, packed up, and went home.
**
Stats will come - but we need to thank our hosts, particularly the Superintendent of the Kenowa Hills High School, who visited for several hours on Saturday.
**
**Let's start planning for 2017 - can we reserve this place for June 24/25 2017?*

3202. Spark in the Park, August 20, 2016, Saturday, 3-8 PM

Yahoo group: GRARA
Date: 2016-06-27 00:52:09 UTC
From: Tom
Topic: 3202 Message: 3202

In just under eight weeks the 3rd annual "Spark in the Park", a Science Fair for amateur radio, will be held.

You have heard about it, now please put the date and time on your calendar to see what seven West Michigan amateur radio clubs have put together.

As with last year, Spark in the Park will be held at the Home School Building gym, located at 5625 Burlingame SW, Wyoming, Michigan.

There will many varied exhibits of the various facets of amateur radio, including AMSAT/satellite radio, DMR, mobile VHF/UHF rovers, Go-bags and boxes, exceptional home brew equipment, Morse key collections, software defined radios, Red Cross and Salvation Army vehicles, the ARRL, and other groups.

More information at http://www.k8tb.org/sitp.htm

There is no admission fee or table fee, due to the sponsoring efforts of seven West Michigan clubs:

Holland Amateur Radio Club

Lowell Amateur Radio Club

Grand Rapids Amateur Radio Association

Allegan County Amateur Radio Club

Kalamazoo Amateur Radio Club

Muskegon Area Amateur Radio Council

Riverside Radio Amateurs (Ionia County)

3203. Morley radio site cleanup this Saturday, July 1

Yahoo group: GRARA
Date: 2016-06-29 15:39:11 UTC
From: Jack Amelar
Topic: 3203 Message: 3203

Morley receive site grounds maintenance.

It's time once again for grounds maintenance at the 250ft commercial tower NE of Morley owned by T&W Electronics which, among other radio services, hosts the Lowell 145.27- (94.8Hz) Morley remote receiver 144.67 MHz and the K8SN 442.075+ (103.5Hz) repeater!

Part of the Lowell Amateur Radio Club's arrangement with T&W is upkeep of the grounds. LARC is responsible for the up keep, but anyone with an inclination to help is certainly most welcome.

Being the site is a mix of field and woods located in a rural area near Amish families, this can also double as camping trip. If you want a non-crowded campsite for this Independence Day holiday, this is it.

The main cleanup day will be Saturday, July 1. Figure start around 10AM, but come earlier or later as best your schedule. Rolls and coffee will be provided in the morning, and lunch provided. The "better half" and kids are certainly welcome.

There are no toilet facilities here, but I will have the rest room in my motorhome available. **It's not a problem, really!**

I plan to arrive Thursday and not leave until the following Wednesday. Anyone else interested in a cheap non-crowded campsite is welcome. Electricity is available. Questions? E-mail jamelar@... or phone home: (616)438-5412 or cell: (616)438-1464. It's best to call the "home" phone as it will be ported to Morley and connected to an outside roof antenna.

On the cleanup agenda.
Clean up the shed where critters have partied during the winter. The usual mowing and light trimming to keep it all clean.
If we have enough help, some logs and brush can be cleared.
If practical, bring an extra mower (in case the one there breaks down, been there, done that) as well Extra chain saw a BIG plus.
BUT MOST IMPORTANT, YOURSELF!

HOW TO GET THERE?

Use your preferred mapping program and input: 3814 155th Ave, Morley, MI 49336 Or follow the Google Maps links below.

Directions from Grand Rapids via US-131 Expressway are simple. If you are arriving from Lowell, the "from Lowell" direction use paved county roads and is really the shortest, quickest way.

FROM GRAND RAPIDS to Morley receive site.
http://goo.gl/maps/acPpw

FROM LOWELL to Morley receive site
NOTE: Lincoln Lake Ave is closed from 5 Mile Road to Hwy M-44.

Hello, we have an opportunity to get our own Grara Call Sign Badges made by Sam Nabkey.
You can email him at sam.nabkey@gmail.com
for your order.
He will deliver the call sign badges at our next GRARA meeting Friday July 8th.
He will need your email order by Wednesday July 6th for the order.
I have attached two files to see what the badges look like.
Cost is $10 for landscape orientation
Cost is $8 for portrait orientation

ARLB022 FCC's OET Clarifies Emissions Compliance Testing for RF LED Lighting Devices

ZCZC AG22
QST de W1AW
ARRL Bulletin 22 ARLB022
>From ARRL Headquarters
Newington CT June 30, 2016
To all radio amateurs

SB QST ARL ARLB022
ARLB022 FCC's OET Clarifies Emissions Compliance Testing for RF LED Lighting Devices

The FCC's Office of Engineering and Technology (OET) has clarified that all RF LED lighting devices falling under Part 15 rules as "unintentional radiators" must meet conducted and radiated emissions limits set forth in those rules.

"Operation of Part 15 unintentional radiators is subject to the condition that no harmful interference is caused," the OET reminded, in a knowledge database paper released on June 17. "Manufacturers and users should therefore note that lighting devices are required to cease operation, if harmful interference occurs."

The OET said radiated emissions measurements must be performed at least from 30 MHz to 1000 MHz to adequately demonstrate compliance with Part 15 (15.109). Its guidance, the OET continued, applies to

RF LED lighting devices that, in the past, have been considered to operate on frequencies below 1.705 MHz. Previously, devices operating between 9 kHz and 1705 kHz had to be tested only for radiated emissions up to 30 MHz, where no specified radiated emissions limits exist, and were exempt from testing from 30 MHz to 1000 MHz. The OET said it recognizes that routine radiated emissions measurements are needed under Part 15, based on the highest frequency generated or used in the device.

"[W]e have found that emissions from RF LED lighting devices are non-periodic, broadband in nature, and are produced as a byproduct of the internal driver circuitry within the RF LED lighting device," the OET "knowledge database" paper said. "These types of emissions have adequate energy and potential to generate radiated emissions well above 30 MHz."

The ARRL Lab's Electromagnetic Compatibility Engineer Mike Gruber, W1MG, said he was pleased to see the FCC's OET clarify the test measurement requirements. He said ARRL is generally hearing more RFI complaints stemming from RF LED bulbs.

"Not only are the emissions limits higher for Part 15 LED bulbs - as opposed to Part 18 fluorescent and CFL bulbs, they seem to be winning out in terms of consumer popularity," Gruber said. "Higher limits and more bulbs probably make for more complaints." Gruber said the Lab has seen LED lighting devices causing problems in the 2 meter band. "Since conducted emissions limits do not apply above 30 MHz, radiated emissions limits can be the first line of defense against RFI at these higher frequencies."

Gruber pointed out that noise generated by street and traffic lighting can be widespread. In such instances, he suggested that Part 15b limits for residential areas should apply. "These limits are lower than Part 15a limits, which are intended only for commercial and industrial environments," he explained. "This is especially critical in cases where a pole transformer connected to the lighting device also feeds a home or residence. The 240 V split-phase secondary system can conduct RF into a residence through the service entrance panel." He suggested that the lower limits may benefit mobile users.

The OET noted that the ANSI Accredited Standards Committee C63-EMC is drafting measurement procedures for lighting devices. "When complete, we expect it will address in greater detail the measurement procedures and configurations to be used in determining compliance," the OET said.

I've purchased and installed several LED lights in my home, each time doing a proximity 'noise' test using a small AM transistor radio. I had one purchase that was noisy (and was returned), but the majority have been very good - the same, or less, noise than a fluorescent light.

The undercounter LED lighting in our home generates massive amounts of interfering radio frequency energy. The commercial installers, a well established Grand Rapids company, were clueless as to the problem or the FCC rules. Once informed as to how to check for emissions with a cheap transistor radio, they were still unable to rectify the problem. WAC, the maker of the 24 volt switching power supplies is a long established standard in the industry and, I'm told, the only supplier handled by any area wholesaler.

For me, on HF, this is a big problem and one I'm going to have to solve myself. Vendors we've contacted don't know or don't care.

The cheap, much less costly than WAC products, stuff I've bought from Chinese manufacturers has been completely trouble free.

3214. South American Sprint Contest - July 23rd, 2016 - 2100 to 2300 UTCS

Yahoo group: GRARA
Date: 2016-07-03 05:24:18 UTC
From: Hank Greeb
Topic: 3214 Message: 3214

From the SA Sprint Contest group - message follows

==========

We would like to invite you to the SA Sprint Contest.

This is a new contest organized by several South American amateur radio clubs and groups.

The contest is only two hours long, the rules are really straightforward and we have included the *QSO/QSY* rule to make it really fun.

You can see the full rules at:*www.sa-sprint.com/rules*

Several logging programs have included support for our contest:*www.sa-sprint.com/software*

The contest will take place on*July 23rd, 2016*. From *2100 to 23 UTC*, on *SSB and CW* (*40 and 20 meters*).

Everyone can contact everyone for QSO points credit. Mults are SA prefixes.

Please feel free to tell your friends about the SA Sprint.

There is a Club/Group competition too!

We look forward to seeing you on the bands.

Vy 73,

SA Sprint Contest

Tom and other organizers for FD 2016

Last night we were discussing where to put the two rigs. I was musing about the need for physical separation, to minimize same band interference between the two rigs. But, upon further thought......

Let's put two rigs in the press box. I'm sure I won't operate anywhere near full time, so it will be easier to coordinate phone/PSK31/RTTY, etc. if the rigs are co-located.

The TS-2000 should work fine for CW, even though it generates wide band RFI within a few hundred KHz of the working frequency because of lack of filtration of the Digital VFO. Same for any rig which doesn't have super filtering, but that should be workable if we are sure NOT to operate on the same band with the two rigs. This should be only a minor inconvenience.

I'll bring my 130 foot dipole and an assortmment of rope. It is fed with 400 ohm window line. We can use it "as is" or if we have extra coax, it would operate as a 75/80 meter dipole fed with coax. The other antenna could be a G5RV (do we have one of those?) or a 40 meter dipole. And Bob's (AC8ZX) tri band beam could be shared (manually) with the two rigs if needed.

I was asked to contact Cortland, KA5S. He says his generator will be in use during field day. If we need another generator, we need a plan "B" of which I'm not aware.

Lettuce prey we have an abundance of operators for the daylight and early evening. I'd like to operate most, or all, of the midnight to dawn shift for CW. The two rigs could both operate SSB or any other mode (CW/RTTY/PSK31, etc.)

Hope to see a bunch of folks on Friday evening (about 6 p.m.) and Saturday morning - confirm time and where breakfast Saturday will be, please. Goal is to be at the Field Day site no later than 10 a.m. Saturday?

3217. Rockford Kids Triathlon - volunteers needed

Yahoo group: GRARA
Date: 2016-07-05 15:08:53 UTC
From: kpalma
Topic: 3217 Message: 3217

All
I hope you all have had a good and safe 4th of July. We are looking good for Saturday, but are always looking for additional assistance. If you are available please consider signing up and helping out. The weather looks is looking great for Saturday.

We will be sending out more information to those who have signed up later today or tomorrow.

We are looking for volunteers to work this years Rockford Area Kids Triathlon. We are looking for 10 to 15 ham radio operators to help out.

The event supports Rockford Explorers and D.A.R.E. programs. We would be helping out in all aspects of the event from Registration, traffic control to runner safety. The event is Saturday July 9th at the High School. We would be there from 7AM to 1PM, but we can be flexible on the times. This is a great opportunity to get out into the community. Kevin Sweeney who is the event organizer has been a friend and supporter of the group for many years. Lets show our support for him and his event. Come out and show your support for the community and get the word out about who we are and what we do. This is a fun low key event. Food will be provided.

Please sign up at http://vrm.cc/rocktri

Event information is available at http://www.rocktri.com/

3218. Hello everyone

Yahoo group: GRARA
Date: 2016-07-05 23:32:26 UTC
From: Thom
Topic: 3217 Message: 3218

Greetings all,

I found your Yahoo page the other day and signed up for it.

Please allow me to introduce myself.

My name is Thom Durfee and my call is WI8W. I have lived in the Grand Rapids area for the past 15 years but never believed that I would ever again put my ham radio station back together and get back on the air.

I was a member of the Big Rapids club for many years but sadly we had a slight disagreement that led to my leaving the club. If you would like to hear the story I will tell it to you in person. It is quite interesting.

Anyway I was a good contester back in the day having a few placement certificates hanging on my wall. I love CW as my primary mode but thinking about getting back into RTTY and some of the new digital modes.

I am a member in good standing with QRP Amateur Radio Club International and was their Awards manager for 8 years,

When I was a member of the Big Rapids Club I was in charge of all the licensing classes and the leader of the VE team. I also ran several ham radio events where our members learned how to build antennas and construct accessories for their shacks.

I am planning to attend your get together tomorrow night and I would love to meet you all.

Thanks

73

Thom Wi8W

Thom WI8W

Glad you are returning to the hobby and have found the Yahoo Group.
By all means, come to the Wednesday open radio room and/or this
Friday's meeting.

Sorry about the BR Club. Happens. There are "I dislike GRARA" people
around, same as any club.

If you see a lot of cars in the parking lot use the stairs in back, not on the end of the building, that door should be open. If not many cars the EMS is not having classes, use the stairs at the end of the building and bang on the door.

3223. CQ VHF Contest July 16-17th

Yahoo group: GRARA
Date: 2016-07-07 02:57:08 UTC
From: David DeVos
Topic: 3223 Message: 3223

Hello everyone - a reminder that the CQ World Wide VHF contest is right around the corner, on the weekend of July16-17th. CQ WW VHF is held on 6 and 2 meters, which are the most popular bands of VHF'ing.

Here's a link to the website: http://www.cqww-vhf.com/

I will be on to have some fun on the bands. If you have any questions about VHF contesting, please shoot me an email.

Dave DeVos - KF8QL

3224. Morning all

Yahoo group: GRARA
Date: 2016-07-07 10:33:36 UTC
From: Thom
Topic: 3217 Message: 3224

Got up at 5:30am.....feel like I could sleep till noon.

Had a great time last evening at the Red Cross building.

Coffee pot is on with cartoons on the TV.

Plan for the day is to put up a 40 meter dipole fed with 300 ohm twin lead. I love that style of antenna and 40 meters is my favorite band.

Planning on attending the meeting Friday.

Hope to meet some more of you there.

3226. Sunspots

Yahoo group: GRARA
Date: 2016-07-17 22:28:51 UTC
From: Hank Greeb
Topic: 3226 Message: 3226

From Spaceweather.com, we might be in for different propagation
conditions soon:

BIG SUNSPOTS STARING AT EARTH: Solar activity has been low for
months. That could soon change. Two big sunspots are staring directly
at Earth, and one of them has an unstable magnetic field that harbors
energy for M-class solar flares. Images and updates are available at
http://spaceweather.com
<http://Spaceweather.us11.list-manage.com/track/click?u=0c5fce34d5ca05f64a13d085d&id=1ce3b
f81b2&e=9364e82fa8>
==========
Anyone have the latest solar flux data from QRZ.com?

I've been able to work a reasonable number of stations for NPOTA, and
only able to "try" about half time this weekend.

3228. Geomagnetic Storm in progress

Yahoo group: GRARA
Date: 2016-07-20 01:51:29 UTC
From: Hank Greeb
Topic: 3228 Message: 3228

From Spaceweather.com

GEOMAGNETIC STORM: Unexpectedly, a CME struck Earth's magnetic field during the late hours of July 19th. The impact sparked a minor G1-class geomagnetic storm that could intensify in the hours ahead as Earth passes through the CME's strongly-magnetized wake. Visit http://spaceweather.com <http://Spaceweather.us11.list-manage.com/track/click?u=0c5fce34d5ca05f64a13d085d&id=a26cc7ffef&e=9364e82fa8> for updates.

3231. Please, tell me where to go

Yahoo group: GRARA
Date: 2016-07-21 03:49:34 UTC
From: Hank Greeb
Topic: 3231 Message: 3231

Someone told me of a link to the WOOD Radio interview with a few of GRARA officers about the W8DC Field Day. I've been looking around for it, but it ain't on the GRARA facebook page, it ain't on the W8DC.org web site, so I'm at a loss. I have about a week before the deadline for sending in the info.

I really don't understand why ham radio operators don't bother to communicate.

Please, pretty pleas, preetty Please with suger on it. please tell me where this elusive wood radio interview may be found.

Otherwise we'll lose 50 points or so.

Hank,

I have no idea where you would find that video. Have you contacted WOOD TV about this?

I chuckle at your comment about hams not bothering to communicate. I was saying to the guys last night...all day long I hear this station monitoring or blah blah listening on the repeater. No one even answers them, not even me.

Usually I am busy with something when they call.

Hope you find what you are looking for.

and yep things tend to not get updated on the yahoo group or the website.

Yahoo group: GRARA
Date: 2016-07-26 03:34:32 UTC
From: Jack Amelar
Topic: 3239 Message: 3239

----- Forwarded message from kpalma@... -----
Subject: Volunteers Needed Mud Run 2016

All

Come out and have some fun while serving the community.

The 2016 Eat Dirt Mud Run is Saturday August 27th 2016 7:30 AM - 1 PM at the Kentwood Community Church located at 1200 60th St. We are in need of volunteers to assist in monitoring runner safety. We are in need 20 - 25 people to help out. If you are able to help out please sign up at http://vrm.cc/mudrun
Events like this are a great opportunity to get public exposure for the group. Our primary duties will be runner safety. We will position personal along the course to monitor the runners. We may also be called to perform other functions if necessary, but only if they do not interfere with our primary task. Most positions will be stationary posts. If you wish to bring a chair to sit in while monitoring the course you may. Please remember that many of the positions will be in the sun, so remember to bring proper protection. Food will be provided.

If you don't know what the mud run is check out the web site. http://www.eatdirtmudrun.com/

This is a 5K run that has a number of obsticles, many of them involve mud, This is a fun event to work. The participants of this event ary crazy (in a good way). Many of the runners dress up on costumes for the event. Come out and serve the community and have a good time while doing it. Bring a chair, most possitions can be monitored while sitting in a chair.

If you have any questions regarding the event please contact

Karl Palma

kpalma@...

Thank You

I bought all my major gear from HRO. I still deal with them in fact I ordered something just this morning.

I think maybe the demise of AES after being in business for 59 years is that no one wanted to take over ownership of it. I am not sure exactly what their business model was. For the majority of being in business the internet was not even thought of yet.

I think maybe HRO is in the same situation. But as you may know HRO has some presence in cities all across the country, something AES never had. Maybe that is their advantage. I do not believe that internet sales is HRO's main focus. I have been to a couple o9f their stores and they all were fairly busy.b At least HRO decided to open a new store to replace AES. Thats a good thing.

Take care

3246. Geomagnetic Storm Warning for Aug. 2nd

Yahoo group: GRARA
Date: 2016-08-01 05:47:44 UTC
From: Hank Greeb
Topic: 3246 Message: 3246

From Spaceweather.com
GEOMAGNETIC STORM WARNING: NOAA forecasters estimate a 65% chance of geomagnetic storms on Aug. 2nd when a CME is expected to strike Earth's magnetic field. A solar wind stream following close on the heels of the CME could boost storm levels to G2 (moderately strong). High latitude sky watchers should be alert for auroras. Visit http://spaceweather.com for updates and more information.

3247. August GRARA meeting this Friday 5th

Yahoo group: GRARA
Date: 2016-08-04 00:42:11 UTC
From: Jack Amelar
Topic: 3247 Message: 3247

Reminder this Friday evening, August 5, is the GRARA monthly meeting.
Door opens 6:30, meeting at 7. All are welcome.

3253. PERSEID METEOR OUTBURST

Yahoo group: GRARA
Date: 2016-08-08 03:48:57 UTC
From: Hank Greeb
Topic: 3253 Message: 3253

*Anyone for Meteor Scatter propagation? From Spaceweather.com
*

PERSEID METEOR OUTBURST: Do you love the Perseid meteor shower? This year, you will love it even more. Forecasters say the 2016 Perseids should be twice as active as usual, filling the sky with 200+ meteors per hour on peak nights between Aug. 11th and 13th. This is happening because Earth is heading for an unusually rich stream of debris from parent comet Swift-Tuttle. Visit http://spaceweather.com <http://Spaceweather.us11.list-manage.com/track/click?u=0c5fce34d5ca05f64a13d085d&id=ebee399bcf&e=9364e82fa8> for sky maps, observing tips, and links to live webcasts of the Perseid outburst.

It would be nice if a picture of one of the new name badges, and ordering instructions, could be placed on the w8dc.org or GRARA Facebook page, or both. Shucky durn, if this were done, I might even plunk down some ca$h and buy one.

It would be great if we'd have a cadre of GRARA members with these kind of name badges at the upcoming hamfest. Do we have such info at each club meeting?

Lettuce push this way to advertise GRARA!

3257. additionl volunteers Needed - Mud Run 2016

Yahoo group: GRARA
Date: 2016-08-08 11:13:16 UTC
From: kpalma
Topic: 3257 Message: 3257

Come out and have some fun while serving the community.

Looking for 7-10 more people.

The 2016 Eat Dirt Mud Run is Saturday August 27th 2016 7:30 AM - 1 PM at the Kentwood Community Church located at 1200 60th St. Don't know what the mud run is? Check out their web page at http://www.grandrapidsmudrun.com/

You thought the runners at the river bank run were crazy, these people are crazy .... in a good way.

This is a 5K run that has a number of obsticles, many of them involve mud, This is a fun event to work. Many of the runners dress up on costumes for the event. Come out and serve the community and have a good time while doing it.

We are in need of volunteers to assist in monitoring runner safety. We are in need 20 - 25 people to help out. If you are able to help out please sign up at http://vrm.cc/mudrun
Events like this are a great opportunity to get public exposure for the group. Our primary duties will be runner safety. We will position personal along the course to monitor the runners. We may also be called to perform other functions if necessary, but only if they do not interfere with our primary task. Most positions will be stationary posts. If you wish to bring a chair to sit in while monitoring the course you may. Please remember that many of the positions will be in the sun, so remember to bring proper protection. Food will be provided.

If you have any questions regarding the event please contact

Karl Palma

kpalma@... <mailto:kpalma@...>

Thank You

Spark in the Park

A Science Fair for Amateur Radio

August 20, 2016

*3:00 PM to 8:00 PM *

* (Yes, an afternoon event !!) *

No Admission Charge

Home School Building

5625 Burlingame SW, Wyoming, MI

Sponsoring Clubs:

Holland Amateur Radio Club

Lowell Amateur Radio Club

Grand Rapids Amateur Radio Association

Allegan County Amateur Radio Club

Kalamazoo Amateur Radio Club

Muskegon Area Amateur Radio Council

Riverside Radio Amateurs (Ionia County)

It's not a flea market.

*It's not a field day. *

It's kinda like a science fair for amateur radio.

It is an exposition of many facets of amateur radio, including:

* <http://www.k8tb.org/sitp/k8dogl.jpg> -VHF/UHF roving in a pickup truck, Bob, K8DOG *

<http://www.k8tb.org/sitp/kf8ql.jpg> *-VHF/UHF vehicle roving, Dave, KF8QL*

-Mototrbo digital radio, Mike, KB8ZGL

-HF digital modes, ARRL Michigan Section Technical Specialist

-Amateur Mesh networks

-QRP portable operations

-Remote transceiver operation

-"Go Bags" and boxes

-Microwave

-Amateur radio controlled quad and hexcopters, with live video downlinks

-Arduino amateur radio projects

Pictures from

Spark in the Park

2014

A multi-club amateur radio science fair

Over 20 folks met at 4 PM to revitalize the Michigan VHF-UHF Society, now at www.mivus.org <http://www.mivus.org>

Bob, K8EIO shows his trik, with an Elecraft KX3 on board

Bob, working some DX with a wire thrown up in the tree.

James, KB8VUC, fine tuning a Mesh-Node setup

James, KB8VUC and James, W8ISS communicate with each other !

James, W8ISS had a camera on his car, feeding a mesh-node.

Doug, KD8CAO, working the FO-29 SSB satellite

Mike, W8DER get 1st place for his most impressive Arduino display

Mike showed some 14 different Arduino amateur radio projects

Two of Mike's "Fox Boxes", used for hidden transmitter hunt.

John, AC8JW demonstrating HF digital modes

Jason, KD8QNX demonstrated SDR radios

Al, KC8OPU shows his custom made drone

Gale, N8GS flys his quad copter, equipped with a GoPro camera

Mike, KB8ZGL brought his companies "portable" crank-up tower

Tom, N8DGD and Steve, AC8QE inside the Red Cross communication vehicle

Dave, KF8QL with his multi-band VHF-UHF rover

Bob, K8DOG and his 6, 2 and 70 cm rover

This is Ron's, K8DMR mobile UHF ATV antenna

Bob, KD8HNF with his remote HF station

Phil, K8PVH with his dual band radio in a lunch box

Larry Camp, Wb8R, our state SM from the ARRL

Mike, KB8ZGL explaining Mototrbo radios

Laryn, K8TVZ and Mike, KB8ZGL deciding the future of amateur radio

Jason explaining some of the benefits of SDR

A special thank you to the sponsoring clubs:

Holland ARC

Lowell ARC

Grand Rapids ARA

Allegan County Radio Club

Kalamazoo Amateur Radio Club

Muskegon Area Amateur Radio Council

Riverside Radio Amateurs (Ionia County)

Doug,

we had no way to reschedule it, so it went, with obvious low attendance.
I t will be back next year, as a AM event.

3267. We have been asked to help in the Grand Rapids Bridge Run

Yahoo group: GRARA
Date: 2016-08-31 03:57:29 UTC
From: stprovost@...
Topic: 3267 Message: 3267

Hello, we have been asked to provide about 10 radio operators to provide communications for the 16th annual Lake Michigan Credit Union Bridge Run.

They expect 2200 runners for the 5 mile and 10 mile runs.
The event is Sunday September 18th.
We would report about 730am and be going home around 11am.

All the information is at this link:
The Bridge Run - Home http://thebridgerun.com

3268. Grahamfest (Wyoming) Swap Date Change

Yahoo group: GRARA
Date: 2016-08-31 11:14:21 UTC
From: ARRL Members Only Web site
Topic: 3268 Message: 3268

Flash!!

I just received notification from John Streyle W8QZ, Grahamfest co-chair that due to a scheduling error, the date of the GRARA Grahamfest in Wyoming that was originally scheduled for September 24, 2016 has been rescheduled for September 17.

I expect that all previously published information concerning the swap aside from the event date will remain unchanged.

73,

Larry, WB8R

3271. Volunteers needed - ADA Bike Tour 2016

Yahoo group: GRARA
Date: 2016-09-02 09:47:47 UTC
From: jamelar@...
Topic: 3271 Message: 3271

Attention ham radio operators

We are just over a week out and are still in need of 15-20 more volunteers. This is a great cause and has the potential to be a big and fun event. If you are able, please consider joining us for this event. The event coordinators are looking for us to provide the communications for the safety of the event participants. This is a great opportunity to use our radio skills and support our community.

We have a new event that is requesting our help. The American Diabetes Association is hosting a Tour De Cure on *Sunday September 11th 2016*. This event consists of a short walking course and; 62, 10 & 30 mile bike courses. The event will start in Downtown Grand Rapids and head out to the Zeeland and back. This will be an all-day event, but not all the positions will be needed the entire time. Times will range from 4 AM to 4 PM, but most will start later and end earlier (*see info below*). We are looking for 20 to 25 radio operators to assist with this event. This is a great opportunity for the hams in Kent and Ottawa counties to work together and support the communities we live in.

We will have 8 vehicles on the course each needing a radio operator co-pilot, and 3 aid stations. We will also need net control operators and other people to relieve people for breaks and fill in for unexpected needs.

We will be utilizing the DMR radio system on the 70cm band. Turbo radios will be issued before the event.

8 SAG Vehicles 7AM to 4:30PM (can split shift)

2 NCS station 7AM to 4:30PM (can split shift)

3 Rest stations:

Station 1 8:00AM to Noon

Station 2 9:30AM to 1:00PM

Station 3 Noon to 4:00PM

Additional Support as needed when available

If you are available please sign up using the link.
http://vrm.cc/ada2016

If you a have any questions about the event please feel free to contact us via email:

Karl Palma: kpalma@... <mailto:kpalma@...>

Laryn Lohman: laryn@... <mailto:laryn@...>

Thank you all in advance for your support in making this event a
success.

From: Jack Amelar
Topic: 3273 Message: 3282

"First of all Saturday is the 10th not the 11th."
Which is why an OOPS email was sent out soon after the original email.

"Second of all...I got the post 2 days after the event."
That's interesting as my copy, and I'm sure others, got the message via
GRARA Yahoogroups with-in minutes of my sending the original message
which was Wednesday, September 7 11:54:43 AM EDT. The OOPS message was
sent at 12:49:48 PM EDT.

Anyone else experiencing 5 day delays thru the Yahoogroups as Thom WI8W did?

Jack,

That message that Thom is referring too was somehow sent by another person, if you look at the archive it was sent again.

You did a great job correcting the whoops and also getting the meeting notification out. Thanks for all the thankless work you do for many of the West Michigan clubs.

So, when Thom says, “Nice Job” I concur, you are doing a great job and many of us appreciate it.

Mike

"First of all Saturday is the 10th not the 11th."
Which is why an OOPS email was sent out soon after the original email.

"Second of all...I got the post 2 days after the event."
That's interesting as my copy, and I'm sure others, got the message via GRARA Yahoogroups with-in minutes of my sending the original message which was Wednesday, September 7 11:54:43 AM EDT. The OOPS message was sent at 12:49:48 PM EDT.

Anyone else experiencing 5 day delays thru the Yahoogroups as Thom WI8W did?

I never received the correction email from the group.

Sorry if I opened a can of worms.

I know that Yahoo Groups can be somewhat flaky at times. Several years ago I had a group with them dealing with digital photography. I had over 15,000 subscribers and the delays and other issues got so bad I had to shut it down.

Yahoo never offered any solution to the issues and it looks like they still have not corrected it.

On another note I will be leaving for Florida in the morning and I will be gone for a week. Sorry I wont be at the Wednesday Radio Room meet nor the swap this weekend. Ya'll have fun.

-------- Forwarded Message --------
Subject: ARRL Request to Contact Your US Senators Supporting the
Amateur Radio Parity Act
Date: Tue, 13 Sep 2016 16:47:27 -0400 (EDT)
From: ARRL Web site <memberlist@...>
To:

Dear ARRL member,

I am writing to you today because we are at a crossroad in our efforts
to obtain passage of /The Amateur Radio Parity Act./

Our legislative efforts scored a major victory in our campaign when /The
Amateur Radio Parity Act/, H.R. 1301, passed in the House of
Representatives yesterday, September 12^th .The legislation now moves to
the Senate, where we need every Senator to approve the bill.

You are one of over 730,000 licensed Amateur Radio Operators living in
the United States.Many of you already live in deed-restricted
communities, and that number grows daily.

NOW IS THE TIME FOR ALL HAMS TO GET INVOLVED IN THE PROCESS!

·If you want to have effective outdoor antennas but are not currently
allowed to do so by your Home Owner’s Association, SEND THESE EMAILS TODAY!!

· If you already have outdoor antennas, but want to support your fellow
hams, SEND THESE EMAILS TODAY!!

·If you want to preserve your ability to install effective outdoor
antennas on property that you own, SEND THESE EMAILS TODAY!!

We need you to reach out to your Senators TODAY!*Right away*.

Help us in the effort.Please go to this linked website and follow the
prompts:

https://arrl.rallycongress.net/ctas/urge-senate-to-support-amateur-radio-parity-act

Thank you.

73,

Rick

3288. Amateur Radio Parity Act - Call to Action (Again)

Yahoo group: GRARA
Date: 2016-09-20 18:07:41 UTC
From: Jack Amelar
Topic: 3288 Message: 3288

If you have already done this, thank you.
If you haven't, seriously? You can't take 2 minutes to help push this bill through the US Senate? The US House has passed the bill. NOW LET'S GET THE JOB DONE!
Maybe 5 minutes if you're on dialup. Just do it!

----- Forwarded message from memberlist@... -----
Date: Tue, 20 Sep 2016 12:02:19 -0400 (EDT)
Subject: Amateur Radio Parity Act - Call to Action (Again)

Greetings to the hams of Michigan. Many of you have responded to our previous call to action and have sent your letters to our Michigan Senators. However, there are a significant portion that as of this writing have not done so.

This note is to urge that all who have not yet sent their letters to do just that: Send your letters!

We have an opportunity to positively affect Amateur Radio for years to come. H.R. 1301, the Amateur Radio Parity Act, has unanimously passed the House of Representatives and moved on to the Senate for consideration.

All you need to do is spend two minutes of your time to send an email to your two Senators supporting the Bill.

By doing so, you will have helped the future of Amateur Radio by guaranteeing our ability to have an effective outdoor antenna in deed-restricted communities.

The number of people living in such communities grows exponentially each year. Often, a ham homeowner has no choice but to live in a community restricted by covenants. There are nearly 3/4 of a million licensed hams in the United States, more than ever before.

But that may change if we are forced to live in a community that refuses to allow an antenna.

Help yourself and help your fellow hams. Go to this link:

https://arrl.rallycongress.net/ctas/urge-senate-to-support-amateur-radio-parity-act

Enter your zip code and follow the prompts. The letters are there. All you need to do is fill in the blanks, hit save, then send.

That?s it. Under 2 minutes and you?re done.

If you haven?t yet done so, please do so today. Your voice counts!

Thanks to all the hams of Michigan who have done their duty and thanks in advance to those who will respond to this missive.

For those who send their letters this time around, please send me a brief email that simply says "Letters Sent" followed by your callsign.

These emails help us gauge our participation.

73,

Larry, WB8R

3295. New Extended Deployment Fox Hunt Starts tomorrow.

Yahoo group: GRARA
Date: 2016-09-25 23:41:23 UTC
From: Michel Hill
Topic: 3295 Message: 3295

Hi Michigan Fox Hunters, how about trying a new kind of fox hunt? ...the extended deployment fox hunt! Our version of this new kind of fox hunt will start Monday, September 25th and continue for two weeks. We expect the batteries to last!

Actually this isn't really new. The CTFoxHunter@... has been doing this kind of hunt for two summers now. In fact, they have even been running this kind of hunt in the snow! They are located in Manchester Connecticut and the hunts are generally run by Paul Gibson, N1TUP. The Extended Deployment Fox Hunt has become so popular that they don't seem to have much time for the 2-hour hunt anymore.

We will try to run our local hunt much the way Manchester does.

The FoxBox has been placed as of 2:30pm today, Sep.25, 2016. It is running 2 watts into a stock rubber duck antenna. Since their is no starting place for finding the hidden transmitter, all you can do try is to bring-up the transmitter
as you travel around the community. When you have tried a certain route with no success,
report your information with an email to the Michiganfoxhunters@yahoogroups.com yahoo group.
Eventually someone will hear the fox signal and report their location and possible direction
to the transmitter.

Your first try may be from home. You do this by going on the 2 meter simplex frequency of 145.530 MHz, key your transmitter, ID and then send a DTMF "1". If the FoxBox can hear you and you can hear it, you will hear its very distinctive sequence of tones. It will
transmit for 30 seconds, ID and then go back to sleep. You can make it transmit as often as necessary to find the fox.

Once someone has been able to bring it up the foxbox, please report that information to the other fox hunters. Feel free to reply to the Yahoo Michigan Fox Hunter
group. _Do not reveal its,__location_,just a location from which you are able
to hear the fox. This then becomes a starting point (and a direction if possible) for the other fox hunters to use.

When someone finds the foxbox, they should report the success and time to the MichiganFoxHunters@... group, but *not the location. *This gives the other hunters time to find the box. After all, we have two weeks.

This way everybody wins!

You do not actually have to touch the box to claim finding it. Eye ball contact is sufficient. This week's foxbox is located less than 30 feet from a
safe parking location. This week's foxbox is located somewhere in the southern half of Kent County.
Remember, to make the fox respond, hold your transmit key down and push the DTMF "1" button.

I was able to make the fox respond from my mobile rig today from six miles away. In the Connecticut group, they
often start by testing along the expressway routes and reporting the findings.

Good luck,

Mike, W8DER, Chuck AJ8W

3302. Extended Deployment Fox Hunt -- info

Yahoo group: GRARA
Date: 2016-09-28 14:09:23 UTC
From: Mike
Topic: 3302 Message: 3302

Randy and others:

Here are some details about the foxbox being used in the current
Extended Deployment FoxHunt. Please follow this link.

http://www.michiganfoxhunter.com/fox_projects/foxbox.htm

Changes: After discussions with the supervisor of the Michigan State
Police Bomb Squad, some changes were made. Two permanent labels were
engraved and placed on the top of the box. In addition, a "name tag"
type message, sealed in plastic, is clipped to the top handle directing
police to two current phone numbers for additional information. These
numbers are my home phone and my cell phone. During a hunt, I am sure to
keep my cell on at all times. I have two identical fox boxes and a
third controlled by an Arduino micro-computer instead of the Byonics unit.

The batteries are still doing a good job. We are planning on two weeks
from last Sunday @ 2:00 pm.

Review: frequency is 145.530
a DTMF #1 tone transmitted by your HT/Mobile rig turns it
on for 30 seconds plus the CW ID.
Do not report the location of the foxbox it you find it.
You might report the first time you hear the foxbox and
maybe the direction to help others get started.

3308. Extended Deployment FoxHunt -- 8 days to go

Yahoo group: GRARA
Date: 2016-10-03 18:31:19 UTC
From: Mike
Topic: 3308 Message: 3308

For those of you who have not found the fox yet over the last 8 days, there are six days left to achieve fame. This noon (Monday) we swapped fox-boxes to assure that we would have a strong signal right up until Sunday, October 9th.

Here is the field specs.

frequency: 145.530 Mhz

To make the fox transmit, Key your microphone and send a DTMF key #1 tone. The fox box will transmit random tones for 30 seconds, Identify with morse code and shut down. You can repeat as necessary. The fox is hiding somewhere in the lower half of Kent County. The fox is hidden from view less than 25 feet from the closest parking surface. The transmitter is sending 2 watts into a standard rubber ducky antenna at ground level.

You can see what the fox box looks like at:

.http://michiganfoxhunter.com/fox_projects/foxbox.htm
<http://www.http//michiganfoxhunter.com/fox_projects/foxbox.htm>

You can review previous postings to see where other hunters heard the transmissions.

When you first hear the box, you can report the location and direction here, but please don't disclose the hiding place.

If you locate the fox box, you don't have to have "hands-on" to claim you accomplishment. We use the honor system here. Please leave the box in the condition you find it.

....Then post your finding on the Yahoo Group:
http://michiganfoxhunter.com/fox_projects/foxbox.htm
<http://www.http//michiganfoxhunter.com/fox_projects/foxbox.htm>

or post an email to michiganFoxHunter@yahoogroups.com

Or email Mike@... and I will post it for you.

If you are not a member of the MichiganFoxHunter Yahoo group, you an subscribe free athttp://michiganfoxhunter-subscribe@...
<http://michiganfoxhunter-subscribe@yahoogroups.com/>. Or send me an email at Mike@... and I will send you an invitation to join the easy way.

Winners so far have been:

1. Dan Thompson, N8WKM

2. Mike Wolthuis, KB8ZGL

3. Randy Macneill, W8RWN

4. Tom Bosscher, K8TB

5. Nathan Hardman, N8THN

Any Questions, just email us.

Mike@W8DER and Chuck AJ8W

3309. Ham In A Day Saturday October 8, October LARC meeting

Yahoo group: GRARA
Date: 2016-10-05 03:34:53 UTC
From: Jack Amelar
Topic: 3309 Message: 3309

Know of anyone looking to get their ham license or upgrade? Pass this on!
The next Ham In A Day sponsored by the Lowell Amateur Radio Club is
this Saturday, October 8, 1PM, at F.R.O.M.
https://goo.gl/maps/LT3sfLGJHHn Preregistration is preferred. VE exam
at 6PM (Laurel VEC).
Cost for HIAD is $25. There is no fee for just taking the exam(s) if
you are looking to test without the HIAD class or upgrade.
Lots more details at http://w8lrc.org/hiad/

The October meeting of the Lowell Amateur Radio Club
IS NOT this Saturday. The meetings in October, November, and December
are on the Second Thursdays. Decision to keep meetings on Thursday
evenings or return to Saturday mornings will be made at the December
meeting.
So, the next LARC meeting is Thursday, October 13, 6:30PM social, 7PM
meeting, at the "Shack", actually a meeting room at Flat River Outreach
Ministries (F.R.O.M.) 11535 Fulton St E (Hwy M-21) just West of the
Lowell Meijer. Look for the 100 foot tower on the north side.

3310. TV series Frequency premieres tonight

Yahoo group: GRARA
Date: 2016-10-05 14:16:57 UTC
From: Jack Amelar
Topic: 3310 Message: 3310

Interested in a TV fiction involving Amateur Radio?

https://en.wikipedia.org/wiki/Frequency_(TV_series)
"Frequency is an upcoming drama series set to air on The CW in 2016. Inspired by the 2000 Gregory Hoblit film of the same name, Frequency is created by Supernatural and Being Human veteran Jeremy Carver. The series is set to premiere on October 5, 2016"
Plot: In 2016, NYPD Detective Raimy Sullivan discovers that she is able to speak to her deceased father Frank Sullivan in 1996 via his old ham radio. Her attempts to save his life trigger the "butterfly effect", changing the present in unforeseen ways. To fix the damage, she must work with her father across time to solve a decades-old murder case.

Premieres tonight at 9PM on the CW TV network
Ch. 3-2 or Ch. 7 on cable and satellite.

Yahoo group: GRARA
Date: 2016-10-11 00:32:49 UTC
From: Ron Karger
Topic: 3317 Message: 3320

Hank, you will are getting very very sleepy....No you are not being hypnotized or brainwashed (You are getting enough of that with election season). The GRARA connection is the Fusion repeater on the W8DC 146.760 repeater. Wires-X is a digital internet link using the C4FM mode. If you do not have a Yaesu radio with C4FM then you can listen and talk with a DMR radio using a FCS reflector. If this is all Greek or you don't wish to cross over to the dark side (being digital radio) that is fine also. If the digital packet racket bothers you when you are o. The 146.76 just turn on your CTCSS and the coded squelch should do the trick. The repeater is on AUTO/AUTO so the repeater will transmit both analog and digital bit without a digital radio you will not be able to decode the C4FM. I am just down the road from you in Cedar Springs and if you you would like more info or like to check out my station, get a cup of coffee, shoot the breeze feel free to stop by. I work out of my home so usually here.Ron AB8DT

Congrats guys! The HRI-200 is sitting at the Redcross then? I assume that is where GR-Mi6WAN is? Sounds like a ton of fun. Checkout the MI5-MICHIGAN room on 21917 that links to MI5 DMR StateWide2. Audio is perfect between DMR and Fusion.

Have I missed a presentation @ a club meeting about all this
gobbledegook? If so, it's probably my own fault for not paying
attention to the very, very, very robust communication of what the
presentation of the monthly meetings will be. If, not, it sounds like
it might be of interest to someone who is still bemoaning the demise of
sp*rk.

Subject: MARA Burrito Night

The Michigan Amateur Radio Alliance is again going to hold a

Burrito Night on 10/21 at 5 PM until the food runs out, we will

order more supplies this time. Location is the 5th st Hall at

5th & Davis NW, Grand Rapids. Price will be dependent on

what our supplies cost. Bring your friends, relatives, neighbors,

kids, your kid's kids for a great meal. This is a rain or shine event!

CU there!!! !!!!!!!

3325. GRARA repeater system update

Yahoo group: GRARA
Date: 2016-10-31 15:11:38 UTC
From: stprovost@...
Topic: 3325 Message: 3325

Hello, this past friday, Mike KB8ZGL and his climber Troy were successful in getting the 440 mhz link cable (located between 440 mhz antenna and hardline cable from the radio room) removed, fixed (by our friends at T&W), and then re-installed.
Tom Hansen stated the signal quality was much better after the link cable was repaired and installed.
Cost for the cable repair at T&W was $75, I will ask for a check to be cut for this cost at our November Meeting.

Now we are getting ready to order equipment to setup our high speed internet link from the 92nd street hill to our antenna platform on the verizon tower.
This is the next phase of the plan to get us internet access for the radio rooms, and our second repeater location.
The cost for the equipment is about $800.
We would need to cut a check for this amount at our meeting this friday.
This cost is already covered from the $1300 we already received for cable sales.
I am also working on raising more money through sales of ups units that were given to GRARA from a local school district that replaced all ups units with new units. The old units are being sold to raise funds for the GRARA repeater system.

The issue is, we are running out of time to have climbers available to install the equipment for the data link.
Thus, I am having the equipment ordered this week.
I will gladly answer any questions from members about this purchase.

from Dale's Tales, by our Section Mangler, WB8R, November 2016
**
**A NOTE ABOUT ARRL SANCTIONED HAMFESTS: With the year's end
approaching in just two short months, the requests from Great lakes
Division Swaps for ARRL Sanctioning in 2017 seem to be running behind
this year. It is important to note that obtaining ARRL sanction for
your hamfest is not automatic. Your swap chairperson needs to file the
request early to insure that there is adequate time to obtain the
sanctioning approval, that way the swap will meet the deadline to be
listed in QST and hamfest material can be shipped to you from ARRL
Headquarters. It is never too early to register your hamfest with
Headquarters.**

3329. ARRL Info on new OTH Radar

Yahoo group: GRARA
Date: 2016-11-01 01:46:15 UTC
From: Thom
Topic: 3327 Message: 3329

New Russian Arctic Over-the-Horizon Radars Set for 2017 Startup

10/31/2016

According to media accounts, more long-range, new over-the-horizon (OTH) radars that can identify aerial and sea targets hundreds of miles away are scheduled to begin operation next year in the Russian Arctic. It's doubtful, however, that the news heralds the return of interference on the level of that generated by the so-called "Russian Woodpecker" OTH radar, which plagued Amateur Radio HF bands in the 1970s and 1980s.

Over the past couple of years, OTH radars, /sans/ woodpecker, have become increasingly commonplace intruders on Amateur Radio bands, according to the International Amateur Radio Union Region 1 (*IARU R1* <http://www.iarums-r1.org/>) Monitoring System (*IARUMS* <http://www.iarums-r1.org/>), which has noted OTH radars in Russia, China, Cyprus, Iran, and Turkey. The frequency-hopping nature of the technology accounts for the annoying interference that covers wide swaths of spectrum. The Russian systems-intelligence "Konteyner RLS" OTH radar, transmitting from in the Nizhny Novgorod region, is frequently spotted on 20 meters. While no woodpecker, it transmits a broad, frequency-modulated CW signal at 50 sweeps per second with a bandwidth of 80 kHz or greater, accompanied by signal splatter, IARUMS Coordinator Wolfgang Hadel, DK2OM, reported recently.

/Sputnik/, a Russian government-controlled radio service, *cited* <https://sputniknews.com/russia/201610291046866256-russia-radar-arctic/> a /Rossiiskaya Gazeta/ newspaper report that six OTH radar installations will operate in the region. Deputy Defense Minister Dmitry Buklgakov, who visited the construction site, said a runway capable of handling all types of combat aircraft was simultaneously being reconstructed nearby, the report continued. Other reports have indicated that similar systems will be deployed in the Far East in 2018. Russia has sold its OTH radar technology to China.

OTH radars employ widely separated transmitting and receiving site and can "see" beyond the horizon, the typical limit for ordinary radar. The systems employ antenna arrays of up to 5 kilometers long and 5 meters tall. /— Thanks for news tip to Frank Smith, WS1MH/

The Konteyner receiving site southeast of Moscow.

3334. Changes are coming!

Yahoo group: GRARA
Date: 2016-11-05 06:28:40 UTC
From: Thom
Topic: 3325 Message: 3334

Greetings all,

It's 1am on Saturday November 5 and I am still wide awake. Earlier, at the monthly club meeting, I was voted in to the position of club website administrator. This position will start on January 1, 2017.

I have already started a design for the new club website. We are about to make it look great, be much bigger and contain loads of information that you will find useful. I am in need of the following, as a start....

To start let me say that if you email me stuff, attachments are welcome. I can handle text files, PDF's and I use Microsoft Word 2010. I also have Adobe Photoshop for photographs and videos.

1. Does anyone have a photograph of the city of Grand Rapids taken at night? If so please send me a copy of it. I want to use it as the header photo on the new site.

2. I would request that all officers (and anyone else who wants to) submit a brief, written summary of your history as a Amateur Radio Operator.

3. I would like to get ideas for what you would like to see on the new site. No matter how trivial, it might just be included.

4. Photos of any activities you have participated in relating to Amateur Radio.

You can email me those items, if you have them, ASAP, at the address below.

5. If you have any questions call me on the repeater (146.26), send me a email, or you can call me direct.

I hope to have A PREVIEW OF THE NEW WEBSITE at the December Meeting.

email: ki8w@...

phone: 616-498-7770...if you do not get an answer, leave a voice mail and I will call you back. I am often separated from my phone even while at home and I don't move around all that fast anymore. lol

Thanks all

Spent some time searching the listings:

North Ottawa got 2196 points as a 3A
Lowell got 5738 points as a 4A
Kalamazoo got 4538 points as a 5A, Allegan 1734 points also 5A
I didn't find MARA - did they submit a score?
Looks like an apples-to-oranges comparison.

MARA was not able to submit their logs in time, but I have a rough calculation of their point total.

We operated 2A. According the the latest newsletter we had 885 contacts. Using my logs to compare, I can guess we would of had somewhere around 2500-2600 points.

Those of us making the annual trek to Hamvention have been dealing with, for what seems the past decade, I-75 construction through Dayton, I am happy to report it all appears to be finished! Driving through Dayton a couple days ago, the only construction signs were for US34, I-75 was a breeze. Of course this all could change come spring.

And the signs directing to Hara Arena are gone.

Great news...

Here is my story of driving to Dayton for my first Hamvention.

No problem until I was 25 miles north of Dayton.

Traffic was backed up for about 9 miles...the reason... there was an
Ohio State Trooper sitting in the passing lane, eating his lunch. No
lights and no other reason for him being there.

I used the local repeater autopatch to report him.

Looking forward to Xenia next year to check out the new venue.

Have a Happy Turkey Day all. I will be at the radio room tonight.

I-75 Northbound this afternoon through Dayton was a bit crowded, but
southbound was clear, only one slowdown south of town a mile or two
before I-675.

I'm very glad to be out of such messes of traffic.

3349. VNA to borrow?

Yahoo group: GRARA
Date: 2016-11-29 00:12:19 UTC
From: John Streyle
Topic: 3349 Message: 3349

Does anyone have a VNA (vector network analyzer) they would be willing to loan out? I am trying to figure out how to shunt feed my tower for 160, and my MFJ analyzer appears to be too overwhelmed with noise and RF to be able to give a usable reading, when hooked to the tower. (And, an SWR bridge doesn't provide enough info.)

John,

I do not own a VNA...sorry.

What kind of radial system do you have under your shunt feed?

The radial system is ~80 pieces of ~20 ga. copper magnet wire, with lengths varying between 6 and 100 feet, depending on direction and obstacles, house, etc. It was either laid on the surface of the ground and stacked down with wire staples, or else buried shallowly (about an inch) in the ground. all terminate (after stripping the ends, of course) into a group of screw-type grounding tie bars in a large plastic electrical box, and are in turn tied together with the tower and its ground rods through a short piece of 10 ga. solid copper, which is also the point the coax shield connects to.

3354. Call to Action.....

Yahoo group: GRARA
Date: 2016-12-01 23:02:13 UTC
From: ARRL Members Only Web site
Topic: 3354 Message: 3354

For those who have already sent letters to Senators Stabenow and Peters:
Thank you.

For those who have not yet done so, please see below and take action as
suggested:

SB QST @ ARL $ARLB044
ARLB044 ARRL Issues Urgent Last Call to Press for Senate Passage of
Amateur Radio Parity Act

ZCZC AG44
QST de W1AW
ARRL Bulletin 44 ARLB044
From ARRL Headquarters
Newington CT December 1, 2016
To all radio amateurs

SB QST ARL ARLB044
ARLB044 ARRL Issues Urgent Last Call to Press for Senate Passage of
Amateur Radio Parity Act

It's now down to the wire: ARRL has issued a last call for members to
urge their US Senators to support the Amateur Radio Parity Act (H.R.
1301) when it comes up during the "lame duck" session of Congress that
adjourns in a couple of weeks. The House of Representatives approved
the bill in September, and the Senate must follow suit if the bill is
to succeed. If it fails in the Senate, the entire process will have to
be repeated in the new Congress. The legislation is now in the Senate
in two forms - as H.R. 1301 and alternately in the packaged bill S.
253

"We are on our final push for the Amateur Radio Parity Act before
Congress adjourns," said ARRL President Rick Roderick, K5UR. "The
grassroots effort by the Amateur Radio community has been outstanding.
Since September, over 110,000 emails have been sent to legislators in
Congress. Thanks to everyone who has helped, but we can't stop now.
Please, keep the e-mails coming and also work the phones down the
stretch. Call your Senators! We are almost there.
Let's get it done!"

ARRL Hudson Division Director Mike Lisenco, N2YBB, who chairs the ARRL
Board's Legislative Advocacy Committee and has been heavily involved in
efforts to move H.R. 1301 forward, echoed President Roderick's
sentiments. He said the bill was just starting to build momentum in the
Senate following its unanimous passage in the House, when Congress shut
down for the 4 weeks prior to Election Day. He pointed out that H.R.
1301 has received broad support from both parties.

Lisenco had a special request of Florida radio amateurs. "Please write and call Sen. Bill Nelson and demand that he remove his hold on H.R. 1301 and support passage of this critical legislation."

Urging your US Senators' support is simple: Go to our Rally Congress page at, https://arrl.rallycongress.net/ctas/urge-us-senate-to-pass-amateur-radio-parity-act , enter your ZIP code, fill in your name and address, press enter, and e-mails will go directly to your Senators. Members may do this even if they have already contacted their US Senators for support.

There are no guarantees, Lisenco has pointed out. "In order to have a chance at overcoming political obstacles that have little or nothing to do with the legislation, we need our voices to be heard," he said. "And we need that input today!"

President Roderick urged members to "reach out one more time to your Senators today! Right away Right now!"

September's victory in the US House culminated many years of effort on ARRL's part to gain legislation that would enable radio amateurs living in deed-restricted communities to erect efficient outdoor antennas that support Amateur Radio communication. The measure calls on the FCC to amend its Part 97 rules "to prohibit the application to amateur stations of certain private land-use restrictions, and for other purposes."

While similar bills in past years gained some traction on Capitol Hill, it was not until the overwhelming grassroots support from the Amateur Radio community for H.R. 1301, and ARRL's relentless and strident efforts on Capitol Hill that this bill made it this far.

All,

I spoke to Senator Stabenow yesterday on the phone and she told me that with the Senate going on recess for the holidays very soon they will not be doing anything on this bill before the end of the year. Looks like we will have to start all over with the new congress after the first of the year. But miracles do happen from time to time.

3359. Anyone on the ARRL 10 meter contest?

Yahoo group: GRARA
Date: 2016-12-11 03:01:38 UTC
From: Hank Greeb
Topic: 3359 Message: 3359

I ain't heard nothing good about propagation on 10 meters today.

But, some stations seem to be working others. Family and other activities kept me off the air, except I think I've made one more point as a "chaser" in the National Parks On The Air, sorta by accident.

For about 3 or 4 years straight, 10 meters was "hot" for the ARRL 10, and my peanut whistle could make a hundred contacts or more. Probably not for this weekend. I might have some time tomorrow afternoon.

Just curious, and thanks for the bandwidth.

Howdy all,

Just found out about this and I think we should make it a club activity.

I would be willing to put this effort together for the club. We could use the facilities of our club station, antennas etc. We could put together some stations to run using a combo of club radios and radios we may bring from home.

Set them all up in our meeting room, run some coax to our club antennas and power it all from a generator outside.

January 28, 2017...1900Z (2pm) until January 29...1900Z (2pm)

Great idea.. I'm all for it. But....

Are we wimps? What about commandeering a Red Cross ERV, a tent or two, and run xO where X would equal at least 1 or more station(s) Outdoors? Setting up outdoors, but inside an ERV or equivalent, would be warm. Inside a tent could be heated with electric heaters. I believe we could convince a township or City or Village to allow a "Red Cross" affiliate to use a park for such an event.

Indoors, or Home station isn't really "winter." IF we're gonna operate winter, why from a Home station? Besides, the RFI around Red Cross make it practically impossible to run 80 and 40 meters during daylight hours, and probably isn't so good during the evenings either.

Take it from an intrepid NPOTA activator - making QSO's when it's 0 ?C ? a few, amidst sn*w drifts plus man-mae piles, make for "very interesting" Q's. (Activation of a National Scenic Trail like the North Country Trail which runs through Kent County MUST be done from a location reached by human power. No vehicle, no permanent antennae, no attachment to vehicle for power, etc. A tent is permitted, but makes for a long setup/tear down time.)

Just looking for ideas Hank, Your suggestions sound great. I hope we
get some more thoughts and suggestions. nI want everyone's input on this
but I know that with any group only a few would actually do anything.

Topic: 3359 Message: 3366

Hi everybody,

I'm not a GRARA member yet, but I like this idea and agree with Hank's suggestion. I would be willing to be there a couple of hours, if I get permission from my local authority (wife).

I'm sure you'll have plenty of radios, but my humble FT-857D can be there in its go-kit if needed.

73,
Marcelo W6EUH

3367. Broadcastify Live Feed of 146.760 Repeater

Yahoo group: GRARA
Date: 2016-12-17 18:29:06 UTC
From: ab8dt@...
Topic: 3367 Message: 3367

I have put live streaming feed on the "W8DC 146.760 MHz repeater and Wires-X Node #40074" via Broadcastify (see Broadcastify - Live Police, Fire, EMS, Aircraft, and Rail Audio Feeds http://www.broadcastify.com/). You can listen online or via an app thru your mobile device. It will broadcast both FM & C4FM. The Wires-X node is still RF linked into the repeater and has it's own Room W8DC Repeater Room #40074. Also and can be linked to any room that is active (see constantly updated list at WIRES-X ACTIVE NODE ID list https://www.yaesu.com/jp/en/wires-x/id/active_room.php).

3368. RE: Mara's After Christmas dinner party

Yahoo group: GRARA
Date: 2016-12-17 21:46:49 UTC
From: Richard Ranta
Topic: 3368 Message: 3368

Hear yee, hear yee, hear yee,

MARA is holding it annual Christmas Party on Jan 21st, 2017 at the 5th St Hall. Oops, nobody gave me a time, check

the website. The menu will include Swiss Steak, chicken, etc and a desert table. This party is open to all local hams &

families. In order to inform the caterer on the attendance numbers, payment of $11 per person must be sent to arrive by

Jan 11th to Jerry Wittkoski, W8MSK, 1025 Kendalwood St NE, Grand Rapids, MI 49505. We will also have a "White

Elephant" gift exchange if you "wish" to participate. A White Elephant is anything you have laying around the house, you

don't want or need and would rather dump it on a unsuspecting friend than pay the junk man to haul away. We always have

fun. Checks should be made out to MARA. Hope your schedule will allow you to attend. Merry Christmas to ALL!!!

Mike, K8OOK, MARA Secretary

3379. Special Event Station K7Z will commemorate Zane Grey's birthday on January 28-31, 2017

Yahoo group: GRARA
Date: 2017-01-05 20:19:50 UTC
From: Bruce Sperka
Topic: 3379 Message: 3379

For Immediate Release

January 5, 2017

Contact: Bruce Sperka, AD7MM
bsperka@...

Special Event Station K7Z will commemorate Zane Grey's birthday on January 28-31, 2017

Payson, Arizona -- Sponsored by the Tonto Amateur Radio Association, Inc. and the Northern Gila County Historical Society that operates The Rim Country Museum and The Zane Grey Cabin. Members of our amateur radio association will be active from January 28 - 31, 2017 using the call sign K7Z from their own QTHs as well as from the Zane Grey Cabin in Payson, AZ.

Preferred frequencies will be in the General band segments. Like Us? Spot Us!

A special QSL card will be available for the event:
https://www.qrz.com/db/k7z

QSL INFO

Direct Only - Your Card and SASE, Sorry No eQSL, LOTW or Bureau

Non-USA, Please enclose 2 US Dollars for return Postage

Send a SASE (self-addressed stamped envelope) for a commemorative QSL card to:

Tonto Amateur Radio Assoc., Inc.
PO Box 765
Payson, AZ 85547

Zane Grey was an author and master of the American western novel. An Ohio born dentist, Pearl Zane Grey spent many years under the Mogollon Rim writing "To The Last Man" and a dozen other Westerns with Arizona settings and characters. His prolific writings popularized the American cowboy as a taciturn, romantic figure.

3380. Great Deal on Dayton 2017 Hamvention Housing at Univ at Dayton Campus South!!!!

Yahoo group: GRARA
Date: 2017-01-11 02:32:26 UTC
From: <stprovost@...>
Topic: 3380 Message: 3380

Every year, Grand Rapids Amateur Radio Association has a group of members go to Hamvention in the Dayton Ohio area.

This year Hamvention 2017 is located at a new location in Xenia Ohio at the Greene County Fairgrounds and Expo center. More information is at this website:
http://hamvention.org/about/hamvention/
Keep in mind that the main website still has last years info, but it is being updated now on a daily basis!

Our group usually leaves thursday day morning and comes home monday afternoon.
We stay at the University at Dayton dorm rooms.
We have available spots in the Campus South building.
You don't need to stay for the whole four nights.
Each suite has a kitchen, bathroom with multiple stalls and showers, and 3 bedrooms that sleep two people each

Cost is $117.00 per person for four nights at Campus South.
Parking is included right outside of the dorm building.
Please note the $117.00 is a flat rate for the four night stay.

Contact is Tom N8DGD via email (n8dgd@...)?for reservation,

Make check payable to "Tom Hansen"

Mail payment to
Tom Hansen
632 Fairview Ave NE
Grand Rapids, MI. 49503

Topic: 3380 Message: 3381

Howdy all,

Work continues on getting the club website cleaned up and working.
Changes are coming.

Now available are club email addresses that are forwarded to a email
account you are using. They are in the format yourcall@....

For example...ki8w@...

If you would like to have this setup for you, I need the following...

1. your callsign

2. a currently used email address that is not a forward, somewhere else
(like ki8w@...).

Send your info to web.administrator@... and I will get this setup
for you.

Hope to see you at the Wednesday night Open Club Room or at the next
General Meeting.

Have a great day.

3385. ARRL January VHF Contest is this coming weekend.

Yahoo group: GRARA
Date: 2017-01-17 03:56:21 UTC
From: David DeVos
Topic: 3385 Message: 3385

Hi everyone,
I'll be on for the January VHF contest this coming weekend from EN72fu, and I'll have 6,2 & 432 from my home station. I do have 5.7G and 10G on my tripod, and I wouldn't have any problem pulling those out for snow scatter - just give me a phone call. My 10G , 5.7G , 2.3G, and 1296 beacons will be on as well from EN72et.
For information see the ARRL Contest Page January VHF

From: Thom
Topic: 3385 Message: 3386

Howdy All,

Spent 50 hours over 2 weeks building a new website for the club.

It is coded in good old HTML. The old site was deleted.

Just finished uploading the new website to the server and the site is now live.

The site contains everything the old site did and a bit more.

So head on over to w8dc.org and give it a ride. Let me know if you find anything amiss

Of course I can always use info, web site links, photos/video or what have you.

I will be displaying the new website at tomorrow nights Open Club Room event.

73,
Thom KI8W

Thom,
The web site looks great.
I travel a lot and so use a lot of club web sites for the local activities. None are better.
I did not see any info on your repeater(s). The recent meeting minutes are absent.
Good job.
Wendell, K8OO/4

Hi everyone,

I'll be on for the January VHF contest this coming weekend from EN72fu, and I'll have 6,2 & 432 from my home station. I do have 5.7G and 10G on my tripod, and I wouldn't have any problem pulling those out for snow scatter - just give me a phone call. My 10G , 5.7G , 2.3G, and 1296 beacons will be on as well from EN72et.

For information see the ARRL Contest Page January VHF<http://www.arrl.org/january-vhf>

John,

proper grid square for your home QTH is EN72ew. Got that from the
Detail Page from your callsign listing on QRZ.com.

Dear DXer,

I would like to extend a personal invitation to you and Members of your Club to attend the International DX Convention 2017 in Visalia, California on April 21-22-23, 2017.

IDXC 2017 will be our 68th annual International DX Convention. DXers from around the world will gather once again to meet their fellow DXers, attend interesting and informative programs, see the latest in new products from the top vendors - and have a chance to win some great raffle prizes! This year Friday, April 21, 2017 will be a full day of training, presentations and vendor exhibits.

Full details of IDXC 2017 are at this website: http://www.dxconvention.com/

You can download the IDXC 2017 PR Kit here:
http://www.dxconvention.com/files/idxc2017-prkit.zip

The IDXC 2017 PR Kit contains:

* An IDXC 2017 Flyer that you can include in your Club newsletter and post at your DX gathering place.
* A short IDXC 2017 PPT slide show you can use for your Club meeting
* An IDXC 2017 color advertisement that you can include in your Club newsletter
* A Visalia Vacation Options brochure - Visalia is just a few hours from world-class California vacation destinations, and we encourage all our DXing friends to combine their visit to IDXC with a vacation.

Thank you, and I hope to see you and many of your Club members at our International DX Convention next April!

- 73 and good DX de Mike, <http://www.qrz.com/db/k6mkf/> K6MKF, IDXC 2017 Committee

If anyone is going to Howell, please remember than Hell is only about 15 miles away. A trip to Hell, and eating a burger or similar at the Hell Saloon (formerly Dam Site Inn), is a priceless adventure. :)

1:30 pm is a really odd time to schedule a 'dinner'. It might be better called a 'very late lunch'. I would suggest better timing is needed in the future as this is inconvenient at best.

3402. Need transportattion to/from GRARA meeting

Yahoo group: GRARA
Date: 2017-02-03 15:31:12 UTC
From: Hank Greeb
Topic: 3402 Message: 3402

I'd love to attend the GRARA meeting tonight. Does anyone live in the Northwest part of the county who could pick me up for the meeting and return me to home? I think I could drive, but it would be against medical advice. I'm recuperating from a hip replacement, and am not supposed to drive until I see my surgeon later this month.

I live about a mile from Rockford.

Please advise by private e-mail or phone 616 828 9663 (cell)

In the past, the dinner was at 6:PM. The problem was the line ups from
the crowds at that time made it difficult for our people to get in, and
room reservations were difficult to get as well. If the weather was
bad, driving home at dark was no fun either.

Finding a time and day that's convenient for everybody would be futile.
Over the years we have found the 1:30-2PM start time to be most
compatible for most of those who wish to attend. Sorry for anyone who
can't make it this year, hopefully next year will work out.

In the past, the dinner was at 6:PM. The problem was the line ups from the crowds at that time made it difficult for our people to get in, and room reservations were difficult to get as well. If the weather was bad, driving home at dark was no fun either.

Finding a time and day that's convenient for everybody would be futile. Over the years we have found the 1:30-2PM start time to be most compatible for most of those who wish to attend. Sorry for anyone who can't make it this year, hopefully next year will work out.

Thanks for the reminder of the Lowell event. It had quite slipped my mind as I didn't get a reminder card this year. Probably because I was busy and didn't attend last year. In any case it is on my calendar now.

3410. GRARA VE Testing for Feb 2017 this friday Feb 10th at 7pm

Yahoo group: GRARA
Date: 2017-02-08 03:13:47 UTC
From: stprovost@...
Topic: 3410 Message: 3410

Hello, we continue the tradition of the VE testing by the Grand Rapids Amateur Radio Association on the second friday each month.
The next testing date is this friday Feb 10th at 7pm.
We will start registration at 630pm.

Remember the cost of this VE exam is zero dollars!.

Please review this website FAQ section to know what to bring:
https://www.laurelvec.com/?pg=faq https://www.laurelvec.com/?pg=faq

Upon successful completion of the exam, you will see your new license status in the FCC database within 7 days or less!

Testing location is at the
American Red Cross
1050 Fuller Ave NE
Grand Rapids, MI 49503

Hello, for the past 2.5 weeks, I have been working through pneumonia.
Last night I wen to med center and was given new antibiotics! for round two.

I am working with Nathan N8THN to be sure we will have a successful friday night.
I will be meeting with him tomorrow to finish this process.

Thus, I will not be there tonight :(.
Trying to get more rest.

Topic: 3418 Message: 3418

Yep, the ARRL International DX Contest (SSB) will start at 0000Z
Saturday, March 4, and run through 2359Z Sunday, March 5

This is coincident with the 1900 (EST) Meeting of the Grand Rapids
Amateur Radio Association.

I suggest that a group of GRARA members fire up W8DC for the event, and
give it a try. We've done this before, and it has worked out quite well.

3420. RED CROSS closure alert

Yahoo group: GRARA
Date: 2017-02-14 00:03:53 UTC
From: stprovost@...
Topic: 3420 Message: 3420

Hello, Today I was informed that starting next monday Feb 20 and going on until saturday Feb 25, the basement area of the red cross will be CLOSED.

There will a company working to clear asbestos from the ceiling area in all the rooms. They will also wrap piping with proper insulation.

During this time, no one will have access to the basement area.

Thus, thus wed Feb 22, there will be no radio room.

We need to remove some of our gear from the radio room, and declutter our room as well this week.
See you wednesday night this week.

If you're amongst the many who have activated a National Park in 2016,
and are feeling "withdrawal symptoms" of not being able to participate
in such a grand effort, you may be interests in KB6NU's latest blog
about "Parks On the Air":

http://www.kb6nu.com/p-ops-going-2017/

It seems to encompass all the State and National Parks in the United States.

There's a "promise" of Michigan State Parks On the Air, with a "soft
start" on April 1, but the rules have yet to be published.

We could also use this opprotunity to move some of the stuff from our radio room out to the garage.

I am thinking that our room looks so cluttered and it does not present well to visitors or potential new members.

I would also like to build a new operating desk in the same fashion that I built my personal station desk. I can provide photos if needed.

Also how aboyut painting the walls and/otr putting in a drop ceeling (sic).

3425. Michigan State Police 100th Anniversary

Yahoo group: GRARA
Date: 2017-02-15 19:41:14 UTC
From: Hank Greeb
Topic: 3425 Message: 3425

Received from Larry Camp, WB8R, Section Manager:

==========

Michigan State Police 100th Anniversary

Ever since they first got radios back in the 1930's, hams have worked closely with the Michigan State Police.

MSP is Michigan's Emergency Management Agency, so as soon as ARES was formed, the partnership between MSP and ARES began.

On April 19th, the Michigan State Police celebrates it's 100th anniversary. To commemorate that event, we will be operating a special event station from the State Emergency Operations Center, which happens to have a very impressive ham shack.

The station will be operating the following weekend, April 22nd and 23rd (zulu days). We will be operating on the following frequencies:

3.560 (CW)
3.930 (LSB)
7.065 (CW)
7.230 (LSB)
14.030 (CW)
14.230 (USB)

We will (obviously) favor the lower frequencies during the evening and early morning, higher frequencies mid-day.

To support the Michigan State Parks on the Air event going on at the same time, the station will also operate 146.58 FM. The SEOC station has a significant VHF footprint.

The Michigan State Police will be providing a special QSL for this event. To obtain this special QSL Card, see http://ares-mi.org/MSP100.php.

==========.

Might be a good chance to get that special QSL card.

Reminder, Saturday, February 18, Get Outta the Cabin / New Hams Dinner

Download flier at http://www.w8dc.org
or direct at
http://www.w8dc.org/file/club/dinflyr17.pdf

Feb. 18 ☐Get Outta the Cabin☐ Dinner (formerly known as the ☐New Hams Dinner☐) at 1:30 at the Golden Corral, 3461 Alpine NW, Walker. Anyone involved or interested in ham radio is welcome. We would especially like to encourage and welcome any new licensees and hams new to the area. You don☐t want to miss out on the door prizes, this year including a new radio for a lucky new ham. Good time for all! Buffet style; pay at the door. Normal restaurant rates with discounts for seniors and children. Cost is under $13 with beverage and tax, plus gratuity. No reservations, just show up.

Subject: [GRARA] Anyone have Last Years Michigan Governor's Ham radio proclamation?

  I had a computer failure, and can't find the proclmation made around
Field Day date last year by the Governor concerning Amateur Radio.

I'm applying for a special use permit for a Field Day Site for 2017, and
would like a copy of this resolution as supporting documentation.

Thanks in advance.

3436. 2017 Kent and Ottawa NWS SkyWarn Spotter Class

Yahoo group: GRARA
Date: 2017-02-27 17:25:36 UTC
From: Derek Schroeder
Topic: 3436 Message: 3436
Attachments: 1 described; binary payloads are missing from this source WARC

Good afternoon!

It is that time of year again when threatening weather looms in the forecast.

The Kent and Ottawa counties SkyWarn groups are proud to present the Annual NWS Basic SkyWarn Spotter class.

The link to sign up is located here.
https://www.eventbrite.com/e/kent-ottawa-severe-weather-spotter-training-2017-registration-28894842251

This year the training will be held at the Grandville High School. Please see the attached flyer for address details.

We look forward to seeing you there!

Derek Schroeder
Kent County SkyWarn

3439. Field Day - June 23 & 24 - Cedar Springs

Yahoo group: GRARA
Date: 2017-03-01 19:03:26 UTC
From: Hank Greeb
Topic: 3437 Message: 3439

Mark your calendars for June 23 and 24! Field Day is near! Make plans for taking part! We plan to operate at the Staging Area for the Fred Meijer White Pine Trail in Cedar Springs. This will be in conjunction with the centennial of the founding of the Michigan State Parks. The Michigan DNR plans a 3 year celebration of State Parks staring this year, and running through 2019. Hams will be celebrating with the State as "Michigan State Parks On The Air" (MSPOTA).

Details will be discussed at the GRARA meeting on March 3.

From: Hank Greeb
Topic: 3437 Message: 3440

Yep, it's DX contest starting at 7 p.m. EST this Friday. This coincides with the start of the GRARA meeting.

Anyone want to operate W8DC, and try out the new antennae? Seems like it would be a great opportunity to make a few contacts, especially on 20, 15, and possibly 10 meters (if 10 is actually open!)

Let's discuss this at our meeting on Friday!

3443. QRP To the Field - 22 April?

Yahoo group: GRARA
Date: 2017-03-03 20:34:58 UTC
From: Hank Greeb
Topic: 3443 Message: 3443

Anyone interested in operating "in the field" between 0800 and 1800 EDT, April 22, 2017, for QRP to the field? We could operate near the Grand River or the Flat River near Lowell, or the Rogue River near lots of places in the county, or on or near the Thornapple River and the Covered Bridge in Ada, or.... ???? What's the river which flows into and out of The Wabasis Lake. - like when we operated from Wabasis Lake Park a couple years ago? Lots of Rivers in the area, lots of choices..... I'm sure I'm not familiar with many of the rivers in the area.

Whatcha thimk? How about another adventure in the Wilds? (At least it shouldn't be -2 °F like it was when we a bunch of us went to Hell in 2007. :)

Subject: [QRP-L] 2017 QRP TO THE FIELD
Date: Fri, 03 Mar 2017 11:22:30 -0700
From: na5n@...
Reply-To: QRP-L Mailing List <qrp-l@...>
To: QRP-L Mailing List <qrp-l@...>

This year's QRP TO THE FIELD (QRPTTF) will be held on:

SATURDAY, APRIL 22, 2017 from 0800-1800 your local time

THEME: "A River Runs Through It" -or- "Rivers On The Air"

Operate from near a river, stream, creek, etc. Most everyone has some sort of river nearby, or even a scenic river park, for a nice field location. If it has a name, it counts. SOTA stations are always invited to participate in QRPTTF for the x3 multiplier. Working a SOTA station earns you extra points.

Rules, information, and babbling commentary here:
http://www.zianet.com/qrp/qrpttf/2017/ttf.htm

40th Annual 5/3rd River Bank Run
Main Event Saturday, May 1 6AM - 1PM / varying end times

Why should you help out with the 5/3rd River Bank Run?
1. As amateur radio operators we should give back to the community.
2. Time to dust off those radios and hone our communication skills.
3. Great opportunity to show the community what ham radio operators
can do to support their community.
4. For those of you who volunteer in the emergency community it is a
great time to work with other emergency service personnel.
5. See old friends.
6. We think this is fun.

Several things to keep in mind. We have 2 Events.
#1) The JR Event which we will need about 15-20 People to help.
Wednesday, May 10 4PM - abbout 8PM.
#2) The Main Event Saturday, May 13 6AM - 1PM with varying end times.

We will also have an RBR Pre-Meeting on Friday, May 12 at the Kent
County Sheriff Dept,701 Ball Ave, Grand Rapids, from 6:30PM - 8:30PM.
(We need about 80-85 People to help with the main event in various
positions)

For those who have never worked the River Bank Run.
This is the PREMIER Communications event in Kent County. This event is
one that you'll enjoy and come back every year for more! The RBR event
is HUGE and keeps growing!

Please sign up @ http://vrm.cc/rbr. Any questions please email:
rbrsafety@...

3446. MI-State Parks OTA (MSPOTA) - April 1, White Pine Trail

Yahoo group: GRARA
Date: 2017-03-11 18:30:45 UTC
From: Hank Greeb
Topic: 3446 Message: 3446

On All Fool's Day, April 1, 2017,this fool will be participating in the maiden day of the Michigan State Parks On The Air (MSPOTA)

I'm inviting all fellow *fools... errr...*. hams who have mobile or portable stations to join the effort.

Schedule - (Approximate)

Start Time
Date
Comment
Where?
1700Z
1 April 2017
1 p.m. EDT
Trail Head, Cedar Springs, Michigan

Trail Head & Parking area is where West Maple Street meets the Fred Meijer White Pine Trail, west of Main Street. The best landmark on Main Street is the Cedar Springs Brewing Company on the SW Corner of West Maple and Main Street.

If you wish to operate but don't have portable gear, I'll have my Elecraft KX2 QRP Rig, and "probably" will even have a microphone attached to it so SSB will be possible. (No guarantees - I've hooked the microphone to a borrowed KX3, so I think it will work with the KX2, but, as many know, SSB is not a high priority on my list of modes. :) Use your own call, if you wish, or a special event call which I'll have for this special All-fool's-Day event, whichever floats your boat.

I'll personally be operating at 1700Z from the gazebo on site if weather is favorable. If it's raining, snowing, hail falling, gale wind blowing, etc. I'll operate from my automobile.

If timing is not right for your schedule, and you have your own portable or mobile rig, show up anywhere along the trail (doesn't need to be at the site, just within 50 yards, 150 feet) of the trail. Pick a time and a mode, and operate.

Advertise yourself with a self spot on any of the DXclusters. I generally prefer DXwatch.com, but the majority of the DXclusters are linked together on the internet, so if you announce your presence on one of them, it will show up within a minute or so throughout the country.

Full rules of the MSPOTA have not been promulgated yet, but I know that all one needs to exchange is RS(T) and MSPOTA park number (MSP404 for Cedar Springs). The "chasers" who will be calling you only need to give

RS(T), but will often give their state. The only thing that is needed for a valid log entry is date, time, mode, the call letters of the station worked. Usually operators give signal report.

If you plan to join me at 1700Z, please advise by private e-mail (or via return e-mail to the reflector).

3447. CQ WW WPX Contest, SSB: 0000Z, Mar 25 to 2359Z, Mar 26

Yahoo group: GRARA
Date: 2017-03-14 18:26:40 UTC
From: Hank Greeb
Topic: 3447 Message: 3447

Yep for all those who love flapping their jaws and exercising their
vocal cords, there the

CQ WW WPX Contest, SSB: 0000Z, Mar 25 to 2359Z, Mar 26
For the very, very, very few who still think in local time that is
CQ WW WPX Contest, SSB: 2000EDT, Mar 24 to 1959edt, Mar 26

This is a fun contest, where one gets multipliers for each and every
different prefixes in the world.
I haven't counted them, but there is numerous one. Like W*DC gives one
prefix, WA*DC gives another, WB*DC gives anoher, etc, up to WZ*DC, where
* equals 0 through 9, then K* thru KZ*, etc. Probably several hundred,
maybe even several thousand in the United States alone.

So, crank up those Sidewinder rigs, exercise you jaws and vocal cords,
and join the fun!

3448. WOW! My Woodbadge Beading!

Yahoo group: GRARA
Date: 2017-03-15 05:20:24 UTC
From: Jerry
Topic: 3448 Message: 3448

Okay, I completed Woodbadge training for Scouting 'way back in 2011/2012, and never had my beading ceremony. If you like seeing strange rituals, cake and pop, this event is for you!

Sunday, March 26th from 2PM to 4PM.

Neil Fonger Post #179, American Legion, 2327 Wilson Ave. Walker, MI 49534.

(Up the hill from the I-196 & 28th STreet//M-11 interchange)

I'd love to see you again. Me, I'm doing as OK as I can expect, with Kidney dialysis 3x a day. I've been on the transplant list for the past 1-1/2 years, on medical retirement, with a few miscellaneous other "issues". Just hit 250,000 words with the 11 books I'm writing simultaneously.

My email address will probably be permanent for the rest of my life, but I misplaced my phone and sill be out of town this Thursday to Monday,.

Warmest regards,

Jerry "Uncle fester" Elya

Trail Head, Cedar Springs, Michigan

Trail Head & Parking area is where West Maple Street meets the Fred Meijer White Pine Trail, west of Main Street. The best landmark on Main Street is the Cedar Springs Brewing Company on the SW Corner of West Maple and Main Street.

If you wish to operate but don't have portable gear, I'll have my Elecraft KX2 QRP Rig, and "probably" will even have a microphone attached to it so SSB will be possible.

I'll be operating at 1700Z from the gazebo on site if weather is favorable. If it's raining, snowing, hail or sn*w falling, gale wind blowing, etc. I'll operate from my automobile.

If timing is not right for your schedule, and you have your own portable or mobile rig, show up anywhere along the trail (doesn't need to be at the site, just within 50 yards, 150 feet) of the trail. Pick a time and a mode, and operate.

Full rules of the MSPOTA have not been promulgated yet, but keep an eye on http://www.mspota.org and click on the "Activator Rules" link. Rules have been promised, and things seem to be falling into shape.

If you plan to join me at 1700Z, please advise by private e-mail (or via return e-mail to the reflector). If you're unsure, and find out you can make it on April 1, just show up.

3451. North Country Trail help

Yahoo group: GRARA
Date: 2017-03-21 02:17:44 UTC
From: Jack Amelar
Topic: 3451 Message: 3451

The National Parks On The Air (NPOTA) event may be history, but we can now give a little help to the people who operate the trail. They were very cooperative with us during NPOTA, read on how a simple email can be a thanks in return.

73 Jack NY8D

/\/\/\/\/\/\/\/\/\

West Michigan friends:

We have a bill in Congress that's very important to us, that would extend the NCNST to connect with the Appalachian Trail in Vermont, and would also include in the NCNST the world-class hiking trails including the Superior, Border Route and Kekekabic Trails in northeastern Minnesota. the bill in the North Country National SCenic TRail Route Adjustment Act, HR. 1026 and S. 363. Here is how Congressmen representing west Michigan have supported this (or not):

Justin Amash--MI-03
For many of us, Justin Amash is our Congressman. While it seems a bit incongruous that he has never co-sponsored our NCNST re-route bill, its true. He hasn't despite numerous personal requests and the fact that MI-03 hosts the national headquarters of BOTH the NCTA and NPS-NOCO, and more NCTA members per capita than anywhere else.

Next week I'm giving it another shot, with a scheduled visit to his Grand Rapids office. What I need for you to do, and it will take only a minute, is one or both of these things:

Go to this link to e-mail Rep. Amash: https://amash.house.gov/contact-me/email-me, or Call (202) 225-3831 (Amash's Washington office)

Please urge him to co-sponsor HR 1026, the North Country National Scenic Trail Route Adjustment Act. Share that you are his constituent, that this issue is very important to you and the community he represents.

Bill Huizenga--MI-02
Friday we received notice that Rep. Bill Huizenga (R-MI-02) was again co-sponsoring the NCNST's Route Adjustment Act (HR 1026). He had us a bit worried there --especially since he was a co-sponsor in the last Congress. But he added his name to HR 1026 Friday, bringing our total to 31 co-sponsors, 14 of which are Republicans.

Please take a moment to send a personal e-mail (go here: http://huizenga.house.gov/contact/) or make a phone call: Phone: (202) 225-4401 . A simple "Please thank Congressman Huizenga for co-sponsoring HR. 1036, our North Country National Scenic Trail Route Adjustment Act. " If you like, add a sentence about why this is personally important to you as a constituent.

Saying "thank you" is important!

Fred Upton--MI-06
Fred co-sponsored our legislation in the last Congress, and, as a member of the House Trails Caucus (plus the fact we sponsored an event for him on the Trail last year!) you'd think he would be all over this, Sadly, not yet. Please contact him to urge him to co-sponsor HR 1026:

Email: http://upton.house.gov/contact/zipauth.htm
Phone (269) 385-0039 or (202) 225-3761

The House bill now has 31 co-sponsors (14 Republicans, 17 Democrats), and the Senate bill has 10 co-sponsors. We've prepared a map (https://northcountrytrail.org/get-involved/advocacy/) showing the 8 states for the NCNST indicating which Congressional Districts have co-sponsored the bill, and which remain. Senate support is also shown.

Many thanks. Please do this now. It matters!

From: stprovost@...
Topic: 3457 Message: 3457

Hello, if you want to learn more about Yaesu fusion, here is a youtube link of a demonstration
given to a chicago club last month.

https://www.youtube.com/watch?v=E81KafJT_zI&feature=youtu.be
https://www.youtube.com/watch?v=E81KafJT_zI&feature=youtu.be

I am working with a local ham who wants to come give us a demonstration of yaesu fusion across several radios.
I am requesting that after our regular may meeting, he will demonstrate the yaesu fusion.

thanks

Dave,It is a lot to absorb in so here we go in a nut shell. I am planning on giving a demonstration on the Wires-X at the next club meeting so a hands on with equipment maybe the best way to explain things.
Below I compiled a list of local repeaters that are Fusion and do both FM-Analog & C4FM-Digital (AMS/AMS) along with a couple of local simplex nodes. I also gave a list that your DV4mini can use to connect into three of the most popular rooms that are "bridged" into the FCS Reflector. The most impressive is the Alabama Link that has about all the analog & digital modes available all on one.
In order to give you an answer I will need to explain a few things. When we are talking on C4FM we will be using Simplex or Repeaters and either one can be connected into the internet with a interface (I.E.; HRI-200 Wires-X) or a Hotspots (I.E.; DV4mini, DV4home, DVmega, OpenSpot, etc.). Only a HRI-200 will get you into the "Wires-X" system. The hotspots will get you into a reflector system (I.E.; FCS/YSF). In order to get into the Wires-X on the 146.760 W8DC you will need a C4FM radio (I.E.; FT1DR, FT2DR, FTM-100, FTM-400, FTM-3200, FT-991 or the new FT-70DR) all the listed radios can connect into the Wires-X node except the FTM-3200 and the FT-70DR. Connecting into the Wires-X node will allow you to change to a different room but you can still communicate as long as you have a C4FM radio.
FCS/YSF Reflectors are "bridged" into the Wires-X system via an RF Link. So since the W8DC has a Wires-X node I would put a VHF DV4mini stick inline with the repeater's input & output so it would put the RX & TX into the FCS system (I.E. FCS002/22 "Michigan")
The developers at SharkRF OpenSpot has hinted about someday in the near future having a direct connection into the Wires-X system so keep tuned for that info. Their hotspot is the only one that will allow cross-mode from DMR to C4FM or C4FM into DMR which will be beneficial if you only have one type of radio but want to try different modes.

Hi - Can you provide information on connecting to WIRES via the 146.76 machine. Is that possible today, or planned for the future?What other local repeaters are connected to WIRES? I’ve been experimenting with a DV4Mini at home, and enjoying the US/Worldwide WIRES connection. Thanks – Dave – KF8QL

3463. MI-State Parks OTA (MSPOTA) - April 1, White Pine Trail

Yahoo group: GRARA
Date: 2017-03-30 22:04:30 UTC
From: Hank Greeb
Topic: 3446 Message: 3463

This is the nth announcement for this event, Somewhat redundant, but I can't find the list of two or three folks who showed interest in the event for the firs announcement. Must be hiding in a different computer or an obscure name for the file.

Anyway, on All Fool's Day, April 1, 2017,this fool will be participating in the maiden day of the Michigan State Parks On The Air (MSPOTA)

Fourth announcement - but who is keeping trackF? As noted before, I'm inviting all fellow *fools... errr...*. hams who have mobile or portable stations to join the effort. (or, if you don't have a portable or mobile rig, and just want to operate, I'll fit you in for a spell.)

Schedule - (Approximate)

Start Time
Date
Comment
Where?
1700Z
1 April 2017
1 p.m. EDT
Trail Head, Cedar Springs, Michigan

Trail Head & Parking area is where West Maple Street meets the Fred Meijer White Pine Trail, west of Main Street. The best landmark on Main Street is the Cedar Springs Brewing Company on the SW Corner of West Maple and Main Street.

If you wish to operate but don't have portable gear, I'll have my Elecraft KX2 QRP Rig, and "probably" will even have a microphone attached to it so SSB will be possible.

I'll be operating at 1700Z from the gazebo on site if weather is favorable. If it's raining, snowing, hail or sn*w falling, gale wind blowing, etc. I'll operate from my automobile.

If timing is not right for your schedule, and you have your own portable or mobile rig, show up anywhere along the trail within Kent or Montcalm County (doesn't need to be at the site, just within 50 yards, 150 feet) of the trail. Pick a time and a mode, and operate.

Full rules of the MSPOTA are on http://www.mspota.org and click on the "Activator Rules" link.

If you plan to join me at 1700Z, please advise by private e-mail (or via return e-mail to the reflector). If you're unsure, and find out you can

make it on April 1, just show up.

International Mills on the AIR weekend March 13, 14
ACTIVE WINDMILLS / WATERMILLS / WATER PUMPING STATIONS and links

A bunch from the Netherlands, only one from the USA
K8DAA in Holland at Windmill Island Gardens.

Mills on the Air main page http://www.pb7z.com/dmota/Mills.htm

Mills on the Air K8DAA page http://www.pb7z.com/dmota/k8daa.htm

"Windmills On The Air" is now planned for MAY 13th thru May 14th 2017 !
Jeff KB8QAP and Phil K8PVH will be portable on WIND MILL ISLAND
during Tulip Time located in Holland, Michigan USA to activate " DE
ZWAAN" Windmill on May 14th only using various HF bands and digital
modes. On 20 meters please look for us on CW with 14.018, SSB Phone on
14.255, and PSK31 on 14.070. Our special windmill callsign will be
K8DAA.
A handsome QSL card is ready for any stations who can contact us at the
windmill directly on that day. Both Phil-K8PVH and Jeff-KB8QAP are
heading up the HF site operations on the Island.
So please mark your calendars and tune in for the Windmills on the air
2017! Didn't hear us on HF ? Try calling the K8DAA De Zwaan mill on May
14th using IRLP node 4373 Good Luck! 73 Jeff KB8QAP, Phil K8PVH

Hank,

If things work out right, I will probably activate
tomorrow in Rockford.? I might swing by and see if I can find you,
but I'm not sure.? Barb will be with me.? We'll see.? I'm
just now putting my gear in a new vehicle.? So, I don't know if I
will try to set up totally portable, or try to run from the Jeep.?
We'll see I guess, depending on the weather.

3466. Re: [GRARA] MI-State Parks OTA (MSPOTA) - April 1, White Pine Trail

Yahoo group: GRARA
Date: 2017-04-01 03:03:33 UTC
From: Hank Greeb
Topic: 3446 Message: 3466

Del: VEry good new from you. Welcome aboard!

Either way, either from Rockford, or Belmont, or Cedar Springs....
White Pine in Kent County is White Pine in Kent County. Cedar Springs
is just 7 miles from Rockford, so would be nice to see you, but not
necessary.

And, you may operate portable or mobile - it's not like NPOTA where you
were supposed to be independent of your vehicle. Since this will be the
very first day of MSPOTA activations, we may find it a dud, or we could
find us being swamped with calls. You also can simultaneously activate
it as KFF1555 for WWFF-KFF Parks on the Air, they are independent but
many folks are bilingual and activate them simultaneously. We will be
trying to be on 40, 30, 20, 17, 15, 12, 10 meters, whichever is open,
and two or three of us will be operating CW and maybe some PSK-31 or
RTTY, or ???

We're all planning to use our own calls, right now we have "reasonable
probability" of having NY8D, K8GGL, W8QS, and me. Self spot on the
DXclusters and on the MSPOTA Facebook page, and, if you're doing both
KFF155 and MSPOTA, on the POTA Facebook page as well.

Let's see how much fun MSPOTA can be. And/or how much fun POTA -
KFF-WWFF can be.

Oh, temp is supposed to be in the 50's, so I'll "probably" be in the
gazebo at the staging area. But, if it's at all cold, I'll stay in the
car.

3467. Great video on youtube to watch that explains digital voice modes d-star, fusion, and dmr

Yahoo group: GRARA
Date: 2017-04-03 04:48:12 UTC
From: stprovost@...
Topic: 3467 Message: 3467

This video was recorded at Hamcation (not sure on spelling) last month.
Ham Radio 2.0 was the one who recorded the forum.
The actual forum starts at the 9 minute mark of the video.
Here is the url link to the video: https://www.youtube.com/watch?v=XUizi2W1LTk
https://www.youtube.com/watch?v=XUizi2W1LTk
It is about one hour long, and the tech level for understanding is at the basic level.
This presenter does not go into which mode is the best versus the other digital voice modes.

Remember we are having a demonstration of fusion at the may 2017 grara monthly meeting!

It is going to be a interesting and long meeting.

We are also going to have a demonstration by Tom Behler KB8TYJ on how he handles his station operation as a sight impared ham.

Thanks for the link Stephen...going to put that on the website this morning.

3470. New noontime net in Michigan

Yahoo group: GRARA
Date: 2017-04-05 21:12:32 UTC
From: Tom
Topic: 3470 Message: 3470

Beginning on Friday, April 14th at 12 noon EDT, or 1600 Z, a new net will be hitting the air waves on the W8IRA Independent Repeater Association Link system. It will be called the IRA Link System Michigan Noon-time Roundup Net.

The net will be held on Monday, Wednesday, and Friday each week, with the possibility of expanding to a five-day schedule if interest and participation are sufficient. So, find a link near you, and please join us!

The purpose of the net is to promote activity on the IRA Link System, and also to help identify and trouble-shoot any problems that might be occurring with system repeaters.

The net also will be a great way for Michigan hams to communicate with each other during the mid-day hours while mobile, or just looking for conversations with fellow hams.

If you have any questions, or would like more information, please contact Tom Behler: KB8TYJ, the Net Manager. He can be reached at:

tombehler@...

If you would like more information on the Independent Repeater Association (IRA) Link System, go to:

www.w8ira.org

In addition, the W8IRA system now has a Yahoo email reflector, and you can subscribe to that at https://groups.yahoo.com/neo/groups/W8IRA/info

And the audio from the W8IRA repeater is available to anyone to listen to on the Internet at http://www.broadcastify.com/listen/feed/24896

We look forward to your participation in this new and exciting ham radio activity!!

1. The classic Kenwood 430S, all solid state, 160 through 10, including the WARC bands. Includes mobile microphone and a copy of the operating manual. $ 230 Rig-Pix athttp://www.rigpix.com/kenwood/ts430s.htm

2. An Icom IC-706MKiiG. This is the latest version, 160-10, plus 6m, 2m and 432, with factory box and manual, mobile microphone, $ 600 RigPix athttp://www.rigpix.com/icom/ic706mkiig.htm

3. Very cool Icom IC-7200, 160-10 plus 6 meter. Includes factory box and manual and mobile microphone, $ 750. RigPix at http://www.rigpix.com/icom/ic7200.htm

These are located in Grandville, Mich. Please email Jeff, W8IP at jeffemery72@...

3474. Radios forsale

Yahoo group: GRARA
Date: 2017-04-13 16:15:14 UTC
From: Michael J. Wolthuis
Topic: 3474 Message: 3474

Good afternoon everyone,

I am making some changes to my collection and wanted to offer these radios to you all forsale before I brought them to hamfests and such. These are all pristine. Feel free to share this with anyone looking.

ICOM 5100A – Brand new in box – Top of the line D-STAR radio - $475

Kenwood D-710 – APRS dual band radio - $400

ICOM 2820 – Dual band DSTAR radio - $400

RC-d710 – pairs with the Icom2820 to do APRS or can pair with any other radio that has packet input/output for APRS - $250

Icom 2800H – my very first dual band mobile, hard to see her go, but time to move on - $250

All radios have each original part, original manual and original box. Many have add-ons that were purchased to increase value.

Again these radios are all nearly perfect, the 2800H has a few marks on it. I can send pictures if interested in any of the gear.

Howdy All,

I just finished removing any links from our club website (w8dc.org)
that were created by the TinyUrl site. They all appeared to be broken.

Please if you submit any links for inclusion, I ask that you do not use
TinyUrl to create them. No matter how long the link may be, include
it, and I will use it.

I currently need active links for the Ham In A Day event in Lowell on
June 10 and for the General Class Upgrade Class to be held starting
September 6.

thanks

Hi Tom and John,

I own Michigan Adventure Racing and we're looking for volunteers with hand-held radios to help with communications and safety for some of our trail running, mountain biking and adventure races, especially the adventure races which may not have good cell coverage

Here are a list of our races. Would you be willing to share this information with your club members and see if anyone is interested?

Thanks!

Mark

3479. Re: volunteers with radios for local races

Yahoo group: GRARA
Date: 2017-04-23 16:34:23 UTC
From: Jack Amelar
Topic: 3478 Message: 3479

"April 29 Hurt the Dirt trail race, 1/4, 1/2, full marathon, free kids run, Luton Park, Rockford Good cell coverage so we are probably okay with this one"
Just as well, too soon to plan properly.

"May 20 Michigan Adventure Race: Ludington Edition, 6 and 12 hrs, Ludington State Park I believe Mason County EM is recruiting the local club"
Hamvention weekend

"July 28-30 Michigan Adventur e Race: Epic Edition, 6-8 and 18 hrs, Caberfae Peaks Resort Do you have emails or phone numbers for anyone in the Wexaukee Amateur Radio Club? I can□t find anything on their site."
Yes, best to contact WARC. On their hamfest (Saturday, May 6) i found n8ul@... I will forward this information.

"Sept. 16 Lord of the Springs Singletrack + Gravel Bike Race, Yankee Springs, Middleville"
I am forwarding this to the Barry ARA bara_newsletter@...

"Oct. 7 Michigan Adventure Race: ArtPrize Edition, 4 hrs, Grand Rapids"
Same day as HamCon at MIS http://glhamcon.org/

"Nov. 11 Dirty Duel trail race, 5K vs. 6K, Robinette□s, Grand Rapids"
GRARA should consider this one.

"Jan. 27, 2018 Michigan Adventure Race: Winter Edition, 3 hours, Rockford"
And this one too. Let's discuss at the May 5 GRARA meeting.

And of course, not everybody will be at Hamvention and HamCon.

"Michigan Adventure Racing LLC" Does anyone know if this operates as a profit or non-profit entity? Not that a profit would really matter, but still would be good to know.

3485. 2017 River Bank Run - help still needed

Yahoo group: GRARA
Date: 2017-05-02 12:19:01 UTC
From: jamelar@...
Topic: 3485 Message: 3485

We are a little over a week out before River Bank Run events kick off.
We are still in need of a few more volunteers for the event.

Why should you help out with the 5/3rd River Bank Run?

1. As amateur radio operators we should give back to the community.

2. Time to dust off those radios and hone our communication skills.

3. Great opportunity to show the community what ham radio operators
can do to support their community.

4. For those of you who volunteer in the emergency community it is a
great time to work with other emergency service personnel.

5. See old friends.

6. We think this is fun.

Please pass this invitation along to your local clubs and friends.

Several things to keep in mind. We have 2 Events.

#1) The JR Event which we will need about 15-20 People to help. May
10th 2017 from 4PM - approximately 8PM

#2) The Main Event Which is on May 13th 2017 from 6AM - 1PM with
varying end times.

We will also have a RBR Pre-Meeting on Friday May 12th 2017 at KCSD

701 Ball Ave from 6:30PM - 8:30PM. (We need about 80-85 People to
help with the main event in various positions)

For those who have never worked the River Bank Run.

This is the PREMIER Communications event in Kent County. This event
is one that you'll enjoy and come back every year for more! The RBR
event is HUGE and keeps growing!

More detailed information will be sent out before the event. We are
still working out this year's communication plan.

Please sign up @ http://vrm.cc/rbr

Any questions please email: rbrsafety@...

3486. Hamvention, beds still avalable at UofD dorm

Yahoo group: GRARA
Date: 2017-05-08 03:40:21 UTC
From: Jack Amelar
Topic: 3486 Message: 3486

As of this writing, there are 2 beds available at the University of Dayton Dormitory.

The dorm has 3 rooms, 2 beds per room, a kitchen and living room area. WIFI is included.

The cost is $117 per person for the weekend and the advance rate Hamvention ticket is $22, total $139. The room is available for Thursday evening until Monday morning. You can arrive later and/or leave earlier if you wish, but still the same rate.

Contact Tom N8DGD n8dgd@... You can ride along / carpool if you wish, leave mid-late morning Thursday, head back Monday morning, or make own transportation arrangement. Contact Tom ASAP, once the rooms are gone....

3488. WE get publicity

Yahoo group: GRARA
Date: 2017-05-10 00:10:45 UTC
From: Hank Greeb
Topic: 3488 Message: 3488

Didn't even have to send a press release.

From the */Northeast Advance/*, Sunday, May 2, 2017, Page 5

CEDAR. SPRINGS

Group seeks approval to test emergency ham radio system

Jan Hoist jholst@mlive@com

Cedar Springs residents may soon be getting a firsthand look at how an amateur radio operation might work in an emergency.

The Grand Rapids Amateur Radio Association has applied to the City of Cedar Springs for an Amateur Radio Field Day, celebrating the 100th anniversary of Michigan State Parks, to be held in late June at the staging area for the Fred Meijer White Pine Trail State Park.

Henry Greib (sic), on-air director for the radio association, told the Cedar Springs City Council that the event is a 24-hour test of radios to ensure they are ready in case of an emergency.

If the event gains city approval, several amateur radio stations would be set up on the site, demonstrating how such a station might be deployed in case of a major disaster in the city or county, which could knock out or overload other communication systems.

Antennas will be located on trailers, portable masts and communications van. Generators, designed for campground use, also would be used.

The event would take place in a continuous 30-hour period over a two-day period. June 24-25. The group also would set up a booth so interested visitors could learn about amateur radio operations.

GRARA is a nonprofit organization. Amateur radio operators, also called ham radio operators, are often used in emergencies. They are called amateurs because they are not paid for their services.

"Services are provided at no charge, but our communications services are professional," Greib said. "The Grand Rapids association supports the Red Cross and does a number of odd jobs that don't get handled by other communications."

In addition, ham radio operators are licensed by the Federal Communications Commission, according to Greib.

The council will make a decision about the event at its next regularly scheduled meeting May ii. Council meetings begin at 7 p.m. at city hall, 66 S. Main St.

3490. RE: delayed 2 Meter Net.

Yahoo group: GRARA
Date: 2017-05-10 01:34:40 UTC
From: Richard Ranta
Topic: 3490 Message: 3490

Good evening. I wanted to let you all know that we were scheduled to have a 2 meter net on the 146.760 Mhz repeater tonight at 7PM. However, a c4fm conversation was taking place and after repeated attempts to get their attention, I decided to simply wait and hold the net next week at the normal time: 7PM. Come rain or shine.

I hope you all have a great weekend and have fun at Dayton.

Howdy All,

Now that my email issue appears to be resolved, I have posted the videos taken at our last club meeting (May 5,2017) to the w8dc.org website. There is the General Membership Meeting and the excellent presentation on the Wires-X system on our 146.76 Fusion Repeater as given by Ron AB8DT. The videos are basically in raw format with very little editing.

I do not claim to be a videographer...I just play one at meetings.

From: Ron Karger
Topic: 3490 Message: 3493
Attachments: 5 described; binary payloads are missing from this source WARC

Richie,That would be my bad. I turned off the TOT (time out timer) on the Wires-X node for the Monday Night Fusion Net Node #21493 MNWIS @ 8:30 EST and forgot to turn it back on. It is back on 60 minutes so it will auto disconnect if it is left unattended and reconnect to the W8DC-GRARA room #40074
If that ever is a problem in the future you can connect into the 146.760 Node with your FTM-100 by pressing the "D/X" button and changing the node yourself by two methods (Manual or Auto).
MANUAL METHODPress & hold the DX button for over one second to connect into the node (see Step 1 below). On the microphone DTMF pad Press the # button for over one second & the # will show up on the screen. Press in 40074 then # again and it will connect into the "W8DC-GRARA" room #40074 (see Step #5 below)

AUTO METHODStep 1
Step 2

Step 3Step 4: Screen will show "NOT CONNECTED" and the previous room will flash for 20 seconds and will auto connect into the W8DC Room #40074. Just be aware that if you (or someone else) keys up in C4FM during this 20 second period it will reconnect into the previous node/room
Step 5: "W8DC-GRARA" will be solid (not flashing) and you are connected into the roomOn Tuesday, May 9, 2017, 9:34:57 PM EDT, 'Richard Ranta' scooter1cat@... [GRARA] <GRARA@yahoogroups.com> wrote:

Richie,That would be my bad. I turned off the TOT (time out timer) on the Wires-X node for the Monday Night Fusion Net Node #21493 MNWIS @ 8:30 EST and forgot to turn it back on. It is back on 60 minutes so it will auto disconnect if it is left unattended and reconnect to the W8DC-GRARA room #40074
If that ever is a problem in the future you can connect into the 146.760 Node with your FTM-100 by pressing the "D/X" button and changing the node yourself by two methods (Manual or Auto).
MANUAL METHODPress & hold the DX button for over one second to connect into the node (see Step 1 below). On the microphone DTMF pad Press the # button for over one second & the # will show up on the screen. Press in 40074 then # again and it will connect into the "W8DC-GRARA" room #40074 (see Step #5 below)

AUTO METHODStep 1
Step 2

Step 3Step 4: Screen will show "NOT CONNECTED" and the previous room will flash for 20 seconds and will auto connect into the W8DC Room #40074. Just be aware that if you (or someone else) keys up in C4FM during this 20 second period it will reconnect into the previous node/room
Step 5: "W8DC-GRARA" will be solid (not flashing) and you are connected into the roomOn Tuesday, May 9, 2017, 9:34:57 PM EDT, 'Richard Ranta' scooter1cat@... [GRARA] <GRARA@yahoogroups.com> wrote:

Good evening. I wanted to let you all know that we were scheduled to have a 2 meter net on the 146.760 Mhz repeater tonight at 7PM. However, a c4fm conversation was taking place and after repeated attempts to get their attention, I decided to simply wait and hold the net next week at the normal time: 7PM. Come rain or shine.

I hope you all have a great weekend and have fun at Dayton.

From: Jack Amelar
Topic: 3498 Message: 3498

International Mills on the AIR weekend May 13, 14
ACTIVE WINDMILLS / WATERMILLS / WATER PUMPING STATIONS and links

A bunch from the Netherlands, only one from the USA
K8DAA in Holland at Windmill Island Gardens.

Mills on the Air main page http://www.pb7z.com/dmota/Mills.htm

Mills on the Air K8DAA page http://www.pb7z.com/dmota/k8daa.htm

"Windmills On The Air" is now planned for MAY 13th thru May 14th 2017 !
Jeff KB8QAP and Phil K8PVH will be portable on WIND MILL ISLAND
during Tulip Time located in Holland, Michigan USA to activate " DE
ZWAAN" Windmill on May 14th only using various HF bands and digital
modes. On 20 meters please look for us on CW with 14.018, SSB Phone on
14.255, and PSK31 on 14.070. Our special windmill callsign will be
K8DAA.
A handsome QSL card is ready for any stations who can contact us at the
windmill directly on that day. Both Phil-K8PVH and Jeff-KB8QAP are
heading up the HF site operations on the Island.
So please mark your calendars and tune in for the Windmills on the air
2017! Didn't hear us on HF ? Try calling the K8DAA De Zwaan mill on May
14th using IRLP node 4373 Good Luck! 73 Jeff KB8QAP, Phil K8PVH

3499. ARROW one day bus trip to Hamvention

Yahoo group: GRARA
Date: 2017-05-15 19:34:08 UTC
From: Jack Amelar
Topic: 3499 Message: 3499

Forwarded from ARROW Communication Association, Ann Arbor

Know anybody who would like to join the ARROW Hamvention bus ride? There still are a few good seats left. We have lots of goodies for door prizes again this year. Our prizes include a 440 MHz DMR handi from Connect Systems and a headphone/microphone combo from Heil Sound. We also have a no-solder no-tool RF Probe kit for each and every rider from www.QRPme.com with an on-board DVD that will show our passengers how to put it together and use it.

$65.00 via Pay Pal at https://www.w8pgw.org/activities/dayton-bus-trip/

If you know someone, send them our way! Only a few seats left! (We even have a rider from Toronto!)

Forward this to anybody and everybody!

73,

John

For those headed to Hamvention this weekend, keep in mind GRARA has flea market spaces for gathering, storing your new treasures, resting, etc.
Flea Market spaces 7255 and 7355.

For keeping in touch, we recommend 147.26 Simplex, that's the output of the primary W8DC repeater operating simplex.

I got this email from the Elecraft mail list that I belong to.

This is about the danger if charging Lithium-Ion batteries and leaving them unattended.

This is a English translation of the original German Text.

73

Thom KI8W

Guys,

I want to give you a advice, my shack it (was) in the basement (cellar??) I do all my thing for the hobby there.
A collega of mine asked me to take a look at two Go-Pro LI-Ion accu's because they where not loading anymore.

So I put the first one on the loader for 8 till 9 hours and checked it and it was ok (with 10% loading current)
Then I dit put the second one in same place at 10 in the morning at 3 my daughter called me there is a fire.
We rusted to the cellar but I could not enter it was filled with dark smoke.

My shack is gone and 90 % off my house, I have insurance don’t now if it is enough to cover all of my Elecraft stuff

My K1, my own build K2 my K3 and my KX3 are gone, I found my K1 in 20 cm off water really down under, I clean’t it with fresh water.
After that flushed it with pure alcohol. It is completely taken apart today as far as is possible.
I Hope it will survive I will let it dry for a lot of day’s

My K2 is melted the same as my P3 and my K3 perhaps I can order the outside of both, but a am still not allowed to enter the basement so I don’t know how it looks at the inside.

So finale the message is please take care with li-ion accuse battery’s. It did cost me our house in 1 hour.

Thom:

Cells containing lithium must be treated with great care. Don't believe the claims from Chinese Manufacturers that their cell packs contain "balancing circuits" to eliminate overcharge. Pay a bit more for cells from reputable manufacturers.

My brother, who makes electrically powered airplane models, charges his cells a 1 C (i.e. they will fully charge in one hour. He Always puts them inside a metal can, half filled with sand to absorb any heat which might be generated by a fire. He doesn't "attend" the charging 100% of the time, but he checks them periodically during a charge, and puts the charger and bucket containing the cell pack on a metal bench in his garage. He's seen fires from setups which "fast charge" cells at 10 C or greater out in he field. Yes, these pack CAN be charged at high rates, so the user can make more flights of his airplanes, but doing so must be done very carefully, and expect an occasional fire.

So far, I've used a cell pack recommended by Hobby World, a local supplier of radio controlled model supplies, and a matching charger. I charge it at 1/4 C, i.e. it would take 4 hours to charge the pack if it were completely discharged.

But, if you've ever seen a fire caused by exposure of Lithium, Pottasium, or similar elements when exposed to air, you WILL appreciate the need to take care.

Marcelo:

Thanks, I see it, but even there it is on the right side of the page, NOT the main part of the page. It would seem to me that an upcoming event like Field Day could be "pinned" to the top of the entry page as in other group facebook pages (NPOTA and MSPOTA as examples.) But that would take action from the sponsor of the page, which is NOT listed, so that's why I'm asking here.

I also realize that several of the leadership of GRARA is in Xenia for the Hamvention, so it may not happen immediately. That's certainly OK, becase it's more than a month until Field Day.

You didn't say how old these receivers were. If they could be considered at least "near antique" I'd suggest you look at the Antique Wireless hamfest held in late Summer or early fall in or near Lansing. If they're not, there's several hamfests, including GRARA's own, in early September. Might be worth while trying to sell them at a hamfest and see how it goes.

You might get some idea of salability at one of the Open Radio Rooms, at 1050 Fuller NW, Red Cross, each Wednesday, starting 7 p.m. or earlier. Bring a couple of them down and let the assembled multitude have a look. I'm no expert on such things, but one never knows until trying.

Look up W8dc.org for details on the GRARA hamfest.

Ah, yes. Trading is good if the parties have what the other wants.
Otherwise, cash is an excellent intermediary.

3519. Happy Samuel F. B. Morse Day

Yahoo group: GRARA
Date: 2017-05-24 21:04:06 UTC
From: Hank Greeb
Topic: 3519 Message: 3519

Yep, according to usually reliable sources....

On May 24, 1844, *Samuel* *F*.*B*. *Morse* transmitted the message “What hath God wrought” from Washington to Baltimore as he formally opened America’s first telegraph line.

There were many attempts earlier, as early as 1819, to make a practical electrical telegraph, but Morse's inventions could claim the first large scale commercial use of what turned out to be the telegraph.

Later, around 1895, Marconi made the first practical use of electromagnetic transmission of Morse Code.

And, the rest is history.

From: Ty
Topic: 3516 Message: 3522

I have a Lafayette Model KT-320

**

I have a Hallicrafters Model S38-D

**

I have a Hallicrafters Model SX-110 and the speaker for it. The speaker is a rare commodity.

**

I have a Knight Star Roamer

**

I have two Zenith Trans Oceanic (One black and one tan)

**

I have an RCA Victor Shortwave radio Model 3 BX-671

**

I have a Pyramid Phase 3 13.8 Volt 20 Amp power supply powered by 110 V A.C. current.

**

I have a White Tornado 225 plus Class AB1 linear which is portable, can be used on an auto or truck, or with the above power supply.

**

*I have an EICO model 625 tube tester. I have several replacement tubes for the radios. The radios work. There is no way to test the CB radios, yet they worked when I stored them.**
*

I have a couple of CB radios and a field strength meter.

I have a Realistic 20 watt P.A. Amplifier (not radio equipment)

EVERYTHING goes for $ 400.00 cash...no checks please.

*Everything works.

3526. Address of Field Day in Cedar Springs

Yahoo group: GRARA
Date: 2017-05-29 13:24:46 UTC
From: Hank Greeb
Topic: 3505 Message: 3526

I don't know that it has an address, because it's a park. However, I put

160 W Maple Street NE, Cedar Springs, MI

in Google Maps, and it shows very near the entrance to the parking lot
of the park. The link to this would be:
https://goo.gl/wtBqvv

That should get you very close. If you put satellite view it will show
the parking lot along the trail, just south of this address. Note the
parking lot is one way south, so this is the way to get to it.

Please remember, we plan to start setting up at 9:00 A.M. Saturday, June
24, hope to be set up by 2 p.m. when Field Day begins. We also are
looking for definite crew to help with tearing down and sprucing up the
site on Sunday afternoon, June 25.

Hope to see many, many GRARA members and guests at Field Day. Pass the word!

3529. Resend Tables at IRA Hamfest this Saturday

Yahoo group: GRARA
Date: 2017-06-01 02:33:41 UTC
From: Jack Amelar
Topic: 3529 Message: 3529

I meant to say fellow GRARA members, but you probably already knew that.

As has been the case for many years, I will have tables in front of my motorhome for fellow GRARA members to sell from at this Saturday's IRA Hamfest.
Make sure anything for sale has marked the price and who owns it.

And if you don't have anything to sell, this makes a great hangout.

See ya all Saturday.

This message is going out to All West Michigan hams. I have been asked by Dave, Abe's son to try and locate a Doppler system that he used to track down interference on the link system. It was loaned out to someone or a group and has not been returned. Dave needs to use it to isolate some problems. If you can help in locating the equipment (doppler and 4 antennas) please contact me and I will gladly pick it up and return it.
We all owe Abe for his generosity and help in one fashion or another. Please ask around and see if we can find this unit.

Or check with our neighbor who has a goat to see if he needs a different
set of dietary flora. :)

Goats do a great job of controlling weeds - when I was a kid we had a
nanny goat, and we kids LOVED playing with HER kids for 8 months or so,
and then eating goat burgers and other goat meat during the winter.:)

3547. Fwd: [MRRC] C6ATA in the ARRL June VHF Contest

Yahoo group: GRARA
Date: 2017-06-05 19:43:48 UTC
From: Hank Greeb
Topic: 3547 Message: 3547

Anyone for DX during the upcoming VHF contest? If so, meteor scatter to C6 land on 2 meters should be a "reasonable" probability. Did out the sofware for JT65, etc., and see what you 2 meter DX can do!

-------- Forwarded Message --------
Subject: [MRRC] C6ATA in the ARRL June VHF Contest
Date: Mon, 5 Jun 2017 15:14:54 -0400
From: David Pruett <k8cc@...>
To: MRRC Reflector <mrrc@...>

The ARRL June VHF Contest is a week away (June 10-11, 2017). A small team of four operators, including one current and one former MRRC member will be part of that operation as using the callsign C6ATA from Eleuthra Island in the Bahamas as an unlimited multi-operator entry which will be active on 50, 144, 222, 432 and 1296 MHz during the contest. The team believes that this will be the first time 222 MHz has been activated from C6A, while and the first ever terrestrial activity on 1296 MHz.

There will be activity before and after the contest on both VHF and HF by the operating team under various callsigns. QSL C6ACC via K8CC, C6ALY via K6KLY, C6AMG via WB4OMG and C6ATA via NN7AZ or LOTW.

2m will run MSK144 often, and we hope to have 6m QRV on JT65/MSK144. We expect to be on the ON4KST chat pages and PingJockey as long as the island Internet service stays on line. The operation will be in grid square FL15wc, but watch out for some rover operation in rare FL14 - one or more ops may just head out for a bit.

The 2M station will focus on MSK144 for meteor scatter QSOs on or near 144.144 MHz from 10Z-14Z Sunday morning and during the last 15m minutes of each hour (eg., xx45 - xx59) during the contest. Otherwise it will be on or near 144.188 for terrestrial QSOs, unless otherwise announced on the ON4KST or Pingjockey sites. It may be possible (depending on the reliability of cellular service) to text the 2M op at 734-276-5822 to arrange skeds. The 1400 mile typical maximum range for meteor scatter QSOs with C6ATA extends all the way from Eleuthra to southeast Michigan. Keep in mind that there is a minor meteor shower (the Aquilids) which occurs during the contest.

C6ATA will be operating from an excellent QTH with clear, over water shots to all of the USA. It will have good antennas and equipment, with operators seriously operating the contest.

The C6ATA team is looking forward to working many of you during the contest.

73,

Kenny, K2KW/C6ATA
Dave, K8CC/C6ACC
Russ, K6KLY/C6ALY
Buddy, WB4OMG/C6AMG

3548. Meeting Tomorrow 6 June, 10 a.m. AT Cedar Springs City Hall

Yahoo group: GRARA
Date: 2017-06-05 20:46:58 UTC
From: Hank Greeb
Topic: 3548 Message: 3548

Last minute change of venue.

I just talked with the Cedar Springs City Manager, and he would like us to meet with him and the Police at

Cedar Springs City Hall
66 South Main
Cedar Springs

I'm sending this to several people I know planned to make it. We will also try to have a person at the Field Day Site until about 10:10 or so to direct people to the City Hall. Anyone on this list is welcome to join us at Cedar Springs.

Sorry for the late change of plans, but this is the first I heard of it.

Hank,

what is the address of the actual field day site? Let me know and I
will put a map to it on the website front page.

I will not be at the meeting in Cedar Springs, I have a prior commitment.

thanks

Thom KI8W

Thanks, Tom.

Good to know I'm getting through to the GRARA Yahoo group.

It was good to see you as well, and was lots of fun publicizing the IRA Link System Noon-time net at the main stage on Saturday.

We did leave some leftover net flyers with Tom (KA8YSM), in case they are needed.

Thanks for all the support!

3554. Radio operators needed for upcoming events

Yahoo group: GRARA
Date: 2017-06-10 21:38:52 UTC
From: jamelar@...
Topic: 3554 Message: 3554

All

We have a few events coming up.

1st: Rockford Area Kids Triathalon

The event supports Rockford Explorers and D.A.R.E. charities. We would be helping out in all aspects of the event from Registration, traffic control to runner safety. The event is Saturday July 8th 2017 at the Rockford High School. We would be there from 7AM to 1PM, but we can be flexible on the times. This is a great opportunity to get out into the community. Come out and show your support for the community and get the word out about who we are and what we do.

Please sign up at *http://tinyurl.com/rocktri17
*

Event information is available at http://www.rocktri.com/

2nd: GR Mud Run

The 2017 Eat Dirt Mud Run is Saturday August 26th 7:30 AM- 12:30 PM at the Kentwood Community Church located at 1200 60th St. We are in need of volunteers to assist in monitoring runner safety. If you are not a licensed ham radio operator and would like to help please feel free to sign up, we will still be able to put you to work. Events like this are a great opportunity to get public exposure for the group. Our primary duties will be runner safety. We will position personal along the course to monitor the runners. We may also be called to perform other functions if necessary, but only if they do not interfere with our primary task. Most positions will be stationary posts. If you wish to bring a chair to sit in while monitoring the course you may. Please remember that many of the positions will be in the sun, so remember to bring proper protection. Food will be provided.

Please sign up at http://bit.ly/mudrun2017

Event information at www.grandrapidsmudrun.com

3rd: American Diabetes Association Tour de Cure

The American Diabetes Association is hosting the second annual Tour De Cure on Sunday September 30th 2017. This event consists of a short walking course and; 10, 30 & 60 mile bike courses. The event will start at Millennium Park. The course and times are still being worked on by event organizers. We are looking for 20 to 25 radio operators to assist with this event.

More information will be posted as it becomes available.

Please sign up at http://bit.ly/ADA_TDC2017

Event information:
http://main.diabetes.org/site/TR/TourdeCure/TourAdmin?fr_id=11731&pg=entry

3555. Info needed for field Day

Yahoo group: GRARA
Date: 2017-06-15 02:44:04 UTC
From: Hank Greeb
Topic: 3555 Message: 3555

I need confirmation that we have two Honda generators for our field day. At Hudsonville it was said that someone would check to be sure, but I haven't heard back.

Right now I believe, but haven't had confirmation;

1. We will have 2, 2 KW Honda generators for field Day. Do we have confirmation
2. The Red Cross ERV will be available. This can be used for the operating area for one HF station (probably the SSB station unless I hear otherwise) The SSB station will use AC8ZX's tower for 20/15/10 meters, and a vertical to be tested for 80 meters.

Things confirmed:

A) K8JH crew will be completely self contained, their own generator, backup batteries, antenna, etc. They'd like to monopolize 40 meter SSB and CW. They'll also have a 6 meter antenna at the top of their tower. IF sporadic E holds, we should have quite a few contacts on 6 meter CW and SSB.

B) K8DMR will bring a demo station for ATV.

C) WD8USA will bring his travel van and VHF equipment. He has offered an operating space for the CW station.

D) The backup for the CW station is an enclosed dining canopy, which I'll brin(g.

E) WX8BOB is soliciting help for the information booth. I haven't heard how much help he has found, but we have high hopes.

F) KB8TYJ will bring his rig, and all accessories. N8XX will bring an antenna and a separate computer for logging for 80 and other bands.

G) I'll be bringing hot dogs, hamburger patties, buns, and bottled water. WD8USA will do the cooking of these, as I'll be grabbing 40 ZZ's in preparatio for a "graveyard shift) on 80 meter CW.

Please note we'll have a "pot luck" dinner about 6:30 p.m. on Saturday, Jun 24.

This is a family potluck Sat night- Feel free to bring the family for Sat dinner around 6PM or so, a dish to pass and your own table service.

Hank- I assume you need to bring a 2mtr weak signal station? I take it 6 is covered as that is where most stations will be on VHF- So 2 mtr SSB might not be a viable option.

One can never tell what will happen on 2 meters. If you're up during the wee hours of the morning, an hour or two before dawn, there is always the possibility of tropospheric ducting. And, Sporadic E sometimes gets as high as two meters (not often, but with sporadic e on 6 meters being a daily occurrence late last week and early this week, who knows what will behold on 2? You also could bring a simplex 2 meter rig for FM - NY8D worked about 10 stations in to hours on simplex with a 2 meter vertical about 30' up while we were activating the North country trail last summer from Seidman Park just north of Ada. All of the VHF conacts are "bonus" contacts. The VHF stations do NOT count as additional transmitters.

Hank: I have confirmed the following:
I will be picking up two honda generators Friday and Returning generators back on sunday.
I have the local ERV signed out for our field day weekend.

People are wanting to know if we are allowed to start setup friday night or not.

Stephen:

Thanks! I'm glad to know that we have ducks in a row. Have you checked to see if the SSB crew would like to use the ERV for an operating area? If not, I'm quite sure the CW crew would like to use it. Either way it should give good publicity foe Red Cross. Would you check with Red Cross to see if they have any brochures about volunteering, or other aspects of Red Cross efforts? We'd be delighted to put these on our PR table?

I didn't know we wanted to set up anything earlier than Saturday Morning. What kind of setup would you like to do on Friday? It certainly fits into the rules. We certainly wouldn't want to set up any "attractive hazards" for kids to get hurt overnight.

Let me know details, either by return e-mail or call my cell phone 616 828 9663.

I'll check with the City Manager and confirm if Friday Setup is ok. They're rather flexible, so they'll probably be cooperative.

I will also be bringing my station to be used as the GOTA station. I'll be the control operator if we have anyone from the public interested in operating.

3562. More Field Day Musings

Yahoo group: GRARA
Date: 2017-06-17 17:04:56 UTC
From: Hank Greeb
Topic: 3562 Message: 3562

Apparently there's considerable interest "behind he scenes" for Field Day 2017 at Cedar Springs Staging Area, for the Fred Meijer White Pine Trail. Questions pop up once in a while, and I try to answer.

Some "burning" Questions so far;

Q.1. Setup?
A.1. Setup begins 9 a.m. Saturday. This is *NOT* cast in stone. There's talk about "someone" wanting to set up "something" Friday. I know no details, but will check with Cedar Springs to determine if earlier is possible. Not knowing what is planned, it's hard to say "yeah or nay." Cedar Springs is quite accommodating, but without any idea of who/what/where being proposed for setup earlier than Saturday morning.... well.... 'nuff sed.

Q.2. is there a restroom facility?
A.2. Yes, it's a unisex, handicap accessible, and has its own electricity. It WILL remain open overnight. If you want some other type of restroom facility, there are commercial businesses within a block or two, and 24 hour gas stations are at the exit of US131 and 17 Mile Rd.

Q.3. Food & Drink?
A.3. Saturday evening pot luck, about 6 p.m. Club will provide hot dogs and hamburgers. Bottled water will be available. Other food TBD.

Q.3. Info Booth?
A.3. WX8BOB and the Weather Spotters will be manning an Info Booth. Do we have GRARA brochures? Ham In a Day Brochures? GRARA Hamfest Brochures? I have an assortment of general ham radio brochures from ARRL to be delivered by no later than Thursday, but we should have info about our club and other local clubs, etc.

Q 4. Is electricity available for RV's etc.?
A 4. No this is NOT a RV park, there is NO electricity available for people parking at the site.

Q.5. Physical Address for the site?
A.5. It has no mailing address, but
160 West Maple Street NE,
Cedar Springs, MI
gets one very close. It's where Maple Street dead ends at the trail

These are the questions which I've answered privately and some have been answered publicly. Other questions - send a private or public e-mail, or call my cell phone

616 828 9663
and I'll try to respond within a few hours.

From: Hank Greeb
Topic: 3564 Message: 3564

Semi final blurb for Field Day, there may be one or two more - never can tell:

First of all, we have a "reasonable crew" for setting up. We could use a few more for tearing down at about 1300 EDT Sunday or maybe later, depending on how things are going contact wise

Second - we WILL have a pot luck dinner, with hamburgers and hot dogs supplied by the club at 6 p.m. Saturday.

Official time for setup i0900 EDT Saturday June 24. K8JH, AC8ZX, N8XX, and probably others plan to be there for sure by 0900 EDT.

IF I have an idea (ANY idea) of what we might do on Friday Evening, I'll be glad to ask the City Manager if it would be okay. We would be responsible for security of anything we have at the park. I would be hesitant to leaving anything overnight, unattended, at such a public spot, so we'd need at least one, possible two as "caretakers" to show presence overnight.

To figure out possible station locations, look at the park on Google Maps (select 160 West Maple St NE, Cedar Springs, Mi 49319 for a address) then zoom in a bit, under satellite view, and look at the park. It runs for a block south next to the trail, and for about 50 feet south of maple all the way from 2nd street to the trail

1. I suggest the ERV to be used as the SSB station, placed between the parking lot and the privacy fence to the east, next to AC8ZX's tower and antenna.

2. I believe someone said they'd like to try a GAP vertical or similar for other HF Bands for the SSB station (particularly 75 meters), which could be mounted most anywhere.

3. The K8JH van and 60' hydraulic mast will be north of Maple and east of the trail, exact location to be determined upon arrival. K8DMR says he will be bringing a 6 meter rig and computer to be used in addition to the main rig at the K8JH van.

4. K8DMR will possibly demonstrate Amateur TV if a path can be determined to the repeater.

5. WD8USA has a camping van of unknown dimensions, to be used for 2 meter and maybe other VHF bands, which could be fit either north or south of Maple Street. Exact location TBD.

6. KB8TYJ and his CW rig and all hardware to be placed inside a 10 by 10' dining canopy with sides, for use on 20 meters. It, and a 40 mast

I'm bringing, will be placed south of Maple Street and probably about 60' east of the parking lot. If SSB and CW are able to function together the SSB crew can work 20 and 80. We'll work on reducing any mutual interference, but our rigs aren't Elecraft K3 quality or similar.

7. WX8BOB and the weather spotters network folks will host an info booth inside the existing gazebo, along with a GOTA station.

8. Greg, KN4CK will be GOTA station, and share the gazebo with the info booth. (this is subject to change, there are several other spots available.)

I'll bring my laptop down to the Radio Room tonight. If K8JH, N8DGD, K8DMR and WD8USA are available, you could set up the entire network to make sure it works. KB8TYJ will be using N3FJP while he operates, I'll import his data from an ADI file he gives me at 9 p.m. or so, and put my computer on line then. We've already checked, and the ADI file from N3FJP's software imports correctly into what I think is the latest version of N1MM (installed this morning) If there's another version before Field Day, I can always download it.

If anyone has a portable camp stove, bring it along. K8JH has one, I have a small one, and WD8USA has promised to be chef for hamburgers and hot dogs for the pot luck dinner. I'm getting burgers and hot dogs - I'll confirm the quantity tonight at the open radio room.

Will our internet access work so we can have a computer hooked up to DXMaps.com to show sporadic E paths for 6 meters? that would be a BIG help. Today there are many, many paths between various parts of the US, and even some multi-hop sporadic E into Europe. This has been the case for at least the past 5 days. Lettuce prey that the gods of the sun, who control the ionosphere, continue to look down upon us with kindness, and provide many such paths during Field Day! :-) 8-)

Hank,

Just so you don't get blindsided...The club has decided that our networked computers at FD will be running N3FJP software instead of N1MM. N3FJP is easier to use and network.

That is if the powers that be actually bought N3FJP from the provider.

see ya tonight.

Hank:

I will be sure to bring a thumb drive for my log transfering over to you Saturday evening when we decide to curtail 20-meter operations. . I am very interested in continuing on 20 meter CW Sunday morning, once 80 meters shuts down and 20 meters opens up, and can stay until the end of the event. At that time, we can transfer my log to your computer again to be sure all contacts are included.

Let me know if this will work for you, or if there is another strategy we should be thinking about.

I'm very much looking forward to this entire Field Day operation, and am honored to be a part of it!

Thanks to everyone for helping put it all together!

I've found a VERY Large cooler, but would prefer a couple smaller coolers for storage of food and bottled water at the field day site.

If anyone reading this has a cooler or two, please put your name and call letters on it some how (maybe on the bottom?) and bring it along to the Field Day site. I'll have ice for cooling medium.

I have hot dogs and ground beef patties which need to keep cool for a few hours, plus I'm sure the crew will appreciate cold water.

For 6 meters, today is pretty rotten compared to earlier in the week.
Let's hope it's better for Saturday and Sunday. But it could be that a
significant number of folks have their gear stowed away for Field day.

See http://www.dxmaps.com and select 50 MHz for results

I also would like to thank Hank, and everyone else, for making my first GRARA Field Day effort a success, and a real pleasure to be part of.

My Xyl, Sue, and I enjoyed our participation very much.

I also appreciate everyone letting me use my station with my assistive technology for making my 20-meter contacts.

I wound up with a total of 262 contacts; 258 were CW contacts, and three were SSB contacts that we made when some of my Big Rapids friends paid us a visit.

Hank has my N3FJP Field Day log in ADIF format, so hopefully, it will be easily imported into the club's final Field Day report.

Am very anxious to hear of our final totals.

Thanks again, all!

An Idea for field Day.

Could we become associated with a STEM (Science, Technology, Engineering and Math) program at one or more schools in the Greater Grand Rapids area? Seems like an interesting idea. Maybe, just maybe, we could get some younger blood into the Amateur Radio Service with such a program.

And, we might get a few operators for our GOTA station.

From: Pete Spotts <nm5ps@...>
Reply-To: nm5ps@..., QRP-L Mailing List <qrp-l@...>
To: qrp-l@...

From the Field Day Division of the Department of Younger Hams:

I was up at Lake Cochiti with variously four to five adults, three of us licensed, and 11 teens from a STEM program here in ABQ in which passing the Tech exam is one requirement for passing the course they were taking. Five or six of the kids passed their Tech exam the day before, a test that was billed as a practice exam. So they were really pumped. The kids arrived about 7:30 Saturday morning and set up much of the station with our supervision. When it came time to operate (a bit late, ahem, for reasons we can go into over a cup of coffee sometime), they did the operating, with appropriate supervision.

We had our bumps and thumps during set-up, but no teens, adults, or radios were injured in the making of this Field Day site.

We had a blast!

With best regards,

Pete

You might also talk to the Boy Scout council offices in Walker.? If
you plan it far enough ahead of time, they might be willing to help
you.? STEM is a huge part of Boy Scouts now.? So if you offered
the opportunity to work with scouts at next years event, they might be
willing to advertise for you with the scouting community.?

If you want, I can contact them for us.? I could see each club that
wants to do this could get listed in an article that the council would
sent out announcing where to go in each town or area.

How does
that sound?

Del
W8WDW
I paid for 100 watts, why not
use them?

3579. Six meters is hopping

Yahoo group: GRARA
Date: 2017-06-27 19:20:04 UTC
From: Hank Greeb
Topic: 3579 Message: 3579

See Dx maps and choose 50 MHz for the maps to portray. There's even some multi hop Sporadic E from parts of the U.S. to Europe.

It isn't obvious that sporadic E extends to Michigan latitudes, but there is one station in Wisconsin who is at our latitude who has been spotted. I have no 6 meter capabilities, so I can't verify. maybe K8DMR and others who have 6 meters can verify the possibility of 6 meter Sporadic E from around here.

Remember, almost any antenna and which will radiate any power will often be sufficient for sporadic E work on 6.

Hank:

Being relatively new to the area yet, I am not sure of specific groups, but this would sure seem to be possible!

Also, how about reaching out to local scout groups?

Anything we can do to get young people involved will be a “win win” for everyone.

An Idea for field Day.

Could we become associated with a STEM (Science, Technology, Engineering and Math) program at one or more schools in the Greater Grand Rapids area? Seems like an interesting idea. Maybe, just maybe, we could get some younger blood into the Amateur Radio Service with such a program.

And, we might get a few operators for our GOTA station.

From the Field Day Division of the Department of Younger Hams:

I was up at Lake Cochiti with variously four to five adults, three of us licensed, and 11 teens from a STEM program here in ABQ in which passing the Tech exam is one requirement for passing the course they were taking. Five or six of the kids passed their Tech exam the day before, a test that was billed as a practice exam. So they were really pumped. The kids arrived about 7:30 Saturday morning and set up much of the station with our supervision. When it came time to operate (a bit late, ahem, for reasons we can go into over a cup of coffee sometime), they did the operating, with appropriate supervision.

We had our bumps and thumps during set-up, but no teens, adults, or radios were injured in the making of this Field Day site.

We had a blast!

With best regards,

Pete

Yep! 6 was hopping HOT!

I worked a station on 6 AM in North Carolina with S-9 signals that evening- Heard stations all over the east coast very strong!

I heard others report VE3's but didn't hear any- Zero's were weak however- JB

3584. Tower Work Party Scheduled-

Yahoo group: GRARA
Date: 2017-07-07 00:22:39 UTC
From: wd8usa@...
Topic: 3584 Message: 3584

The work party to finally install the triband antennas on the short tower at Red Cross will be Tuesday next week @ 830AM with a breakfast meeting first at new Beginnings Restaurant, then to the Red Cross.

The "rain" day will be Wednesday the next day if needed.

KF8QL and WD8USA will be the climbers and we need at least 2 for the ground crew.

Any one know how the cross arm is attached to the tower? We would like to loosen the arm to slide the pipe to install the antennas.

Do we have another cross arm available to install on the tower lower down for 2 more antennas?

All,

I have been informed that in order for me to do any work on replacing the operating positions in the radio room that I need a club vote granting me permission to do so.

Is not a club vote needed for any work done on the tower as well? The meeting is tonight.

Yep, I understand. Any project we want to do is ok without a vote. I even did not have to have a vote on my desk project for the radio room.

I am planning right now to be at the Red Cross to help with the tower project Tuesday.

I would also like to have a couple of carabiners with pullys and halyards hung off that cross arm for acouple future wire antenna projects if possible.

Thanks

Subject: Re: [GRARA] Tower Work Party Scheduled-

All,
I have been informed that in order for me to do any work on replacing the operating positions in the radio room that I need a club vote granting me permission to do so. Is not a club vote needed for any work done on the tower as well? The meeting is tonight.
73 Thom KI8W

On 7/6/2017 20:22, wd8usa@... [GRARA] wrote:

The work party to finally install the triband antennas on the short tower at Red Cross will be Tuesday next week @ 830AM with a breakfast meeting first at new Beginnings Restaurant, then to the Red Cross. The "rain" day will be Wednesday the next day if needed. KF8QL and WD8USA will be the climbers and we need at least 2 for the ground crew. Any one know how the cross arm is attached to the tower? We would like to loosen the arm to slide the pipe to install the antennas. Do we have another cross arm available to install on the tower lower down for 2 more antennas?

3589. Power is back at 92nd St, the 26 repeater is back on the air

Yahoo group: GRARA
Date: 2017-07-08 19:56:05 UTC
From: Tom

ok, the rule for voting, is there "must" be a vote on any "expenses" more than $70. Since Thom is providing the materials for his radio room project, no vote is required.
It is nice that Thom is letting the club know about his project.

thanks

We realize most can't help because of the work thing (Dave and I only just retired so we know!)

Since Dave and Joe are climbing, we have to make it fit our schedules-

Prayers are in order agains't any falls from the tower!

Every one can help with that!!

PS any unfinished work can be done in the evening which is not a bad idea!

If an extra session in the evening is needed we will announce it here-

Mark your calendar for Saturday, August 19 at 9:00 am for the 4^th annual “Spark in the Park”,

a science fair for amateur radio. Come and bring along your show and tell projects.

Join hundreds of other hams who’ll be demonstrating the different facets of the

hobby at the Home School Building, 5625 Burlingame in Wyoming.

This is sponsored by ten clubs in West Michigan: Holland ARC, Lowell ARC, GRARA, Allegan County RC, Kalamazoo ARC,

Muskegon AARC, Riverside Radio Amateurs, Michigan ARA, the IRA and North Ottawa ARC.

Admission and tables are free!

If you have a device you have built, a go kit, a tube or micro-processor QRP transmitter, an antenna tuner,

or any other item, bring it along and show others what you have done.

A reminder that this is now a morning event.

More information at http://www.k8tb.org/sitp.htm

3605. Field Day info needed

Yahoo group: GRARA
Date: 2017-07-16 19:58:05 UTC
From: Hank Greeb
Topic: 3605 Message: 3605

I need to know which of the contact were made with Solar Power. I was told they were marked somehow in the log, but I knoweth knot how to find that info.

We get a bunch of extra bonus points if I can specify which of the contacts were made with solar power.

Help please.

I was told that these were made by hooking up a battery which had been charged by solar power to the GOTA rig. That's fine, but I still need to know which contacts were made via this method.

Help,, help help please, pretty please. I'd like to get this filed with ARRL ASAP. Deadline approacheth in about a weak and couple daze.

From: Thom
Topic: 3606 Message: 3612

The only generator we used was the one in the Red Cross unit that was there. The unit that was in the field across the road had its own generator but I bet no one got a picture of it.

I am also not aware that we used the solar panel at all either. It just sat up against the fence all weekend and I never saw any wires coming from it.

As for the City Manager, if he was there, I did not know it.

Sure seems like we dropped the ball on a lot of things. It will be better next year.

On the other hand, it is not many points. This is not a competition, its a emergency simulation.

We did NOT use a solar panel.
We used a battery to run the time we used a station for non generator use.

From: Hank Greeb
Topic: 3616 Message: 3616

Does ANYONE have pictures from field Day? I KNOW I took 8 or 10 pictures, but they seem to have disappeared. Not on either of my computers. I don't see any on the W8DC web site. We had a self proclaimed official photographer, but he had a major problem with his camera, and apparently did not get any pictures

I have until Tuesday evening, July 25, at 2359z to get the summary into ARRL, so I need as many pictures of our setup by 1600Z Tuesday (Noon Eastern Time)

I can hardly believe that this got so screwed up, but it did.

help, please, help.

Hank,

I have a lot of the Field Day photos taken by Phillip W8IPN.

There are all multi-megabyte in size and my email server will not allow
those to be sent via email.

Hi Thom,

If you are not able to make reduced-size copies of those photos (and if you try and do it, please backup the original files first), I suggest dropbox, google drive, google photos, facebook or other alternatives to email. Even the semi-old fashion way: burn a CD/DVD and then drive a couple of miles. Maybe somebody can spare an hour of their time and help with that. (Unfortunately I can't, otherwise I'd gladly do).

There's always a way.

Subject: Call to Action....

ARRL President Issues Call for Members to Reach Out to their Senators to Support S. 1534

07/25/2017

ARRL President Rick Roderick, K5UR, is calling on League members to urge their US Senators to support the Amateur Radio Parity Act of 2017, S.
1534. ARRL has opened a RallyCongress page to simplify the task.

“[W]e are at a crossroad in our efforts to obtain passage of The Amateur Radio Parity Act,” Roderick said. He said the campaign to secure passage of the bill scored a major victory earlier this year when H.R. 555 passed unanimously in the US House of Representatives. Obtaining passage of the companion Senate bill, S. 1534, is the final legislative hurdle.

“Now is the time for all hams to get involved in the process!”
Roderick said. “Many of you already live in deed-restricted communities, and that number grows daily.”

He urged radio amateurs now restricted by a Homeowners Association from installing effective outdoor antennas to visit the RallyCongress site and e-mail their two US Senators. He also encouraged those not now affected by deed covenants, conditions, and restrictions (CC&Rs) to support their fellow radio amateurs by doing the same.

“If you want to help create an opportunity — not available before now — for Amateurs who live in deed restricted communities to install effective outdoor antennas on property that they own or lease, send these e-mails today!” Roderick said. “We need you to reach out to your Senators today. Right away.”

S. 1534 was introduced in the US Senate on July 12, marking another step forward for this landmark legislation. Senators Roger Wicker (R-MS) and Richard Blumenthal (D-CT) are the Senate sponsors. The measure will, for the first time, guarantee all radio amateurs living in deed-restricted communities governed by a Homeowners Association (HOA) or subject to any private land-use regulations, the right to erect and maintain effective outdoor antennas at their homes, while protecting the aesthetic concerns of HOAs.

The link below will take you to the web page on the ARRL Website where you can send your letters to Senator Peters and Senator Stabenow.

Copy the link below and paste into your browser and you will be taken to the appropriate place on the ARRL website. From there, simply enter your zip code and follow the directions to send your letters via email.

https://arrl.rallycongress.net/ctas/urge-us-senate-to-support-amateur-radio-parity-act

Once your letters are on their way, please send me an email stating that you letters have been sent and your callsign and email to wb8r@....

Please share this with all your friends and members of your radio club.
Take the initiative to ensure that every ham you know (non-ARRL members too!) sends their letters and sends an email to me letting me know that their letters have been sent.

This is IMPORTANT, folks!

Don’t delay, Do it today!

Thanks and 73,

Larry, WB8R

ARRL Michigan Section
Section Manager: Larry Camp, WB8R

We will be returning to Fisk Knob for the UHF contest this weekend.

I need folks to work me on 900 MHZ FM so pass the word.

We will have 50 watts on 900 FM and from up there, We will see what happens!

I will be listening on the input of N8WKM repeater which is I believe is 902.2625 and on 927.500

which I believe is the Nat. simplex calling freq on 900. (If this is not right, please advise)

We will also be on 223.5 and 446.0 simplex FM as well.

- You all are welcome to stop up if you want.

We will be setting up Friday afternoon late and be on the hill until Monday morning.

This will be the first time in over 20 years we have had a chance to do this!

My only fear is the forcast for thunder storms this weekend so stay tuned!

Good luck in the contest, Joe.

And, for those who might be interested, this week-end is also the North American QSO Party (NAQP) CW contest.

The contest will run from 1800Z Saturday affternoon until 0600 Z Sunday morning on the usual HF contest bands.

I will be part of a national team of blind hams, and we will be using the team name Braille for the contest exchange.

I hope to work at least a few GRARA members this week-end.

Should be a fun week-end for all concerned, as long as we can keep the T-storms away.

Have fun on the Knob!
Perhaps the last time there was activity from the knob was when GRARA ran field day from there. That was in the 70s- the year when there was almost no gas available. I picked up the WOOD TV generator, but only had enough gas to get to the hill, but not back to town. And we had no gas to run the generator. The event was saved when my co-chairman, K8XR, drove into the yard of a transportation company, filled a 55 gal. drum from their gas pump and walked into their office saying "I owe you for gas". We had a 88 foot crank-up tower which in retrospect was a bit of overkill for Fisk Knob. We ran 3A.
The results were good, as I recall we came in 3rd in MI and 5th in the whole 8th call area!
A bit of history.
I will listen for you on 446.
Good luck,
Wendell, K8OO

There was a lot of activities in the 80s and 90s during VHF/UHF contests. There could be a number of motorhomes, including my own. One fella, I can't remember his name, would sometimes bring his solar array/batteries to use instead of a generator. A good number of folks would show up a various times. Racked up a lot of points. Had a grill for burgers and chicken. Fabulous sunsets. A great time by all.

The Knob is a great place for VHF/UHF. For the heck of it, I would crank up the TV antenna on the motorhome and receive TV stations all over Michigan and Wisconsin.

Not sure why operating the VHF/UHF contests from Fisk Knob died out, but IMO would be great to make a return.

Have fun on the Knob!Perhaps the last time there was activity from the knob was when GRARA ran field day from there. That was in the 70s- the year when there was almost no gas available. I picked up the WOOD TV generator, but only had enough gas to get to the hill, but not back to town. And we had no gas to run the generator. The event was saved when my co-chairman, K8XR, drove into the yard of a transportation company, filled a 55 gal. drum from their gas pump and walked into their office saying "I owe you for gas". We had a 88 foot crank-up tower which in retrospect was a bit of overkill for Fisk Knob. We ran 3A. The results were good, as I recall we came in 3rd in MI and 5th in the whole 8th call area!A bit of history. I will listen for you on 446.Good luck,Wendell, K8OO

Hi Paul,
Good to hear from you. Did not realize that maybe that field day was the start of your very successful DX/contest career. Don, K8XR was my best friend. I now live about a mile south of where we had our contest station.
I will be at The Spark in the Park. I might take a trip to the knob Saturday.
Wendell, K8OO

AHHHA! Jack you bring it all back Sir!

I remember when you used to bring your motor home up and support us in these contests in the 80's-

One of the first I remember is the June VHF contest where my Kenwood TS-680 was in a tent and 6 opened up early and stayed open for most of that weekend! Contacts left and right on that band!

Also one night in your motor home, I was sleeping when Mt. Graylock (W2SZ) came in on 220 SSB with 20 over S-9 signal strength!

Not a soul on the band could I hear except that station and of course we did make an easy contact that early morning!

He kept on calling but no one answered him after our QSO-

Moral of the story- Got to be on when the band opens!

Thanks Jack for the many years you supported us!

JB

3639. Solar Eclips QSO Party

Yahoo group: GRARA
Date: 2017-08-10 16:50:47 UTC
From: Hank Greeb
Topic: 3639 Message: 3639

This is a "sorta contest" with a very valuable technical aspect to it.
It only happens once in a century or so that a total solar eclipse is
visible from the United States.

So if you're available during the period of the solar eclips, please
participate. Time/date is 1400 – 2200 UTC on August 21, 2017 Note, it
is NOT a contest in the usual sense, so folks who generally "chew the
rag" of operate traffic nets, or whatever..... are encouraged to
participate. The more reports the organizers receive, their scientific
data will be concerning what, if any, anomalies in propagation exist
during a solar eclipse.

And, you do NOT have to be in the path of the solar eclipse. folks even
a hundred miles or more, such as we are in SW Michgian, can provide
valuable data.

Hank:

I have the IRA Link System Noontime Roundup Net to run at noon on that day, but I am going to try to participate in the SEQP from here as much as I can.

I have to figure out whether or how I’m going to log contacts.

I suppose I could use the N3FJP A C Log program, but I also hear that Scott’s VHF contest logging program can be adapted specifically to the SEQP.

Will have to see what I can come up with between now and then.

From: Thom
Topic: 3642 Message: 3642

Howdy all,

We are in need for all who can to step up and give us a hand.

We will be conducting our regularly scheduled examination schedule the night before the hamfest on September 9.

Those of us who are on the VE team will not be available to help set up tables that Friday for the Hamfest.

We will need a few of you to go to the Home School building Friday night to help set up tables.

Let us know if you can help out setting up tables.

Thanks,

73

Thom KI8W

3643. For GRAHamfest, who makes sub-sandwiches?

Yahoo group: GRARA
Date: 2017-08-14 23:20:02 UTC
From: Jack Amelar
Topic: 3643 Message: 3643

OK everyone. For the concession stand at the September 9 GRAHamfest,
I'm thinking sub-sandwiches instead of hot dogs.

I have found one supplier in Saranac that can supply subs at $2.70 ea,
I figure we sell at $4.50 including a bag of chips.

So two things, anyone with opinion on this?

The most important, does anyone know of any other suppliers of
sub-sandwiches in the GR area I can check with.
I have already checked with Frandale Fundraising in Grandville. There
primary business is with school groups, as such, they don't ramp up
production until October, too late for us.

The quantity I'm looking at is 50. If we have leftovers toward the end,
I bag them up in 5 lots and sell for near cost. Heck, I'll buy some
myself if this happens.

So if you know something, say something.

I checked prices at Sams club for the following, to compare cost and profits

Hot Dogs 30 cents

Buns 15 cents

small chips 25 cents

large bottle of mustard and ketchup about $4.50 each

Cost of the dog and chips is about 70 cents and sell it for $2.25. profit about $1.55

plus the cost of the mustard and the ketchup..

Some folks will probably buy two of these.

Sub price $2.70

chip price .25 cents

Total cost $2.95

sell $4.50

Profit $1.55

I comes down to what will sell the best and how will the subs keep until being sold

Dave

Hello from Western Washington '7 land,
The XYL and I are preparing to relocate to Western Mi. in 2018 to be closer to a pending grand-harmonic.
We've been shopping the real estate ads and have a few ideas but I want to land somewhere that doesn't mind having copper and aluminum hanging in the air, if you get my drift.
Do you folks have suggestions for areas that are generally free of HOA and anti-ham covenants?
Many thanks!

Bill:

I recently relocated to Grandville Michigan, just west of Grand Rapids.

Grandville has an exception for amateur radio in its housing ordinance, so I don’t think you’ll have a problem here.

I verified this with the help of the City Manager’s office, and they were very cooperative.

Should you decide to relocate to Grandville, I’d give the city office a call.

They may want your address in case anyone has any questions, but that’s all done in the spirit of open communication, as far as I can tell.

I have wire antennas here, and two support masts, and noone has ever raised any questions.

Subject: [GRARA] Moving East

Hello from Western Washington '7 land,
The XYL and I are preparing to relocate to Western Mi. in 2018 to be
closer to a pending grand-harmonic.
We've been shopping the real estate ads and have a few ideas but I want
to land somewhere that doesn't mind having copper and aluminum hanging
in the air, if you get my drift.
Do you folks have suggestions for areas that are generally free of HOA
and anti-ham covenants?
Many thanks!
73's

Hi Bill,

I live in the Lowell area.? I am just over the
county line into Ionia county, Keene township.? The county wanted me
to get a building permit for my tower.? But the inspection was as
simple as coming out and looking it over to verify it looked like the
drawing said it would look.? It is a 60' tower and they said with my
distance from all airports, I could have gone much higher.?

Hope that helps.

Del

Bill:

I recently relocated to Grandville Michigan, just west of Grand Rapids.

Grandville has an exception for amateur radio in its housing ordinance, so I don’t think you’ll have a problem here.

I verified this with the help of the City Manager’s office, and they were very cooperative.

Should you decide to relocate to Grandville, I’d give the city office a call.

They may want your address in case anyone has any questions, but that’s all done in the spirit of open communication, as far as I can tell.

I have wire antennas here, and two support masts, and noone has ever raised any questions.

3652. Tower Work Today

Yahoo group: GRARA
Date: 2017-08-15 19:50:41 UTC
From: wd8usa@...
Topic: 3652 Message: 3652

I got the H frame up at mid level on the short tower today. Only thing remaining is to pull the antennas up and slip em on!

They are tested and ready to go and I hope to schedule a work party real soon Perhaps on Friday this week- I only need 2 ground crew to assist-

There are 3 feed lines at mid level - one is marked with 3 green electrical tape bands.

I also repaired a crack in the balun of the low NVIS antenna and cleared the branches away-

Will make a decision by tomorrow after looking at the WX forecast-

Good progress I see in the radio room- Very good! Please consider sound dividers (partitions) for the operating area-

The last exercise we had indicated a need for this-

I am thinking four of them- JB

Bill,

First let me say you will be most welcome to the area.
You didn't specify if you want to be in, near, or in the region of
Grand Rapids, or how high you're thinking of a tower, or dipole, or ?

As Dell W8WDW pointed out, Ionia County, just east of Kent County where
Grand Rapids is located, is probably the least restrictive. Newaygo
County just north and Allegan county just south are good also. If you
want to go west into Ottawa County toward Lake Michigan, it gets worse.
About every city and township in Kent County has an ordnance of some
sort for amateur radio antennas. I live in Kent, Vergennes Township.
Years ago I had to deal with a 35 foot limit. The hams here did get
together with the township and eventually it was changed. I live on 10
acres zoned agriculture. 35 foot limit made no sense and we got the
township to agree with that. Some areas in Kent County limit to 50 ft,
70 ft, or you have to go through a special use permit hearing. Just
about anywhere you do need a building permit if erecting a tower above
35 ft.

Having said all that, HOAs are another story. Fortunately, there are
plenty of places without an HOA.

When you narrow down where you're thinking of buying, chime in again
and we can find more information.

73 and welcome, Jack NY8D

3654. Ohio QSO PARTY August 26 noon to midnight EDST

Yahoo group: GRARA
Date: 2017-08-16 00:41:18 UTC
From: Hank Greeb
Topic: 3654 Message: 3654

Shameless plug for the OHQP happening in about 10 days on Saturday Aug 26 from noon to midnight EDST. Current activations show 66 of 88 counties with planned activity with more to come. Will have mobile, roving, EOC and home stations on hopefully in all 88 counties.

Many Ohio stations support the Michigan QSO party in April. So, fire up your rig and make a few (or many) contacts with Ohio Stations on August 26.

Best bands for the contacts with Ohio should be 40 during daylight, and 80/75 meters during late afternoon/evening hours.

Both Phone and CW contacts are permissible. AND, contacts by mode result in 2 multipliers,

Rules and other details of this contest are at
http://www.ohqp.org/

I live in Walker, where hams are allowed 70' tower+antenna+mast (i.e. total), no building permit required. I am not in one of the new developments, however; rather in an older house built in the 60s.

One must be very careful in selection of a location. AND, avoid at all costs the numerous "site Condominiums" which are so prevalent in this area. These almost universally have restrictions on antennas. My wife and I took over 6 months of looking, looking, and looking to find a suitable place. Of course, we had dreams of having a site where we could build another dream home.

It "probably" is possible to find a suitable prebuilt home in many places. But, we aware that real estate is a sellers market these daze, and you must make an offer quickly with reputable realtor.

good luck!

FYI from Tom Behler: KB8TYJ

From: ARRL Web site [mailto:memberlist@www.arrl.org]
Sent: Wednesday, August 16, 2017 1:54 PM
To: tombehler@gmail.com
Subject: New 605 Form takes effect August 21, 2017

IMPORTANT UPDATE: NEW NCVEC 605 FORM
A NEW NCVEC 605 FORM MUST BE USED AT EXAM SESSIONS BEGINNING MONDAY AUGUST 21, 2017.

VE NEWS SECTIONS:

New NCVEC 605 Forms and Applicant Information.
Field Stocked VE Teams -- Packages Mailed.
FCC and NCVEC 605 Change -- Information and News Stories.

New NCVEC 605 Forms and Applicant Information

New NCVEC 605 Forms
<http://www.arrl.org/files/file/VEs/NCVEC%20605%20Form%202017%20Sept.pdf> and an Applicant information sheet <http://www.arrl.org/files/file/VEs/Applicant%20Info%20Qualification%20Question%202017.pdf> for use at your ARRL VEC exam sessions beginning August 21, 2017 have been published. Please discard all existing versions of the NCVEC 605 Forms on or after midnight, August 20, 2017, as they will no longer be valid and cannot be used. All VECs and VE Teams must use this new form. For information regarding the 605 Form change, please see the “FCC and NCVEC 605 Form to Change” section below and refer to the news stories on ARRL’s website.

Instructions for the New NCVEC Quick Form 605 Application (September 2017 series).
Throw away all previous versions on or after August 20, 2017.
605 Forms can be copied when necessary.

The FCC is revising the basic qualifications section of 605 Application forms to include a question regarding whether an applicant has been convicted of a felony in any state or federal court. Applicants’ responses and explanations to the basic qualification question (felony question), will be used to determine eligibility to be a Commission licensee.

Instructions for the New Applicant Information Sheet – FCC Basic Qualification Question.
These instructions are for applicants that answer “YES” to FCC’s basic qualification question.
There are 2 sets of instructions on one form, therefore please cut the form in half before using it at
an exam session. The Applicant Information sheet can be copied when necessary.

After the application data is submitted to FCC and an FCC file number is created, the applicant is required
to provide an explanation directly to the FCC within 14 days. Candidates that do not want to answer the basic qualification question at the test session will be handled the same way the candidate's that are uncomfortable with giving their social security number (SSN) at the session are handled.

The candidate is allowed to take the exam(s). However, it must be made clear that FCC will reject their
license application form 605 if the question is not answered. As with the candidates that decline to supply
their SSN, these candidates should also be referred to the VEC department directly for further instructions
and guidance.

Officially Field Stocked VE Teams

For ARRL VE teams who are Formally Field Stocked by the ARRL VEC, 25 new NCVEC 605 Forms were shipped out on Monday August 14, 2017. Field Stocked VE Team leaders should look for the package containing the new forms to arrive this week. Throw away all previous versions on or after August 20, 2017; do not return them to ARRL VEC.

The materials supply should be sufficient for up to four or five exam sessions for the majority of ARRL VEC teams. With one thousand Field Stocked teams, what we send to you all in a mass mailing must be done with prudence in mind. Generally, this mailing is not intended to provide a year's worth of supplies for teams that test monthly and typically have more than 3 to 5 examinees per session.

Field Stocked teams should be especially vigilant about keeping us informed of who has possession of the exam supplies. Notify us immediately when your address changes or the teams Field Stock changes hands to ensure that any exam updates will be mailed to and received by the proper person. Periodically check your supplies to make sure they are current and that the quantities are sufficient.

Field Stocked VE Teams can order test materials on the ARRL website via our easy to use online Re-Stock Form <http://www.arrl.org/field-stocked-ve-teams>
(www.arrl.org/field-stocked-ve-teams <http://www.arrl.org/field-stocked-ve-teams>) or call us (800-927-7583) to obtain supplies.

Current exam session forms and documents (print, download or fill interactively) can be found on ARRL VEC's VE Resources <http://www.arrl.org/resources-for-ves> webpage
(www.arrl.org/resources-for-ves <http://www.arrl.org/resources-for-ves>).

FCC and NCVEC 605 Form to Change: Information and News Stories

The Communications Act (federal laws overseeing communications) requires the Commission to evaluate whether an applicant is qualified to be issued any FCC license (both commercial and amateur). This enables the FCC to determine whether an applicant is eligible under sections 310(d) and 308(b) of the Communications Act of 1934, as amended, to hold or have ownership interest in a station license.

The FCC 605 Form Application is not just used for the Amateur Radio Service. It's used for authorization in the Ship, Aircraft, Amateur, Restricted and Commercial Operator, and General Mobile Radio Services. The Commission is revising the basic qualifications section of this form to include a question regarding whether an applicant has been convicted of a felony in any state or federal court. Applicants' responses and explanations to the basic qualification question (felony question), will be used to determine eligibility to be a Commission licensee. There is not a Report and Order and there is not a public comments period on this form update as it is already in the rules.

The NCVEC 605 Form (used at exam sessions) must also be updated to include the basic qualifications question. For potential amateur license holders, this means not just that they passed the examination but also that they meet the character requirements. If the answer to the basic qualification question (felony question) is 'YES', they will submit to FCC as an exhibit a statement explaining the circumstances. The application will be off-lined (held) for a basic qualification review which FCC already does for other radio license services. The Wireless Telecommunications Bureau's Mobility Division stated that the fact that an applicant answers 'YES' doesn't mean they will be denied a license.

Furthermore, applicants are required to answer the question only if they are filing NCVEC Form 605 or FCC Form 605 for one of the following purposes indicated: New, Amendment, Modification (Upgrade or call sign change), or Renewal/Modification (changes at renewal time). The question does not have to be answered if the applicant is filling a renewal only or an administrative update to their license (change of address, name, email, etc.).

A new NCVEC 605 Form with the basic qualification question was released and is available in the ARRL VEC forms section of the VE Resources page www.arrl.org/resources-for-ves <http://www.arrl.org/resources-for-ves> . The new form takes effect for all VECs and VE Teams on August 21, 2017 and must be used at exam sessions going forward. Older form versions will be obsolete and should be discarded.

FCC has indicated that all VEC's must begin transmitting this additional data to FCC starting on September 7, 2017. Amateurs will see the new information displayed in the FCC license database and in their license manager record when logged in to their license account. The FCC WTB Public Notice about the 605 form change was released on 08/07/2017 and is available here: https://apps.fcc.gov/edocs_public/attachmatch/DA-17-741A1.pdf

The last major change to the NCVEC 605 Form occurred 17 years ago (April 2000) when the FCC restructured the license classes!

ARRL News Stories

Revised FCC Form 605 Will Ask Applicants "the Felony Question" – published 07/19/2017
www.arrl.org/news/revised-fcc-form-605-will-ask-applicants-the-felony-question
<http://www.arrl.org/news/revised-fcc-form-605-will-ask-applicants-the-felony-question>

Applicants Must Use FCC Form 605 with "Felony Question," Starting on September 7 – published 08/07/2017
www.arrl.org/news/applicants-must-use-fcc-form-605-with-felony-question-starting-on-september-7 <http://www.arrl.org/news/applicants-must-use-fcc-form-605-with-felony-question-starting-on-september-7>

To: Tom Behler KB8TYJ <tombehler@...>
Subject: Circular Polarization

Good after noon Tom.

If you know of any hams that would like to try something different on 2 meters

and may be interested in ground station to ground station circular polarization

have them get in touch with me. I have been successfully using circular polarization

for a long time now and conducting several experiments using it. The upsides to

using circular polarity signals are:

1) Enhanced distance of both transmit and receive signals.

2) Improved ability to receive mobile stations who's signals go up and down due

to changes in mobile antenna polarity as they go up and down hills.

3) Unlike Vertical antennas who’s signal can be absorbed by foliage on trees or

buildings, the circular signal has a tendency to bounce or refract delivering more

signal to the receiving station no mater if the station is a repeater or simplex

operation.

Hi, all.

Below is a link to an article in this week's Handiham e-letter outlining how you can observe the effects of Monday's solar eclipse using you're A M radio.

http://www.skyandtelescope.com/2017-total-solar-eclipse/how-to-hear-the-solar-eclipse/

Here's one exirpt from this article, listing specific A M stations to look for as the eclipse traverses the country.

"Listed below, are 13 clear channel AM radio stations that lie either within the August's eclipse path (bold type) or close enough to have at least 95%

of the Sun's disk obscured by the passing Moon. Four of these are Class B stations, which direct their signal diametrically away from another station at

night which occupies the same frequency, so that it will not interfere. Case in point: KPNW does this to protect KMOX.

Generally speaking, if you are listening for a particular station that is within 800 miles (1,300 km) away, you might be able to hear it near the time

that maximum eclipse is occurring over that station's transmitter."

Personally, I still can't help but wonder what will happen to the signals of smaller day-time only stations that may be closer to me than the clear channel stations. For example, we have a station in Jackson, Michigan on 1510 KHZ; Mason, Michigan on 1110 KHZ, and a station in a Chicago Suburb on 750 A M.

I'm going to be checking those frequencies in particular to see what if any kind of interaction occurs between the conflicting signals.

Of course, on the ham radio side of things, I'm going to participate at least somewhat in the Solar Eclipse QSO Party.

3666. KB8TYJ And NAQP SSB Contest This week-end

Yahoo group: GRARA
Date: 2017-08-18 21:30:40 UTC
From: Tom Behler
Topic: 3666 Message: 3666

Hello, all.

If you will be near an HF rig this week-end, and want to do some SSB operating, come join us in the North American QSO Party SSB contest!

The contest runs from 1800 Z tomorrow afternoon through 0600 Z Sunday morning. The maximum operating time for a single-op station is 10 hours, and everyone is limited to 100 watts or less.

I will be part of a team of blind ham operators across the country. Our team is named the Braille team. Many of us, including myself, will be using the name Kevin, so don't bbe confused if you hear me using that name.

We are using the name Kevin, in honor of a very dear friend (Kevin Nathan, K7RX), who became a silent key several years ago.

I do have some other commitments tomorrow afternoon and evening, but will try to play in the contest as much as I can. I will be doing a combination of S and P, and C Q ing. The best bands for anyone to work me from around here will obviously be 40 and 75 meters.

Hope to work some of you in the contest.

Tom Behler: KB8TYJ, Grandville

3667. VHF/UHF Antenna Instal Now Complete

Yahoo group: GRARA
Date: 2017-08-19 14:22:49 UTC
From: wd8usa@...
Topic: 3667 Message: 3667

The install work of the 2 GP-15 antennas at mid level is complete. As I see it, Just the replacement of the dipole will finish outside work on the short tower!

Thanks to all that assisted to get this done! JB

3668. General Class class starting September 6

Yahoo group: GRARA
Date: 2017-08-20 00:08:44 UTC
From: Tom
Topic: 3668 Message: 3668

If you are a technician or know a technician and would like to upgrade to the general class, you might consider this general class this fall, presented as a cooperative effort by the Grand Rapids Amateur Radio Association and the Holland Amateur Radio Club.

The class will meet on Wednesday night in the basement of the Grand Rapids Red Cross at 7:00 PM, starting on Wednesday, September 6, and will go for 10 weeks, ending on November 8. There will be 9 classes over the ten week period, with one of the classes will be a study hall.

The cost is $ 20 and more information and online registration is at:

If you are not doing anything special, tune in tomorrow, Monday, August 21 on the Linked repeater System for a special edition of the noon-time round up net.

Starting at 2:00 PM, our host will be the congenial Tom Behler, KB8TYJ and he will host a special "Don't look at the sun!" net.

Keep in mind that other people in the US are paying $ 400 for hotel room to see the day go night. For a few minutes. Then it becomes day again.

Here in Michigan we have fun on nets.

Funny you should ask that question!

The feedline with 3 green stripes is the GP-15 on the North side of the tower at mid level.

The feedline with 2 green stripes is the GP-15 on the South side at mid level.

The 3 White banded feedline is from the CX333 on the West side of the tower at the top and the 2 White banded feedline goes to the CX333 on the East side of the tower at the top.

On the H frame at mid level there is room for 2 more antennas hanging up side down for later if needed.

I will make up a formal drawing for the radio room and get it there next week.

I also have Crouch communications coming to reinstall the static brush soon which has been cleared by the staff at red Cross-

As far as I know, This completes work on the VHF/UHF antennas finally on the short tower.

The only other thing I know of that needs to get done is take down the dipole and put up another one that Thom is got in mind and to connect the "pod" radios to the CX333 and the Red cross radio to the pod.

I will try to get that done this week and test the Pod transmitters - JB

All,

The dipole I am planning on putting up will be a rebuild of some old dipoles I found in the Red Cross garage last week.

160 80 and 40 meters will be the focus of this antenna. I will cut these antennas to resonate in the bottom 1/3 of each band and that should allow our antenna tuner to tune the antennas to the entire band on each antenna.

When we remove the offset fed dipole to make room for the new antenna I will need to have whoever is climbing to replace the rope on the 50 foot pulley to handle the weight of this antenna.

Any questions...please let me know.

.Today, I hooked up the Pod radios to their feedlines, ran power to the Red Cross radio and amp and hooked up the Red Cross Icom MKIIG to it's tuner and feedline.

I left a paper taped to the wall by the feedlines identifying which feedline is for which antenna.

Tomorrow, I will finish running power to the ID-800 and the 220 and 6 mtr FM radios and test the SWR on the Pod radio system.

Thom, You will have to "dress" the power cords as you would like them to be that I ran today.

Great work! It is coming along nicely!

Just got back from viewing the eclipse in person. Pictures and video don't begin to cover it. There is no better way to view the eclipse than in person at totality. Pictures don't convey the cooling, the darkening of ambient light, the quieting of animals. Pictures usually miss the 360 degree sunset.

BTW, I took my radio with me and was not able to raise a single ham on any of the 2 or 6 meter simplex frequencies during the week we spend in Kentucky.

Viewing a total eclipse in person is so much better than anything NASA can offer.

How much are we paying these clueless people for this work? I would think an HF beam would be pretty hard to overlook, when you're at the top of the tower. Sounds like something we could have put up ourselves.
Don't forget about the broken ground wire at the base of the tower, either. That needs to be fixed also.

I doubt you'd hurt the rotator, but something else would be damaged with rotation.

John,

I agree with you...that was one botched install. We probably could have done a better job ourselves.

We need bigger wire for the tower ground. I recommend #4 stranded and that should be connected to a ground rod with thermal welding. We need 1 for each leg. Thermal welding items can be had for around $9 each.

I agree that seeing it in person is probably the best way but some of us have a tough time, in our ever advancing age to travel long distances.

Besides the partial we had here in Michigan was more then enough to give us a sense of how the environment reacted. We had 82% coverage here.

Besides I recorded the whole thing.

3685. Re: [GRARA] Eclipse Coverage

Yahoo group: GRARA
Date: 2017-08-24 09:41:59 UTC
From: Hank Greeb
Topic: 3670 Message: 3685

Lettuce knot knock the efforts of NASA on their efforts to share the eclipse experience with those of us who could not be at a site of total eclipse. With the internet, and wide TV overage, people from around the world could view things "live" if they so desired.

I heard from a few friends who did travel to places like Carbondale, IL, and the experience was overwhelming to them and those around them.

And, we should NOT forget that this was the first time the Amateur Radio community was able to truly participate in the scientific experiment to help determine the effect of an eclipse on High Frequency propagation. The Reverse Beacon Network was used to track signal strength of HF stations throughout the country. Analysis of these data will take some time, so we must have patience.

I was "fortunate" to be in Fort Collins, Colorado, where the covereage was something like 97% of the sun. It was still "light" at that point, but the Denver Weather Bureau reports that it cooled by about 8 degrees celcius, from a bit over 20 degrees to around 12 °C.

There were very few clouds at our site, which was great for viewing the eclipse.

To note, thee will be another eclipse in the year 2024, totality which will be visible from fairly near us, so make your plans to be in total darkness if that be your wish. Info will be on the NASA site in the near future, if it isn't there already. On Monday, all links seemed to converge to the 2017 eclipse.

We got back last night (Wednesday) from Tennessee to watch the total eclise, and do other things. As Kreigh says, nothing on TV, You Tube, etc. can compare to seeing such an event in person. I first became aware of this eclipse about 6 or 7 years ago and decided then I was going. There were a few clouds where we were, Cookeville, TN, but they cleared before the main event.

The the April 8, 2024 eclipse will pass by Toledo, Lima area. I plan on that one as well although the weather in April can be very iffy. Glad I made this one.

Hank. From Denver, why didn't you make the relatively short trip to Casper, WY?

Jack:

Traffic, Traffic, Traffic. Especially the traffic FROM the site on Monday evening. There was a 30 mile (or more) parking lot south of Casper, which didn't dissipate until the wee hours of Monday morning.

Besides, 97+ % was good enough for me. but I've 2024 on my list, presuming I live that long. (Actuarial tables say I have a resonable probability of being on the "living" side of the bell curve.)

3689. Radio Room Update

Yahoo group: GRARA
Date: 2017-08-25 21:14:53 UTC
From: Thom
Topic: 3687 Message: 3689

Howdy all,

Spent several hours in the Radio Room today.

A shelf has been installed above the FT-920 station and the computer monitor and the power supply for the Amplifier has been placed on the shelf.

a shelf has also been built above the TS-2000 station and the dual computer monitors have been installed on the shelf. This station is not yet operational.

Edge trim has been installed on the desk top on 3 sides and also trim has begun on the shelf units.

The FT-920 station is operational on 20-10 meters only using the yagi.? The yagi cannot be turned at the present time due to a obstruction.? It is currently pointed south.

Work will begin on the 160 thru 40 dipole this weekend.

There is a antenna lead in the station that is marked 40 meter dipole.? Anyone know if that coax is connected to any outside antennas?? I asked Joe WD8USA if he knew and he said he did not think it is connected to anything. If you know, please let me know.

Joe also has the Red Cross radios all installed and finished and we have a 220Mhz radio installed for our use.

I still have to finish installing trim and I am planning on staining that trim.? The computer on the 920 station has to be connected up and made operational.? The headphone system on the 920 station also has to be re-installed and tested.

Things are coming together nicely.

Well said Thom!

In addition, the SWR has been checked on the new antennas and found to be less than 1.5 to one in most cases

All VHF UHF radios are now operational- the last thing there is the installation of the packet station- JB

Joe,

Yep we noticed that little obstruction tonight as we were leaving. The rotator control box is wired to the rotor but not yet wired to a power supply.

Thanks for the heads up on that and I did dress some cables on the Red Cross station tonight.

Thanks Joe,

3694. GRARA meeting Friday, donations to RC for Texas flood victims?

Yahoo group: GRARA
Date: 2017-08-30 02:21:43 UTC
From: Jack Amelar
Topic: 3694 Message: 3694

I'm going to stick my neck out here as what I am encouraging has no official GRARA officer sanction.

This Friday the 1st is the September meeting of the Grand Rapids Amateur Radio Association, 6:30PM social, 7PM meeting, at the Red Cross Building on Fuller Ave.
Of course, GRAHamfest 2Ø17 setup is the following Friday 8th evening, Hamfest on Saturday 9th.

Anyway, I am encouraging anyone willing to give to the American Red Cross for relief in the Texas floods to do so at Friday's meeting, cash or check. This can be presented by our leason, or someone of the officers choosing, to present to the Red Cross on behalf of GRARA members. You know, the Red Cross, who provides our meeting place and ham shack. 'Nuf said.

Final prep for the Hamfest at this meeting. Our biggest fund raiser. All hands on deck.

3695. Two Items For Sale Needing Space On A Table

Yahoo group: GRARA
Date: 2017-09-04 13:57:42 UTC
From: Tom Behler
Topic: 3695 Message: 3695

Hello, everyone.

This is Tom Behler: KB8TYJ.

I don't know what is appropriate for the upcoming swap, so please bare with this question if it is a bit out of the ordinary.

I have two items that I would like to sell. I placed them on a table at theIRA Swap in June, but got no takers. So I want to try again if someone has a bit of extra table space.

The items are:

1. A Kenwood TMV7A dual-band mobile rig that is in working condition. The rig has the VS3 voice chip in it, which enabled me as a blind ham to perform rig functions and to do all needed programming. I will include some additional rig accessories, such as the remote mounting kit, and a programming cable with a serial port connection. I'm selling the rig because I no longer have any use for it. The only problems with the rig are that the blue display screen is apparently a bit fuzzy (which was typical of those rigs back in the day), and the mic buttons are a bit sticky.

2. A Cobra Ultralite Senior HF antenna. The antenna was up at my original Big Rapids home QTH for about 3 years, but still seems to be in fairly good shape. I'm selling the antenna because I simply don't have room on my small Grandville lot for a 140 foot wire antenna.

If I can borrow some space on someone's table, I'm willing to give the table owner a bit of the sales proceeds if these items do move.

Once again, if something like this is not appropriate, please be honest, and I'll figure out another way to sell the items.

Thanks much, and I'll see everyone at the swap on Saturday.

Tom, and everyone else,

GRARA usually has tables that members with a couple items can display.
I don't know for certain if this is still the case for Saturday's
Hamfest.

Anyone with lots of stuff should get their own inside tables or trunk
it outside.

Ok, Jack.

I'll probably just bring my two items to the swap, and see what happens from there.

Once again, I don't want to compromise any procedures that are already in place, so will just play it by ear.

Thanks for the response.

I will be in the radio room tomorrow. I will put a label on that jack.
I am also planning on hoisting that monster of a dipole with the
feedline attached to see if the rope I have up there will hold that darn
thing. Just a test and not an actual deployment. If the rope breaks so
be it.

If the rope I will climb to replace it- We should think about bolting down the radios to the table so they don't sprout legs and walk away as has happened in the past-

Tom N8DGD, perhaps Steven and myself will look at the set up to see if it flows well then we can secure them.

Still think we need removable partitions for the operating positions for sound deadening-

Overall, I am pleased with all the work to get the radio room back into shape! JB

If the rope I will climb to replace it- We should think about bolting down the radios to the table so they don't sprout legs and walk away as has happened in the past-

Tom N8DGD, perhaps Steven and myself will look at the set up to see if it flows well then we can secure them.

Still think we need removable partitions for the operating positions for sound deadening-

Overall, I am pleased with all the work to get the radio room back into shape! JB

All,

I am not sure which radios you are referring to that need to be bolted down. I know that most of the "mobile" radios in the station especially in the Red Cross section need to be bolted down but I noticed that most of the screws for mounting the brackets to the radios are missing. We can bolt down those radios with screws with not so common heads.

Until we decide to put a proper ceiling (lower) in that room, installing partitions will not dampen the sound all that much. We need to cover the walls first and get rid of the hard surfaces that reflect the sound. Headphones and not allowing any conversation in that room will contribute a great deal to making that room fun to operate.

My focus now...

1. Getting the offset dipole off the tower to make room for the new dipole for the FT-920 station. We can re-purpose the offset dipole.

2. Getting 3 new ground rods with proper size wire and thermal welding to re-ground the tower.

3. Replacing the feedline on the GAP vertical antenna. I want to use this antenna on the Ft-2000 station.

4. Install the 160/80/40 dipole for the FT-920 station.

My main concern is that with all the changes and additions I have made to the radio room, I am thinking very few members will even bother to use any of it.

I also think the security of the room is not as severe as some people think it is.

Finally a personal note to Dave, AC8AB. Typing a email in caps is interpreted as being yelled at someone.

I do not like being yelled at.

At a minimum, the mobile radios clustered where the Red Cross radio is need to be bolted down as you suggested with uncommon threads as we have lost mobile radios like these before.

I am thinking that the Red Cross HF Icom MKIIG needs to be moved from where it is to a separate location isolating it from the VHF radios and allowing for the Pactor modem to be hooked up and allowing for a computer to be used for digital applications

No rush on this as I can do this later.

As for deadening the room , what ever measures that e can take would be good- Previous exercises indicated way too much noise pollution from multi operators talking at the same time.

Perhaps the first exercise we can do from there is the ARRL SET on Sept. 30 I think it is- That would give a first good test of the range of the new VHF antenna systems on the short tower and test the digital stuff too-

Joe,
It is not my business but thought I would suggest what we did at an old club station that was for "public access".
We installed little angle brackets with a hole in them and passed an aircraft steel cable through them with a lock. Nothing is theft proof, but it would delay an attempt.
Most radio cabinets are metal and brackets are easy to weld on with wire welders now.
Just a thought.

Joe,

One of the features of the new desk is that it can be configured any way we see fit. I have no problem changing it to make our efforts easier.

I have no experience in that radio room of any multi operator operations just the loud din of casual conversation which I found rather annoying (not the topics just the loudness of it all).

I can already see that we can move some things off the desk and that should free up some space.

We need soft surfaces in there to deaden the sound. Wall hangings, furniture etc.

Let me know when you are going there and I will meet you.

> The Mud Run is complete and now it is time to get ready for the last event of the year. The Tour de Cure is September 30. This is the second year for the event. This year the Start/Finish line will be in Millennium park. There are 4 courses this year 3 are street courses and the last is an off road course. There are 4 aid stations. We are looking for people to work the aid stations, SAG vans, and bikers patrol the courses. The first race starts and 6:30 AM and the last race is estimated to be done at 2 PM. Volunteer start and end times would be determined by where they are stationed. Below are links to sign up for the event, event information, and the course maps. This event supports the Diabetes Association. This is a great cause, we all know someone who has been affected by Diabetes. This is an opportunity to support the organization while enjoying your hobby of ham radio. Please consider signing up to help. Also, please pass this request on to other radio operators/clubs.

Good ideas all of them!

Well you haven't lived until you experience a live exercise in there with several operators on different bands passing traffic !

I am thinking we might operate the ARRL SET from there on Sept30th. Might be a good idea to attend if you can-

We can do some work in the room this Sat if you are available to get ready for SET??

JB

Hi,
I hope it´s ok to post this here. If not, I apologize and [Mr. moderator] please remove it.

Any scooter/moped owners here interested in enjoying ham radio combined with scooterism?

I'm hoping it's not only me.

This is NOT [necessarily] about operating while in motion. Everyone knows better. But I'm sure there are many safe and fun ways to combine both hobbies.

Scooter season is almost over here in Michigan, but I'm confident that it's still possible to do something fun before the snow arrives.

If interested, please visit and join
https://www.facebook.com/groups/West.Michigan.Ham.Radio.Scooterists/

Thanks!

Interesting point!
I guess it'll be one of the things that we could discuss, and those that actually transmit (or want to) while driving/riding, can offer and take suggestions, share their experiences, etc.

The thing I'd like to understand, is how, out of a chunk of digitized apparently random data (representing some section of spectrum), that frequency and phase information can be extracted, without previously knowing anything about the frequency or phase; then turn that into "I" and "Q" data. And somehow, this all happens within a cheap mass-produced IC. [From there on, it's just more or less fancy mathematics.] I've yet to hear or find a good explanation of this.

On transmit, the frequency and phase info is known 'a priori', so those factors are not an issue.

I really like my Flex 5000A, but would like to better understand how it all works. And, I've played with the $15 USB dongle SDR as well (mixed results there - very suceptible to strong out-of-band or in-band signals).

Hello, today I received the following email from the building custodian:
Just to let you know and if you would pass it along to the rest of the radio people please, NO One will be able to enter the building AT ALL next weekend…starting Sat. Nov 4th EARLY A.M. There will be no access to building. We will be striping and waxing the floors and one of the floors is the back entry and no one can walk on it til Monday after Nov 5th…so will you pass the word? I will post it on the building as well.
Any questions? Give me a shout.
THANKS.

Nancy Long
Maintenance Coordinator

3732. Weekend Operations at W8DC

Yahoo group: GRARA
Date: 2017-10-25 18:23:20 UTC
From: Thom
Topic: 3732 Message: 3732

Howdy all,

We will be operating the W8DC club station this weekend (October 28-29 UTC) in the CQ World Wide DX SSB contest.

Operations will be in the Multi-One, unassisted, high power category.

The door to the radio room will be open at 5pm Friday, October 27 for the 7pm local start of the contest.

This contest is open to all club members should you choose to operate all or even an hour of the contest. The back door will be open and I will be in attendance for the entire event. Stop on by if you want to learn about contesting and want to have some fun.

I have 7up, Coke and Dr. Pepper in stock as well as crackers, cookies and microwaveable stuff to snack on all weekend.

Sleeping quarters in the room next door. Bring your sleeping bag.

This is with the full blessings of the Red Cross which has approved our operations.

Remember this club station is YOUR club station and is provided for your enjoyment.

Hope to see you there.

3737. Re: [MITN-MACS] Will the Department of Defense EMP drill shut down power grid?

Yahoo group: GRARA
Date: 2017-11-04 02:24:01 UTC
From: wd8usa@...
Topic: 3737 Message: 3737

That is why in any exercise traffic you send make sure to use the word "Exercise" in the text at the beginning and end of the text.

Saying this is a drill or exercise frequently will help while in communication.

Limit your exchanges to the bare minimum to get your message through- remember others might be waiting to submit their own reports!

Tune in to the broadcasts on 60 mtrs CH1 at 0300Z Sat night and again Sunday morning at 1600Z on 13.483.5 USB and follow the instructions given by the broadcast stations.

Log the time and readability of the received broadcast and submit to usarmymars.org the reception report and they will QSL to you after the exercise- JB

PS Look for Comex 17-4 Reception Report in the left hand column of the navigation page to file your report-

As the old WWII phrase says "Loose Lips Sink Ships"!

3739. Amateur Radio Interoperability test update

Yahoo group: GRARA
Date: 2017-11-04 15:20:12 UTC
From: Hank Greeb
Topic: 3737 Message: 3739

There was a bit of corn fuse ION about the original message, both concerning the time(s) of the broadcasts, and the fact that this was a test, and would NOT shut down the Power Grid and a whole bunche of other stuff. The ARRL put out gnu information on their web site about this at <http://www.arrl.org/news/communications-interoperability-training-with-amateur-radio-community-set>

Which reads, in part:

Communications Interoperability Training with Amateur Radio Community Set

10/24/2017

[UPDATED 3 November 2017 @ 2320 UTC]

From the U.S. Army's Network Enterprise Technology Command (NETCOM): The exercise will simulate a power-outage scenario; it will */not/* impact any public or private communications. There will be no power outages or communication systems outages.

This exercise is designed to improve readiness, build cooperation and public awareness, and better prepare to defend the nation.

To clarify time of broadcast on 60 meters: A military station on the east coast and the Fort Huachuca, Arizona, HF station will conduct a high-power broadcast on 60-meter channel 1 (5330.5 kHz) on *November 5 from 0300 to 0315 UTC (Saturday, November 4, in US time zones)*.

==========

There's an apology someplace from the DOD (really? they make mistooks? I'd NEVER thought that would happen) and/or ARRL (witch is on very, very, very, very few occasions wrong) :-) 8-)

So, if we can figure out when 0300Z is and compare it to our local time, witch may be a stretch for us "mere hamachewer radio ops" and IF we have receivers which will receive Upper Sideband mode on 5330.5 KHz, we MAY be able to hear an Oh Fishy ALL broadcast concerning this event.

The 13 MHz frequency noted in the bulletin will "probably" have wide skip zones if propagation is typical for that time of day. I could be wrong, because I heard and worked Indianapolis last Wednesday on 14 MHz CW with my 5 watt peanut whistle.. This is quite unusual, however....

==========

Please note there's a slight bit of cheek in tongue in the above two paragraphs. This is a REAL drill, designed to see if the Military can work with us Hams during a crisis situation. That the wording of the original announcement stirred up folks at the "legitimate news agencies" like Fox News and a whole bunch of others is regrettable.

So, if at all possible, tune your rigs to 5330.5 KHz Upper Sideband this evening (11:00 p.m. Eastern Daylight Time) and give a report to the officials.

Note, I've been unable to find info on who and how to report participation in this event, so I suspect it will be provided in the broadcast. There is an e-mail address for questions about the event in the above URL, but I'll leave that to the reader if more info is desired.

Communications Interoperability Training with Amateur Radio Community Set

Elements of the US Department of Defense will conduct a "communications interoperability" training exercise November 4-6, once again simulating a "very bad day" scenario. Amateur Radio and MARS organizations will take part.

"This exercise will begin with a notional massive coronal mass ejection event which will impact the national power grid as well as all forms of traditional communication, including landline telephone, cellphone, satellite, and internet connectivity," Army MARS Program Manager Paul English, WD8DBY, explained in an announcement.

During the exercise, a designated DOD Headquarters entity will request county-by-county status reports for the 3,143 US counties and county equivalents, in order to gain situational awareness and to determine the extent of impact of the scenario. Army and Air Force MARS organizations will work in conjunction with the Amateur Radio community, primarily on the 60-meter interoperability channels as well as on HF NVIS frequencies and local VHF and UHF, non-internet linked Amateur Radio repeaters.

Again this year, a military station on the east coast and the Fort Huachuca, Arizona, HF station will conduct a high-power broadcast on 60-meter channel 1 (5,330.5 kHz) on Saturday from 0300 to 0315 UTC. New this year will be an informational broadcast on Sunday, on 13,483.5 kHz USB from 1600 to 1615 UTC. Amateur Radio operators should monitor these broadcasts for more information about the exercise and how they can participate in this communications exercise, English said.

"We want to continue building on the outstanding cooperative working relationship with ARRL and the Amateur Radio community," English said. "We want to expand the use of the 60-meter interop channels between the military and amateur community for emergency communications, and we hope the Amateur Radio community will give us some good feedback on the use of both the 5-MHz interop and the new 13-MHz broadcast channels as a means of information dissemination during a "very bad day" scenario.

Amateur stations may now make county situational reports on 60 mtrs.

Listen to any 60 mtr freq for any military station call sign AAR or AFA prefix to make your report- WD8USA

PS this article is an excellent recap-

Communications Interoperability Training with Amateur Radio Community Set
Elements of the US Department of Defense will conduct a "communications interoperability" training exercise November 4-6, once again simulating a "very bad day" scenario. Amateur Radio and MARS organizations will take part.
"This exercise will begin with a notional massive coronal mass ejection event which will impact the national power grid as well as all forms of traditional communication, including landline telephone, cellphone, satellite, and internet connectivity," Army MARS Program Manager Paul English, WD8DBY, explained in an announcement.
During the exercise, a designated DOD Headquarters entity will request county-by-county status reports for the 3,143 US counties and county equivalents, in order to gain situational awareness and to determine the extent of impact of the scenario. Army and Air Force MARS organizations will work in conjunction with the Amateur Radio community, primarily on the 60-meter interoperability channels as well as on HF NVIS frequencies and local VHF and UHF, non-internet linked Amateur Radio repeaters.
Again this year, a military station on the east coast and the Fort Huachuca, Arizona, HF station will conduct a high-power broadcast on 60-meter channel 1 (5,330.5 kHz) on Saturday from 0300 to 0315 UTC. New this year will be an informational broadcast on Sunday, on 13,483.5 kHz USB from 1600 to 1615 UTC. Amateur Radio operators should monitor these broadcasts for more information about the exercise and how they can participate in this communications exercise, English said.
"We want to continue building on the outstanding cooperative working relationship with ARRL and the Amateur Radio community," English said. "We want to expand the use of the 60-meter interop channels between the military and amateur community for emergency communications, and we hope the Amateur Radio community will give us some good feedback on the use of both the 5-MHz interop and the new 13-MHz broadcast channels as a means of information dissemination during a "very bad day" scenario.

Was this 0300Z Saturday, or will it be 0300Z Sunday (Saturday evening local)? I can't find the original message which i received via a different source.

0300Z Saturday has gone, 1600Z Sunday (11 am Sunday EST) I'll not be home.

I CAN receive 60 meters, haven't tried transmitting there, but my KX2 is capable.

From: Hank Greeb
Topic: 3737 Message: 3744

Interesting exercise. The military wanted to know of the condition of the infrastructure in all the counties in the United States. We had a local power outage, but the net control never asked for localities with problems. And my 10 watt KX2 running on battery power could NOT be heard on either the 5330.5 KHz frequency for for NE US or the 5403.5 KHz frequency for Central US. I stayed mainly on the NE channel, because the NCS was most easily copied.

If they really want info from all counties, I'd say we should use ham radio nets to collect data from all locations, and prioritize those with problems such as power outage we had in Rockford for about 2 hours.

And, if the MARS folks need a similar exercise, let them duplicate our ham radio effort. Redundancy does not hurt in such an exercise.

It was an interesting exercise, for sure. Remember, there's another broadcast today November 5, at 1600Z on 13483.5 KHz USB. We hams can't use that frequency, don't know if MARS stations can use it.

72/73 de n8xx Hg
QRP >99.44% of the time

p.s. I'm fairly certain that with CW and 10 watts on a 5 MHz channel I could have been readable in most parts of NE US. Typically W2LJ from New Jersey checks into the Michigan QRP Club net on thursdays at 0100Z when Daylight time is in effect and 0200Z the standard time is in effect. It's on 3535 KHz 80 meters, so coverage should be similar on 5303.5 KHz.

What the Military wants is reports from stations that just pop up out of the blue as this is the most thing likely to happen in a major incident- The MARS station knows what to ask for and will format the correct messages for sending on military circuits for long haul delivery to the appropriate receiver of this traffic.

The vast majority of reporting Ham stations it is assumed will have no knowledge of NTS or ARES and have no knowledge of the proper formatting of messages. They just know something bad has happened and want more info and can be valuable sources of first indications of the nature of the disaster and what services are interrupted.

For the purposes of the exercise, it is assumed all is normal as this is just a drill only.

Hank, If your power problem effected your county, that situation is different and would be reported as an actual incident- You would indicate that when in contact with the military station- Volunteer the information up front!

The Fort plans more of these , At least four a year-

The broadcasts last night were a great success- reception was good from both ends of the country here at this station- JB

Starting January 3, 2018

Extra Class Upgrade Class

If you are a general and would like to upgrade to the extra class, you might consider this extra license class this winter, presented as a cooperative effort by the Grand Rapids Amateur Radio Association and the Holland Amateur Radio Club.

The classes will meet at 7:00 PM on Wednesday nights in the basement of the Red Cross building, 1030 Fuller, Grand Rapids, starting on January 3, 2018, and will run for 10 weeks. The cost is $20.

More information and online registration is available at:
http://tinyurl.com/extra-k8tb

For further questions, contact the instructor, Tom Bosscher, K8TB at 616-662-1080 or by email to k8tb@....

*

ARRL SWEEPSTAKES PHONE
*2100Z November 18 to 0300Z November 20
4 pm EST Nov 18 to 10 pm EST Nov 19

W8DC will open about 3 p.m. Nov 18 to get set up for operation
1 transmitter, multi operator low power

WE NEED VOLUNTEERS!
You do NOT need to be a contest operator
You only need to have a desire to learn and help with the effort!

We have the following operators signed up so far
*
Name
Call
Dustin Olsen
KD8PUZ
Greg Stoike
KN4CK
Thom Durfee
KI8W
Tom Hansen
N8DGD
Rob Schroeder
KD8VHV

*
PLEASE ADVISE Greg, KN4CK, on air director,
mailto:onair.director@... of your availability
Join the fun! Enjoy the Camaraderie!

*
Author: Hank Greeb, N8XX
retiring on air Director, Thanks Greg for volunteering!

3749. Field day results

Yahoo group: GRARA
Date: 2017-11-11 14:22:59 UTC
From: Hank Greeb
Topic: 3749 Message: 3749

ARRL Field Day results are on the web. This means the December issue of
QST is about to be released!

Yup, W8DC did fine! We managed almost 5000 points, and placed 4th in
Category 3A in Michigan Section, and 8th in the Great Lakes Division!
The following table is from:
<http://www.arrl.org/results-database?fd_category=3A&fd_power=2&fd_sect=MI&ss_call=&sort0=
fd_score+desc&sort1=&sort2=&event_id=91339>

From the above web site it's possible to select various ways to present
these data.

Call *Score* *Category* *GOTA Call* *Section* *Participants*
Club
1 W8UM 7,658 3A W8RP MI 75 ARROW/UMarc
2 N8SL 5,826 3A K8ERS MI 30 South Lyon Area ARC
3 W8LRC 5,718 3A KD8RXD MI 25 Lowell ARC
4 W8DC 4,996 3A MI 30 Grand Rapids ARA

Congratulation to all who helped with this effort. It's better than
many of our former efforts!

But, please note, Field Day is NOT a contest in the usual manner. It is
primarily an exercise in setting up and operating a station in a remote
site, typically after a communications disaster, such as a flood,
tornado, or other Natural Disasters. So, please consider joining this
effort next year, even if you've never participated in a 'contest'.   In
an emergency all hands are needed!

Hank,

Glad you found that info. It can be a real pain scanning all that fine
print in QST trying to find a clubs effort.

No, it's not actually a contest but it can be a great training item for
new people who want to start contesting.

I thought we actually used Greg's call KN4CK as the GOTA callsign.
Maybe not.

3753. GRARA November 10 VE session, 3 for 3

Yahoo group: GRARA
Date: 2017-11-11 19:50:44 UTC
From: Tom
Topic: 3753 Message: 3753

Last night was a good night for three West Michigan amateur radio operators.

First up is congratulations to Fred Long, KE8HPH, from Caledonia. Fred was just licensed as a tech in August, then passed his general in September, and went on to pass his extra last night.

Then we have Richard Ed, KD8UZZ, from Grand Rapids, who just passed his general last month, and came back and took and passed his extra last night.

And we need to congratulate Ken Kaminski, KD8GJN, from Wyoming, Michigan who passed his general.

If you hear or see any of these three gentlemen, congratulate them on their achievements.

And a special thank you to the GRARA VE team, headed up by Stephen, AC8QE

Reminder, there will be an Extra class class started at the Grand Rapids Red Cross on January 3, 2018. More information at: *http://tinyurl.com/extra-k8tb*

SKYWARN Recognition Day is Saturday, December 2

A heads up: SKYWARN <http://www.skywarn.org/>™ Recognition Day (SRD) will take place this year on Saturday, December 2 from 0000 until 2400 UTC (starts on the evening of Friday, December 1, in US time zones).

During the SKYWARN special event, ham radio operators will set up stations at National Weather Service (NWS) offices and contact other radio amateurs around the world. Participating Amateur Radio stations will exchange a brief description of their current weather with as many NWS-based stations as possible on 80, 40, 20, 15, 10, 6, and 2 meters plus 70 centimeters. Contacts via repeaters are permitted.

SRD was developed jointly in 1999 by the NWS and ARRL to celebrate the contributions SKYWARN volunteers make to the NWS mission -- the protection of life and property. Amateur Radio operators, which comprise a large percentage of SKYWARN volunteers, also provide vital communication between the NWS and emergency managers, if normal communications become inoperative.

I do SkyWarn. But unfortunately I have personal conflicts around this event this year and won't be able to participate; SkyWarn brought me into Ham Radio (I am a weather nut). Just hoping some of the club will be interested in participating.

*Message for KF8QL at the yahoo address listed on QRZ.com bounced.

I have a question about the 4 corner Grid Square between EN72, EN73, EN62, EN63

If Dave, or anyone else who is knowledgeable of this corner receives this, please respond via a private e-mail.

From Levine Central it appears to be within Bass River State Recreation Area, and "probably" less than 1/4 mile off a road. However, I've never been to that part of Bass River SRA, so I'm not sure of the topography.

Thanks es

Kreigh:

It’s funny you should ask.

I currently am in contact with Jeff Nawrot (Kent County’s EC/RO) about trying to put something together for Skywarn Recognition Day.

I don’t know if we’ll be able to pull anything off at this late stage of the game, but I’m willing to see what we can do, with the idea that some sort of snmall operation is better than nothing at all.

I’ll keep you and everyone posted.

I coordinated Mecosta County’s Skywarn Recognition Day effort for a number of years when I lived up in Big Rapids, and was Mecosta County EC/RO. I was quite surprised when I moved down to Kent County that nothing seemes to have been happening with regard to the vent.

On a final note, it looks like you and I need to talk at some point, since I’m an incurable weather enthusiast myself.

Anyone interested in Skywarn Recognition Day might ask WX8BOB. He was promoting SKYWARN and all sorts of other ham radio activities at our Public Info Booth during Field Day. If anyone know, he should know who is making plans to activate the local WX Bureau.

The weather bureau has been activated in the past. I went down there a few years ago and made a few contacts, but don't recall who was organizing the effort then.

As an update, I just got word from the Warning Coordination Meteorologist at the Grand Rapids NWS office that Allegan County is heading up the Skywarn Recognition Day effort this year for that office.

I've asked for the contact info for who is heading things up, and will send more details as I get them.

Thanks for Jim’s contact info, Mike.

I’ll pass this info along.

I have been given an eventbgrite signup link, but from what my XYL and I can tell, there is no way to know which time slots have already been taken.

Eventbrite also creates issues for my Jaws speech screen reading software, so may have to try an alternate way.

Thanks again for the info.

Subject: [GRARA] Just wondering if we are participating in SKYWARN Recognition Day

SKYWARN Recognition Day is Saturday, December 2

A heads up: SKYWARN™ Recognition Day (SRD) will take place this year on Saturday, December 2 from 0000 until 2400 UTC (starts on the evening of Friday, December 1, in US time zones).

During the SKYWARN special event, ham radio operators will set up stations at National Weather Service (NWS) offices and contact other radio amateurs around the world. Participating Amateur Radio stations will exchange a brief description of their current weather with as many NWS-based stations as possible on 80, 40, 20, 15, 10, 6, and 2 meters plus 70 centimeters. Contacts via repeaters are permitted.

SRD was developed jointly in 1999 by the NWS and ARRL to celebrate the contributions SKYWARN volunteers make to the NWS mission -- the protection of life and property. Amateur Radio operators, which comprise a large percentage of SKYWARN volunteers, also provide vital communication between the NWS and emergency managers, if normal communications become inoperative.

I do SkyWarn. But unfortunately I have personal conflicts around this event this year and won't be able to participate; SkyWarn brought me into Ham Radio (I am a weather nut). Just hoping some of the club will be interested in participating.

I thought this week would be the right time to say "Thank You", to Phil W8IPN and Thom KI8W, for all their past contributions to the GRARA Club. While I don't often visit the Radio room, I've heard nothing but great praise for the new look and thinking that went into organizing the room. My Hat is off to you, since I still can't wire an N-connector.

Thom has put in a lot of work in maintaining the web site. No simple task! That's a lot of work. He doesn't complain, just gets it done.

I also want to thank Phil for all the Extraordinary effort he has put into maintaining and made hearing Treasurer's report fun! Yes, it is a pleasure to hear his reports. His work has helped me start doing a whole club inventory. But I know that it is now manageable to accomplish! Thank you Phil.

Thom is still in his office while Phil has moved on. Speed to both of you.

On this Thanksgiving week, your efforts has made GRARA feel a lot more like a family.

Thank you!

Rich Ranta K8JX and of course, Scooter the cat.

I second it as well.

My XYL and I have seen some really positive developments with GRARA since we joined last January.

And, it's work done by people like Phil and Thom that makes all of that happen.

Joe,

Good afternoon.

I have strong interest in this. I plan on stopping by the address to see it before our monthly meeting tomorrow night.

I have a 1 1/2 acre place off exit 101 of the 131 in what we affectionately refer to as Cedar Rock. I can easily accommodate this tower and antenna.

If you have any more detail about this, please let me know.

Would it be OK to contact Dave Couvreur directly. If not, who should I contact?

Please let me know.

Thank you,
Jim Duffy

Well all I know is this fella is connected with the Kazoo Red Cross who in turn contacted me to see what I could do to get it taken down.

I know from conversations with the gentleman there is a control box and rotor as well in the deal. Looks also like a small 2 mtr antenna as well.
He doesn't want any of this stuff and from what I understand, there is a box (or boxes) of small parts and equipment in the deal.

The owners first name is Dave- His contact number- (616) 481-2525.

Guys, there has been some discussion about the Skywarn Appreciation Day at the Grand Rapids National Weather Service. _This is the day!

_This is an annual event put on by the GRR NWS and hosted by the Allegan Amateur Radio Club. Come on out and get a tour of the NWS and help with the on-air activities.

From Patterson and 44th Street, instead of entering the (GRR) Gerald Ford Airport, go north on Patterson to the next light. Turn right into the road where the NWS and Kent County Road Commission have there facilities. (You cannot miss the weather radar ball.) Go in the front door and go to the conference room on the left to help operate.

Hello, everyone.

Please take W8DER up on his suggestion if you have the time yet today.

My XYL and I just got back from the event, and we were well received.

I did some operating on 20 and 40-meter phone.

40 meters was fairly good earlier this morning, and is likely to pick up again as the afternoon goes on the band lengthens out.

Thanks to the Allegan ARC for taking the initiative in terms of heading up this year's operation.

Cortland is out of the hospital temporarily. He had a setback in the schedule for open heart surgery because of another procedure which involved an aneurysm in a major artery. He will need three or four weeks to recover from that surgery before the doctors will schedule an operation to repair his heart.

In the meantime, I'm sure he'd appreciate a call on his cell phone.

Changes Coming to the Amateur Radio Emergency Service

The Amateur Radio Emergency Service® (ARES) has been the public service communications program of the ARRL since 1935. Over the program’s eight decades it has occasionally undergone updates to make sure it meets the needs of partners at all levels, adjusts to changes in the Amateur Radio Service, and incorporate lessons learned from emergency and disaster activations. However, the last major update to ARES occurred more than 40 years ago, and it is quite clear that a lot has changed since then.
So, two years ago, the ARRL board of directors created the Public Service Enhancement Working Group to study the ARRL’s public service offerings and recommend changes and improvements. The working group focused on many areas including training, volunteer management, field organization positions, and mission – all areas of concern brought to the board and staff’s attention from those in the field. The recommendations were vetted through a peer review group of field organization volunteers and readied for

implementation.
In the months ahead, you will receive information on enhancements coming to the ARES program, including:

A new national mission statement for ARES
New national training requirements and local training resources for ARES
Updated field organization job descriptions
Improved ARES operating guidelines
New ARES group benefits
A new volunteer management system – ARES Connect

The first step in the next evolution of ARES is group identification. Currently there is no way to identify ARES groups or their associated volunteers with a searchable unique designator, which makes reporting and accountability difficult. Beginning January 1, 2018 ARES groups will need to sign up for their unique ARES identification number. This number will be utilized by theARES Connect system and provide ARES groups with unique benefits (think club affiliation, but for ARES!).
Once ARES groups receive their identification numbers they will be eligible for benefits including:

ARES book sets (great for the EOC or Red Cross radio room)
New ham referral
Early access to the annual ARES Report
Email forwarding, which will provide ARES groups that have a club callsign with a uniform "call sign@..."
More to come!

Groups that will need an ARES identification number include local level (city/county/district) and section level. Information about the ARES identification application process will be sent out the week before the application system opens.
If you have any questions, please contact ARRL Emergency Preparedness Manager Mike Corey, KI1U,ki1u@...

Sent: Mon, Dec 18, 2017 8:21 pm
Subject: Updated RRI Publications Page

Hello Everyone:

The Radio Relay International on-line publications page has been updated to provide permanent, direct links for downloading the RRI Training Manual (TR-001) and companion Introductory Training Slides (TR-002):

http://radio-relay.org/about/publications/

One can also find other useful publications under this heading including the RRI Traffic Operations Field Manual FM-001, a variety of fillable radiogram ICS213 message forms and other useful documents.

Please feel free to share this link with your fellow club members, local EMCOMM group volunteers and others who might find these documents useful.

Our best wishes to everyone for a Merry Christmas and Happy New Year!

73,

James Wades (WB8SIW)

3801. Extra Class, reminder

Yahoo group: GRARA
Date: 2017-12-27 01:49:31 UTC
From: Tom
Topic: 3801 Message: 3801

The 2018 Extra class is starting on January 3, 2018. There are only 9 seats left. If you have thought about getting your extra, this would be a good time to join others to study for it.

*Extra Class class
*

Starting January 3, 2018

Extra Class Upgrade Class

If you are a general and would like to upgrade to the extra class, you might consider this extra license class this winter, presented as a cooperative effort by the Grand Rapids Amateur Radio Association and the Holland Amateur Radio Club.

The classes will meet at 7:00 PM on Wednesday nights in the basement of the Red Cross building, 1030 Fuller, Grand Rapids, starting on January 3, 2018, and will run for 10 weeks. The cost is $20.

More information and online registration is available at:
http://tinyurl.com/extra-k8tb

For further questions, contact the instructor, Tom Bosscher, K8TB at 616-662-1080 or by email to k8tb@....

3803. Contests this weekend

Yahoo group: GRARA
Date: 2017-12-29 01:39:01 UTC
From: Hank Greeb
Topic: 1260 Message: 3803

There are two "major" contests this weekend which may be of interest:

Winter RAC Contest
http://wp.rac.ca/rac-canada-winter-contest-rules/

Stew Perry Top Band Challenge
http://www.kkn.net/stew/

For the low power aficionados there's the Original QRP Contest
http://www.qrpcc.de/contestrules/oqrpr.html

These overlap to a degree, and since one doesn't get very far on 160
during the daylight hours, it's certainly possible to enter two, or even
all of these.

And, note that the RAC (Canadian) contest has both CW and SSB
components, so folks who prefer Voice Communications are welcome to try
this contest>

There are others during the weekend, and WA7BNM's contest calendar has
the complete list.

So, Thom, if you will be hanging out on the IRA Link System frequency, feel free to check into the IRA Link System Michigan Noon-time Roundup Net.

You may remember that, with the help of Tom Bosscher (K8TB) and others, I started that net back in April, and it has been a major success.

The net operates Mondays, Wednesdays, and Fridays at noon.

Recently, we have been averaging between 15 and 20 check-ins, with a record of 28 check-ins last Wednesday: December 20th, when I was net control.

I tend to be net control on Wednesdays, with others doing the honors on Mondays and Fridays.

The net is a social net, and we try to have an interesting topic or two, as well as a trivia question for each net session.

Everyone is welcome!!

Date: 2017-12-30 00:54:36 UTC
From: Richard Ranta
Topic: 3807 Message: 3807

It's the end of the year and I thought it was appropriate to give a "Hats" off to an individual who has been a fixture in GRARA for years. Richard Douglas, KC8NKA. He has contributed a lot to the operation of our club , by being a VE leader, showing up snow or rain, or even making trips to Hams who can't leave their house, Rich and the VE team have been there. He has assumed the responsibility for seeing events through in many areas, such as securing the Swap site, to being sure our Post Office Box was taken care of. He also wore many other hats, such as helping support other clubs in deeds or by making financial donations. He also was our treasurer for many years. From getting sandwiches for our Christmas party, to talking another ham into joining our club and becoming our new secretary (Me!).

Richard never asked for any hat's off for all he'd accomplished, over the year. He just does it to help others.

And he has been successful.

73's Richard, may you have many more years with your friends.

Richard Ranta K8JX and of course, Scooter the cat.

Grara secretary . (he and Tom H and David D. talked me into it)

3810. INTERNATIONAL GRID SQUARE CHASE 2018

Yahoo group: GRARA
Date: 2017-12-30 18:32:49 UTC
From: Hank Greeb
Topic: 3810 Message: 3810
Attachments: 1 described; binary payloads are missing from this source WARC

SEE: http://www.arrl.org/international-grid-chase-2018 for more details

This is a "non-contest Contest" somewhat akin to the National Parks on the Air (NPOTA) of 2016, but by default, everyone is in one grid square. If you don't know your grid square, see the details in the above link. Most of us in this area are in either EN72 or EN73 gtid squae, whilst the folks over in Holland and parts of Michigan along the West coast of the state are in EN63 or EN62.

They say there are thousands of Grid Squares. And, there's a "competition" for each month, and overall for the year. In actuality, if I read the rules correctly, ALL the contacts one makes qualify for "points" but only 1 multiplier per grid square per mode.

I'll be on at midnight (0000Z) Monday for the straight key night, and presume any and all contact I make will count for Grid Squares also.

Should we have a "Spouth Western Michigan Grid Square Challenge" as well, like we sometimes have for Field Day?

I'll leave counting ballots on that question up to someone else. Lettuce discuss this possibiity at local club meetings. We have a year to decide.

72/73 de n8xx Hg
QRP >99.44% of the time

p.s. Happy Gnu Yaer to one and awl! May 2018 be fruitful and exciting. Good DX to awl

“They say there are thousands of Grid Squares”.

There are 32,400 grid squares.

Been on the air for 30 days here in FL using FT8 and a “stealth” wire hung from my 12 foot surf fishing rod. Although during December I worked and confirmed all 50 states, plus 73 countries; this represents less than 0.85% of the grid squares! Digital is a great way to work grid squares. Even big guns are getting on FT8. My Alaska contact was with WL7J who has many big awards including the first ham to work and confirm every country on earth. Worked other guns such as K8TB and K8JH!☐
Happy New Year everyone!

Rich,

Thank you for being a club member who has been consistent in your activities with and for the club over the years. The club (W8DC) will have continued success with others serving as your example has displayed.

Thanks to all of you that have helped make W8DC successful over the years. I was inspired myself to be more involved after the recent elections in 2017.

To a “Great” upcoming year (2018)! Happy Holidays and a Happy New Year to W8DC and each club member. Let each of us try to serve in some way in 2018 and the club will see and experience more success.

Happy New Year

Coming events:
HARC Annual Board Meeting
Extra class upgrade instruction class
GRARA Annual holiday party
MARA monthly meeting
HARC Holiday Dinner
LARC monthly meeting
HARC E.A.T. meeting (Education And Training)
WM Hams Get Outta the Cabin Dinner
HIAD (Ham in a Day)
Friday Lunch Bunch

The Holland Amateur Radio Club will hold its annual board meeting at
6:00 p.m. TONIGHT, Tuesday, January 2, 2018. The meeting will be held
at the Burger King located at 735 Michigan Avenue (between 30th and
31st Streets) in Holland. All are invited to attend.

THERE'S STILL TIME!!!
Extra Class class starting Wednesday nights, January 3, 7:00 PM, for
ten weeks. The last
class will be Wednesday, March 7 and will be followed by a testing
session on Friday,
March 9. Please note that this is not an electronic theory class. The
sole purpose of
this class is for you to pass the FCC extra class license exam.
Instructor Tom Boscher
K8TB, held at the American Red Cross building on Fuller Ave, GR. Cost
will be $20 More
info, contact information, and registration at http://tinyurl.com/extra-k8tb

Annual GRARA Holiday Party Potluck and monthly meeting, Friday, January
5, 7PM. Door
opens at 6:30PM. Grand Rapids Amateur Radio Association provides meat
and beverages.
Bring a dish to pass. All are welcome. Contact Tom Hansen N8DGD
n8dgd@....
Talk-in 147.26+(94.8Hz).
Location: American Red Cross building, 1050 Fuller Ave NE, GR between
the I-196 Ford Fwy
and Leonard St. Same location as the GRARA shack.
Directions: http://w8dc.org/pages/Red%20Cross.html

Michigan Amateur Radio Alliance monthly meeting, Wednesday, January 10,
7:30 PM, at

Plainfield Township Fire Department Training Center, SW corner of 5 Mile Rd and
Plainfield Ave. All are welcome. Talk-in W8USA 145.23-(94.8Hz)
https://w8usa.org/interact/meetings/

You□re invited! Holland Amateur Radio Club will be holding a holiday dinner on Monday, January 15, 2018. All hams, family, and friends are invited to meet at the Golden Corral, 12420 Felch Street, Holland. We□ll get together at 6:00 p.m. in the meeting room of the restaurant for food and fun. No reservations are needed □ just show up and pay at the register as you usually would. Seniors, don□t forget to ask for a discount!

Lowell Amateur Radio Club monthly meeting, Thursday, January 18, 6:30 PM social, 7PM
meeting. All are welcome. Pizza provided. Talk-in W8LRC 145.27-(94.8Hz)
http://www.w8lrc.org
Directions: https://goo.gl/maps/9e7G2FVkriJ2

The next Holland ARC E.A.T. meeting (Education And Training) will be Monday, January 22, 7 pm at the VictoryPoint Ministries Youth Building. The club has bought a series of instructional electronics videos which are around 30 minutes long. Right now, we are viewing one of these videos, and then Jeff, KD8THX is showing us more advanced technology.

23rd Annual WM Hams Get Outta the Cabin Dinner (formerly called New Hams Dinner),
Saturday, February 3, 2PM, Pizza Ranch, 3858 28th St SE (Hwy M-11), Kentwood. Sponsored
by MARA, GRARA, LARC, and HARC. Lots more information / flier:
http://w8dc.org/file/club/GetOuttaTheCabinDinner2018.pdf
http://w8lrc.org/wp-content/uploads/GetOuttaTheCabinDinner2018.pdf

HIAD (Ham in a Day) classes, Saturday, February 10 in Lowell, Saturday, April 14 in Holland.
http://w8lrc.org/hiad-registration/
Then again in Holland Saturday, April 14 http://tinyurl.com/holo-hiad-ve

Every Friday, Lunch Bunch at Noble Restaurant in Wyoming.
https://eatnoble.com/
Gather in the back room starting about 11:30. This gathering of hams is sponsored by NOBODY! It's just some hams that get together for lunch on Fridays, and there is always room for you.

If I missed something or there is something coming up of interest to the WM Ham community, let me know.

3823. FW: [N3FJP_Software] ARRL Grid Chase Interface Questions Answered.

Yahoo group: GRARA
Date: 2018-01-03 22:13:48 UTC
From: Tom Behler
Topic: 3823 Message: 3823

FYI if you use the N3FJP A C Log program from Tom Behler: KB8TYJ

From: N3FJP_Software@yahoogroups.com [mailto:N3FJP_Software@yahoogroups.com] On Behalf Of Scott & Kimberly Davis SNKDavis@... [N3FJP_Software]
Sent: Wednesday, January 03, 2018 3:44 PM

Question: Can I use Amateur Contact Log for ARRL's International Grid Chase 2018 event?

Yes! Like the ARRL's Centennial QSO Party in 2014 and the National Parks on the Air (NPOTA) event in 2016, scoring for ARRL's International Grid Chase is handled by ARRL's Log Book of the World (LoTW). Amateur Contact Log worked just fine for the ARRL Centennial QSO Party, NPOTA and it will be fine for ARRL's International Grid Chase in 2018 too. Grid Chase scoring is handled by upload to LoTW and Amateur Contact Log has all the features you need for that.

To keep your Grid Chase score updated, you only have to upload your Grid Chase QSOs to LoTW, just as you would any other QSO record. You don't even have to log the grid! LoTW will determine and confirm the grids you work based on the LoTW records of the stations that confirm on LoTW. You can see the Grid Chase leader board here: https://igc.arrl.org/leader-board.php

It isn't necessary to track the grids you work in AC Log since LoTW is performing that function, but you can always display the grid field to do that too if you like. To display and customize the location of the grid field, click Settings > Edit Fields Displayed. To see your AC Log grid total, just click Awards > 10-10, Grids, Etc., enter the starting record for the time period of interest, enter an L in the Confirmed By field (to only return QSOs confirmed by LoTW) and then click calculate.

Complete details on the ARRL Grid Chase are here: http://www.arrl.org/international-grid-chase-2018

Step by step instructions for using AC Log with LoTW are here: http://www.n3fjp.com/lotwhelp.html

If you wish to display your grid field on AC Log's main form, details on customizing AC Log are here: http://www.n3fjp.com/faq.html#q79

In summary, to participate, just make as many QSOs as you can! No specific exchange is required and contest contacts count too. For example, we have a great opportunity to collect a lot of grids in ARRL RTTY Roundup this weekend (http://www.arrl.org/rtty-roundup). Then upload your QSOs to LoTW!

3824. Contests this weekend

There's an interesting QRP contest of which I've just discovered. It's run by the Italian QRP Club, IQRP, and involves three weeks in each of selected months. Details may be found at;
http://www.arimontebelluna.it/news/news_maratona_uk.htm

Other contests are:

PODXS 070 Club PSKFest: 0000Z-2400Z, Jan 6
PSK-31, a natural for 5 watts or less though there are other categoriesHank Greeb <n8xx@...>
Rules at
http://www.podxs070.com/o7o-club-sponsored-contests/pskfest

Other contests of interest may be:
Slovenia Peace Messenger Contest
There's little on the web site for this, so perhaps one can find more at the 7 day calendar by WA7BNM at
http://www.podxs070.com/o7o-club-sponsored-contests/pskfest

The other major contest is the ARRL's RTTY Roundup, 1800 UTC Saturday, January 6, to 2400 UTC Sunday January 7. Details at
http://www.arrl.org/rtty-roundup

Happy contesting to all

Probably a usual plea for blood donations at this time of year, and definitely NOT eggzactly related to ham radio, so pardon the bandwidth.Blood supply is typically short at this time of year, and many hams support public interest activities, so I'm forwarding this message to this reflector.

Please note that there are local blood drives in the area, so one usually doesn't have to drive to downtown Grand Rapids for a donation.

So, i you're able to give blood, please consider doing so. Tis a worthwhile endavor.

Subject: Urgent Need for Blood Donations Launches Today: How You Can Help
Date: Mon, 08 Jan 2018 20:17:25 +0000 (UTC)
From: American Red Cross <noreply@...>
Reply-To: American Red Cross <noreply@...>
To:

The following message is from Gail McGovern, President and CEO:

I hope everyone had a wonderful holiday with family and friends, and enjoyed some well-deserved rest and relaxation over the past few weeks. As we start the new year, we unfortunately face a difficult time for our blood collections during the challenging winter months.

Today, the American Red Cross launches an urgent appeal for blood and platelet donations nationwide to help address a winter blood donation shortage. Red Cross blood products are currently being distributed to hospitals as fast as donations come in, and in particular – platelet and type O negative and B negative blood donations are critically needed right now.

Winter weather can have a tremendous impact on the blood supply this time of year, when brutally cold temperatures keep many donors home and snow and ice storms often result in the cancellation of blood drives. Blood donations during the busy holiday and winter weather months of November and December were already more than 28,000 donations below expectations.

Red Cross volunteers can help make a difference this winter. We would like to encourage eligible donors to make an appointment today – just download the Blood Donor App, visit redcrossblood.org or call 1-800-RED

CROSS (1-800-733-2767). To reduce possible wait times at blood donation sites, we urge everyone to schedule an appointment and complete their RapidPass – now available on your mobile device.

In closing, I want to express my heartfelt thanks to all staff who make our lifesaving work possible for patients who are counting on us. I know appeals are especially demanding for our employees who often work long hours to recruit, collect, process, and distribute blood and platelets. Particularly this time of year, many staff members bundle up and trudge out in the snowy weather and frigid temperatures to ensure we can meet the needs of our hospital partners.

I am profoundly grateful for all of you – from those who roll up a sleeve to give, to those who work tirelessly day-in and day-out to meet patient needs. Together, we will continue to fulfill our mission in communities across the country. Thank you for your steadfast dedication and unwavering commitment.

Sincerely,

Gail

Hank and all:

I will be participating in the NAQP CW contest this week-end. … I will be part of a team of blind ops from across the country. We will be using Braille as our team name.

Hope to work some of you on the bands.

40 and 80 meters will be the best for any local contacts.

QCEN and OH-KY-IN Present 2018 Winter Field Day!!!

Hello Winter Field Day enthusiasts!

Despite all of the rumors that we aren?t going to participate in the Winter Field Day event we have been given a second life! Due to an unreasonable price hike from the Hamilton County Park District we were going to have cancel the event this year.? Fortunately for us QCEN stepped in and offered their facility for both clubs to havea joint field day operation at their radio room on the American Red Cross campus.

So no worries about freezing this year we will be in a nice cozy building.? Like in previous years we will be serving lunch and dinner on Saturday for the operators that come out to work.? On Sunday we will have Doughnuts for breakfast from ?Stan the Man? Doughnut shop ? Stan was voted 2017 Best Bakery in the North!

Location: American Red Cross Building

Address: 2111 Dana Ave.? Cincinnati, OH 45207

Date: January 27 and 28, 2018

Time: Lunch at 12 noon on 1/27/18

Contest Time: Saturday 1/27 at 2 PM through Sunday 1/28 ? 2 PM

**

As many know me, I am not a big sign-up sheet man!? We are all amateur radio operators that love our hobby and love promoting it.? All I ask is when someone new walks up while you are working offer them the

opportunity to take the Mike.? This plan has worked great for the last two years and that way no one feels like they are locked in and can?t getup and take a break!

This year we will form a committee to find an outdoor spot for the 2019 Winter Field Day but in the mean time I hope that you come join us at the Red Cross building for this joint club event!? If I can ask one favor even if you think that you might come please shoot me an e-mail so that we have plenty food available.? My contact information is listedbelow!

Thanks and hope to see you there!

73,

Michael L. Sien ? KD8SOH

2018 Winter Field Day Coordinator

3833. Fwd: Jim Weaver K8JE SK

Yahoo group: GRARA
Date: 2018-01-16 01:03:35 UTC
From: Jack Amelar
Topic: 3833 Message: 3833

-------- Beginning of forwarded message --------
15.01.2018, 18:28, "ARRL Members Only Web site" <memberlist@www.arrl.org>:

With a heavy heart, we must report that Jim Weaver, K8JE, former Great Lakes Division Director, died January 14th. He had been ill for some time, but was able to attend the Great Lakes Division Convention this past October, where he was presented with the George S. Wilson III W4OYI Lifetime Achievement Award. The criteria says in part “The Wilson recipient is an all-around Amateur whose lifetime activities, attitudes, and achievements might serve as an example to others. Emphasis is placed on service to others rather than self, diversity of Amateur Radio interests and Activities, evidence of continuing self-challenge via Amateur Radio, and outstanding contributions to Amateur Radio.” Jim was a Life Member of ARRL.

Jim served as Director of the Great Lakes Division from 2002 until 2014. During that time, he chaired the Legislative Action Committee starting in 2007, and served on the CEO Selection Criteria Committee in 2013 & 2014.

He served as a Public Information Officer starting in 1996, was an Official Observer, an Official Emergency Station, an Official Relay Station, and was also a Volunteer Examiner.

Jim was active in Disaster Communications, and worked closely with the Red Cross in Cincinnati. A long-time member of the Queen City Emergency Net, he was Communications Manager for the club in 1968, and then served as President in 1976. He was also active in many other clubs in the Cincinnati area.

During the 1960s and 1970s, for most of ten years, he wrote a weekly column for the local newspaper, the Cincinnati Enquirer, titled “Ham Call.” Week after week, he found stories about ham radio that would interest the public at large. Just recently, QST re-published an article he co-authored for that magazine back in 1976, about the ham response to the Beverly Hills Supper Club Fire in Northern Kentucky.

At this time, no information about funeral arrangements is available.

Blood donations dropped significantly during this past holiday season. And now severe winter weather has caused an urgent problem: far fewer blood donations. While there's often a surge in generous donations when major disasters receive media attention, the Red Cross serves hospitals and cancer treatment centers nationwide throughout the year.

When trauma occurs, we must be ready to help the injured. When accidents happen at work, school or on the roadways we must be fully equipped to assist the survivors.

Patients need your help right now.

Share your strength. One pint of blood can help save up to three lives! Patients will be so grateful – and so will their families and friends.

All I can say is "Goodbye to you."

He kinda rubbed me the wrong way when I was talking to him, at Xenia last year, in a very calm manner, about some things I would like to see changed.

Not to mention his role in the vote coming tomorrow to basically making our elected Director shut his mouth about what the ARRL is doing. Adding the President and 3 Vice Presidents to the Board effectively skewing any vote by the Board in the ARRL's favor.

Example: The ARRL can cancel any members membership without cause or explanation.

Directors Code of Conduct document.

Basically they are taking the power away from the Membership.

It's all on the QRZ.com website.

KB8TYJ and I both did the SSB North American QSO party - NAQP - on Saturday/Sunday. I'll let Tom tell his tale. All I'll say about the event is that I have another reason to LOVE CW. I did manage 20 contacts for 400 points, mainly on 40, with 75 next and 1 on 20 meters. Much of the time it was an exercise in hearing others "CQing in my face" when I answered their calls.

Ths other "big" contest was the ARRL VHF contest. Anything shorter than 20 meters seem like the "Daylight" part of "DC to Daylight" for me, but I know a couple of GRARA members who are VHF aficionados. Weather was excellent for this time of year for mobile/portable work...

Lettuce no how things went, if you did anything.

72/73 de n8xx Hg

Hello, all.

With Hank’s encouragement, here is my summary report for the NAQP SSB contest this past week-end.

I also have a summary for my earlier NAQP CW contest effort if anyone would like that as well.

I made a total of 306 qsos, and 97 multipliers, for a total score of 29682. I operated for 9 hours and 18 minutes, and used 100 watts.

This week-end’s contest was very different from the CW contest last week-end.

Conditions on the higher bands were much poorer. I only made 6 qsos on 15 meters, and 2 on 10 meters. I also only made 24 contacts on 20 meters, which is highly unusual for me. 20 meters was very squirrely, and was basically closed down by 2100 Z, or 4 p.m. Eastern time. This caused me to move down to 40 meters much earlier than I had previously. 40 meters also went long early, and I did end up spending a lot of time on the part of 75 meters I could use with my current Alpha Delta DXCC antenna. In fact, I did quite well on 75 meters, even with my antenna limitations. For example, on that band, I was able to work from coast to coast, and even up into Canada. I also worked the Cayman Islands, which was a real thrill.

All and all the contest was another fun one, and I once again enjoyed being part of the Braille team of blind ops. . I did not use Braille as my contest name this time, but used Tom instead. I’m glad I did this, since copying contest exchanges was quite difficult at times.

Here’s my summary report from the 3830 scores web site:

North American QSO Party, SSB - January

Call: KB8TYJ

Operator(s): KB8TYJ

Station: KB8TYJ

Class: Single Op LP

QTH: Grandville, MI

Operating Time (hrs): 9.25

Summary:

Band QSOs Mults

160: 0 0

80: 121 40

40: 153 37

20: 24 15

15: 6 4

10: 2 1

Total: 306 97 Total Score = 29,682

Club:

Team: The Braille Team

Comments:

SOAPBOX: Conditions were much more challenging for the SSB contest than they were for the CW contest the previous week-end. In fact, the higher bands (20, 15, and 10 meters) were in very poor shape. Despite that, the contest was quite fun, and was a very rewarding experience.

Hank,

There have been some discussion about this between Tom N8DGD and myself
regarding if we want to fire up The Red Cross backup generator to use
for Winter Field Day.

Also please remember that this is NOT a ARRL sponsored event.

I have a copy of the WFD Rules in the club station.

Opening the door at 12 Noon on Saturday.

I will not be participating in this event. I have other things
scheduled for the weekend.

Also N1MM does not support this contest.

Thanks

Thom KI8W

Thanks, Thom:

I'm glad plans are underway.

I don't know the rules, but running the BIG generator for more than a test run would be VERY expensive of fuel. It doesn't look like WFD has the same idea as reglar Field day, where a "Emergency Operating Center" need only to have non=commercial power available. Back in Cincinnati we'd fire up the generator for half hour or so to exercise it, but not for the full time.

72/73 de n8xx Hf
QRP >99.44% of the time

p.s. I probably won't be able to come to WFD. I've been seeing Cortland, KA5S at Meijer Heart Center where he is recovering from a triple bypass heart surgery.

Seems like a good idea to run the generator for 30 mins. or so, just to exercise it. Should find out if the RedX has some schedule for that already, or not.
Who knows the details and proper usage of the machine?

3846. Cortland Richmond, KA5S

Yahoo group: GRARA
Date: 2018-01-25 02:00:13 UTC
From: Hank Greeb
Topic: 3846 Message: 3846

Happy to report that Cortland Richmond, KA5S has had a successful operation which resulted in 3 bypass grafts on his heart. He is now doing well at the Meijer Heart Center. I won't give a room number, because he may be moving to another as his recovery progresses.

He has his laptop with him, and I'm sure he'd appreciate an email of good wishes for continued speedy recovery. He isn't quite ready to be moved to a rehab center, but one never knows.

He has his cell phone with him, and those of you who know it can calll him during normal waking hours. He may be found through the main number of Meijer Heart Center>

3847. REQUEST FROM WLAV radio engineer

Yahoo group: GRARA
Date: 2018-01-25 03:39:29 UTC
From: stprovost@...
Topic: 3847 Message: 3847

Hello, I received this email request from the wlav radio engineer:

Stephen, Mike,

I am writing to request your members assistance in locating what I believe to be interference to WLAV-FM Studio Transmitter Link microwave system. The WLAV Microwave receiver is located at the WLAV tower site at roughly 5 Mile and Pettis Ave NE and receives a signal from downtown GRR. The receive antenna is highly directional.

WLAV is experiencing what I believe to be generated interference to our microwave receiver operating on 946.5Mhz. This interference occurs at specific times during the day, but on random occasions. So far it has only occurred on weekdays, and only around the hours of 7-8AM and 4-5PM. Never on weekends, holidays, or times outside of what I have described, and not every single weekday.

This leads me to believe the interference is being generated by a mobile transmitter that is operating in the area of 5 Mile NE and Pettis NE, near our receiver. This interference has been occurring for approximately three to four weeks. Perhaps it is someone who regularly travels Pettis or 5 Mile roads.

I believe this be a cell phone jammer or perhaps a problematic mobile radio that is throwing a harmonic or mixed signal on 946.5, but that is pure speculation. I am only guessing it is mobile due to the random nature, yet regular time of day instances to date.

I have set up a spectrum analyzer at the receive site but have not had been able to capture the offending signal when it was actually occurring as it is does not seem to occur for longer than a few minutes at a time. I see several intermittent carriers below 946 in the cellular band, however these signals appear clean and do not affect the WLAV 96.9 Mhz audio when they are up. Although I have not ruled out cellular interference, I feel due to the random nature of the interference, this is not the cause as interference from the nearby site would likely occur more frequently.

If you would be so kind, I ask that you share this information with your members and ask those that may be in a position to monitor 946.5 Mhz be on the lookout for possible sources of interference in the NE area around 5 Mile and Pettis NE. The system is digital, so you won’t be able to de-modulate a listenable signal on 946.5, but for those with spectrum analyzers and or tunable radios, they may hear or see the noise floor or carrier on 946.5 change. The over the air audio on WLAV-FM will also mute or go to broken audio when this occurs. We have also investigated transmitters that may be beyond the WLAV studios, and perhaps “skipping” in. The closest transmitter on that channel is Chicago, and not pointed toward Grand Rapids. Radio STL links are required to use narrow beam width TX antennas.

If anyone should have any information on this issue they may contact me at dave.grant@cumulus.com mailto:dave.grant@cumulus.com, or call my cell phone at 616-304-2468.

I thank you in advance for any assistance your members can provide. This has been a very frustrating issue to resolve, as I am sure you can all relate to.

Dave Grant
Chief Engineer
Cumulus Media Grand Rapids

WLAV-FM

thoughts on this issue?

Topic: 3842 Message: 3848

I wanted to report that the logging program N1MM does support WFD. Greg was able to install, configure and test the logging capability for WFD. There was a custom UDC file that was downloaded and loaded.
There was a second machine configured as well for the possibility of maintaining two stations during the contest. There is the need though for additional operators.

I do not remember Greg's call sign or I would have mentioned above. Sorry Greg!

3850. Re: [GRARA] Winter Field Day? Logging software

Yahoo group: GRARA
Date: 2018-01-25 19:00:55 UTC
From: Wendell Broome
Topic: 3842 Message: 3850

Just FYI:
N3FJP has software tailored to essentially every contest including each state QSO party, VHF contests, and of course, WFD.
Each contest works on top of his AClog which I have working well between my FT8 software and Lotw.
I am passing this info along as it makes sense for a club station to use logging software that operates the same for all contests. Once you learn one, there is little learning curve for the other contests (or just casual contacts).
AClog networks with multiple station locations, so a common log file is used for FD type logging. It scores the contest and prepares the file for log submission.
AClog has a free 45 day trial period costing $25 after that. Each contest is about $9.
However, the suite of all contests and AClog costs just $50 to download ($65 on CD).
Some of you probably have more experience with this software suite than
I, but I know good software when I see it and it seems like a good candidate for a club station. N3FJP.com

3851. Re: [GRARA] Winter Field Day? Logging software

Yahoo group: GRARA
Date: 2018-01-25 20:08:06 UTC
From: Michael Wolthuis
Topic: 3842 Message: 3851

N3FJP is the #1 logging software for contests in my personal opinion.. The author is personally active on contests, updates the software regularly and donates copies to student organizations.

It is well worth buying the entire suite. It is really nice when you can use the network versions and you will find it is so easy compared to N1MM.

My 0.02 as a very happy user of all of N3FJP's logging programs for over 10 years…

3852. RE: [GRARA] Winter Field Day? Logging software

Yahoo group: GRARA
Date: 2018-01-25 20:38:34 UTC
From: Tom Behler
Topic: 3842 Message: 3852
Attachments: 3 described; binary payloads are missing from this source WARC

As some of you already know, I successfully used the N3FJP ARRL Field Day logging software in GRARA's Field Day operation last Summer.

I teamed up with Hank (N8XX) to operate the CW station throughout the event.

I realize that my reasons for using the N3FJP logging software center around its nice integration with my Jaws For Windows speech screen reading software, which is very important for me as a blind ham. But, as is indicated below, the software is quite adaptable with a very simple learning curve from one logging program to another within the N3FJP suite of products.

Unless there is some sort of strenuous objection, I'm hoping to use it again in the GRARA Summer Field Day effort again this year.

Kinda sounds like it *could* be related to operation of the 147.26 repeater transmitter - ? (Not saying how that could happen, just noting the coincidence of times)The repeater is most typically active during commute times. We could test that theory fairly easily.

All,

Another successful contest is in the books.

Band conditions were really bad and that affected our score. The A index was about 6 and the K index was at 3 for most of the weekend.

Operators were...N8DGD, KN4CK, KE8GBI, KD8PVZ, KD8VHV and N8VLZ

Thom KI8W was in attendance most of the period to lend moral and technical support.

Rob, KD8VHV provided a great dinner with a Crockpot of Roast Beef and Veggies. Thanks Rob, it was fantastic.

Here is the summary...All contacts were SSB.

Band	QSO's	Pts	Multi
3.5	126	126	48
7.0	36	36	20
14.0	43	43	29
TOTALS	205	205	92

Score: 615 points.

The Cabrillo log file has been submitted to the contest sponsor and all contacts have been added to our Log4OM logging software.

Our entire logbook in Log4OM has been uploaded to our LOTW account.

Thanks

73

Thom KI8W

Congratulations to everyone for a job well done!

I’m not surprised that 75 meters was your best band, based on what I experienced during the NAQP SSB contest the previous week-end.

I was hoping to do some of the Winter Field Day contest from here at home, but ended up coming down with the crud which pretty much put me out of commission from Thursday until today, Sunday.

At least that’s getting better now.

Wonder if there are any plans for the ARRL International DX CW and SSB contests in mid February and early March, respectively?

Glad to see the radio room is being used.

Tom,

Thanks for the nice words.

Oh, yes there are more contests planned for February. ARRL International is definitely on the calendar.

We had a great time. We hope to get you down there one of these days.

Yep, 75 meters was definitely our best band. You did pretty well in your NAQP effort. We missed that one, sadly.

Anyway I just got up from a 2 hour nap with yet another foot cramp. These damn things are getting more and more frequent.

It's February

Coming events:

GRARA monthly meeting, VE exams
WM Hams Get Outta the Cabin Dinner
HIAD (Ham in a Day)
Traverse City Hamfest
HARC monthly meeting
LARC monthly meeting
MARA monthly meeting
HARC E.A.T. meeting (Education And Training)
SKYWARN spotter annual training
Kalamazoo Hamfest

Grand Rapids Amateur Radio Association (GRARA) monthly meeting, first Friday of the Month, February 2, 7PM. Door opens 6:30 PM. American Red Cross building, 1050 Fuller Ave NE, GR between the I-196 Ford Fwy and Leonard St. Same location as the GRARA shack. Talk-in 147.26+(94.8Hz). Directions: http://w8dc.org/pages/Red Cross.html
VE TESTING at GRARA on the second Friday of the month, February 9, same location.

23rd Annual WM Hams Get Outta the Cabin Dinner (formerly called New Hams Dinner), Saturday, February 3, 2PM, Pizza Ranch, 3858 28th St SE (Hwy M-11), Kentwood. Sponsored by MARA, GRARA, LARC, and HARC. Lots more information / flier:
http://w8dc.org/file/club/GetOuttaTheCabinDinner2018.pdf
http://w8lrc.org/wp-content/uploads/GetOuttaTheCabinDinner2018.pdf

HIAD (Ham in a Day) classes, Saturday, February 10 in Lowell.
http://w8lrc.org/hiad-registration/
Then again in Holland Saturday, April 14 http://tinyurl.com/holo-hiad-ve
Classes begin at 1PM, exam at 6PM. Anyone wanting to just take exams can do so at no cost, but should register.

Hamfest, Traverse City. Saturday, February 10. Sponsor: Cherryland Amateur Radio Club
http://cherrylandarc.com

Holland Amateur Radio Club (HARC) monthly meeting, second Monday of the month, February 12, 7PM. Victory Point Ministries Youth Building, 11530 Ransom St., Holland. The building is located on Ransom, which is just east of 120th, south of New Holland St. and north of Quincy St. Talk-in K8DAA 147.06+(94.8Hz) http://www.hollandarc.org/ Directions: https://goo.gl/maps/BNmMiGCGqeH2

Lowell Amateur Radio Club monthly meeting, third Thursday of the month, February 15, 6:30 PM social, 7PM meeting. All are welcome. Pizza provided. Talk-in W8LRC 145.27-(94.8Hz) http://www.w8lrc.org Directions: https://goo.gl/maps/9e7G2FVkriJ2

Michigan Amateur Radio Alliance monthly meeting, second Wednesday of the month, February 21, 7:30 PM, at Plainfield Township Fire Department Training Center, SW corner of 5 Mile Rd and
Plainfield Ave. Talk-in W8USA 145.23-(94.8Hz) https://w8usa.org/interact/meetings/

The next E.A.T. meeting (Education And Training) will be February 26, 2018 at 7 pm at the VictoryPoint Ministries Youth Building. The club has bought a series of instructional electronics videos which are around 30 minutes long.
HARC E.A.T. sessions are open to the public and you do not need to be a HARC member or have an amateur radio license to attend. If you have questions about amateur radio equipment, operating practices, licensing, test and measurement, or anything remotely related to amateur radio, this is the place to be. http://www.hollandarc.org/?p=3666 Talk-in K8DAA 147.06+(94.8Hz)
SKYWARN spotter training, Ottawa and Kent county Skywarn. Thursday, March 1, doors open 6PM, begins 6:30 PM, Hudsonville High School Eagle Auditorium. Lots more information and sign-up at
https://www.eventbrite.com/e/ottawa-kent-severe-weather-spotter-training-2018-registration-42101467623?aff=mcivte

Kalamazoo “Michigan Crossroads Hamfest”. Saturday, March 17.

Yahoo group: GRARA
Date: 2018-02-01 20:58:49 UTC
From: Hank Greeb
Topic: 3861 Message: 3862

The regular monthly meeting of the Grand Rapids Amateur Radio Association will be held Friday, 2 February 2017, at Red Cross HQ, 1050 Fuller Avenue NE, Grand Rapids. This is about 2 block south of Leonard Street.

We are please to announce that Mike, KB8TB and crew will demonstrate FT8 digital mode, which is one of the later digital modes which is "catching fire" on the HF and VHF bands. With any luck with propagation, he will be able to demonstrate "live contacts" with folks around the state and maybe even some DX. (Caveat: One can NEVER be certain of HF propagation)

Note that all members of the ham community are always welcome at these monthly meetings. So, please publicize this event, bring your ham friends for an educational presentaiton.

February 3, 2018, 2000 UTC: During the last 72 hours, we continued to experience the high winds, low clouds, fog and rough seas that have prevented helicopter operations since our arrival at Bouvet. No improvement was predicted in the weather forecast for the next four days. Then, last night, an issue developed in one of the ship’s engines.

This morning, the captain of the vessel declared it unsafe to continue with our project and aborted the DXpedition. We are now on our long voyage back to Punta Arenas. As you might imagine, the team is deeply disappointed, but safe. There is already talk about rescheduling the DXpedition,

According to the Bylaws dues are due at the end of February each year.

I am processing several who have already given me dues at the recent meetings, or who have sent checks to the PO Box which is listed below.

Dues are $25 per year. For ops who are over 70, they may request the senior discount, which results in $15 per year.

Please support the organization.

If you've already contributed your dues, you may disregard this message.

That's right, one of the largest and longest running hamfests in Southwest Michigan is just one month away. Held in the spacious Valley Arena at the Wings Event Center in Kalamazoo Township, the Crossroads draws hundreds of hams from not only sSouthwest Michigan, but also West, Central and Southeast Michigan, as well as northern Illinois, Indiana and Ohio. Featuring over 160 vendor tables, the Crossroads offers plenty of space for vendors to display their wars and gives amateur radio enthusiasts a wide variety of vendors to shop. It is a tremendous opportunity for vendors and shoppers alike. Wings Event Center offers 2000 Free PAVED parking spaces. Also featured at the Crossroads are door prizes and an Amateur Radio Examination (VE) session for new hams and hams looking to upgrade their license.

f you have not reserved your tables and tickets yet, please go to www.w8df.com/hamfest (http://www.w8df.com/hamfest)and download the flyer to print, complete and mail in with payment while tables and tickets are available. If you have any questions, please contact the Jay Jarrett, Hamfest Committee Chair at either crossroadshamfest@w8df.com or 269-815-8007.

We look forward to seeing you at the 58th Annual Crossroads Hamfest & Radio Swap and don't forget to where your green for St. Patrick's Day.

Subject: West Michigan Emergency Communication Net Official Schedule Change

Greetings to you all,

There is now an ongoing effort to revitalize the West Michigan Emergency Communication Net on the 145.270 W8LRC Lowell Amateur Radio Club repeater system.
As you may know, the net has been held on Sunday nights at 8 p.m. for a number of years. Jim McFadden (W8JWM), Kent County WMECN net controller, Tom Behler (KB8TYJ) Kent County Skywarn trainer for the visually impaired, and Robert Hornbrook (KD8TOV) Ionia County ARES / RACES / Skywarn are coordinating and operating the net. We are implementing a new day and time of Wednesday evenings at 8 p.m for the net. This change will be effective beginning on Wednesday February 21, 2018. We are very hopeful that this new scheduling will encourage many more folks to participate. This will put the net right between the Satern net, and the Michigan VHF Traffic Net, both of which are held on the Michigan Independent Repeater Association (IRA) link system. As far as we know, this new time doesn’t conflict with any other major area nets.
Once the new net is established, we are planning to come up with relevant topics and possible training ideas in order to give people reasons to check in. This is all being accomplished with the support of the Lowell Amateur Radio Club (LARC, W8LRC.org). We are hoping that anyone who represents an area AUXCOMM organization such as ARES, RACES, Search and Rescue, and Skywarn will join the net. We encourage any and all licensed amateur radio operators to check into the net as well.
Finally we will do everything we can to encourage participation from County EOC’s within range of the Lowell repeater system.
We ask that you please forward this message to everyone you know who might be interested in joining the net.

Thank you for your time and attention. We hope to hear you on the net real soon.

Sincerely,

Jim, Tom, Robert

3876. Hawaii's Communication Breakdown and How Going Ham Could Save Us

*/If we could use ham radio to coordinate between folks who go out it would be a BIG help. We hams in SW Ohio would regularly go out on damage assessment after flooding of the Ohio River and tributaries, or less occasional tornadoes. We'd have maps with us of the "probable locations" of damage, and discuss on the fly what we found and what was actual vs predicted damaged areas.

I know that we have much less frequent need for such damage assessment in SW Michigan, but still ham radio could be useful for such coordination. I'll try to get my 2 meter Funny Modulation squawk box running so when I go out with a "trained" damage assessment person I'll have communications if needed.

i just volunteered with Kit Soltysiak a few minutes ago after reading an urgent message for help needed. She suggested that I (and by inference, anyone who will be going out for flood damage assessment) take an on line course. Since the Red Cross portal seems to change daily, if not more often, I'm going to visit 1050 Fuller Ave NE on Monday afternoon to take the course there.

I suspect this is one of the few real needs for medium to large scale disaster assistance in this area. I hope I can be of service.

72/73 de n8xx Hg
QRP >99.44% of the time

p.s. Flood damage assessment is not very difficult. >99.44% of the time there's water lines on buildings which have been flooded, and the Red Cross and Federal Disaster service guidelines are clear on when minor, major, or total damage is in order. So, if you have time, reasonable eyesight, and willingness to slog around in sometimes muddy streets, please volunteer. It can be very informative, and the folks you're helping will be very appreciative./*/

Subject: Re: [GRARA] Fwd: Red Cross Callup, Flooding Event

If we could use ham radio to coordinate between folks who go out it would be a BIG help. We hams in SW Ohio would regularly go out on damage assessment after flooding of the Ohio River and tributaries, or less occasional tornadoes. We'd have maps with us of the "probable locations" of damage, and discuss on the fly what we found and what was actual vs predicted damaged areas.

I know that we have much less frequent need for such damage assessment in SW Michigan, but still ham radio could be useful for such coordination. I'll try to get my 2 meter Funny Modulation squawk box running so when I go out with a "trained" damage assessment person I'll have communications if needed.

i just volunteered with Kit Soltysiak a few minutes ago after reading an urgent message for help needed. She suggested that I (and by inference, anyone who will be going out for flood damage assessment) take an on line course. Since the Red Cross portal seems to change daily, if not more often, I'm going to visit 1050 Fuller Ave NE on Monday afternoon to take the course there.

I suspect this is one of the few real needs for medium to large scale disaster assistance in this area. I hope I can be of service.

72/73 de n8xx Hg
QRP >99.44% of the time

p.s. Flood damage assessment is not very difficult. >99.44% of the time there's water lines on buildings which have been flooded, and the Red Cross and Federal Disaster service guidelines are clear on when minor, major, or total damage is in order. So, if you have time, reasonable eyesight, and willingness to slog around in sometimes muddy streets, please volunteer. It can be very informative, and the folks you're helping will be very appreciative.

Subject: Red Cross Callup, Flooding Event

On Monday the Red Cross is calling as many as can to assist with the flooding event .

The communications unit has not been called out but there are many other jobs that need doing.

The County has declared a Disaster declaration which allows for Federal and State assistance.

If you can help, Go to the Red Cross building on Monday and offer to help if available- JB

Right nowthere is no plans to set up a radio team, maybe later this week.

Beforeanyone deploys you have to take a online course in Disaster Assessment, this isrequired by the Red Cross. To do this go to Red Cross Volunteer Connection.

Sign up thenconnect to edge top of page, search for Disastercycle servicers an take the course.

There is aapp you can put on your phone called RCCollect, get this from play stores, this will let you input data on to yourphone and send it. There is also a course in Volunteer Connection on how to usethis app.

Mike Jones willhelp you register, ect.

3885. Disaster Assessment Training completed.

Yahoo group: GRARA
Date: 2018-02-27 20:55:30 UTC
From: Hank Greeb
Topic: 3883 Message: 3885

After 4 to 5 hours of frustration, I was able to log into the Volunteer connection and EDGE training site for Red Cross. The course took only an hour to complete even though it the web page said it might take as long as 3 hours and 15 minutes. Nothing much has changed since the 1970's when I started doing damage assessment for SW Ohio Floods, tornadoes, etc. There's a "hidden" and not at all obvious 'test' which seems to be needed for completion, which I didn't find out about by senedipity, even though I received a notice of completion in an e-mail.

If others try to log in and have difficulties, the key point was to clear the cache (or history file if using internet explorer) of a browser. It took two calls to the national computer help line (in Washington

The Course is Disaster Assessment Fundamentals which took me 1 hour to complete, and then (sorta hidden) andother 15 minutes or so to take a test. need for this test was not at all obvious because I had an e-mail which indivated that I had completed the course.

I'm supposed to show up at Red Cross at 9 a.m. tomorrow. I prey this won't be a wild goose chase.

I'd encourage anyone and everyone who is available during normal working hours to register with Red Cross for Disaster Assessment. If we could get enough hams together we could perhaps convince the powers that be that we could coordinate our efforts "on the fly" using ham radio, could leave from our homes instead of having to trundled down to Red Cross HQ (quite a distance out of the way for many of us), and get the job done without all the red tape and bureaucratic nonsense foisted upon us by National. This has been done in the past in other parts of the country. There's no reason ham radio could not be an excellent adjunct to flood disaster relief in Western Michigan>

Thank you for sharing, Hank.

I wasn't as patient as you. It took me like 5 minutes to give up at the Red Cross website. Besides, I didn't (don't) want to become a regular RC volunteer, just wanted to take the training and be like "on call" when available if required... Unfortunately I can't be available during regular work hours.

Anyway, hopefully enough ham radio volunteers can help.

73,
Marcelo W6EUH

Marcelo:

You might inquire if you're still interested. There's a group which covers minor disasters like fires, wind damage, etc.

These events often happen after hours. I'm not sure how long the duration of such an event might be, i.e. would it interfere too much and too often with sleeping hours...

But, the training is fairly easy to comprehend and pass. I don't recall the name or phone number of the damage assessment coordinator, but he's a volunteer like all of us would be. Give a call to Red Cross, probably after a week or so to let the paid personnel breath a bit, and ask whatever questions you might have. They're always looking for competent help.

Doing anything on the "fly" like this does not lead to a pleasant experience in many cases, although Hank and others are thanked for their efforts-

The key take away is train and prepare before an event like this happens where time to do proper training is over and the recovery phase begins for real .

I know not much has been said about training for over a year and longer so this comes as no surprise-

It is my hope this experience encourages the club to participate now in training both is RC and FEMA (after a break for RC staff to recover) .

Those that took the ICS courses years ago (IS 100,200,700, and 800) need to take a refresher which can be done on line through FEMA - It is strongly recommended because most if not all first responders and Fire /CERT use ICS in Disaster response.

There are many applications for Ham radio in the ICS framework.

Years ago I was involved in the KC ARES/RACES. As the Feds required more and more ICS courses, and I was still on dial-up, I just lost interest. AFAIK, I was there to provide radio support, not learn all there is to know about how the Feds operate.
When the Red Cross recruitment had the "intellectual property" form to sign, I didn't fully understand the personal implications and refused to sign. The RC refused to accept me unless I signed. I asked our ARRL rep at the time if the ARRL ever had legal counsel review the form, all he could do is advise me not to sign it. So that's where it ended with me.

Skywarn is a different service I have no problem participating in.

It's March

Coming events:

SKYWARN spotter annual training
GRARA monthly meeting, VE exams
HARC monthly meeting
LARC monthly meeting
Kalamazoo Hamfest
MARA monthly meeting
HARC E.A.T. meeting (Education And Training)
HIAD (Ham in a Day)

SKYWARN spotter training, Ottawa and Kent county Skywarn. Thursday, March 1, doors open 6PM, begins 6:30 PM, Hudsonville High School Eagle Auditorium. Lots more information and sign-up at
https://www.eventbrite.com/e/ottawa-kent-severe-weather-spotter-training-2018-registration-42101467623?aff=mcivte

Grand Rapids Amateur Radio Association (GRARA) monthly meeting, first Friday of the Month, February 2, 7PM. Door opens 6:30 PM. American Red Cross building, 1050 Fuller Ave NE, GR between the I-196 Ford Fwy and Leonard St. Same location as the GRARA shack. Talk-in 147.26+(94.8Hz). Directions: http://w8dc.org/pages/Red Cross.html
VE TESTING at GRARA on the second Friday of the month, March 9, same location.

Holland Amateur Radio Club (HARC) monthly meeting, second Monday of the month, March 12, 7PM. Victory Point Ministries Youth Building, 11530 Ransom St., Holland. The building is located on Ransom, which is just east of 120th, south of New Holland St. and north of Quincy St.
This is not for members only, and all those interested in amateur radio are invited to attend. Following a short business meeting, Tom Bosscher K8TB, will demonstrate the new FT8 digital mode by operating his home station by remote control.
Talk-in K8DAA 147.06+(94.8Hz) http://www.hollandarc.org/ Directions: https://goo.gl/maps/BNmMiGCGqeH2

Lowell Amateur Radio Club monthly meeting, third Thursday of the month, March 15, 6:30 PM social, 7PM meeting. All are welcome. Pizza provided. Talk-in W8LRC 145.27-(94.8Hz) http://www.w8lrc.org Directions: https://goo.gl/maps/9e7G2FVkriJ2

Kalamazoo “Michigan Crossroads Hamfest”. Saturday, March 17.
Location: Wings Event Center, 3600 Vanrick Drive, Kalamazoo, MI 49001
Website: http://www.w8df.com/hamfest
Sponsor: Southern Michigan Amateur Radio Society
Type: ARRL Hamfest
Talk-In: 147.000 (PL 94.8)
Public Contact: Jay Jarrett , N8ARR, 5103 South 36th Street Climax, MI 49034
Phone: 269-589-8649, Email: N8ARR@arrl.net

Michigan Amateur Radio Alliance monthly meeting, second Wednesday of the month, March 21, 7:30 PM, at Plainfield Township Fire Department Training Center, SW corner of 5 Mile Rd and Plainfield Ave. Talk-in W8USA 145.23-(94.8Hz) https://w8usa.org/interact/meetings/

The next E.A.T. meeting (Education And Training) will be March 26, 2018 at 7 pm at the VictoryPoint Ministries Youth Building. HARC E.A.T. sessions are open to the public and you do not need to be a HARC member or have an amateur radio license to attend. .
http://www.hollandarc.org/?p=3666 Talk-in K8DAA 147.06+(94.8Hz)
We will have instructional videos, as well as answer any questions and especially help newcomers to the hobby get started. Everyone is welcome to come and find out about ham radio, help someone else, or just socialize. No matter how long you've been involved in the hobby, there's always more to learn!

HIAD (Ham in a Day) classes, Saturday, April 14 in Holland.
http://tinyurl.com/holo-hiad-ve
Classes begin at 1PM, exam at 6PM. Anyone wanting to just take exams can do so at no cost, but please pre-register.

Cadillac Hamfest, Saturday, May 5
Location: Cadillac Jr. High School, 500 Chestnut Street, Cadillac, MI 49601
Website: http://www.wexaukeearc.org
Sponsor: Wexaukee Amateur Radio Club
Talk-In: 146.980 (no PL tone)

#AOLMsgPart_1_1d65a6ce-7162-48d6-8b28-6753c5a9894d td{color: black;} .aolReplacedBody {font-family:; font-size: 100%;} hi Joe - Catherine Kello is the new Training Lead. She is working with the Ops people and was hoping she could work with you on the training ideas for radio club after the disaster. Jim Leys is working with Dis Assessment so if he is there tonight he can give you an update.
We are holding the Diaster Assessment and Logistics courses next Tuesday at the GGR Chapter. I'll forward you that email to give to the members (I believe they need to be Red Cross mbrs to attend, Nikki or Catherine would know). Catherine.kello@...

Thanks for helping,

3894. Foxhunting Training in the Park, April 28, 2018

Yahoo group: GRARA
Date: 2018-03-06 12:56:16 UTC
From: Tom
Topic: 3894 Message: 3894

A "Tune-Up In the Park" Fox Hunting exercise will be held on April 28, 2018 sponsored by the Lowell ARC, the Allegan ARC, the Holland ARC, and the Grand Rapids ARA.

Whether you are just beginning to be interested in Fox Hunting or you are a grizzled veteran, plan on being at Douglas-Walker Park on Saturday, April 28, 2018 from 9 am to 12 noon.

There will be at least five micro-transmitters hidden in the park for you to take your time locating, practicing your skills and debugging your equipment.

At twelve noon, the park activity will stop, and a "live" fox will go on the air, located within eight miles of the start.

There will be seasoned Fox Hunters to help with your equipment and techniques.

If you have a Fox Box or a micro/mini fox and would like to bring it to the park to be used, please contact the event coordinator, Nathan, N8THN at coffeefein24@...

3895. Announcement Of Another New Net On The W8IRA Link System

Yahoo group: GRARA
Date: 2018-03-07 02:08:03 UTC
From: Tom Behler
Topic: 3895 Message: 3895

Hello, everyone.

Please spread the word on this new net, and join the fun if you can.

See below for more details.

Tom Behler: KB8TYJ, Grandville

Announcing a new Evening Net on the IRA Link System!

As a lot of you have asked and suggested, starting Saturday, March 10th, at 6:00pm Local Time, there will be a new NET starting up on the W8IRA link system. It will be called the "IRA After Work/Dinner" net.

The format will pretty much follow the "IRA Michigan Noontime Roundup" net with a slight variation. Hopefully, if all goes well, we will expand the net to Tuesdays and Thursdays, also at 6:00pm Local Time. It will entirely be based on how well the new Saturday net goes. The purpose will be to promote Amateur Radio, and ask and answer questions of all kinds. We'll also be able to see how the various IRA repeaters are working and address any problems with them. This, as with the Noontime Net, will allow you to communicate with other Amateur Radio operators or just make some new friends. Brand new radio operators are especially invited to join. We want everyone to get involved! New NET CONTROLS will be needed in order to keep the net going, so please give that some consideration.

If you have any questions, or would like more information, please feel free to contact either:

Tom Behler: IRA Net Operations Director, at kb8tyj@...
<mailto:kb8tyj@...> or,

Rick Fyan, After Work/Dinner Net Manager, at KE8IKT@...
<mailto:KE8IKT@...>

If you would like any more information on the Independent Repeater Association (IRA) Link System, please go to:

www.w8ira.org <http://www.w8ira.org/>

We look forward to your participation in this new IRA Link System Net!

3896. Kalamazoo "Crossroads Hamfest" Saturday, plus other upcoming hamfests.

Yahoo group: GRARA
Date: 2018-03-13 15:28:11 UTC
From: Jack Amelar
Topic: 3896 Message: 3896

Reminder this Saturday's (March 17) Crossroads Hamfest & Radio Swap in Kalamazoo.
From “Smokey” N5MKY

Held in the spacious Valley Arena at the Wings Event Center in Kalamazoo Township, the Crossroads draws hundreds of hams from not only Southwest Michigan, but also West, Central and Southeast Michigan, as well as northern Illinois, Indiana and Ohio. Featuring over 160 vendor tables, the Crossroads offers plenty of space for vendors to display their wars and gives amateur radio enthusiasts a wide variety of vendors to shop. It is a tremendous opportunity for vendors and shoppers alike. Wings Event Center offers 2000 Free PAVED parking spaces. Also featured at the Crossroads are door prizes and an Amateur Radio Examination (VE) session for new hams and hams looking to upgrade their license.

f you have not reserved your tables and tickets yet, please go to www.w8df.com/hamfest and download the flyer to print, complete and mail in with payment while tables and tickets are available. If you have any questions, please contact the Jay Jarrett, Hamfest Committee Chair at either crossroadshamfest@... or 269-815-8007.

We look forward to seeing you at the 58th Annual Crossroads Hamfest & Radio Swap and don't forget to wer your green for St. Patrick's Day.

73, Smokey (Glenn) McCray N5MKY Cereal City, USA 269-986-2063

ALSO ANNOUNCING: Allegan County Amateur Radio Club's annual swap
From Mike W6RP
Saturday April 7, 8 to Noon, at the Salem Township hall, 3003 142nd Ave., Burnips (Dorr), MI 49314. More details as available. http://ac8rc.org/?page_id=6
https://goo.gl/maps/7wQqn4J6Eyx

HAMVENTION DAY BUS TRIP
From John WA8TON/VO1TON/VO1HV
Once again, this year, The ARROW Communication Association of Ann Arbor, Michigan is sponsoring its annual round-trip by bus to Hamvention on Saturday, May 19, 2018. Details plus flier are at:
https://w8rp.org/activities/dayton-bus-trip/

This trip has run since 2002. We have sold out the last four years! We have had riders come from all over. They have come from Kalamazoo and Grand Rapids. In 2017, John, VE3IPS came down from Toronto to be with us. You can see some fine photos and a great video on his web site:
https://ve3ips.wordpress.com/2017/05/22/dayton-hamvention-2017-arrow-communications-bus-buildathon-qrpme-rf-probe-kit-w1rex/

For $65.00 ($55.00 before April 1), we offer a free continental breakfast, space at our flea market table and, most of all, PRIZES! It is probably complete coincidence, but a number of the products we have been given have then made it into the Product Review column of QST (QRP Labs, QRPme and Borden Radio Company come to mind).
We thank you all for your kind attention. We look forward to seeing you at Hamvention and on the bus!

And other future hamfests / conventions:

You might mention the heightened awareness that the club needs to seek out training opportunities to help Red Cross when they arise due to the flooding event in February- disasters happen without warning! Examples include First Aid, Shelter Operations and Damage Acessment - Also we have smoke alarm installs coming up in the near future that may need comm support.

Yes, There is still a need for radio support!

Contact the Chapter for a training schedule directly or Jim K8CAN

Also you might mention the packet station is on full time on 145.07 BBS call sign is W8DC-1

We have a net on Red Cross freq 47.420 every Sunday night @ 7:30 PM Reception reports are solicited-

Thanks Schooter !

JB

A "Tune-Up In the Park" Fox Hunting exercise will be held on April 28, 2018 sponsored by the Lowell ARC, the Allegan ARC, the Holland ARC, and the Grand Rapids ARA.

Whether you are just beginning to be interested in Fox Hunting or you are a grizzled veteran, plan on being at Douglas-Walker Park on Saturday, April 28, 2018 from 9 am to 12 noon.

There will be at least five micro-transmitters hidden in the park for you to take your time locating, practicing your skills and debugging your equipment.

At twelve noon, the park activity will stop, and a "live" fox will go on the air, located within eight miles of the start.

There will be seasoned Fox Hunters to help with your equipment and techniques.

If you have a Fox Box or a micro/mini fox and would like to bring it to the park to be used, please contact the event coordinator, Nathan, N8THN at n8thn@...

Nathan Hardman

N8THN

Some of you at the GRARA Wednesday night gathering were asking about equipment. I recommend two items, plus coax cable to mate with your radio.

A "measuring tape" 3 element 2 meter beam. Google this one up. Plenty of instructions on the 'net on how to build these.

An active attenuator. You an get these right here in Michigan from John, KC9ON who lives in Gaylord.

https://kc9on.com/ham-radio/fox-hunting/

https://kc9on.com/product/fox-hunt-offset-attenuator/

Get these as soon as possible to start experimenting, then come to Nathan's big tune up party on April 28.

73 de Tom, K8TB

#AOLMsgPart_1_4b4692a9-5583-41d3-a15c-bdc567666713 td{color: black;} .aolReplacedBody {font-family:; font-size: 100%;} Good evening! If you haven't heard already, we've been incredibly busy over the last few months in West Michigan! Thank you so much to everyone who has assisted with our three apartment fires, the Statewide Disaster Response Operation assisting with the flood relief, and the numerous individual fire responses, smoke alarm installations, and preparedness education presentations!

We have several awesome in-person training opportunities coming up (many of which are offered infrequently):

Government Operations March 23 10am-5pm Grand Rapids Office (Only available in person and there's still time to sign up!!)

Collaborating Essentials March 24 10am-5pm Grand Rapids Office (Good for Community Partnerships- still 8 spots available!!)

Muskegon Boot Camp April 10-12 (the brochure is attached for courses available and how to sign up)

If you sign up through SurveyMonkey, there will be a pop-up at the end asking if you want to take a survey, do not click "Yes"... just "x" out of the box.

Hudsonville Boot Camp May 16-20 (rescheduled from March due to flood response) Stay tuned for brochure and course offerings.

Lastly, during the Strength of Workplace meeting held a few months ago, it was requested we share a Table of Organization with all DCS volunteers so you know who the leads are of various areas and how to contact them. Attached is that information. I hope it's helpful!

Let me know if you have any questions, are looking for ways to get more involved, or just want to call and chat about your Disaster Services experience. I'd love to hear from you!

Have a wonderful night,

Nikki Salladay

"Ham in a Day" Held at Victory Point Ministries Youth Building, 11530 Ransom St., Holland. This is an opportunity for anyone wishing to get their amateur radio technician license to study and take the exam all in one afternoon. Directed study starts at 1:00 and continues till 6:00, when the test will be given.For registration and more information, go to:http://tinyurl.com/holo-hiad-ve Cost for the Ham in a Day study session is $25. Also, anyone holding a current technician or general licenses may arrive at 6:00 and take the test to upgrade at no cost. Anyone whose license is within 90 days of expiring can also renew their license between 6:00 and the end of testing at no charge.

Lowell Amateur Radio Club monthly meeting, third Thursday of the month, April 19, 6:30 PM social, 7PM meeting. All are welcome. Pizza provided. Talk-in W8LRC 145.27-(94.8Hz) http://www.w8lrc.org Directions: https://goo.gl/maps/9e7G2FVkriJ2

The next Holland ARC E.A.T. meeting (Education And Training) will be April 23, 2018 at 7 pm at the Victory Point Ministries Youth Building. The club has purchased a series of instructional electronics videos which are around 30 minutes long. This will be followed by discussion and/or demonstration. HARC E.A.T. sessions are open to the public and you do not need to be a HARC member or have an amateur radio license to attend. If you have questions about amateur radio equipment, operating practices, licensing, test and measurement, or anything remotely related to amateur radio, this is the place to be.
SEE NOTE of future E.A.T. meeting dates and location above.

North Ottawa ARC meetings 4th Thursday of the month, April 26, 6:30 PM at the Spring Lake District Library. This meeting is a general public meeting introducing Amateur Radio, at the request of the library. http://www.w8cso.org/ 145.49-(94.8Hz)

FOX HUNT a "Tune-Up In the Park" Fox Hunting exercise will be held on Saturday, April 28, 2018 sponsored by the Lowell ARC, the Allegan ARC, the Holland ARC, and the Grand Rapids ARA.
Whether you are just beginning to be interested in Fox Hunting or you are a grizzled veteran, plan on being at Douglas-Walker Park on Saturday, April 28, 2018 from 9 am to 12 noon. There will be at least five micro-transmitters hidden in the park for you to take your time locating, practicing your skills and debugging your equipment.
At twelve noon, the park activity will stop, and a "live" fox will go on the air, located within eight miles of the start.

There will be seasoned Fox Hunters to help with your equipment and techniques.
If you have a Fox Box or a micro/mini fox and would like to bring it to the park to be used, please contact the event coordinator, Nathan, N8THN at n8thn@...
Douglas-Walker Park is on 84th St, 1.5 mile west of US-131 exit 74 / Byron Center. Map to the park https://goo.gl/maps/UV6bQ6BhCZy

If you are interested in where that errant Chinese satellite might be,
have a look at the heavens-above website:

http://www.heavens-above.com/GroundTrack.aspx?lat=0&lng=0&loc=Unspecified&alt=0&tz=UCT

As a side note, the latest prediction from NASA's computers is that the
bulk of the satellite is expected to hit the US 131 100th St overpass
sometime Sunday. :)

73 and have a wonderful Easter, Tom K8TB

Howdy all,

I just finished negotiations with the Chinese Government and Space Agency for my purchase of the Tiamgong-1 Space Station for the rock bottom price of $1 US.

Any debris found in Michigan belongs to me and I will sue anyone that steals said property.

Yep, It's April 1.

PLEASE NOTE NEW EMAIL ADDRESS!
The old email, @localnet.com, still valid for now,
will eventually shut down. Please update your directory.

And just in case your curious about the address change (if not, skip the rest of this), I've had the @localnet address for over 14 years. I originally got it when I signed up for Localnet.com dialup. When I switched to a fixed wireless service, I kept the @localnet address by paying an annual fee. I now have a fiber optic service provider. With the proliferation of free email services that are far more versatile, and Localnet doubling the annual fee, I decided it was time to switch email providers. I will keep the old address for now, as I have a lot of accounts tied to it I need to switch over. I'm not slamming it shut, avoiding the dreaded “user unknown”. So why @yandex.com as opposed to some of the other well known email providers? There are other “jamelar”s somewhere on other services, some apparently Spanish being their primary language. If you lose this new address, you can always email to my amateur radio callsign, NY8D@arrl.net which forwards to this, my new email address.

VINTAGE ELECTRONICS EXPO, Thursday, Friday, Saturday July 14, 15, 16
Location: Kalamazoo Expo Center (Fairgrounds)
Our largest show (and the first ALL INDOOR multi-day vintage electronics event of this type in the USA) has moved from our long time Lansing location to Kalamazoo Expo Center, located at the Kalamazoo County Fairgrounds. It is usually the second full weekend after the 4th of July holiday. This show features a huge flea market, a “Main Auction”, “Silent Auctions”, seminars, and a Bargain Auction at the end of the event. Sellers and buyers come from all over the USA. The club encourages the general public to attend… the admission is just $5 per day. Thursday is a set up day only (no sales allowed and only dealers admitted), then the flea market opens FRIDAY morning. We also offer a “Roadshow” style evaluation service at each show. The club encourages folks to bring in items for appraisal, repair or parts info, or to donate to the club. Bring clear pictures if the item(s) are too large to move. Best to contact us first if you have a collection of items you wish to sell or donate to the club. http://michiganantiqueradio.org/

3915. MICHIGAN QSO PARTY 21 APR, 1600Z to 2359Z

Yahoo group: GRARA
Date: 2018-04-07 18:33:08 UTC
From: Hank Greeb
Topic: 3915 Message: 3915

*Yes, the Michigan QSO party will be held

Saturday 21 April 2018
1600Z to 2359Z
That's Noon to Midnight EDST

Rules and other info are at http://www.miqp.org/

This is a low key, fun contest for most.

Grand Rapids ARA (W8DC)
and
Michigan Amateur Radio Alliance (W8USA)

have registered for participation from KENT County

No clubs have registered in adjacent countiers of Allegan, Barry, Ionia,
Kalamazoo, Muskegon, Montalm, Ottawa. Have I missed any "local" counties?

If your club is planning an operation, or if yoou're planning to operate
as single op from home, please put inform the Michigan QSO party of your
intentions at
http://www.miqp.org/plannedOpsEntryMiQP.html

C'mon out, have some fun! Pass the word along.

Art Bell, long time host of Coast To Coast AM, the popular all-night call in
radio show often featuring UFOlogists, quack medicine believers,
government/corporation paranoids, and anyone else marginalized out of the
mainstream of society has died at his home in Pahrump Nevada. Bell was a
ham, W6OBB and his ham station was located in Bell's proclaimed "Kingdom of
Nye" (Nye County Nevada). Cause of
death unknown. One of Bell's frequent guests on his program
was
Wayne Green W2NSD/1 (SK) who made a career promoting his various suspect
life improvement plans, alternative medicine and cold fusion.

3918. Foxhunting Training in the Park, April 28, 2018

Yahoo group: GRARA
Date: 2018-04-15 21:53:37 UTC
From: Tom
Topic: 3894 Message: 3918

Reminder, coming up,

Sponsored by the Lowell ARC, the Allegan ARC, the Grand Rapids ARA and the Holland ARC, there will be a "Tune-Up In the Park" Fox Hunting excise, April 28, 2018.

If you are interested in Fox Hunting, or you are a grizzled veteran, plan on being at Douglas-Walker Park on Saturday, April 28, 2018 from 9 am to 12 noon. Douglas-Walker Park is on 84th St, 1.5 mile west of US-131 exit 74, Byron Center.

There will be at least five micro-transmitters hidden in the park, for you to take your time and practice your skills and debug your your equipment.

At twelve noon, the park activity will stop, and a "live" fox will go on the air, located within eight miles of the start.

There will be seasoned Fox Hunters to help with your equipment and techniques.

If you have a Fox Box or a micro/mini fox and would like to bring it to the park to be used, please contact the event coordinator, Nathan, N8THN at coffeefein24@...

 Note. Investigative reporting has disclosed that two clubs are going for broke. Un-named sources have confirmed that the Allegan and Kalamazoo ARC's have has multiple meetings, building antennas, attenuators and other items. Apparently, these clubs think there will be some competition coming up.

Tom K8TB

Greetings to the Amateurs of Michigan,

The April weather is demonstrating the notion that if you are not happy with the current climate, just wait 5 minutes. Eventually, things will warm up, making it easier to spend more time outside.
I have heard many comments either in person or on the air relative to the ARRL request to expand HF privileges for Technician Licensees. Feel free to share your thoughts with your fellow amateurs, and of course your section team.

The Michigan QSO party begins Saturday, April 21, 2018 1600Z to April 22, 2018 0400Z. Slide your web browser over to miqp.org for more information.

The ARRL Great Lakes Division Convention at Hamvention this year will be my first as your Section Manager. I'm looking forward to meeting up with you at the ARRL Expo area, or perhaps wandering the flea market.

Hospitality Acknowledgements
Thanks to these organizations and clubs for their outstanding hospitality shown to the MI ARRL staff:

Total Volunteer Dollar Value for March 2018: $ 31,884

More information is available athttp://nts-mi.org/.

Come join us on our traffic and public service nets.

A hearty thanks to the hundreds of volunteers across the State of Michigan who work hard as volunteers to hone their skills month after month to make sure they are ready for any situation that may arise. Our

ARPSC and NTS programs are an integral part of AuxComm, which in turn is
an integral part of the Michigan State Police Homeland Security Division.

Final Thoughts

Remember that I’m always interested in hearing about your solutions for issues within our amateur radio community, the issues are sometimes really easy to spot, but the solutions are just a bit more challenging.

I’m looking forward to running into you on the air!

13.04.2018, 22:20, "John Wasciuk" :

Hello, ARROW, LARC and GRARA,

Looking for a ride to and from the Dayton Hamvention. I have a place to stay (I think), so all I'll need is transportation to and from.

I will double-check, but my stay is from Thursday night thourgh Saturday night.

Can anyone help?

3921. Red Cross building left open AGAIN

Yahoo group: GRARA
Date: 2018-04-19 16:13:06 UTC
From: stprovost@...
Topic: 3921 Message: 3921

Just received the following message today:

the basement door propped open, alarm not set, and lights left on the basement. I was the last person to leave the office last night and they were here for their meeting and had the door propped open for their members to get in.

Normally I am the last person leaving but I was out of state.

Not sure who was last person last night but we could be asked to leave if doors and alarms are not taken care of.

Red Cross staff are normally gone by 530pm.

GRARA is normally here after hours and should always check doors and alarms when leaving for the night.
Otherwise we may loose the ability to be here after hours.

Stephen

From: Hank Greeb
Topic: 3924 Message: 3924

The May 2018 issue of QST has an article on Portable Operating by Laura Steinberger, WZ8C, from up north in Traverse City.

I worked her many times during the National Parks On the Air (NPOTA) in 2016.

It would be nice to give her a trophy for plaque for the best article. To vote, you must be a member of ARRL (At least I believe you must) and check in at
http://www.arrl.org/cover-plaque-poll

From: stprovost@...
Topic: 3921 Message: 3925

I will be talking more with Red Cross staff about the open door But, from what I have heard, we did have someone close the basement doors wed night.
they did not have any alarm codes to arm the alarm with.
But it appears we DID not leave doors open.
We are not the only groups who use this building.

GRARA board members will have a closing procedure created at our meeting next week to ensure we have the same closing procedure followed after our after hours events.

thanks
Stephen

3926. DMR MI5 Group has opened up StateWide1 for use

From: Jack Amelar
Topic: 3927 Message: 3927

-------- Beginning of forwarded message--------
19.04.2018, 16:43, "KCEST" <lists@kcest.org>:

Greetings all, hope your 2018 is going well. We are a little less than a month out for the River Bank Run and we are still in need of additional ham radio operators to assist with the event.

There are a few changes with the event this year. First there is a new partnership between the race and Spectrum Health. Second, due to construction and future changes to John Ball park, the course has some minor changes. We will provide more detailed information in the next week or so.

Why should you help out with the 5/3rd River Bank Run?

1. As amateur radio operators we should give back to the community.

2. Time to dust off those radios and hone our communication skills.

3. Great opportunity to show the community what ham radio operators can do to support their community.

4. For those of you who volunteer in the emergency community it is a great time to work with other emergency service personnel.

5. See old friends.

6. We think this is fun.

Please pass this invitation along to your local clubs and friends.

Please keep in mind there are 2 Events.

#1) The JR Event which we will need about 15-20 People to help. May 9th 2018 from 4PM - approximately 8PM

#2) The Main Event Which is on May 12th 2018 from 6AM - 1PM with varying end times.

We will also have a RBR Pre-Meeting on Friday May 11th 2018 at KCSD

701 Ball Ave from 6:30PM - 8:30PM. (We need about 80-85 People to help with the main event in various positions)

For those who have never worked the River Bank Run.

This is the PREMIER Communications event in Kent County. This event is one that you'll enjoy and come back every year for more! The RBR event is HUGE and keeps growing!

From: stprovost@...
Topic: 3928 Message: 3928

Hello, every year GRARA has a group of us go to hamvention.
This year we can have 8 people go and stay within 20 minutes of hamvention Xenia fairgrounds
I just had a person cancel and have an open spot available.
we leave thursday morning May 17th and come back Monday afternoon may 21st.
you can come later or leave earlier, the cost will be $150 plus $22 for hamvention ticket.
We will be staying at a large house in springfield ohio.
please email me at stprovost@provtechs.com with any questions.
thanks

3929. High School Radio Day, Wednesday April 2

Yahoo group: GRARA
Date: 2018-04-24 14:48:35 UTC
From: Jack Amelar
Topic: 3929 Message: 3929

From:
Lowell Buyers Guide, April 22, 2018

High School Radio Day is April 25.

Lowell’s local radio station, WRWW, will be participating in the sixth annual ‘High School Radio Day’ scheduled for Wednesday, April 25. High School Radio Day (HSRD) is a day dedicated to high school radio stations where students can celebrate their uniqueness and promote community awareness of what they do and how they do it. In Michigan, less than one percent of the high schools in the state have a radio station. WRWW broadcasts on 92.3 FM and streams from lowellradio.org They can also be heard locally on Comcast’s Xfinity or public access channel 25. Visit the radio station on the 25th, between 7:30 am and 2:30 pm, when students will be ‘on-air’ commemorating this special event. WRWW is owned and operated by Lowell Area Schools. The radio studio is located right in Lowell High School.

Allegan County Amateur Radio Club monthly meeting second Tuesday, May 8, Allegan County Technical and Education Center (ACATEC), 2891 116th Street (M-222) across from the Allegan County Airport. This month will be starting a little early to allow you some time to hunt

for the hidden transmitters. So we will be starting at 6 PM on May 8th at the ACATEC center in Allegan. http://ac8rc.org/ https://www.facebook.com/ac8rc/ 147.24+(94.8Hz)

Holland Amateur Radio Club (HARC) monthly meeting, second Tuesday of the month, May 8, 2018.
Note: Starting in May 2018, the Holland Amateur Radio Club will be meeting on a NEW DAY in a NEW LOCATION. For the foreseeable future, the club will hold general meetings on the second Tuesday of the month and E.A.T. meetings will be held on fourth Tuesday of the month, both at 7pm. Our new location will be the Chick-Owa Sportsman's Club, located at 9279 E Ottogan Street (just west of Winding Creek). http://www.hollandarc.org/ 147.06+(94.8Hz)

Michigan Amateur Radio Alliance monthly meeting, second Wednesday of the month, May 9, 7:30 PM, at Plainfield Township Fire Department Training Center, SW corner of 5 Mile Rd and Plainfield Ave. Talk-in W8USA 145.23-(94.8Hz) https://w8usa.org/

River Bank Run 2018, Saturday, May 12
This is a large event and we need all the help we can get. This is a chance for Ham radio operators to shine. We are depended on to help with communications related to runner safety. If you have never done this event in the past don't worry, we can partner you up with someone worth experience.
Why should you help out with the 5/3rd River Bank Run?
*1. As amateur radio operators we should give back to the community.
*2. Time to dust off those radios and hone our communication skills.
*3. Great opportunity to show the community what ham radio operators can do to support their community.
*4. For those of you who volunteer in the emergency community it is a great time to work with other emergency service personnel.
*5. See old friends.
*6. We think this is fun.
Please pass this invitation along to your local clubs and friends.
Please keep in mind there are 2 Events.
#1) The JR Event which we will need about 15-20 People to help. May 9th 2018 from 4PM - approximately 8PM
#2) The Main Event Which is on May 12th 2018 from 6AM - 1PM with varying end times.
We will also have a RBR Pre-Meeting on Friday May 11th 2018 at KCSD 701 Ball Ave from 6:30PM - 8:30PM. (We need about 80-85 People to help with the main event in various positions)
For those who have never worked the River Bank Run. This is the PREMIER Communications event in Kent County. This event is one that you'll enjoy and come back every year for more! The RBR event is HUGE and keeps growing!

Lowell Amateur Radio Club monthly meeting, third Thursday of the month, May 17, 6:30 PM social, 7PM meeting. All are welcome. Pizza provided. Talk-in W8LRC 145.27-(94.8Hz) http://www.w8lrc.org Directions: https://goo.gl/maps/9e7G2FVkriJ2 https://www.facebook.com/w8lrc/

Hamvention Bus Trip, Saturday, May 19
As in years past, The Arrow Communication Association is sponsoring a bus trip from Ann Arbor, Michigan to the Greene County Fairgrounds and Expo

Center in Xenia, Ohio and back. The date is Saturday, May 19. We leave the park-and-ride at *5:00 am* and get to the show at 9:00 am. We leave Xenia at 5:30 pm and arrive back to our large park-and-ride site by 9:30 pm. A continental breakfast is included on board. What more could you ask for?
More information, sign-up, flier, etc:
https://w8rp.org/activities/dayton-bus-trip/

The next Holland ARC E.A.T. meeting (Education And Training) will be held on Tuesday, May 22, 2018 at 7 pm at the Chick-Owa Sportsman's Club located at 9279 E. Ottogan Street (just west of Winding Creek).Chick. The club has purchased a series of instructional electronics videos which are around 30 minutes long. This will be followed by discussion and/or demonstration.
Open to the public need not be a HARC member or have an amateur radio license to attend. If you have questions about amateur radio equipment, operating practices, licensing, test and measurement, or anything remotely related to amateur radio, this is the place to be.
http://www.hollandarc.org/ 147.06+(94.8Hz)

North Ottawa ARC meetings 4th Thursday of the month, May 24, 6:30 PM at the Spring Lake District Library. This meeting is a general public meeting introducing Amateur Radio, at the request of the library. http://www.w8cso.org/ 145.49-(94.8Hz)

HIAD (Ham in a Day) class, Saturday, June 9 in Lowell.
"Ham in a Day" Held at Flat River Outreach Ministries, 11535 Fulton ST. E (Hwy M-21), Lowell. This is an opportunity for anyone wishing to get their amateur radio technician license to study and take the exam all in one afternoon. Directed study starts at 1:00 and continues till 6:00, when the test will be given. For registration and more information http://w8lrc.org/hiad-registration/ Cost for the Ham in a Day study session is $25. Also, anyone holding a current technician or general licenses may arrive at 6:00 and take the test to upgrade at no cost. Anyone whose license is within 90 days of expiring can also renew their license between 6:00 and the end of testing at no charge.
Additional HIAD sessions for 2018:
Holland: Saturday, August 11
Lowell: Saturday, October 13
Holland: Saturday, December 8

From W8ZHO.com

Muskegon Area Amateur Radio Council Club Meeting

*May 3, 2018
Meeting at 7PM
MAARC Clubhouse, 2888 Scenic Drive, North Muskegon, MI*

*Meeting topic:
Jerome Novotny, K8CCJ, with Solar Power Installation Changes*

*This subject sounds like a corollary to the excellent presentation last month by KF8QL at the GRARA Meeting! *
*
*
And of course, remember the GRARA Meeting, 1050 Fuller Avenue NE, Grand Rapids, Friday, May 4, 6;30/7:00 p.m.

3934. Mary Christian N8EZL-SK

Yahoo group: GRARA
Date: 2018-05-01 16:51:08 UTC
From: Jack Amelar
Topic: 3934 Message: 3934

Mary Christian (N8EZL) of Jenison went to be with her Lord, April 27, 2018. She was born in Muskegon, MI on February 16, 1945
Surviving Mary's husband of 50 years, Dennis Christian (N8CUF).

Complete obituary at http://www.cookcares.com/obituaries/Mary-Christian-9/#!/Obituary

Mary was an active Tassels member. She and her husband regularly attended the area hamfests, Hamvention, Field Day, and other events
In the early days of the 145.27- repeater, when it was S.T.A.R.S. (Spare Time Amateur Radio Society) located at WZZM-TV13 STL Tower, and before that at the then QTH of Bob Czachorski K8XL in Grandville, Dennis N8CUF was a board member with the blessing of Mary.

3935. RE: Membership Roster is up-to-date.

Yahoo group: GRARA
Date: 2018-05-03 14:26:16 UTC
From: Richard Ranta
Topic: 3935 Message: 3935

Hello All, and Happy Thursday.

I just wanted you all to know the membership Roster is now as complete as it can be.

With one exception: My e-mail address is out of date. (I was busy figuring out how many volunteers were used for the "Floor" event last month)

I will have the latest membership Roster at the club meeting this Friday 5/4/2018.

Oh, if you want to contact me via e-mail, use secretary@... <mailto:secretary@...> .

Enjoy the day.

3937. West Michigan Amateur Radio May events update

Yahoo group: GRARA
Date: 2018-05-08 11:16:37 UTC
From: Jack Amelar
Topic: 3937 Message: 3937

May events update.

This Friday, May 11, Red Cross smoke detector install. We provide communications support. Installs will be in the Godfrey neighborhood. Meet at the Grand Rapids Red Cross Building 8:30 AM. Contact Jim Leys, K8CAN, GRARA Red Cross Laison rc.laison@... for more information

Volunteers are still needed for the Fifth-Third River Bank Run this weekend. If you're available, you need to sign up now.
Please sign up @ http://www.kcest.org/events

The Lowell Amateur Radio Club May meeting will be one week later than usual as many members will be at hamvention(r).
Meeting will be Thursday, May 24. The 17th will be Open Radio Room.

The Grand Rapids Amateur Radio Association June meeting will be at the Hudsonville Fair Grounds, Friday June 1, day before the IRA Hamfest. Meeting will take place following the traditional "Ray's Roadkill and Potluck Dinner" the IRA sponsors which all are invited. The potluck begins at 6:30. Saturday is the hamfest http://w8ira.org/hudsonville-hamfest/

3938. Hamvention/Zenia Ohio - Wires-X portable Simplex Node

Yahoo group: GRARA
Date: 2018-05-08 11:50:15 UTC
From: ab8dt@...
Topic: 3938 Message: 3938

To all who are Hamvention/Zenia Ohio bound or any who are interested on listening & joining in:
For the 2nd year I will be traveling to Zenia, Ohio for Hamvention and will be operating my portable Wires-X node #30074 on the way down from Grand Rapids, MI starting 5/17 and setting up the node at the campground on site running thru the weekend. I will be mainly parked on MNWIS room #21493 but is will be open for use if you want to change it while at Hamvention. It will be on the WIres-X simplex frequency of 147.525 MHz and I may use a DG-ID TX99 if the need arises. I will set up a room #40074 "HAMVENTION" as a return to room when not tied into MNWIS so just check to see what is active.

If you have a Fusion capable radio and can get into the 146.760 W8DC Repeater you can move the node to MNWIS 21494 or HAMVENTION 40074

Questions, comments or concerns to:
Ron Karger, AB8DT

3942. State Pactor Board now up!

Yahoo group: GRARA
Date: 2018-05-10 02:44:24 UTC
From: wd8usa@...
Topic: 3942 Message: 3942

The SEOC has a pactor machine up and running and it is a P-3

Try a connect on 3.591.9 USB using the correct offset for the modem you are using.

It has an excellent signal day or night-

This is a welcome addition as VHF packet won't quite reach there without a band opening.

3943. Fwd: For those attending Hamvention

Hamvention reminder.

I have fleamarket spots 9543 9544 in the name of Michigan Area Radio Enthusiasts (MARE). See attachments for location.
I will have my pickup truck parked there, an EZ UP and table with a MARE display. The display will for the most part be unmanned so everyone is free to roam and attend seminars. I will have plenty of spare keys for the Truck Cap door for us. Feel free to put water, pop, snacks inside, drop off your goodies, pull out a chair to relax, etc. I will have a spare table if anyone wishes to sell, but you watch your own stuff. No club funds were used to purchase the fleamarket spots. If you feel like sending a couple bucks my way, I will gladly accept, but only if you want to.

Last year's setting HTs to 147.265 simplex worked with minimal interference. That's the GRARA repeater output +5KHz

Pray for sunshine and have fun.

3946. Thousands of Amateur Radio Operators Measured the Solar Eclipse's Effects on the Atmosphere

Yahoo group: GRARA
Date: 2018-05-19 03:38:31 UTC
From: Kreigh Tomaszewski
Topic: 3946 Message: 3946

Astronomers and space fans may have set up lawn chairs outside to watch the eclipse, but Nathaniel Frissell set up his ham radio. As the sky dimmed and daylight turned into an uncanny dusk, the reports started coming in: Communication was dying off over the 20 meter (14 MHz) radio band.

Frissell (call sign W2NAF) was one of thousands of hams who set up their radios on the day of the solar eclipse in an effort to measure its effects on the upper atmosphere. They've just release the results of their investigation, which found that the solar eclipse thinned the charged particle-containing part of the upper atmosphere, called the ionosphere.

"It's been a really amazing thing to see the entire ham radio community come together and see this through," said Frissell, a professor at the New Jersey Institute of Technology Center for Solar-Terrestrial Research who organized the event. "We have been able to take this really rough piece of physics and science data that wasn't designed for this in the first place and show the eclipse effects in a very clear manner."

3947. Thought you might like to know the zoo does 'fox hunts' for their native turtles

Yahoo group: GRARA
Date: 2018-05-27 03:01:17 UTC
From: Kreigh Tomaszewski
Topic: 3947 Message: 3947

The temperature was nice this morning when we took the grandkids (just Joe and Molly) to the zoo. Got there shortly after it opened and had time to do a run-thru the main parts of the zoo before we had to meet the zoologist (and several other families) to learn about turtle conservation. The zoo is a fairly large forest island in our urban landscape, and it has a fairly large pond with an island. The zoo is interested in knowing and conserving the natural wildlife that shares their space. There are ten species of turtles in Michigan, and the zoo hosts eight of them, and two of those are actually rare.

Yesterday the zoo staff put out eight turtle traps around the pond. Today we did a sight walk-around of the pond looking for turtles swimming, basking in the sun, or on the edges. We found a couple snapping turtles in the water, a bunch of green frogs, and one painted turtle about 20 feet from the pond, which we picked up. All were documented. The traps were then collected and produced three more painted turtles. Each turtle was weighed and measured, checked for sex, and if female, checked for eggs (it is spring). One of the turtles had been previously captured, so she was released (this was a job for the kids) after being documented.

The other three turtles had to be marked so they could be identified if caught again. They do this by filing three groves around the edge of the turtle shell. Turtles have twelve shell plates on each side, identified by letters, so it is easy to make an alphabetic code for each turtle. https://www.jstor.org/stable/1436818?seq=1#page_scan_tab_contents This does not harm the turtle and is permanent. They also photographed the turtles top and bottom to add to the documentation. They were very excited when one of the turtles had 13 shell plates instead of the expected dozen. The kids got to release the other turtles after they were documented too.

If they catch one of the rare species of turtles they also glue a tiny radio transmitter (good for several years) to the back of the shell. This lets them track down the turtles in the zoo and get clues about how they live out their lives. Turtles need water to breed and raise young, but they often spend much of their life in the nearby forest. A lot of the turtles get identified as they are found crossing roads or paths in the zoo (and these interactions are documented). BTW, the proper way to rescue a turtle in harms way is to take it to the other side of the road or path it is crossing, in the direction it was traveling (it knows where it wants to go). The kids got to use a directional antenna to hunt down a demonstration turtle.

The kids got to release the other turtles after they were documented too.

If they catch one of the rare species of turtles they also glue a tiny, low power, radio transmitter (good for several years) to the back of the shell (it beeps randomly). This lets them track down the turtles in the zoo and get clues about how they live out their lives. Turtles need water to breed and raise young, but they often spend much of their life in the nearby forest. A lot of the turtles get identified as they are found crossing roads or paths in the zoo (and these interactions are documented). BTW, the proper way to rescue a turtle in harms way is to take it to the other side of the road or path it is crossing, in the direction it was traveling (it knows where it wants to go).

The kids got to use a directional antenna to hunt down a demonstration turtle. All the kids were under ten, but they nailed it on the second triangulation.

I asked for details. They told me zoo is in the 164 band for the radios they use for tracking animals. They have reserved several channels for the native animals they want to track. When I got home I found they may be on another frequency for routine communications when I looked at the county band-plan

453.05000 WPXZ338

458.60000 WPXZ338

<https://www.radioreference.com/apps/db/?fccCallsign=WPXZ338> MKent Zoo 2Zoo FMN Public Works

Take your grandkids to the zoo for a special event and it collides with radio. The day was too much fun, so I thought I should share it with the ham radio community.

3949. Coming events for June for the Amateur Radio community

Yahoo group: GRARA
Date: 2018-05-29 19:18:28 UTC
From: Jack Amelar
Topic: 3949 Message: 3949

It's June 2018,

Coming events:

IRA HAMFEST, HUDSONVILLE
GRARA monthly meeting, VE exams, Open Radio Room
2nd Hand Ham Shop
HARC monthly meeting
MAARC monthly meeting
HIAD (Ham in a Day)
ACARC monthly meeting
MARA monthly meeting
IEEE meeting
LARC monthly meeting
FIELD DAY
HARC E.A.T. meeting (Education And Training)
NOARC meeting

Grand Rapids Amateur Radio Association (GRARA) monthly meeting, first Friday of the Month, June 1.
NOTE the June meeting will be at the Hudsonville Fairgrounds following Ray's Roadkill Potluck. You do not have to purchase a hamfest ticket for the meeting, but you WERE planning on the hamfest, right?
July 6 meeting will be back at American Red Cross building
VE TESTING at GRARA on the second Friday of the month, June 8, Red Cross.
http://www.w8dc.org https://www.facebook.com/W8DCGRARA/
Open Radio Room Wednesdays at 7PM, Red Cross.

IRA HAMFEST, Saturday, June 2
Location: Hudsonville Fairgrounds, 5235 Park Avenue, Hudsonville, MI 49426
Website: http://w8ira.org/

Holland Amateur Radio Club (HARC) monthly meeting, second Tuesday of the month, June 5, 2018.
For the foreseeable future, the club will hold general meetings on the second Tuesday of the month and E.A.T. meetings will be held on fourth Tuesday of the month, both at 7pm. Our new location is the Chick-Owa Sportsman's Club, located at 9279 E Ottogan Street (just west of Winding Creek). http://www.hollandarc.org/ 147.06+(94.8Hz)

Muskegon Area Amateur Radio Council monthly meetings are on the first Thursday of the month June 7, 7 PM. Held at the MAARC clubhouse, 2888 Scenic Drive on the east side of Scenic Drive. Look for our sign. 146.94- http://www.w8zho.com/ https://www.facebook.com/w8zho/ Map http://www.mapquest.com/maps/map.adp?address=2888%20Scenic%20Drive&city=Muskegon&state=MI&zipcode=49445&zoom=10

HIAD (Ham in a Day) class, Saturday, June 9 in Lowell.
"Ham in a Day" Held at Flat River Outreach Ministries, 11535 Fulton ST. E (Hwy M-21), Lowell. This is an opportunity for anyone wishing to get their amateur radio technician license to study and take the exam all in one afternoon. Directed study starts at 1:00 and continues till 6:00, when the test will be given. For registration and more information http://w8lrc.org/hiad-registration/ Cost for the Ham in a Day study session is $25. Also, anyone holding a current technician or general licenses may arrive at 6:00 and take the test to upgrade at no cost. Anyone whose license is within 90 days of expiring can also renew their license between 6:00 and the end of testing at no charge.
Additional HIAD sessions for 2018:
Holland: Saturday, August 11
Lowell: Saturday, October 13
Holland: Saturday, December 8

Allegan County Amateur Radio Club monthly meeting second Tuesday, June 12, 7PM Allegan County Technical and Education Center (ACATEC), 2891 116th Street (M-222) across from the Allegan County Airport. https://www.facebook.com/ac8rc/ 147.24+(94.8Hz)

Michigan Amateur Radio Alliance monthly meeting, second Wednesday of the month, June 13, 7:30 PM, at Plainfield Township Fire Department Training Center, SW corner of 5 Mile Rd and Plainfield Ave. Talk-in W8USA 145.23-(94.8Hz)

IEEE West MI Section Meeting at GVSU downtown campus on JT-8 Digital communications protocol, Thursday June 14th, 6PM. Lecture hall is Room 124 in the Kennedy Hall of Engineering (the main Engineering Building). Video of the talk given by Professor Joe Taylor K1JT about the FT-8 and WSPR modes at the 2018 MicroHAMS Digital Conference on March 24.
"RSVPs would be appreciated so we know roughly how many sandwiches, etc. to order but people may come at the last minute. Guests (mainly local radio hams) and students whether IEEE members or not are also invited of course."
I don't have a definitive RSVP address, so for now RSVP to Ron Fredricks K8DMR ron_fredricks@... (616)443-8576

Lowell Amateur Radio Club monthly meeting, third Thursday of the month, June 21, 6:30 PM social, 7PM meeting. All are welcome. Pizza provided.
Open Radio Room is on the other Thursdays, same time.
Talk-in W8LRC 145.27-(94.8Hz) http://www.w8lrc.org Directions:

https://goo.gl/maps/9e7G2FVkriJ2

FIELD DAY for a 24 hour period Saturday, June 23, 2PM to Sunday, June 24, 5PM. Some groups will be setting up Friday evening. Some groups won't begin setup until 2PM to qualify to operate all 27 hours.
To locate a Field Day site, visit http://www.arrl.org/field-day-locator
For more information about Field Day, visit
http://www.arrl.org/files/file/Field-Day/2018/2018%20FD%20Flier.pdf

Holland ARC E.A.T. meeting (Education And Training) is the fourth Tuesday, June 26, 7 pm at the Chick-Owa Sportsman's Club located at 9279 E. Ottogan Street (just west of Winding Creek). The club has purchased a series of instructional electronics videos which are around 30 minutes long. This will be followed by discussion and/or demonstration.
Open to the public need not be a HARC member or have an amateur radio license to attend. If you have questions about amateur radio equipment, operating practices, licensing, test and measurement, or anything remotely related to amateur radio, this is the place to be.
http://www.hollandarc.org/ 147.06+(94.8Hz)

North Ottawa ARC meetings 4th Thursday of the month, June 28, 6:30 PM at the Spring Lake District Library. This meeting is a general public meeting introducing Amateur Radio, at the request of the library. 145.49-(94.8Hz)

3950. Joe Walsh Promotes Ham Radio

Yahoo group: GRARA
Date: 2018-05-31 19:21:15 UTC
From: Tom Behler
Topic: 3950 Message: 3950

Hello, everyone.

Here's a link with some information regarding Joe Walsh's efforts to help the ARRL promote amateur radio.

http://www.arrl.org/news/eagles-guitarist-joe-walsh-wb6acu-promotes-amateur-radio-in-media-announcements

This might be good to present at club meetings, and other venues where we can spread the word about what we do.
